Re: Proposed Quarry on Woodriver Rd., Miller County

Dr. Mr. Coen,

As a resident living on Woodriver Rd, I am opposed to the permit that is being requested by Magruder Limestone Co. to begin a quarry operation on Woodriver Rd. in Miller County.

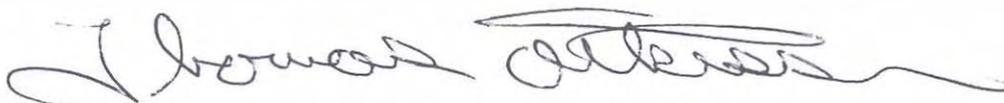

This quarry would adversely affect the residents living near the area. The noise, traffic and dust would be a nuisance as well as a health concern for anyone with breathing disorders. I am concerned that the blasting will cause foundations of our home to crack. Also, most of us have wells for our water source. The blasting could also damage these wells.

I am also concerned about the City of Lake Ozarks' sewer treatment plant. The blasting could cause damage to that. Considering how close it is to the Osage River, this could be a serious issue.

Please be advised that I am strongly opposed to a quarry site on Woodriver Rd. I am requesting a public meeting to address this issue. Please let me know when and where this meeting will take place. No one in this area even knows about the newspaper where this notice appeared. Please notify us in writing or post in the Lake Sun or Eldon Advertiser.

Thank you for your attention to the matter.

Sincerely,

Re: Proposed Quarry-Woodriver Rd.-Miller County

Dear Mr Coen,

As property owners next to the proposed quarry, we are very opposed to the permit that has been requested by Magruder Limestone Co. We have 187 + acres that touch the proposed site and has been in our family for many years. Besides the obvious health concerns, noise, traffic problems, possible well and home foundation damage, our property values will be adversely affected.

The sewer treatment plant could be affected as well, possibly creating problems for the Osage River. Please understand that we are very much opposed to the quarry site. If it hadn't been for a kind neighbor we would not have been notified of this matter. We believe that a public meeting is in order and would like to attend. Please notify us by mail or post in the local papers. By mail our address is as follows: Carl Williams, Joyce Mace, John V. Williams, 3953 Hwy 54, Osage Beach, Mo. 65065.

Thank you,

*Carl Williams*

Missouri Department of Natural Resources  
Land Reclamation Program  
Attn: Larry Coen, Staff Director  
P.O. Box 176  
Jefferson City, Missouri 65102-0176

Dear Mr. Coen:

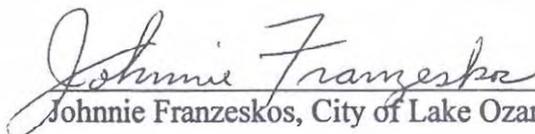

At the June 19<sup>th</sup> meeting of the Joint Sewer Board for Osage Beach and Lake Ozark, the Magruder application for an expanded mining permit was discussed. The joint sewer board comprised of the political leadership of Lake Ozark and Osage Beach found significant deficiencies in the application. They are as follows:

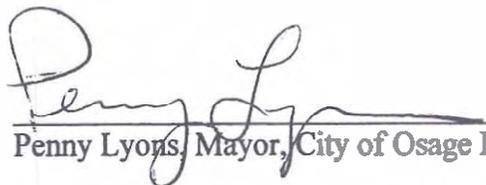

- (1) Neither the City of Lake Ozark, nor the City of Osage Beach were notified of the application. While neither of our city limits extend into the area, or are adjacent, our corporate property (the sewer plant) does.
- (2) The proposed area encroaches upon the main outfall line of the City of Osage Beach to the Joint Sewer Plant. The aforementioned line and easement is right in the middle of the proposed expansion area, and would not allow for any blasting or grade alteration adjacent to it.
- (3) A significant amount of community citizens who are required by law to have been notified (directly adjacent property owners who border the proposed area), were not.

Therefore, our Board formally requests, with the full backing of both the City of Lake Ozark, and the City of Osage Beach that this application be denied.

We look forward to hearing from you.

