Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between April 16, 2020 and June 15, 2020

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	42813	Concern Info	Demolition/renovation at the county courthouse. This building contains asbestos on the flooring, pipes, and walls. All of this is being removed without first having a certified asbestos inspector review, test, and file a report. The county has been sue for failing to comply with Missouri Department of Natural Resources, EPA, and OSHA regulations in a previous renovation/demolition resulting in an asbestos-related death. I have written letters to the county and the presiding judge regarding my concerns. I am a circuit judge working in this courthouse and am on one of the floors undergoing such demolition. As of yesterday, these workers are currently removing flooring, which I believe contains asbestos, in the comm area I must walk through. While I am wearing a mask due to COVID-19, none of these workers are. I used to represent asbestos workers and other trades who helped construct this courthouse. I am very worried about exposure. Please insper this immediately.					
Comments This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City o Kansas City Health Department's Air Quality Program.								
KCRO	5/22/2020	4/22/2020	Brian Morris	Higginsville Lafayette	Open Burning Land Disturbance	JS		
	42830	Concern Info	neighbor tore down house and now there is mud flowing down into her yard because there is nothing there anymore. Gotte so bad, that when it rains, its just mud and water running down into her yard. He also had mold in the house and it was torr down but she wasn't sure how they disposed of the mold. There was a guy that bought the house to tear it down and he burnt it and left the ashes in the ground there. He also got rid of all the grass and took out all the trees so it's a big mud pit. She spoke with him a couple days ago and he said he would try to dig a ditch to make it not as bad for her, but he never di it.					
RP is known as Morris, not sure if that is first or last name.								
Comments No violations were observed.

<p>Concern No. 42871 Concern Info Caller reports that it has not even dried out yet and dust is highly visible from the crushing plant.</p> <p>Comments No violations noted, dust concern could not be verified.</p>								
KCRO	5/1/2020	5/1/2020	Unknown	Jackson	Other Asbestos	MC		
<p>Concern No. 42885 Concern Info Old house from early 1900's being flipped/gutted. All the debris is being dumped into the driveway and left for weeks if not months at a time. Individuals who gut the house not wearing protective gear which contain asbestos, lead, mold, etc. Same contractor had issues with home being demo'd/disposal at 1311 Manheim Road KCMO</p> <p>Comments Referred to the City of Kansas City with case no. 20050108275831</p>								
KCRO		5/6/2020	QuikTrip Kitchen and Distribution Center	Belton Cass	Other	MC		
<p>Concern No. 42970 Concern Info My concern is that the QT distribution facility just installed a new generator set that does not meet the requirements of 40 CFR parts 60 and 1039. In speaking with Robert Weber at the EPA region 7 office, I asked him about the need to have this new diesel engine meet the requirements of the EPA Tier IV final level and whether or not the unit had to be a Certified package from the factory or could be a compliant package. He indicated that it would need to be Certified. I filled a complaint with the region 7 office this week and referred to your office. The owner decided to save money and purchase a compliant engine instead of a Certified engine.</p> <p>Comments</p>

Concerns Investigated Between
April 16, 2020 and June 15, 2020

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
KCRO	5/7/2020	5/7/2020	Taylor Owens Construction LLC	Warrensburg Johnson	Asbestos	MC		

Concern No. 42977 **Concern Info** Demolition of commercial property without appropriate permit from DNR. Location: 500 E. Gay St., Warrensburg, MO 6409 (Verified through website)

Owner: Craig Hibdon / Shelter Insurance 660-747-9121

Contractor on site doing demolition: Owens Construction

This was a residential home many, many years ago--but it has been used as an insurance office (Shelter Insurance) and a commercial business for at least 15 years, if not longer. Therefore, it falls under commercial property rules for DNR permitting (NESHAP notification, etc.).

Comments The building was properly inspected and notified.

KCRO	5/19/2020	5/12/2020	Douglas Packingham	Baldwin Park Cass	Open Burning	DS		
------	-----------	-----------	--------------------	-------------------	--------------	----	--	--

Concern No. 42997 **Concern Info** Called to smoke in the area. E3 and M1 responded to the call. E3 found a pile of what looked to be trash burning next to a pull behind camper that was being stripped down. The pile was on the edge of the street. There was heavy black smoke coming from the pile that contained fiberglass insulation, plastic, wiring, tile, aluminum siding, plywood, and other building materials. The home owner took off running when we pulled up and the other male there talked to us and said the other male was the owner and had asked him to help burn the trailer. I advised the male that DNR would be called and to let his friend know. Also to not burn anything. The Cass County Sheriff was on scene also. We put the fire out with the booster reel and used about 50 gallons of water. E3 was command and M1 assisted.

Comments We will be sending them a letter of Unsatisfactory Findings Response Required.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
KCRO	5/13/2020	5/13/2020	Rick Staton	Skidmore Nodaway	Open Burning	DS		

Concern No. 42958 **Concern Info** This morning in to this afternoon there is a strong chemical burning smell in the air around the downtown area of Skidmore Smells as though rubber is on fire. It is strong enough that my dogs do not want to go outside. This has occurred before ov the winter, but I did not know how to submit my concerns until now. We have squatters that are living in a mobile home ney to the river inside town. I figure that they were burning whatever they could find to stay warm. Upon further investigation I h discovered that they have also rigged up car batteries to the trailer to provide them with some sort of power. They are not plumbed in, nor do they have a septic tank that can be seen. As far as I know they are using the water source next to the trailer as their bathroom. Because it has been cold the last few nights I can only assume that they may be burning again. there is also another individual in town that considers himself the town "Junker" he has been seen burning items (tires, mattresses, pallets, etc) in the past as well. Mr. Rick Stanton lives at 101 S. Chestnut St. The squatters are located on Elm St. next to the cities museum. I am still unsure as to who is burning in town today, but it is very offensive to the senses, and certainly unwanted

Comments No violations noticed at the time of investigation. Information and advise were provided to the concerned party.

