

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: December 3, 2010

Water Body Under Evaluation:

Water Body ID #: 3097
Name: Ditch #6 (Class C)
Length of Segment: 23.3 miles
County (ies): New Madrid and Stoddard

Use Attainability Analysis (UAA) Study:

UAA ID #: 1258
Submitter: MEC/ERC
Date(s) Conducted: October 2 and 8, 2008
Date Received: October 24, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- 1-Natural Pollutant Sources.
- 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- 3-Non-Remedial, Human Caused Condition.
- 4-Hydrologic Modifications.
- 5-Natural Physical Features.
- 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? Yes No Unknown

Comments: The UAA survey was conducted in October 2008 and no evidence of WBCR was observed. 2005 UAA interviews cite fishing as a use occurring on this stream. No interviews were conducted during the 2008 UAA.

Is the evaluated use attainable? Yes No

Comments: The stream did not meet the maximum or median depth criteria at any site evaluated. Because the stream did not meet the depth criteria and there is no evidence of existing use, the committee recommends that the WBCR use designation be removed. Due to evidence of secondary contact recreation (SCR), the committee recommends that the SCR use be assigned.

Committee Recommendation:

- Add Use
- Retain Use
- Remove Use
- Modify Use
- Inconclusive
