Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector		RNOV
						Initials	NOV	
KCRO	2/21/2020	2/11/2020	AA Quarry, LLC	Kingsville Johnson	Fugitive Particulate Matter	JS		

Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between February 16, 2020 and March 15, 2020

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	41997		<p>Concern Info There has been a lot of dust the past two days leaving the property boundaries. Yesterday they were blasting, and today they are crushing. There is always dust coming off of the property; everyday, not just yesterday and today.</p> <p>There is so much track out onto the highway at the quarry entrance today that when you drive by it kicks up so much dust so that you can't see. There is a concrete operation on the opposite side of the road from the quarry, so now the track out is twice as bad. Does the concrete company have the proper permit to be located there?</p> <p>Comments Trucks exiting AA Quarry were causing some dust as they pulled out onto the highway. AA Quarry is in the process of fixing their water truck to fully comply with BMPs.</p> <p>The portable concrete plant does have the required permit to be located there.</p>					
KCRO	2/18/2020	2/18/2020	Unknown	Kansas City Jackson	Open Burning	MC		
	42042		<p>Concern Info There's a new home being constructed on-site at this property. The workers there have been burning leftover construction materials on the front and rear of the property. They simply make a pile and leave it burning overnight. I am concerned about embers because other homes and fences are in very close proximity. I'm also concerned about the chemicals in some of these products going into the air. The charred remains are still there, but they have placed more on top, so I fear they will be burning again soon.</p> <p>Comments This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.</p>					
KCRO	2/19/2020	2/18/2020	M & H Gas L.L.C.	Independence Jackson	Hazardous Air Pollutant Release	JH		

Monthly Air Pollution Control Program Detail Report
Concerns Investigated Between
February 16, 2020 and March 15, 2020

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	Concern No. 42064		Concern Info Major release of gases that shoot 60 + yards from building into residential neighborhoods and public streets endangering people driving and toxic air for neighborhoods can't have windows open due too getting mild to severe headaches have lot videos of release of gases.					
	Comments	Carbon dioxide and nitrogen are not regulated under air pollution, hazardous waste, water pollution, or solid waste.						
KCRO	2/24/2020	2/21/2020	Kc Dumpster	Lee's Summit Jackson	Opacity	CK		
	Concern No. 42513		Concern Info I pass this company's building to and from work. Their building has a chimney on the south side of the building along Baile road that is easily visible from the street. The chimney has a strong appearance of black soot around the top of it and is constantly releasing BLACK smoke giving the appearance that they are burning used oil for a heat source.					
	Comments	Some visible emissions were observed, but the opacity could not be confirmed due to weather conditions. The facility made adjustments to address th issue.						
KCRO	2/25/2020	2/24/2020	Golden Valley Tractor / Daniel Turner Excavating	Clinton Henry	Asbestos	JS		
	Concern No. 42195		Concern Info 1403 north second street "golden valley tractor" was damaged in a fire a month ago and it's getting cleaned up now. no asbestos sampling was done. contractor is daniel turner					
	Comments	It appears the facility was unintentionally and completely destroyed by fire, and therefore the asbestos NESHAP does not apply to this site.						
KCRO	2/28/2020	2/28/2020	Courtney Ridge Landfill	Sugar Creek Jackson	Odor	CK		

Monthly Air Pollution Control Program Detail Report

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p>Concern No. 42512 Concern Info Methane smell flooding surrounding neighborhoods</p> <p>Comments No violations were observed during the investigation.</p>								
KCRO	3/13/2020	3/4/2020	Unknown	Cleveland Cass	Open Dumps Open Burning	JH		
<p>Concern No. 42528 Concern Info Neighbor is bringing in waste and burning it. This issue started in summer 2019 after the original property owner died and her son, Christopher, moved in. CP has seen a dark blue truck, a red truck, and a white truck pulling in a flat bed trailer full of waste. She has seen loads of construction demolition waste, vegetative waste, bags of household trash, etc.</p> <p>RP burns every night after dark. She has called the fire department. and worked with Bill Franz (816-800-1453). Yesterday gutted an RV then burned all of the demo waste over night. The fire department responded three times last night and the night before.</p> <p>RP currently has a pile of chairs, couches, and vegetative waste at the site. The burn pile is past the house and the horse barn at the back of the property right by the pond.</p> <p>She has heard that there is potentially drug activity going on at the site. The Sheriff has responded for fighting.</p> <p>Comments No violations were observed. Concerned party will be contacted to share findings once we are permitted to resume investigations. #24936</p>								
KCRO	3/6/2020	3/5/2020	M & H Gas	Independence Jasper	Odor	JH		

Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between February 16, 2020 and March 15, 2020

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	Concern No. 42506	Concern Info	CP reports that he has lived at his residence for six years, and within the last year there have been noticeable odors and visible emissions from M & H Gas Inc (beverage facility), 4230 Washington Ave, Independence, MO 64055, http://mhgasco2.com/ . CP states the worst he had ever seen it was on February 10, 2020, around 8 - 9 a.m. He took video that episode where the gasses were being released causing a large fog and strong odors. They have tanks lined up outside their facility. He stated that the gas/odors travel across traffic and waft into his house; his garage opens facing the facility.					
			Odors seem to be strongest early in the morning.					
	Comments	Carbon dioxide and nitrogen are the only chemicals. The Department has no regulations on these elements. No odors were observed; no violations noted.						
KCRO	3/6/2020	3/5/2020	Cameron Concrete	Cameron Clinton	Fugitive Particulate Matter	JS		
	Concern No. 42511	Concern Info	Caller states that there is lots of dust from the Cameron Concrete Plant when it is running. She stated the front of her house and cars along her street get covered in the dust.					
	Comments	No violations were observed during the investigation.						
KCRO	3/6/2020	3/6/2020	CS Carey	Kearney Jackson	Fugitive Particulate Matter	MC		
	Concern No. 42514	Concern Info	The facility is grinding the shingles without the use of water. There is a large amount of fiberglass in the air. The Kansas City Missouri Water Department was out there earlier.					
	Comments	?This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
KCRO	3/12/2020	3/12/2020	All Star Wrecker Service	St. Joseph Buchanan	Odor	JH		
<p>Concern No. 42507 Concern Info Caller stated a local wrecking tow service is releasing an unknown odor or chemical into the air next to the caller's location from the company's vehicles. Caller stated this has been ongoing at this location for several months</p> <p>Comments Idling of tow trucks in Buchanan County. No regulation for idling in Buchanan County; therefore, no violations.</p>								
NERO	2/19/2020	2/11/2020	Mr. Stacy Toebben	Jefferson City Callaway	Open Burning	DS		
<p>Concern No. 42109 Concern Info On 2-11-20, caller reports that a pallet company burns pallets almost daily behind the pallet company in the back lot that they occupy. Caller reports that the pile of ashes is as big as a dump truck load and the burning/smoke can be seen from the highway. Caller reports that burning usually takes place in the evenings around 5 p.m.</p> <p>Comments</p>								
NERO	2/19/2020	2/13/2020	Mr. Jeff Page	Sedalia Pettis	Odor	DB		
<p>Concern No. 42110 Concern Info From concern email: "The crematory next door to my home, has started emitting an awful odor. Before December, you only smelled it when outdoors. The human retort actually caught fire last summer. Fire dept showed up but the owner told them was normal to do that. There were 3' flames coming out the top. The smell is so bad, it's seeping into my home. Very hard to eat a meal with the horrible smell of burnt flesh in the house."</p> <p>Comments No violation of the opacity or odor rule found during the investigation. A compliance inspection was also conducted, which found the facility was in compliance with construction permit requirements.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	Concern No. 42170	Concern Info	*Concern was previously investigated as ACE #39765 on July 10, 2019.					
			The Concerned Party (CP) contacted the Northeast Regional Office to report that a St. Louis based outfitting service neighboring their property, Dive Bomb Industries, LLC, is planning to demolish and bury two mobile homes onsite. According to the CP, the company has been slowly cleaning up the property since the concern was first reported, and that they have roll-off dumpster onsite. However, the CP is concerned that with the dumpster being full, the company will just bury the demolition waste from the mobile homes. According to the CP, a back hoe was delivered to the site this morning (February 19, 2020) by Painter Logging.					
	Comments	Issued a Letter of Warning to owner, operator, and manager of property for failure to inspect and notify in accordance with asbestos requirements related to demolition of regulated structures.						
NERO	2/20/2020	2/20/2020	Unknown	Schuyler	Other	DB		
	Concern No. 42104	Concern Info	Caller reports that a neighbor has a residential wood burning stove that is emitting a lot of smoke.					
	Comments							
NERO	2/21/2020	2/20/2020	Weldon Builders and Construction, LLC	Trenton Livingston	Asbestos	DS		
	Concern No. 42385	Concern Info	The corner Car Wash has been partially demolished and is being rebuilt into some sort of garage. No asbestos inspection.					
	Comments	A violation of the Air Conservation Commission Law, including the Asbestos Requirements, was found to have occurred during the investigation. A Letter of Warning (LOW) will be issued to the property owner for failure to inspect and notify the Department of the demolition activity.