KCRO	5/19/2020	5/19/2020	AA Quarry, LLC	Kingsville Johnson	Other	JH		
------	-----------	-----------	----------------	--------------------	-------	----	--	--

Concern No. 42996 **Concern Info** At approximately 4:24 PM AA quarry located at 381 NW AA Highway Kingsville, MO conducted 3 blasts that shook our house to the point the ceiling fan blades moved in my house. This is becoming a community concern as they are damaging property and structures. Please investigate and make sure they are within the operating guidelines of state local and feder: guidelines. The waves of vibrations sent throughout the ground can't be within the limits

Comments Referred to Missouri Department of Public Safety.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
KCRO		5/19/2020	Old Pickering Farm	Raymore Cass	Asbestos	JS		
Concern No.	43031	Concern Info	Live between Belton & Peculiar and the old Pickering Farm, which is at the corner of 195th and Peculiar Drive, they have recently started tearing all of the buildings down. Noticed that on one of the buildings closest to the road, they didn't take the windows out, or take the roof off, etc. and I thought someone should possibly investigate that. It's a big huge, several thousand acre farm, lots of barns and houses and don't know if there is asbestos or if they have approval. If there are any questions you can give me a call.					
Comments								
KCRO	5/21/2020	5/21/2020	Republic Foods / Valley Oaks Steak Company	Lone Jack Johnson	Odor	JH		
Concern No.	43028	Concern Info	Driving down Al Gossett Rd to visit family, my family and I began to smell this absolutely rancid, putrid, foul & absolutely disgusting smell. It was so foul we had to roll our windows up, but not only from the smell! From the sheer amount of flies that came with the stench. This was a stench so bad you could practically taste it. So me, being the curious individual I am decided to detour, attempting to find the location of what I thought was going to be a pile of dead bodies, animals, something. Noooooope, turns out it was Valley Oaks. The fact that there are homes within the vicinity and you can smell this from the highway is just wrong. I usually don't complain about stuff like this, but holy shit! Wtf is going on at that place!? It smelled like a pile a rotting whales that were rolled in dog crap. Then the millions of flies all over the area was insane. We ended up not staying at our families home very long because of the intolerable stench. It's asinine places like this operate around residential properties. No way in hell they're following EPA guidelines, not with that stench. I grew up on a farm and I can tell you right now they're dumping waste where they shouldn't be

Comments No odor violations were identified								
KCRO	5/21/2020	5/22/2020	Republic Foods / Valley Oaks Steak Company	Lone Jack Johnson	Odor	JH		
Concern No. 43030			Concern Info Please, ask valley oaks to stop doing whatever it is that they've been doing as of late. The ammonia in the air is causing breathing problems, sores in my nostrils, and causes our eyes to water, along with dry heaving, nausea, and dizziness. Last night I called the Sheriff's Department to request that they ask them to stop for the night. The Deputy was unable to make contact with anyone. Please, do a site visit and discuss alternatives to current activities

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	Concern No. 43052	Concern Info	<p>A company is burning demolition debris at a former gas station and it is emitting petroleum and other noxious odors. The location is the intersection of A Highway and outer road, across from the Fishing Dock business in Archie Mo. He said the local fire department was on scene there yesterday but they have a relationship with the owner, another first responder, and they didn't ask him to stop the burning.</p> <p>Caller also left a message on KCRO's main line. Caller states the guy responsible is a ranking officer with the Grandview M Fire Department, and he bullies up on and badgers our little volunteer fire department and they all leave. He is doing it aga today. This has been going on for about 2 weeks.</p>					
Comments								
KCRO	5/27/2020	5/22/2020	Connie Thomas and Richard Helm	Blue Springs Jackson	Open Burning	CK		
	Concern No. 43054	Concern Info	<p>Captain Derrick Llewellyn from the Central Jackson County Fire Protection District sent an email to the Unit Chief of the Air Pollution Section Mike Cunningham and provided the fire report.</p> <p>The fire report stated: "Responded to an illegal burn. Upon arrival found a pile of trash, clothes, carpet, furniture burning. I requested a brush truc to extinguish. I made contact with Richard Helm and Connie Thomas who own property and live next door at 29503. They not have an active burn permit and I advise them that due to the numerous responses to this location for illegal burning the rights for a burn permit are revoked for 6 months. I also took photos and told them I would turn over the information to the Missouri Department of Natural Resources."</p>					
Comments This report can be used by the Department of Natural Resources as it is from an official agency.								
A letter of Unsatisfactory Findings will be issued to Connie Thomas of Angel Homes LLC as the owner of the property and a letter of Unsatisfactory Findings will also be issued to Richard Helm as he is the resident at the property where the illegal burning took place.

KCRO	6/4/2020	6/4/2020	Republic Foods / Valley Oaks Steak Company	Lone Jack Johnson	Odor	JH		

Concern No. 43148 **Concern Info** I live in Lone Jack, Mo. , very near to Valley Oaks cattle operation. Things had seemed to quiet down for a bit but as I have stated in May the stench coming from that operation has gotten increasingly worse. I have lived here for over 20 years, always enjoying country life until Valley oaks was opened. There were many times before the date I have shown that the stench was so bad going outside was not possible, stench and flies horrible. This seemed to get better after we thought Valley oaks was stopped. Now it seems it has been leased to another group who are slaughtering cattle, the stench again being horrible. I love to work outside and enjoy just relaxing on the porch. This is now impossible again, these people should be investigated and monitored for their practices. If you had this to put up with you would not be happy either. I live on road 1911, Valley oaks is south of me

<p>I'd like to make a complaint with your office about ground contamination and possibly well contamination and illegal tire burning. I have contacted the Holt County Sheriff Dept many times about this . They just came out and spoke with the neighbor doing this .. I am under the impression that tire burning is illegal. My husband is on oxygen and breathing treatments and this must be stopped. The person several months ago also tried to tap in to my private well and when stopped he made the statement that if I didn't let him tap in to it he would poison it so now I'm afraid to drink the water and have to pay Culligan to bring drinking water to my house.</p> <p>Attached are photos and also a link to a short video of the tire fire today 06/11/2020 in the field behind my house.</p> <p>The person who set the tires a fire is Troy Lawson..</p> <p>He lives in Rockport but runs a illegal junkyard behind my house in a field and he has defaulted on the property contract ar can't get him off the property..</p> <p>Link to tire fire video https://photos.app.goo.gl/A2wPbHdtzrkASNP79</p> <p>My physical address is Linda Stovall 14635 Ember Rd Craig, MO 644337.</p>								
Comments No violations of hazardous waste,however, unsatisfactory findings for scrap tires being issued to RP.

