

**Title 10—DEPARTMENT OF NATURAL RESOURCES  
Division 10—Air Conservation Commission  
Chapter 2—Air Quality Standards and  
Air Pollution Control Rules Specific  
to the Kansas City Metropolitan Area**

**IN ADDITION**

**NOTICE OF SUSPENSION OF RULE**

**10 CSR 10-2.330 Control of Gasoline Reid Vapor Pressure**

*ACTION TAKEN: This NOTICE OF SUSPENSION OF RULE 10 CSR 10-2.330 applies to the entirety of 10 CSR 10-2.330. 10 CSR 10-2.330 imposes certain volatility limits on gasoline intended for final use that is sold, dispensed, supplied, offered for sale or supply, transported or exchanged for trade in Clay, Platte, and Jackson Counties from June 1 through September 15 of each year. During the applicable time frame, the Reid Vapor Pressure (RVP) limit must be 7.0 psi or less. The COVID-19 emergency has caused a dramatic and unexpected decrease in the demand for gasoline, which is preventing regulated parties upstream of retailers and wholesale purchaser-consumers from selling the winter gasoline in their storage tanks and turning their storage tanks over to compliant low-volatility gasoline before June 1, 2020. Without a waiver of the low-volatility requirements, these regulated parties would be required to hold their winter gasoline supply, which would prevent them from utilizing their storage tanks for low-volatility gasoline and result in a shortage of compliant low-volatility gasoline. These supply shortages are alleviated by this temporary suspension of 10 CSR 10-2.330.*

*This suspension is not anticipated to interfere with attainment of the National Ambient Air Quality Standards for ozone.*

*EMERGENCY STATEMENT: Pursuant to Executive Orders (EO) 20-04 dated March 18, 2020, and EO 20-09 dated April 24, 2020, the rule is suspended effective May 6, 2020 until June 15, 2020.*

*This in addition notice will appear in the June 15, 2020 issue of the Missouri Register.*