Sincerely,

  
Johnnie Franzekos, City of Lake Ozark

  
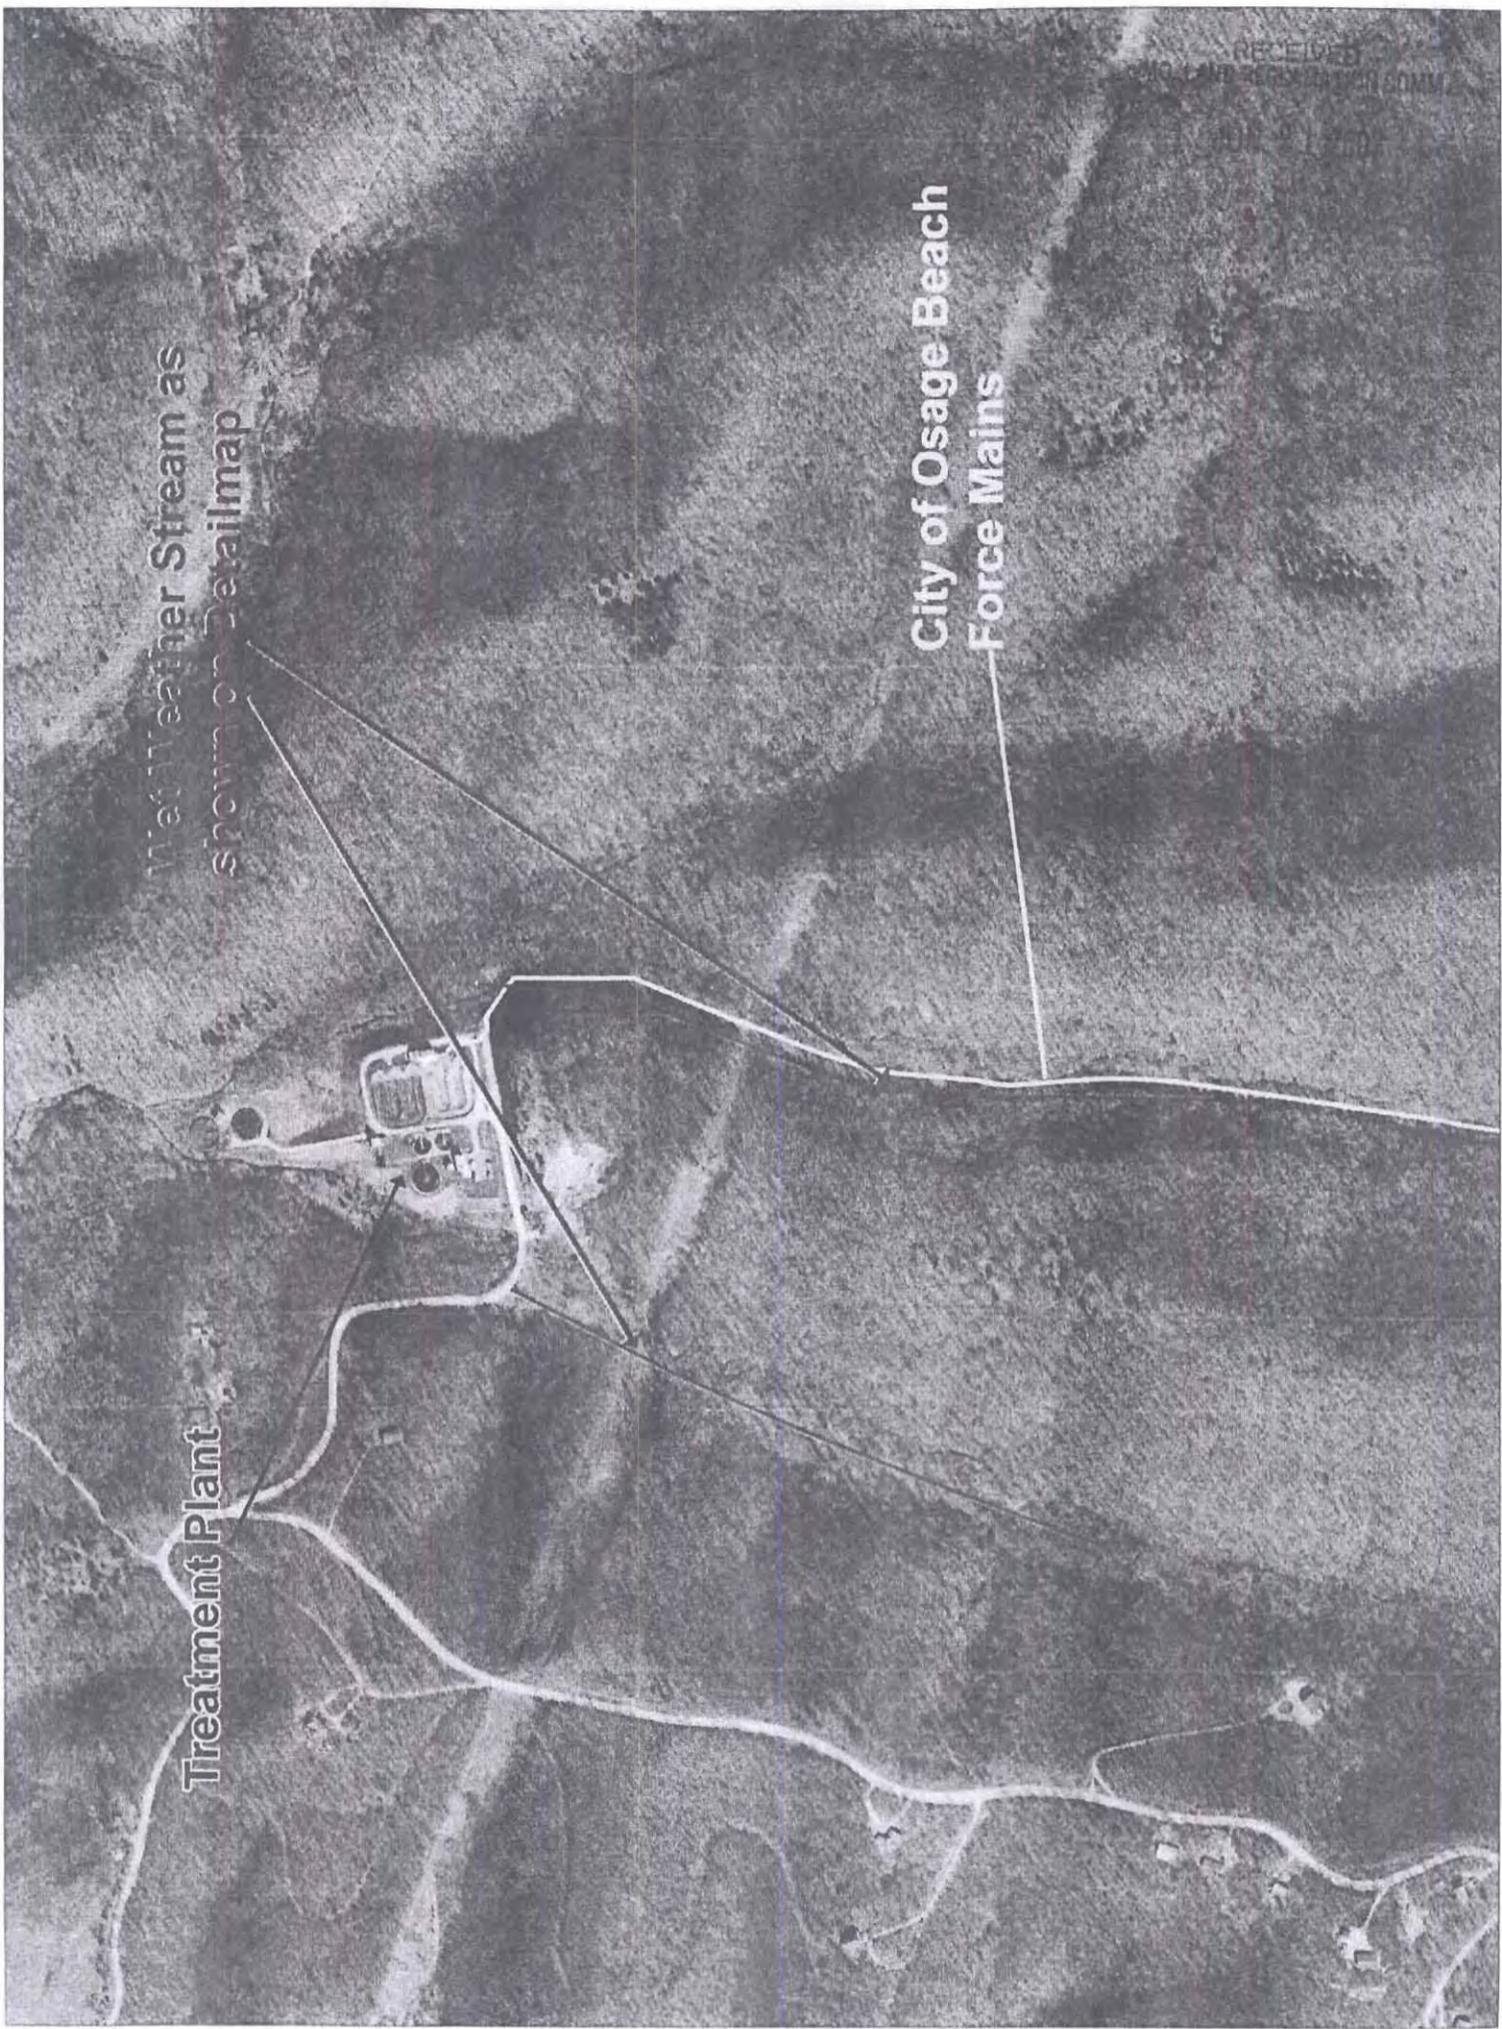

Penny Lyons, Mayor, City of Osage Beach

RE: Proposed Quarry on Woodriver Road, Miller County

Dear Mr. Coen,

My wife and I are the owners of the property referred to as MCJK Properties that borders the proposed quarry site property for nearly one half mile along their east boundary. We have been actively developing this property for the past two years in a quality planned community.

We feel a quarry on this property would adversely affect our ability to continue the successful development as we know it now. We have spent a large amount of time and money to do this project according to MO DNR specifications. We have provided a large state approved well to accommodate this community and also a state approved sewer treatment plant. In addition to these we are providing many upgrades to make this the first class community that it is. It is necessary for us to be able to continue this development to pay for these improvements. We would not have considered purchasing this property to develop in this manner and spent the time and money if there had been a quarry proposed or operating on the adjoining property. As the word is spreading in the community the people are finding out where the quarry is wanting to locate, some of the builders in our subdivision are concerned and don't know if they will continue to buy and build under these conditions.

We are concerned also about the way we learned about this proposed quarry. We found out through a friend on Monday June 18, 2007 that there was a permit application notice published in a newspaper on the opposite side of the county with very limited circulation. Along with this they used a loop hole in the regulation which may be legal, but to me not ethical not to have notified the adjacent land owners. This is compliance to the letter of the law instead of the spirit of the law which we think was originally intended, and we feel it should be changed. This is very concerning to me because if this
