Monthly Air Pollution Control Program Summary Report

For ALL REGIONS - 06/16/2017 to 07/15/2017

Number of Concerns Received RE:

<i>Asbestos</i>	13
<i>Burning</i>	31
<i>Fugitive Dust</i>	8
<i>Odors</i>	12
<i>Particulate</i>	1
<i>Toxics</i>	0
<i>Other</i>	15

Of the above, 9 concerns involved multiple emissions.

Total of Concerns Received:. 68

Number of Investigations of Concerns:

Received during report period. 59

Received prior to report period. 13

Total number of investigations completed: 72

Number of formal notices of violation issued: 1

Please note, the information provided in this report reflects all concerns received during the reporting period as well as all inspection activities that occurred during the reporting period regardless of the date in which the original concern was received.

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
KCRO	2017-06-21	2017-06-16	Unknown	Lexington	Lafayette	Air Odors / Sewer line	KN	
Concern No.	31815	Concern Info	Concern referred from EPA on 6/16/17 Odor from sewer in backyard. Can't get city of Lexington to come look at it. Also complained of smell in her neighbor's backyard. Also in her mother's backyard. EPA reported as sewer main break and it was still occurring.					
Comments	Concern has been resolved by City of Lexington Water Department							
KCRO	2017-06-19	2017-06-19	Titan Environmental	Kansas City	Jackson	Asbestos	MC	
Concern No.	31820	Concern Info	The building opposite from the sprint center has been doing a renovation project for about a year. The CP is unsure who owns the property. Within the last couple months, the company doing the clean up, Titan Environmental, has been taking bags of items out of the building. The bags are unmarked and sometimes the items are not in bags. The CP says they are taking out tiles and other items and are concerned about asbestos. CP says RP is throwing the bags and other items in unmarked cars, but it unsure where the RP is taking these things. CP does not believe the RP is removing these items the correct way as they are sure these tiles and other things have asbestos or lead.					
Comments	Referred to Kansas City Air Quality Program.							
KCRO	2017-06-22	2017-06-20	Norterre New Construction	Liberty	Clay	Fugitive Dust	CS	
Concern No.	31836	Concern Info	EPA received an online concern on 06/13/2017 at 9:12 a.m. Concern regarding construction at site since 2016. Construction activity is resulting in large amounts of dust and debris. Concerned party wonders why they have not been required to water the dirt so it keeps the dust down. The side street constantly has debris. You can not walk outside without covering your face when the wind is blowing. The dust makes it real hard to breathe for people with asthma. You wash your car, and it is covered with dust the next day. You turn on the air conditioning, and dust blasts out of the vents. Concerned party believes the dust is casing a health hazard to people coming to the doctor at the clinic, especially during high asthmatic season.					
Comments	No violations observed and no further actions for this concern Went to the site and observed the work; no dust leaving the property. Went to the Methodist church down the road on a hill to observed and did not see dust leaving the property Went to construction site. Met with Tod Land, Senior Superintendent, and Mark Denton, Special Project Leader, with Excel Constructors. They checked their log for the day in question and did not find any record of wind and it being a dusty day. Mark Denton commented they have had 3 inches of rain since the concern date. They do not have any dust suppression plans or equipment in use. I recommended they utilize a water truck or other method. They were making plans during the investigation to use a fire hose for the driving areas and, if that did not work, they are planning to get a truck to water. I recommended that they contact our office on days that are really windy and dusty to let us know they are taking measures to manage the dust. Mark Denton gave us his phone number for us to contact him if neighbors call with concerns in the future. 913-515-3696							