<p>Concern No. 43220 Concern Info My concern is that since 8pm tonight we have not been able to step foot outside because the valley oaks cafo you pos let there is stinking us out. F U and your environmental concern page. DNR is a bunch or dumb ass idiots that have no idea th damage that factory is doing to my family. Go do your damn job and fix their problem. Over 2 miles away and we can't breathe</p> <p>Comments On 6/11/2020, the odors were faint and less than 2:1 on the Nasal Ranger. On 6/12/2020, I did not detect odors. No violation of the odor regulations.</p>								
KCRO	6/11/2020	6/12/2020	Republic Foods/Valley Oaks	Lone Jack Johnson	Odor	JH		
<p>Concern No. 43357 Concern Info The smell has continued since my last complaint and did not receive any feed back from my last response on 6/12/2020. It is unbearable at times to be outside and you can't even open windows in our home due to the disgusting smell. It is causing undue stress, headaches, we use to enjoy long walks through our neighborhood but now you have to plan you days and walks around which way the wind blows. To be outside in our own yard anywhere is just to much. It is unhealthy i is a quality of life issue not just a smell.</p> <p>Comments Light odor that was lighter than a 2:1 ratio. No odor violation</p>

Concern No. 43237 Concern Info

There is an odor that the CP believes that comes from Valley Oaks. The odor comes and goes usually early morning and late evening.

Comments The odor was slight and was not stronger than a 2:1 on the Nasal Ranger. Therefore, there is no odor violation.

KCRO	6/18/2020	6/15/2020	AA Quarry, LLC	Kingsville Johnson	Fugitive Particulate Matter	JS		
------	-----------	-----------	----------------	-----------------------	-----------------------------	----	--	--

Concern No. 43243 Concern Info Message left on main line: Want to lodge a complaint against the AA Quarry on AA Rd, south of 50 Hwy, east of Lone Jack. All the dust from the rock quarry is coming off again. I've asked you people to do something about this. There is so much dust and gravel on the road in front of the rock quarry that every time a car drives by a huge cloud gets thrown up and people will run you off the road to not go through it. We have to do something about this people. Motorcycles can't even go through it. It's ridiculous. This rock quarry needs to be reined in. Thank you.

Comments Fugitive dust from public gravel roads is not regulated. AA Quarry will work on track out from their facility.

						Initials	NOV	
	Concern No. 42750	Concern Info	<p>Caller reports that an old house at 17902 County Road 116 and a dump truck load of tires has been burning since 10:00 PM last night (4/15) and is still smoldering (4/16, noon)</p> <p>The caller did not know the owner of the property and said the fire department did not respond.</p> <p>Comments Found a brush pile had been burned, but did not find a burned house. Closed out concern as the concerned party did not provide additional information</p>					
NERO	4/17/2020	4/17/2020	Mr. Ron Felker	Hannibal Marion	Asbestos	BK		
	Concern No. 42825	Concern Info	<p>I've made a complaint with Missouri Attorney General's office against Ron Felker (due to him installing a furnace that is less efficient and not the one we agreed upon) and just found out that I can make a complaint with your agency (EPA) and that's why I'm making a late complaint. Ron Felker, owner and operator of Ron's Heating and Air Conditioning (1802 Stuart St Hannibal Mo. 63401) had an employee scrape off asbestos insulation from the HVAC duct work at my residence (1228 Hill Hannibal Mo. 63401). Ron left while this employee started scraping away at the asbestos. The employee wasn't given a respirator and I immediately opened up the only two windows we could to try to air out the basement, sprayed the asbestos with water to prevent more particulate matter going into the air. Ron didn't bring any filters, no isolation of the asbestos and certainly did not remove it properly. Ron said that he could remove the asbestos when we were discussing the work, made my down payment for the furnace, air conditioner and duct work, but never did he say that doing so would put my household at risk of horrendous health issues and I don't believe he's qualified to do such work.</p> <p>Comments No violation of the asbestos NESHAPs regulation was found to have occurred during the investigation. This residential structure is exempt from asbestos inspection requirements regarding renovation activities.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	42903		Concern Info There is a neighbor burning debris and trash toward the evening hours. They are within about 20 feet of other houses. The is black smoke coming up from the barrel and he is concerned for the health of the neighborhood, especially to the infants and children in the area and in his house. He is concerned about the toxins coming from the black smoke that is burning up and getting into peoples houses. The second concern he has regarding this neighbor. The neighbor has two huge metal grates in his yard for water drainage. The way the neighborhood is laid out, the rain water runoff is supposed to run through a pipe from several houses to this metal grate to drain. The RP, however, has removed the above ground piping preventing the water to drain in the metal grate. This is causing flooding in the yards of the neighboring houses from RP. There is water standing in the yards for months, causing increased mosquito activity and rotting of the privacy fences. The RP has removed addition pipes that were put in neighbors to drain to those grates.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	42936		<p>Concern Info Caller reports a concern of grain dust in the air and says he can see black mold which he knows has rat poison/pesticides it.</p> <p>On 5-6-20, I (Beth Kroes) spoke to Mark Snyder with the Macon Health Dept (660-395-4711) who said the caller left a voicemail with the concern information. I told Mr. Snyder that we would file the concern for investigation and contact the concerned party. I also attempted to call the concerned party and left a voicemail regarding the filed concern asking for additional details. At this time it is assumed that this is for the former ADM/current Danny Smithson elevator but this has not yet been confirmed with the concerned party. Later on 5-6-20, I spoke to the concerned party who confirmed the location at the former ADM elevator located near the senior housing and diagonal of the city park. The concerned party provided his contact information (updated on this form) and says the dust comes out of the top of the elevator when grain is dumped into or removed from the bins. Regarding the mold, the caller said that there is black mold on the corn on the ground and he assumes this is also in the air/dust. I asked if there were certain times of the day or week that activity at the elevator occurs and the caller said there are not any particular patterns of time. The caller said he has seen chemicals stored in some portions of the elevator and assumes those could be in the grain dust as well. The caller also said he is concerned about open electrical panels where kids could get to and also discussed that he can't get into his driveway sometimes due to the trucks/equipment used at the elevator parked in his way. The caller also suggested that our office contact local law enforcement so that they could take pictures of the dust if needed. I explained the fugitive dust rule and our agency's jurisdictional authority with the rule. The caller asked if the city could also do anything and I told him that he could contact his city officials regarding if any local ordinances are in place/could be proposed. I explained that our office's staff would tentatively be in the area next week to investigate the concern.</p>					
Comments No violation of the fugitive dust rule was found during the investigation. The property owner was informed of the concern.

