Rollins spoke to Alva Glaze (Glaze Drilling) regarding a gas well that was plugged for Matt Clements in 2005. Well is located in sec 35, T55N, R32W Clinton and drilled under permit 049-20030. Mr. Glaze said he remembered the well and that the well was about 780 feet total depth. The well was plugged by pouring 10 bags of cement in the bottom of the well followed by clean fill to 500 feet where he added the 5 bags of cement and then added clean fill to 350 feet. From 350 feet Glaze added cement to the top of the casing which extended about a foot above grade. The well had 20 feet of 6 3/8" casing. The casing was not cut off below grade by the driller. The owner, Mr. Clements, cut the casing off after the cement had set up and took before and after pictures. The casing was cut off four feet below grade and was verified to have cement in the casing. Although a plugging record was not submitted by Mr. Glaze, based on the statement of facts provided by the driller and the pictures provided by the owner, the bond for the well should be released.

### COMPOUNDING AND CREDITING:

**Frequency** - Interest will \_\_\_\_\_ be compounded Cycle Date

Interest will be credited the same frequency as compounded

**Withdrawal of Interest Before Maturity.** The annual percentage yield assumes that interest remains on deposit until maturity. A withdrawal of interest will reduce earnings.

**Required Interest Distribution.** This account requires the distribution of interest and does not allow interest to remain in the account.

**Effect on Closing an Account.** If you close your account before interest is credited, you will not receive the accrued interest.

### MINIMUM BALANCE REQUIREMENTS:

**To Open the Account.** You must deposit at least \$ 1,000.00 to open this account.

**To Obtain the Annual Percentage Yield Disclosed.**

You must maintain a minimum balance of \$ 1,000.00 in the account each day to obtain the disclosed annual percentage yield.

You must maintain a minimum average daily balance of \$ \_\_\_\_\_ to obtain the disclosed annual percentage yield. The average daily balance is calculated by adding the principal in the account for each day of the period and dividing that figure by the number of days in the period.

The period we use is \_\_\_\_\_

### BALANCE COMPUTATION METHOD:

**Daily Balance Method.** We use the daily balance method to calculate the interest on your account. This method applies a daily periodic rate to the principal in the account each day.

**Average Daily Balance Method.** We use the average daily balance method to calculate interest on your account. This method applies a periodic rate to the average daily balance in the account for the period. The average daily balance is calculated by adding the principal in the account for each day of the period and dividing that figure by the number of days in the period.

On the above plat, show distance of the proposed well from the two nearest section lines, the nearest lease line, and from the nearest well on the same lease completed in or drilling to the same reservoir. Do not confuse survey lines with lease lines. See rule 10 CSR 50-2.030 for survey requirements. Lease lines must be marked.

This is to Certify that I have executed a survey to accurately locate oil and gas wells in accordance with 10 CSR 50-2.030 and that the results are correctly shown on the above plat