NERO	2/27/2020	2/24/2020	Mr. Dennis McCrary	Gilman City Harrison	Open Burning	DS		
<p>Concern No. 42300 Concern Info Caller reports that a person at 101 1st St in Gilman City burned a pile of waste that burned with black smoke. Caller states that the pile was dumped some time ago and the guy who dumped it passed away, then the guy who lives in the garage was supposed to clean it up, but he didn't, and that guy's brother burned it. Caller stated the pile contained some asphalt shingles and/or tires.</p> <p>Comments No violation of the Missouri Air Pollution Regulations, or Open Burning Law, was observed during the investigation of the area of concern.</p>								
NERO	2/26/2020	2/25/2020	Frank Young	Nelson Saline	Open Burning	DB		
<p>Concern No. 42261 Concern Info Caller states that at 235 N Main in Nelson there is a big hole in the ground that was filled with railroad ties and set on fire last Sunday (2 days ago) and that it is still smoldering. Caller states that a sheriff's deputy responded and stated that there were no laws against it. Caller stated that Frank Young owns the property and says that if we tell him not to burn he probably won't do it again. Caller also said to be aware of the dogs.</p> <p>Comments Violation of 10 CSR 10-6.045 Open Burning Requirements. SERO	2/21/2020	2/20/2020	Mr. Jack Warren	Diehlstadt Scott	Open Burning	TR		
------	-----------	-----------	-----------------	---------------------	--------------	----	--	--

Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between February 16, 2020 and March 15, 2020

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	Concern No. 42274	Concern Info	SP:24759 The Caller reports that the responsible party is open burning demolition wastes from a residence that burned. The resident is located in Diehlstadt. The materials being burned may include asphalt shingles, tar paper, wood etc.					
	Comments	This location is a residence that had recently burned in a house fire. The remains appear to be a small amount of demolition type debris. No untreated wood wastes were note within the foundation. I informed Mr. Jack Warren that he could not open burn this material and that he would instead have to another form of disposal. Mr. Warren agreed to get the material hauled away to a Landfill or Transfer Station for disposal. I left for Mr. Jack Warren my card and several fact sheets (see below) and a copy of the pertinent air regulation, 10 CSR 10-6.045 Open Burning Requirements, with Mr. Chris Day Mr. Warren was not on site on the morning of February 21, 2020.						
SERO	2/27/2020	2/27/2020	City of Poplar Bluff	Poplar Bluff Butler	Asbestos	TR		
	Concern No. 42298	Concern Info	SP:24871 The concerned party believes that the RP has violated the asbestos regulations and has placed workers at risk.					
	Comments	I telephoned Timothy J. Pekios of Midwest Environmental Studies to discuss this site. It had been inspected on August 20, 2019, by Tim Pekios as a state-certified asbestos building inspector. The project was also notified as demolition project, which was notified by the City of Poplar Bluff as was processed and approved by the Missouri Department of Natural resources' Air Pollution Control Program as project number D10026-2019. Since the project had been properly inspected and notified as a demolition project I called Timothy J. Pekios, Owner of Midwest Environmental Studies to corroborate his involvement with the project. Tim Pekios stated that his firm had removed the asbestos materials from the building as reported in the notification.						
	For these reasons, it has been determined that no violation of 10 Code of State Regulations 10-6.080 Emission Standards for Hazardous Air Pollutant adopting by reference Title 40 Code of Federal Regulations Part 61 Subpart M---National Emission Standard for Asbestos has occurred.							
SERO	3/2/2020	2/28/2020	Kyle Glastetter	Benton Scott	Open Burning	TR		

Monthly Air Pollution Control Program Detail Report
Concerns Investigated Between
February 16, 2020 and March 15, 2020

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 42682 **Concern Info** Open Burning. Two questions: First question. Is it permissible to bring household rubbish produced from another location a bring it to an abounded farmstead to burn in a burn barrel. Please note once fire is started the tenant leaves the fire unattended. Second question. Can green wood, cut from one occupied property be moved to another unoccupied property be burned? In both cases if the fire is less than 600 feet from an occupied residence is that permissible?
Thank you

Comments According to Kyle Glastetter, he is open burning some household waste and he is also open burning some tree limbs generated at his residential property by recent storm activity. He is open burning on his own residential property. He expanded the former property by purchasing the place next door. He is allowed to open burn trash generated at his residence and tree limbs and yard waste generated on the property.

The regulation that is pertinent is 10 CSR 10-6.045 Open Burning Requirements.