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
KCRO	2017-06-28	2017-06-24	Unknown	Ridgeway	Harrison	Burning	JS	
Concern No.	31892	Concern Info	Owner burned his shed at 708 First Street. The shed contained numerous tires and oil containers. The owner has two more out buildings, which he says he also plans to burn soon.					
Comments	A letter of warning will be issued requiring the property owner to respond with proof of cleaning up burnt debris and agree to maintain compliance going forward.							
	I arrived on site and could clearly see the remains of the shed from the public street. I took several pictures showing numerous charred remains of prohibited items including: wheel rims, dimensional lumber, and plastic. There was also a nearby utility pole with severely damaged electrical lines and small electrical box; the pole was completely charred on one side and the wire was dangling on the ground. There was a large pile of dimensional lumber near the site that showed heavy burn residue. The concern stated that the owner planned to burn 2 other sheds on this property. Those sheds and a nearby pile, which includes a boat on other debris, remained unburnt and intact at the time of the inspection.							
	I made contact with the tenant of the house on the property, Jay Thomas. He had just moved in two days prior. Jay was under the impression that this was a controlled burn and that the fire department was on hand to monitor. He did not have the phone number of the owner, Phillip Doolittle, but gave me the phone number of his wife, Chelsea. I left an open burn fact sheet, open burn regulations, and my business card with the tenant and asked him to give those items to the landlord when he sees him.							
	I then went to city hall, spoke with Diann Cunningham, and was given the phone number for the fire department representatives. Diann told me that the fire department was called after the burn started, and upon arrival couldn't do much due to the live electrical line laying on the ground and sparking. She noted that KCP&L was also dispatched to the scene due to the electrical line being damaged. Diann also told me that the shed contained aerosol cans, paint, tires, and lumber prior to being burned. She was unable to tell me if those items were still in the shed when it was burned.							
	I spoke with the property owner and explained to him the seriousness of the situation. I told him that he will likely receive a letter of warning for this first offense, but any subsequent offenses could result in civil penalties. He verbally agreed to comply. I told him that he will have to respond in writing to the letter of warning, agreeing to future compliance with burn regulations.							
KCRO		2017-06-26	Unknown	Liberty	Clay	Asbestos / Fugitive Dust	SN	
Concern No.	31893	Concern Info	CP complains about dust from a construction demo site across the street from the county court house. She is concerned it may contain asbestos.					
Comments								
KCRO	2017-07-06	2017-06-26	AA Quarry	Kingsville	Johnson	Fugitive Dust	SW	
Concern No.	31910	Concern Info	CP complains of dust from rock quarry. He states the quarry does not attempt to control the dust. Dust is carried by the wind any and every direction for several miles.					
	CP requested follow up contact with investigation findings.							
Comments	Inspection was conducted with an inspection report issued with all information. facility in compliance							
KCRO		2017-06-27	Unknown	Kansas City	Clay	Asbestos		
Concern No.	31912	Concern Info	CP complained that neighbor was removing asbestos shingles from a house yesterday June 26, 2017. The CP does not know where the removed shingles were taken. CP is concern that her family may become sick because of exposure to asbestos. The CP would like to know the results of the investigation.					
Comments

KCRO	2017-06-28	2017-06-27	Unknown	Kansas City	Clay	Asbestos	MC	
Concern No.	31913	Concern Info	CP complained that neighbor was removing asbestos shingles from a house yesterday June 26, 2017. The CP does not know where the removed shingles were taken. CP is concern that her family may become sick because of exposure to asbestos. The CP would like to know the results of the investigation.					
Comments	Referred to Kansas City Air Quality Program.							
This removal appears to exempt for state and federal air pollution asbestos regulations because the facility is a single-family residence and does not appear to be part of a larger project. Furthermore, this project is located within the city limits of Kansas City, Missouri. Therefore, this concern has been referred to the Kansas City Air Quality Program.								
KCRO		2017-06-28	Prince Dustin Wykert and Nicole	Altamount	Daviess	Burning	JS	
Concern No.	31939	Concern Info	RP is burning prohibited items ie mattresses, lazy boy recliner, dressers. He burned prohibited items and was planning on burning more when the city issued an abatement order to stop him. He burned the remaining prohibited items anyways. He is now being charged with creating a fire, safety, and health hazard. There should be a court case # soon for that. Deanna will email the original abatement order with photos to Mike.					
Comments								
KCRO	2017-06-30	2017-06-28	Prince Dustin Wykert and Nicole	Altamount	Daviess	Burning	JS	
Concern No.	31943	Concern Info	RP is burning prohibited items ie mattresses, lazy boy recliner, dressers. He burned prohibited items and was planning on burning more when the city issued an abatement order to stop him. He burned the remaining prohibited items anyways. He is now being charged with creating a fire, safety, and health hazard. There should be a court case # soon for that. Deanna will email the original abatement order with photos to Mike.					
Comments	Based on the detailed account of Officer Janna Barton, a Letter of Warning will be issued for the burning of prohibited waste.							
I did not perform an in-person investigation, I feel that there is adequate proof of violation within the evidence paperwork I received from Janna Barton, Ordinance Enforcement Officer for Village of Altamount. It contained detailed accounts of burning violations as well as pictures and an abatement order. I attempted to contact the responsible party of concern and left a voicemail explaining DNR's requirements for the LOW they will be sent. I told them to call if they have questions.								
Further details including photos can be found in in the investigation report.								