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	Concern No. 43162	Concern Info	<p>From online contact form, with incident date of 6-4-20: This morning I heard and observed a venting of a natural gas (?) pipeline to the north of my property at 12801 W. Hwy EE, Rocheport, MO 65279. Based on the county line at this location, would place the pipeline location in Howard County. I am not sure who owns this pipeline, possibly Panhandle Eastern. Th have not that long ago (a few years?) had a pipeline break to the west of us along Hwy 240. I did call and report this morning's incident to Howard County Sheriff's Dept. (Mindy). She indicated that pipelines periodically vent their lines, but s had not been advised in advance in this instance, and would investigate. There was a white pickup in the vicinity of the ver which was plainly visible. I did not approach, but was half a mile away just off Hwy EE at the first road north after crossing the creek bridge into Howard Co. I did speak with my neighbor to the northwest, Mr. McDannold, about my observations, a he also could hear the noise, which sounded like a jet engine in close proximity. It vented for approximately 20 minutes (approx. 11:00 a.m. to 11:20). It has now stopped. We should be notified when this kind of thing takes place, if it is legal. I am questioning the latter, as I did not observe a fenced enclosure, or other safety measures to limit access to the location. Venting gases were clearly visible and very audible. I would like a report regarding this activity and the product of your inqu (and mine). Thanks for your attention to this request.</p>

SERO	5/7/2020	3/27/2020	Residential Property	Leasburg Crawford	Open Burning	TR		
	Concern No. 43140	Concern Info	SP:25224 CP states they do not know the name of the RP but they are burning what's left of a house after demo. He states the smoke is yellow grey and they are concerned with what's in the fire and air. CP states they confronted the people burning and the RP was not nice so the CP called the police and they gave him our number. CP states the police went to location and spoke with R also.					
Comments I (Todd) telephoned the CP on 4-10-2020 and informed them that due to the novel corona virus the investigation would be delayed.								
I went by the area on May 7, 2020. I saw no signs of recent or current open burning. Since the property had reportedly been demolished, the evidence was difficult to decipher. No one was on site. I telephoned the Crawford County Assessor's Office and I was told that the address was 507 East cedar Avenue and that the owner was Lacey Medlock of Rolla. I sent a copy of the regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements and the fact sheet Facts on Open Burning Under Missouri Regulations (PUB02047) to the property owner. I could not obtain a correct active telephone number for the property owner.

Concern No. 43087 **Concern Info** SP:25250
 Passing along a concern - I returned a call from Sandra. She lives next door to the Iron County Recycling and stated there an oily liquid running onto their property that is killing their grass. There is also a strong odor coming from the recycling business. She said it is located off Hwy 21 N in Ironton.

Comments On May 12, 2020 I visited the site after contacting the CP at the number provided. No evidence of an oily substance was observed at the time. A corner of the yard did have sparse vegetation. No odor was present at the time of the investigation. The CP verified that it comes and goes.

Following the site visit, I contacted Iron County Recycling and was put in contact with Jim Black (573) 631-4820.

Mr. Black stated that their facility will only accept equipment which has already had all fluids drained from it.

On May 21, 2020, fact sheets regarding spill response and oil handling were emailed to Mr. Black for reference if an issue arises in the future.

Mr. Black was aware of a stormwater related issue with a neighboring property which he stated he would try to address by attempting to divert water to prevent stormwater from flowing onto neighboring properties. Later the same day he called back to let me know that he dug a ditch to hopefully address the source of the concern.

Concern No. 43144 **Concern Info** SP:25476
?

New house on property along with old structure and big lake. Large brush pile can be seen from Hwy W and Weurtly strett.

INFO:

RP getting ready to burn tires. There is a large brush pile with tires on it and they will be burning it soon.

Comments I travelled to this area on May 7, 2020. I did not witness any open burning or evidence of open burning. I did not find the exact brush pile with tires that was described by the concerned party. I did note numerous brush piles and I noted numerous apparent equipment tires being used to provide for animals (food or water). This area is used for ranching cattle, horses, mules, etc. The brush piles mostly appeared to be quite old suggesting that they are not routinely open burned. I believe that the trees in the area may now be reducing visibility of the brush pile of particular interest to the concerned party.

I contacted the Texas County Assessor's Office for assistance in finding ownership information for this property.

I sent a copy of the regulation 10 Code of State Regulations 10-6.045 Open burning Requirements and the fact sheet: Facts on Open Burning Under Missouri Regulations (PUB02047) to Vandivort Farms, LLC. at 3222 Hwy. W, Summersville, MO 65571; and to Robert Vandivort at 3470 Hwy. W, Summersville, MO 65571.

Concern No. 43138 **Concern Info** SP:25524

Lime In air and water can't see or breath the air,and can't see across Mississippi River at times.what I'm guessing is lime.

Comments I travelled to this location in Ste. Genevieve on May 6, 2020. The location is very near the Ste. Genevieve-Modoc River Ferry along the Mississippi Ri north of town. I was present from 10:36 a.m. to 11:55 a.m. The temperature ranged from 53 to 56 degrees Fahrenheit and the wind was from the north northwest at 10 miles per hour. There was no barge loading taking place and no observable lime dust in the area. There were railcars parked at the Mississippi Lime Company's Little Rock Barge Loadout Terminal, but no loading activity was noted.

I spoke with Jonathan Kennedy, Environmental and Regulatory Affairs Manager with Mississippi Lime Company, by telephone on May 11, 2020. He stated that the loading of barges was at about 50% of the monthly normal due to the economic slow down. He was unaware of any upset or malfunction of equipment at the Little Rock Barge Loadout Terminal at or around the date this environmental concern was received.

