

TANK & PIPING INFORMATION INSTRUCTIONS

1. Tank Capacity: Maximum capacity of each tank in gallons. Describe the compartmented tank (size of compartment, product, etc.) on the "Additional Information" section on the last page.
2. Tank Type: Check whether each tank is aboveground (resale only) or underground.
3. Status of Tank: Check the appropriate box. Note that temporary closure cannot exceed 12 months.
4. Permanently Closed Tanks: Check the appropriate box. If you are unsure if closure is permanent, provide a description in the "Additional Information" section.
5. Date of Installation: If exact dates are unknown, please provide an approximate date of installation for both tank and piping.
6. Tank Construction Material: Check the appropriate box.
7. Tank Internal Protection: Check the appropriate box.
8. Tank External Protection: Check the appropriate box.
9. Methods of Tank Release Detection: Check the appropriate box. Note that release detection is not required on emergency generator tanks.
10. Aboveground Secondary Containment: For aboveground storage tanks only. Check the appropriate box.
11. Spill Protection: Indicate yes or no.
12. Type of Overfill Protection: Check the appropriate overfill protection method.
13. Piping System Type: Check the appropriate box.
14. Pipe Construction Material: Check the appropriate box. If the material is not listed, please describe the type of material.
15. Piping Protection: Check the appropriate box.
16. Methods of Pipe Release Detection: Check the appropriate box. Release detection is not required for emergency generator tanks.
17. Substance Currently or Last Stored: Check the applicable substance for each tank. A complete list of the CERCLA-listed hazardous substances can be found in 40 CFR 302.4.
18. Financial Responsibility: Check the appropriate box for the financial responsibility (FR) mechanism in place for each tank. An owner/operator is required to maintain FR until the tanks are **permanently** closed.

Additional Information: Use this space to provide any additional information regarding your tanks.

Certification for New Installations: This section is to be completed for new tank installations and any upgrades or equipment added to an existing UST system.

IMPORTANT:

Owner Certification: The owner's signature is required. We will not process your registration without an owner's signature. Copies and faxes are not accepted.