The definition for household waste is garbage, trash and other discarded materials that are generated from residential activities in a household. Open burning is the burning of materials where the products of combustion are emitted into the open air without passing through a chimney or stack. Vegetative waste is defined as tree trunks, tree limbs, tree trimmings, vegetation and yard waste.

While the Missouri Department of Natural Resources does not recommend open burning, there is no prohibition against the open burning of vegetativ waste and household waste on a single residence property when it is generated on that property.

Both the responsible party and the concerned party have received or been directed to the pertinent air regulation (10 CSR 10-6.045 Open Burning Requirements) and the fact sheet (Facts on Open Burning Under Missouri Regulations).

No violation was observed.

	Concern No. 42539	Concern Info	SP:24935 The RP is cleaning out an old house and burning all of the material in large fires. The fires are extremely close to neighboring houses and a very large wooded area. The police were called out there on 2/28/20 and there may be a police report over the fires.					
Comments David Barlher purchased an abandoned property and was cleaning up the property for habitation. During the cleanup he opened burned vegetative waste and some household items remaining in the home from the previous owner. Two city workers and a police officer came by and reviewed the items he was burning. They requested he not open burn the clothing and a few other items from the home because they had flame retardant applied to the cloth. David Barlher placed those items in another location for removal to the landfill.

Concern No. 42405 **Concern Info** SP:24979
?Concern party is concerned about lead emissions in the exhaust from the Fort Uranus Mission Outpost Outdoor Outfitters Indoor Gun Range. There is also concern regarding the disposal of lead containing waste from the facility.

Comments Spoke to Mr. Troy Blank who manages the facility. We discussed proper disposal of lead contaminated waste and Mr. Blank provided an email address uranusfirearms@gmail.com where I sent a copy of the Department's guidance for Firing Ranges.

SERO	3/13/2020	3/11/2020	City of Cape Girardeau	Cape Girardeau Cape Girardeau	Asbestos	TR		
------	-----------	-----------	------------------------	----------------------------------	----------	----	--	--

Concern No. 42602 **Concern Info** The City of Cape Girardeau hired a contractor to remove asbestos tiles from the roof of a home and did they did not contain the asbestos

Comments Under Title 40 Part 61 Subpart M---National Emission Standard for Asbestos, residential buildings having four or fewer dwelling units are exempt. An online search of the address given came back with the conclusion that the concerned party was correct and the involved structure was a house with a slate roof. Containment is generally not required for outdoor projects involving non-friable asbestos-containing materials because of the lesser potential fiber release with non-friable slate roofing, which is categorized as a cementitious suspect asbestos-containing building material. No violation of Title 40 Part 61 Subpart M---National Emission Standard for Asbestos occurred.

Concern No. 42238 **Concern Info** From Martin Kator, Environmental Remediation Program:

"Caller:
Rick Hayes
636-667-1642

Location of Concern:
International Shoe
700 West Second St.
Washington, MO 63090

Description of Concern:

Mr. Hayes reports that he observed workers removing pallets of bricks from the interior of the old International Shoe building on Thursday (2/13) and Friday (2/14) and is concerned that they could be conducting demolition without prior testing for asbestos or NESHAP Notification. When asked, Mr. Hayes confirmed that he did not observe any walls or load-bearing structures being removed or demolished. Mr. Hayes explained that he lives next to this site and is concerned about potential asbestos exposure.

This site is the location of a previous Superfund Investigation, initiated in 2016. It was determined that there was no release of hazardous substances and did not warrant entry in EPA's SEMS (Superfund Enterprise Management System) Database for further CERCLA Action.

I explained to Mr. Hayes that I would refer his concern to the APCP – Asbestos Unit, and they would be in contact with him if further action is warranted."

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Comments	<p>I investigated the concern on 2/19/20. Midwest Service Group (MSG), the contractor responsible for the asbestos abatement, submitted an abatement notification A8045-2020. The abatement was originally going to take place from 2/10/2020 to 2/21/2020.</p> <p>When I arrived at the property, there was no abatement taking place. I observed only a dumpster on the property and a few parked trucks, but nobody the site. I called MSG, and spoke with Gail Kieffer-Hall, Project Coordinator, and Cory Elliot, Project Manager. They explained that the project was on hold while the owner removed more property from the building. They did not know what materials were being removed that would have prompted the concern. When I returned to the office, I saw that an amendment had been submitted on 2/7/20 that placed the project on hold.</p> <p>Tom Sims, Environmental Supervisor, received a call from Mr. Jake Gallegos, a third party contractor involved in the abatement. After speaking with the property owner, Mr. Gallegos informed Mr. Sims that the owner was removing some pallets of bricks from storage on the property. This is likely what prompted the concern from Mr. Hayes.</p> <p>Additionally, MSG was informed that they needed to submit a separate demolition notification for the demolition of a boiler structure on the property.</p> <p>On 2/21/20, MSG submitted another amendment, noting that the abatement would take place 2/24/20 - 3/6/20.</p> <p>On 2/24/20, I called Mr. Hayes and explained what we found. I let him know the new abatement start date. Mr. Hayes told me he lived next door and was watching the abatement. He told me he just wanted to make sure that proper precautions were being followed. I told Mr. Hayes to let me know if he had any further concerns.</p>