Concern No. 43209 **Concern Info** SP:25736
 Neighbor behind myself is in law care business all limbs leaves along with bags and boxes he uses on job is burnt at his residence he has small tractor with bucket digs hole in yard burns all the refuse green limbs and leaves don't burn well he uses diesel fuel best I can tell from color of smoke and flame size to help now has part of util pole in hole wind right direction pretty intense smoke and smell

Comments At the time of this investigation no open burning or accumulation of material to be open burned was noted. After I explained who I was and my purpose for the visit, I briefly spoke with Cody Reed about the state open burning regulation: 10 Code of State Regulations 10-6.045 Open Burning Requirements and I gave him a copy of the regulation, a copy of the fact sheet: Facts on Open Burning Under Missouri Regulations (PUB02047), and my business card. Cody Reed stated that he had only been open burning limbs. I explained that he needed to have 200 yards buffer zone to the nearest building that was not his, to avoid burning more than 80 cubic yards of vegetative waste per week, etc.

Concern No. 43212 **Concern Info** SP:25744
 Neighbor dumping and burning piles of garbage near bank of E. fork Huzzah Creek.

Comments At the time of my investigation, no regulated open burning was noted. There was a pile of limbs and brush burning behind the concerned party's home did not note any piles of trash or evidence of trash accumulation or transport. Trash receptacles were noted labeled County Line Sanitation or Boss Trash Service. A copy of the air open burning regulation, 10 Code of State Regulations 10-6.045 Open Burning Requirements and the fact sheet, Facts on Open Burning Under Missouri Regulations (PUB02047) were sent to David and Deborah Kirkwood at the address on file at the Dent County Assessor Office.

I spoke with Deborah Kirkwood on 6-02-2020 she stated that she had not been open burning at the location described for about a month. I briefly explained the open burning regulation and confirmed her mailing address.

Concern No. 43383 **Concern Info** RP is burning down an old house with asbestos siding and its causing distress to the CP.

CP states the house is old and is causing lots of smoke.

Comments At the time of this investigation I noted that a residence had been demolished and was on site in piles. A brush pile is also on site. No evidence of open burning was noted. No likely asbestos-containing building material debris was noted.

A copy of the open burning regulation, 10 Code of State Regulations 10-6.045 Open Burning Requirements, and a copy of the fact sheet, Facts on Open Burning Under Missouri Regulations (PUB02047) were mailed to the property owner on file at the Stoddard County Assessor's Office. Per the Assessor's Office this building had been demolished for at least two years.

On June 11, 2020, I spoke with Wendy Perrin by telephone. She stated that she had 200 plus yards to the nearest structure that does not belong to her. She will burn only untreated wood waste and vegetative yard wastes such as storm debris. I discussed the air regulation (10 CSR 10-6.045) with her. She stated that she had received the copy of the air regulation and fact sheet mailed to her by this office.

			<p>Concern No. 43213 Concern Info SP:25800</p> <p>The CP stated the RP owns a construction company and is burning construction waste. The RP has dug a pit across the road from their home. The pit is covered by a tin fence. The CP stated it is more than just wood. This is causing a smoke problem with the neighbors and the odor is strong when burning. The CP also stated in the past they have heard things exploding in the burn pit.</p> <p>Comments On May 29, 2020, I contacted Lee to inform him that I would be in their area June 1. I contacted Lee earlier than usual because of Covid-19 concerns wanting to make sure he was okay with me being present. I used a face mask as well, doing my best to maintain at least a 6 foot minimum distance from Lee and his wife during my visit. I arrived around noon on June 1, 2020. I spoke with Lee upon arrival and I asked him to show me where they open burn. I took a few pictures (attache below) of the burn barrel while we discussed open burning regulations. We went over what could and couldn't be open burned from a contractor's point view as well as regular household trash. I also informed Lee again that any trade waste must be 200 yards away from any structure that is not owned him. This rule alone makes it so that he could not burn any trade waste at his home because he has neighbors within 200 yards. Before I left I gave Lee another copy of the open burning regulation and the open burning fact sheet. I let him know that if he had any questions moving forward that he could email or call me.</p> <p>On June 2, 2020 I contacted Todd Durham who is the concerned party. I discussed the open burning regulation with Todd and informed him of what we could and couldn't do. I asked Todd if he knew how to find our open burning regulation and fact sheet, with which he replied that he had copies of both let him know that if he had any questions going forward that he could email or call me.</p>

--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 43377 **Concern Info** CP states the odor from the butler shop is unbearable. The CP cant sit out in the front yard due to the smell.

Comments On June 3rd I arrive at the Rock Ridge Meat Shop around 11:00 A.M. After driving around the front of the property I took an alternate entrance into the neighborhood located behind the property as the main entrance was closed for road work. I parked on the road directly behind the property and sat th for ~5-10 minutes with the windows down to see if I could detect an odor. It was 87 degrees and the humidity index was at 62%. There was a wind blowing southwest at ~8mph. During my time at the property there was no odor detected.

I called and spoke with Russell on June 8th about the odor concern. Russell stated that the trash from the facility was not picked up from the prior wee This waste would be sitting in their dumpster in the hot weather emitting, causing a fairly strong odor. Since this occurrence, they have moved their waste to another part of the property and have changed the pickup routine so that the waste is picked up more often. They do keep livestock there, sometimes 5/6 days before they are processed. I discussed 10 CSR 10-6.165 Restriction of emission of odors with Russell and he acknowledged the concern.

