Comments: The UAA survey was conducted in April 2008 and there were no WBCR observed. There were numerous citations of footpath/prints, ATV tracks and trails around the survey site. There was also a picnic area adjacent to the creek signifying secondary contact recreation (SCR). No interviews were conducted during 2008 UAA.

Is the evaluated use attainable?  Yes  No

Comments: The stream did not meet the maximum or median depth criteria for WBCR. Since the depth criteria were not met, the committee recommends that the WBCR use be removed. Due to evidence of SCR the committee recommends that the SCR use be assigned.
