Re: Magruder Request for Mining Permit

Dear Mr. Coen,

We have read the notice posted by Magruder Limestone Co., that they are requesting a permit to expand their mining operations in Miller County. It was only by chance that we saw it. It was posted in a small rural paper that we have never heard of. The property where the quarry will be located is near our property. Our property is a RV Park & Campground and is our sole source of income. We are convinced that another location of the quarry this close to the RV Park will severely affect our business and in turn, our source of income.

The proposed quarry will cause excessive noise due to trucks going in and out, blasting & drilling of rock, and machinery noise. Also, since the entrance to the quarry is a gravel road, excessive dust will have a negative affect. One of the main attractions of this park is the quiet, peaceful atmosphere we offer. Our campers come here to rest and relax. Their comfort and enjoyment is our main concern. The noise and dust will make our park unattractive to potential customers.

We are strongly opposed to Magruder beginning a quarry in Miller County on Woodriver Rd. Please be advised that we will take any measures necessary to stop the issuance of the permit. Our neighbors on Woodriver Rd. are also in opposition to this permit being issued. We request a hearing and/or public meeting to discuss these issues. Copies of this letter will be forwarded to our local, state and federal legislators, as well as the media.

Your attention to this matter will be appreciated.

Sincerely,

Larry and Vicky Stockman

Re: Proposed Quarry on Woodriver Rd., Miller County

Dr. Mr. Coen,

As a resident living on Woodriver Rd, I am opposed to the permit that is being requested by Magruder Limestone Co. to begin a quarry operation on Woodriver Rd. in Miller County.

This quarry would adversely affect the residents living near the area. The noise, traffic and dust would be a nuisance as well as a health concern for anyone with breathing disorders. I am concerned that the blasting will cause foundations of our home to crack. Also, most of us have wells for our water source. The blasting could also damage these wells.

I am also concerned about the City of Lake Ozarks' sewer treatment plant. The blasting could cause damage to that. Considering how close it is to the Osage River, this could be a serious issue.

Please be advised that I am strongly opposed to a quarry site on Woodriver Rd. I am requesting a public meeting to address this issue. Please let me know when and where this meeting will take place. No one in this area even knows about the newspaper where this notice appeared. Please notify us in writing or post in the Lake Sun or Eldon Advertiser.

Thank you for your attention to the matter.

Sincerely,

Linda Wee

THE DUST ON WOODRIVER ROAD IS UNBEARABLE.
TRUCKS WOULD MAKE THIS PROBLEM WORSE.
ALSO, WOODRIVER IS USED AS A HWY 54
BY-PASS THIS MAKES THE DUST A BIG PROBLEM.