Ridge Rock Meat Shop was not in violation of 10 CSR 10-6.165 Restriction of Emission of Odors from what was discussed at this time.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	43387		Concern Info There is a residence on highway 160 east of West Plains that is allowing trash services to dump their collected trash on his property. The trash pile is growing and only gets burned once in a while. This occurs a few times per week. Trash trucks pull in, dump their loads in the pile and leave. Then you will see people in the trash looking through it for anything they think is valuable, then after a few days they try to burn it. The pile of garbage is quickly growing because obviously not everything will burn. I know this has to be illegal and for all neighbors and surrounding property owners it is a HUGE concern and disgrace.					
			Comments At the time of my investigation there was no open burning taking place. The site is a combination of a metal shop and residential property. Robert Threlkeld stated that some residential trash that is generated on site is open burned for disposal but mostly old unpainted wooden pallets are burned for disposal. Facility does repair work on trash trucks that are sometimes parked on site for that reason. I gave Robert Threlkeld my business card, a copy of 10 Code of State Regulations 10-6.045 Open Burning Requirements and the fact sheet Facts on Open Burning Under Missouri regulations (PUB02047). I briefly discuss the fact that the open burning of tires or trash from off site (i.e. from a trash service) are prohibited activities under the air regulation.					
SERO	6/4/2020	5/28/2020	Unknown	Houston Texas	Open Burning	TR		
	43388		Concern Info Caller reports that the responsible party (RP) is open burning various items from a vacant residence, that had been empty years, including trash and building materials such as carpet. RP owns rental properties in and around Houston. RP's son is Chance Drake.					
			Comments No evidence of open burning was noted at the time of my investigation. I briefly spoke with Joe Williams on site who stated that he had done no open burning. I left my business card, a copy of the air regulation 10 Code of State Regulations 10-6.045 Open Burning Requirements, and a fact sheet on open burning for Steve Drake. I spoke with Steve Drake by telephone on June 10, 2020. He confirmed that he had the information I had left for him and that he would comply with the air regulation in the future as he had not been aware of it. No violation.

Concern No. 43391 **Concern Info** The water runoff from these two sawmills and the smoke from burning there waste. Also the. Blowing of sawdust across th roadway.

Comments The investigation began on June 4, 2020, when it was observed that sawdust was crossing the four lanes of US Highway 60 from B & A Lumber, LLC

On June 11, 2020, it was observed that saw dust was crossing the four lanes of US Highway 60 from Patterson Wood Products.

Both of these two sawmills are located to the north of US Hwy. 60 along Shannon County Road 456 near Birch Tree. These incidents of sawdust crossing property lines are violations of 10 Code of State Regulations 10-6.170 Restriction of Particulate Matter to the Ambient Air Beyond the Premis of Origin.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Comments	<p>An investigation was performed on two sawmills located in Birch Tree, Mo. The source of the complaint was anonymous, and claimed the saw mills had sawdust blowing onto highway 60, further polluted water was leaving the sites.</p> <p>The first sawmill that was investigated on 6/3/2020 was B & A Lumber. This operation builds pallets and produce 4-6 truckloads of sawdust a day. Mr. Bruce Asplin is the owner operator of B & A Lumber, and provided the information. He further advised that he tries to remove all saw dust daily, but the saw dust market can be limited at times. Josh Wilkerson and I informed Mr. Asplin about the Missouri clean water act and provided all the information and requirements for Mr. Asplin to obtain a MSOP. After Mr. Asplin provided us permission to observe the property.</p> <p>The southern perimeter runs parallel to highway 60 and is at a slightly lower elevation, causing stormwater to flow to the south. As we made our way southern side of the site, I observed large sawdust and wood waste piles being stored on site. The stormwater runoff from this area leads to a small ditch at the very southern end of the property.</p> <p>As we made our way down to the ditch, we observed discolored, dark water flowing into the ditch from the storage piles located to the north. The sediment pond at the time of the inspection had a dark color in appearance. The sediment pond was discharging water on the southern end, at which was leaving the site and flowing to a drainage ditch that leads under highway 60. Samples were collected pertaining to the benchmarks listed in the MSOP.</p> <p>After we discussed our findings with Mr. Asplin. We told him to contact the Southeast Regional Office if they had any questions or concerns related to the permit requirements.</p> <p>A follow up visit was conducted on 6/9/2020. This visit was performed to provide information on potential BMP's to help with Leachate. In addition I offered further assistance to Mr. Asplin retaining to the application process.</p> <p>The second investigation was performed on 6/9/2020 of the Patterson Lumber. Upon arrival I met with Mr. Donald Bland and discussed the purpose of the visit. Mr. Bland informed me he is the operator of the site, but is not the owner. Mr. Bland further advised that he will meet with the owner to discuss the recent investigation. I provided a template for an operating permit, SWPPP, and application to start the process. I further discussed the requirements and standards of the presented permit. After Mr. Bland provided permission to inspect the site.</p> <p>The western perimeter is at a slightly lower elevation, causing stormwater to flow to the west. As I made my way to western side of the site, I observed large sawdust and wood waste piles being stored on site. The stormwater runoff from this area leads to a small ditch at the very western end of the property.</p> <p>As I made my way down to the ditch, I observed discolored, dark water flowing into the ditch from the storage piles located to the east. The sediment pond at the time of the inspection had a dark color in appearance. The sediment pond was discharging water on the western end, at which was leaving</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
SERO	6/10/2020	6/8/2020	Wendy Perrin	Puxico Stoddard	Other	TR		
Concern No.	43381	Concern Info	The caller observed her neighbor pushing old building materials into the river. The caller wanted to be anonymous but gave her information so the Department could contact her. Reportedly, a complaint was made on this neighbor recently for burning the same materials and a SERO staff member has been on-site. The building materials are from a home of 1930s-1940s vintage.					
Comments	This is my second trip to this site. At the time of this investigation I noted that a residence had been demolished and was still on site in piles. No evidence of open burning was noted. No likely asbestos debris was noted.							
	A copy of the open burning regulation, 10 Code of State Regulations 10-6.045 Open Burning Requirements, and a copy of the fact sheet, Facts on Open Burning Under Missouri Regulations (PUB02047) were mailed to the property owner on file at the Stoddard County Assessor's Office. Per the Assessor's Office this building had been demolished for at least two years.							
	On June 11, 2020, I spoke with Wendy Perrin by telephone. She stated that she had 200 plus yards to the nearest structure that does not belong to her. She will burn only untreated wood waste and vegetative yard wastes such as storm debris. I discussed the air regulation (10 CSR 10-6.045) with her. She stated that she had received the copy of the air regulation and fact sheet mailed to her by this office. She stated that nothing was being pushed into the nearby river. However, some clean fill materials from the demolition including concrete and cinder blocks would be used to reinforce areas subject to erosion due to flooding of the river. No violations observed.