	42418		Concern Info Randy Noland, Building Commissioner for City of Arnold, called regarding several complaints his agency has received regarding Acid Piping Technology. The operations at the business result in metal pipe shavings being blown in the air and neighboring businesses report damage to the paint on their cars from the shavings. According to Mr. Noland, Acid Piping uses a giant saw outside of the facility that results in "6-inch dust particles." Acid Piping occasionally sprays water to mitigate dust from leaving the property and Mr. Anold stated that Acid Piping claims to have cleaned up the dust shavings last week. Mr. Noland would like to be informed of any updates related to the site.					
Comments 3/5/2020 Drive by of site, no observation of material leaving premises.								
3/6/2020 Met with Fritz Knoll, Manager of Acid Piping Technology. Discussed complaint filed regarding the metal pipe shaving leaving property. Mr. Knoll stated the outside saw is used to cut metal pipe which is too large to cut inside of warehouse. The saw is attached to a device to hold the large pipes.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
			Concern No. 42416	Concern Info There are piles of debris all along the edge of our road, in the grass, and on the vegetation. lately, the street sweeper has been wetting down the white dust, creating an entire roadway of wet, sloppy paste. This paste is splashing up onto our vehicles, and creating a hardened crust all over the undercarriages, up the sides, inside wheel wells and under the doors of our vehicles. This crust is thick, and hardened, and unable to just be wiped off. Is it dangerous silica dust? Is it rotting our vehicles? Is it dangerous for us to breathe, as we follow trucks and street sweepers that are surrounded by a cloud of white dust? After multiple emailed complaints, we, the residents, are receiving NO response from FWI/US Silica. This roadway problem is becoming unacceptable. Many of us are business owners, driving expensive lettered vehicles, and we are unable to keep clean. The paste that is being splashed onto our vehicles is causing decay. The center lines on the roadway are not visible. And the constant parade of dump trucks and tanker trucks often create dangerous situations for us as residential drivers, as they often run stop signs, take up our lanes to make turns without yielding to us, etc. When all of us built our homes here, US Silica did not even exist. But, now it is a 24 hour/day operation. We have tried to be civil, and reach out to quarry and sand plant personnel. However, we are receiving no response.				
Comments Tracking out and spilling of material onto roads by vehicles are matters regulated by transportation authorities

SWRO	3/10/2020	3/6/2020	Renters	Eldon Miller	Open Burning	RM		
------	-----------	----------	---------	-----------------	--------------	----	--	--

Concern No. 42393 **Concern Info** The concerned party called to report that the renters at 65 Northridge Drive in Eldon, MO are burning non-household trash that smells toxic and like plastic. Could be tires, as the responsible party has burned tires in the past. The concerned party spoke with the responsible party about the issue. She also said she understands that it is acceptable to burn household trash in the country, but that the odors are much different than smoke from household trash. The investigator can call the concerned party before investigating.

Comments Burn pile of about 1 cubic yard with wire remnants of a mattress. Refused to let me inspect. letter of warning

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector		
						Initials	NOV	RNOV
Concern No. 42408	Concern Info		<p>RP's are bringing in all types of remodeling and demolition wastes from homes they are "flipping." Have been bringing in the wastes from the business to their personal residence for the past year. CP states she has tried to contact the fire dept, planning and zoning to try to do something about it, but was unaware of DNR regulations. States that the pile and burning has got out of hand. RP's brought in multiple mattresses and a hot tub yesterday (3/10/2020) and are planning to burn it soon (has been placed on top of previously burned business/ demolition/ remodeling waste)- remnants of the burning are left on site. CP states pile is much larger than the size of hot tub and mattresses. Wife also has a realstate business- may be bringing in waste from this business too.</p> <p>The truck dumping had "Dewitt's Lighting and Landscaping" logo on side.</p>					
Comments	No violations.