Concern No. 42795 **Concern Info** Incident Number: 2004191250ADC

Report Origin: Private - Citizen

Additional Information:

A caller describes a strong odor (possibly cow manure) coming off the Tower Tee Golf property where recent excavation has been occurring. This facility has been revamping its grounds according to a recent newspaper posting. The caller also called the Metropolitan Sewer District (MSD) who arrived, observed the odor, and suggested the caller call the EPA concerning this situation.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Comments	<p>A check of the internet found that Tower Tee had shut down circa 2017. Per 5-21-19 Post Dispatch article, the facility was sold to JH Berra/McBride for 180-home development and there was much local resistance for the development. The site was then resold to the current owner to instead redevelop golfing and recreational complex similar to what it was before.</p> <p>Per email:</p> <p>To: Mike Shamia mike@towertee.com</p> <p>We received an online odor complaint yesterday, regarding a manure-like odor from the site at 6727 Heege Road, St. Louis, MO 63123. The report indicated that MSD responded and stated it had nothing to do with sewage. Are you aware of any activity going on at the site that may be causing such an odor concern?</p> <p>I would like to get back to complainant with information on the cause. Might be a new resident unaware of the history and near miss of the site being developed a subdivision. Any help you can give me in this matter would be very much appreciated.</p> <p>Thank you.</p> <p>From: Mike Shamia mike@towertee.com</p> <p>Tom - The answer is our contractor spread a top soil pile over the weekend. The pile was moist when it was spread. That created a distinct manure odor. It should subside when it dries out. Let me know if you need anything further. Mike</p>

--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 43270 **Concern Info** Online submittal:

A home building contractor is burning waste weekly that includes pvc piping, plastics, shingles and other toxic non-wood waste.

There is a construction dumpster but it has not been emptied in a long time, it is almost a prop as burning goes on a couple times a week.

Comments I arrived at the concern location at 11:00 am on May 20, 2020. I observed a large active burn pile in the front yard of a house being built on the south side of Linder Drive, near the intersection of Linder Drive and Jamison Connor Drive. I observed chipboard, two by fours, plastic sheets and bags, paper, a various trash including cigarette packs and chip bags being burned in the pile. The yard signs in the nearby lots indicated that the property was being developed by Myers Select Homes.

I called Myers Select Homes and spoke with Keith Myers, CEO. I outlined the purpose and scope of the investigation and described the anonymous concern that we received. I told him that I did see the materials being burned and asked if he was aware of this taking place. Keith Myers told me that did not realize these materials could not be burned. I explained that under 10 CSR 10-6.045 Open Burning Requirements, construction and demolitor waste other than untreated wood cannot be disposed of by open burning. Additionally, only household waste originating from the property where the burning takes place can be disposed of by open burning. In the burn pile, I observed plastic construction waste and wood used for construction that is likely to have been chemically treated, as well as household waste that was brought in by workers. I explained that the company should ensure that the burn pile is extinguished as soon as possible, and that they would be receiving a Letter of Warning.

LOW Issued May 29, 2020. Signed Open Burning agreement was received on June 8, 2020. Facility was returned to compliance.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	43275		<p>Concern Info Forward from USEPA: "Kirk with USEPA passed on the following complaint. Melissa (314-280-1806) a private citizen says that a nearby petroleum storage terminal is emitting really bad odors, more than usual. She lives nearby at South Broadway and Bates Street in St. Louis City, MO near the facility and says she can smell the odors for a long way up and down South Broadway."</p> <p>I drove through the area mentioned at 11:00 am on 5/22/2020 and did not notice any strong odors.</p> <p>I called and left a voicemail for the concerned party. Later in the day, she returned my call. She told me that the facility responsible for the odors is Blue Knight Energy Products at 201 E. Nagel Street. The concerned party works at a recording studio right next to the facility. She said that the odor is almost always noticeable, but for the past few weeks the odor has been incredibly strong, especially in the morning. The concerned party claims that the strong odors have been causing respiratory issues.</p> <p>The facility ID is 510-2662. I am forwarding this concern to the inspector assigned to the facility, Lemma Zewdie.</p> <p>-DBR</p>					
Comments	<p>File review shows that a concern related to asphalt odor was received from the public residing in the area by this office in April 2015. In response, the facility installed numerous vents on tanks and mist eliminators in the middle of the tank farm and near the truck loading racks to reduce odors. The mist eliminators are designed to filter fumes from tanks (all tank vents are ducted to the mist eliminator) and from loading trucks at the loading racks. The residue from the filtration process is collected in drums connected to the mist eliminators and disposed of (Heritage transports the west of site for prop disposal) when full. The relatively cleaner mist/fume is emitted to the ambient air. At the time of the visit, I did not smell odor near by the facility.</p> <p>I called concerned party (Melissa 314-280-1806) on 6/3/2020 to let her know my findings. She agreed that the odor is not there now. She said she is glad that we do go out and investigate and care to call her back to let her know what we found.</p>

Concern No. 43271 **Concern Info** I spoke with nearby property owner Maureen Dennis about an odor coming from 2461 E. Highway 47, Winfield MO, 63389 She said they were breeding mice and rats. She tried to contact property owner with a note, but did not know how to contact them, she did not see a business name and was unable to reach them. I told her I would research any regulations this facility may fall under and call her back today.

I started by looking on Lincoln County parcel map and found that the property is owned by Trinity Reptile Feeders LLC. The parcel's categorized class is residential/agricultural. I then looked to see if MoDNR Air Program had that company or address as a regulated facility. It was not. Then I started to look through Chapter 5 and 6 regulations. The facility would not be categorized as a permit by rule, qualify by size for the odor regulation and though there is not a specific permit exemption, the small size of the facility would produce below de minimus levels of air pollutants.

I left Ms. Dennis a message with this information along with providing a website where she may contact the company and the phone number to Lincoln County government office 636-528-6300 to see if they have any ordinances about running a business close to residential property (though the parcel identifies the property as residential/agricultural). I left her my direct desk phone if she would like to discuss my research results, but have not heard back.

Concern No. 42518 **Concern Info** We have a neighbor who does odd construction jobs and brings home construction waste then burns it in his yard, he now has a new pile to burn in his yard. Last year he burned a mobile home then buried what was left, and now has put rock over it, he often brings home dock foam and burns it or buries it. And now has scrapped another mobile home and has been pushing the debris into the dry creek/ravine behind his house..the base of the trailer home is still there right now and know when it rains that water goes to the lake via Pervis road.. he is pushing it and burying trash and this is going to leak into our ground water and we are all on wells here ... His name is Carl Peyton and his Address where this is happening is (I think it is 544?? Crazy Horse Road with a Sunrise Beach city and zip code but we are right outside of Laurie. He has several large boats in his yard, a tall gas tank on poles in the air (he often burns next to it) and his bon fires from burning the piles of rubbish he brings here are so big they are bigger than his buildings. He has other junk in his yard as well. He also has a new pile in which he is building and will burn soon... when that happens he has a whole bunch of people there and they get drunk and play loud music all night.

This guy can be a big jerk...or has been to the other neighbors and they are scared of him or to turn him in for they fear retaliation and the threatening and harassment or damage to their property he will do. Don't get me wrong, he can also be a nice young man when he wants something... but then a snake and turns belligerent so we wish to have anonymity. I am alone here and I am elderly and have no way to protect myself from him.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	42552		Concern Info As of 3/23/20 the facility continues to conduct the demolition without an asbestos inspection. I am following up due to a conversation I have had with a local business owner the last few days about my concerns about company I work for. This person reported but I thought I better as well. Working to renovate old motel and the last couple weeks they have had some of the guys demo some of the interior (dryw: flooring, etc). Concerned about no testing done for asbestos and lead paint. No PPE being provided (one of the workers cut themselves and of course, no work comp being provided). This is fairly detailed and I would hope you keep this more vague in any communication with the company as retaliation against me VERY LIKELY!					
Comments	Violations found for not obtaining an Asbestos inspection prior to renovation work.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	Concern No. 42596		Concern Info Caller says neighbor burns frequently for the last year since they moved in. She said the other day it was so nice, they left the windows open to go get groceries, and came back to a house filled with smoke. They went over and asked the neighbor if they could stop because it was going into their house. They did, but then started back up again in the evening. She said breathing smoke makes her sick, and she would just like to get them to stop. They are in a subdivision on lots less than 1/2 acre. She says they are burning less than 50 yards from her home and close to other houses. She has health issues that are exacerbated by smoke and because she is having to work from home now she is not able to go outside. She said the burning is frequent and mostly smells like vegetation. She does not know when they would be getting enough vegetation to frequently burn at least 9 months of the year, so thinks they might be hauling it from a business, but is unable to see the gate they would use to get to the burn area.

SWRO	5/6/2020	5/4/2020	Carl Payton	Sunrise Beach Camden	Open Burning Open Dumps	RM		

Concern No. 42906 **Concern Info** Carl Payton is his name and 544 Crazy Horse Road sunrise beach 65079... Directions coming N on hwy 5 from Camdenton take a left on Purvis..Crazy horse is the 1st street on your right at the bottom of the hill(there are 3 going to the trailer park but ignore those they don't go through) when on Crazy horse there will be 3 curves at the second curve is where he bulldozed a house and started burning the waste there, but his address is 544 at the 3rd curve..you will see all types of dump trucks, back hoes, bulldozers and junk boats There. He uses this place for his business. A neighbor told me he lives at 17863 Sheldon point in Gravois 66109. This is Camden county ...but we have gravel fire from the end of the street to the trailer up on the hill so the house at the curve that he is tearing down is also Camden county but sunrise beach fire district."

Concern No. 42915 **Concern Info** Concerned party states that human sludge is being stockpiled in a field and is running off into the roadway, down a ditch and into a wet weather creek. The concerned party states that the property owner has attempted to clean it up once but has not after the rains this week. Concerned party believes that the sludge is possibly coming from Sheldon wastewater treatment plant.

He also states that the odors are extremely bad, and asked about odor violations, I explained that it is extremely difficult to achieve an odor violation. I explained that I was unsure if wastewater treatment facilities have odor regulations and that I would have to research that, but concerned party was understanding.

	43038		Concern Info					
			1. Septic tank issue The residence at 53 Cottonwood Road had septage surfacing in March. The septic tank was pumped. Caller mentioned that the person living on the property has also eliminate waste into buckets that were then dumped onto the ground. Caller alleges that the septage has contaminated the well that is shared with three homes. Caller reports that the well is positive for total coliforms, and that a well expert is advising. The well has been shocked (April 2), flushed, and a filter purchased to alleviate the issue. Caller also stated that at least three other neighbors have had mysterious illnesses. Caller is concerned that the septage is reaching the lake. Caller may have photographs related to this issue.					
			2. Burning The caller is also concerned about the material that the resident at 53 Cottonwood Road has burned. The burning was done on or about March 9-10. Caller alleges that tires, plastic, treated lumber, and other "toxic waste" have been burned. Caller claims the resident has since buried the remains, and is concerned about leaching chemicals. Resident may have buried the burnt remains on or near the septic system lateral lines. Caller is concerned that chemicals are leaching and reaching the lake. Caller may have photographs related to this issue. (Seems to be the primary concern that we can investigate. JGC)					
			3. Illicit drug waste Caller is concerned about harmful waste products that may be coming from illicit drug use and/or manufacture. Caller is concerned that chemicals are entering the lake.					
			4. Abandoned manufactured homes Caller is concerned about several abandoned homes in the area.					
			Caller has several concerns and has contacted multiple agencies (Stone County Sheriff, Stone County Health, EPA, etc.).

<p>Concern No. 43039 Concern Info FROM EPA: The issue at hand is there is water boiling from the ground and releasing white in color steam from near the sidewalk where employees walk causing us to walk through it. My concern is the steam may have unknown harmful substances in it as we breath and walk through the steam. This has been going on for approximately 10 months and the ar that is boiling is getting wider. I'm not sure if this is affecting the ground water or what the source is or the impact this has o the environment or if it is a pipe that has ruptured, so for the health and safety to workers I thought this should be looked in and to also insure the environment is not being affected. This facility is also a state prison and is not in an area where inmates are at. This information is true and accurate to the best of my knowledge.</p> <p>Comments No violations.</p>

--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

Concern No. 43097 **Concern Info** Received via email:

I took a video on Tuesday May 26 @ 7:42 p.m. I announced the time on the video but I was mistaken about the date. It was Tuesday the 26th, not the 25th. I tilted the camera to get the building front and didn't realize the video wouldn't shift but you can still see it ok. Even with the rain the smoke was visible from quite a distance and almost appeared to be something burning.

Don't know if you can use this or not.

File was too big to email but I sent you a link via Messenger.

Cynthia Brookshire