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
KCRO	2017-07-06	2017-07-03	Parkville Coffeehouse	Parkville	Platte	Air Odors	MC	
Concern No.	31969	Concern Info	There's a significant amount of smoke and smell coming from the building when they are roasting coffee. Not sure if there is anything that can be done. Strong smell, and I'm not sure how healthy it is to be breathing in. Been going on for years.					
Comments	<p>No odors or smoke were observed during the investigation; however, the roasting machine was not in operation at the time. If further concerns are received, investigation will be attempted when roasting is occurring.</p> <p>I arrived in the area at 14:55 on 07/06/2017. No odors were detected.</p> <p>I proceeded to walk around the area for a while. Winds were light from a westerly direction. I did not detect any odors that seemed to originate from the coffeehouse.</p> <p>At 15:05, I entered the facility. I identified myself to a staff member at the counter and stated the reason for my visit. He escorted me to the rear of the building and introduced me to the roaster, Nick Brown.</p> <p>The facility has one roasting machine (see photo log for more information on machine), which was not operating at the time of the investigation. Mr. Brown said there was no schedule for when the roasting machine operates; however, roasting is more likely to occur Tuesday - Thursday. Mr. Brown prefers to roast early in the morning during the summer because of the heat.</p> <p>I advised Mr. Brown of the odor regulation.</p>							
KCRO		2017-07-10	Unknown	Lexington	Lafayette	Open Dumps / Asbestos		
Concern No.	32081	Concern Info	CP called and said there were building(s) being tore down on Broadway Street in Lexington. The materials are then being taken to someone's private property on Rock street. The buildings are old and all the material is not being taken to a landfill, afraid there might be asbestos also.

--------	-----------------	---------------	---------------------------------	------	-------------	-----------------	---------------	-----

KCRO		2017-07-10	Advanced Industries / Triple C C	Odessa	Lafayette	Asbestos	SN	
------	--	------------	----------------------------------	--------	-----------	----------	----	--

Concern No. 32085 **Concern Info** Today, July 10, 2017, I was inspecting a vacant funeral home in Odessa at 308 East Main when I was approached by a concerned citizen who apprised me a possible violation.

Is seems that a barbeque restaurant was torn down on the corner of Main St and 2nd Street in Odessa here recently and the demo contractor did not get an inspection prior to demolishing the building. The complainant was very firm that the building had been commercial and had not been a residential structure.

The owner of the barbeque restaurant is Advanced Industries, Inc., 100 North 1st Street, Odessa, MO 64076.

The demo contractor was Triple C Construction, owner Brett Clemons, Odessa, MO 64076.

I went by the site after inspecting the funeral home and noticed the new construction, but did not observe any one working or any vehicles.

If you need a formal complainant, I could be that person. I don't like to do that though, since it appears that I would be just trying to drum up business, which I'm not.

You can call me anytime at (660) 359-7485.

Thank you very much.

Have a great day.

Jim

Comments

KCRO	2017-07-11	2017-07-11	Nine Ten Apartments	Kansas City	Jackson	Asbestos	MC	
------	------------	------------	---------------------	-------------	---------	----------	----	--

Concern No. 32083 **Concern Info** The caller was concerned about the asbestos that can be seen hanging from pipes in the basement. When pieces fall to the floor it breaks apart and he is concerned he and residents are breathing this material.
 Caller said it is visible on pipes in the basement, the laundry room and (assumed to be) in the walls.
 The building is being renovated but he does not believe the workers are following proper removal protocols for asbestos.

Comments Referred to Kansas City Air Quality Program for investigation.

Building is located within the city limits of Kansas City, Missouri; therefore, this project is under the jurisdiction of the Kansas City Health Department's Air Quality Program.

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
KCRO	2017-07-11	2017-07-11	Unknown	Kansas City	Clay	Fugitive Dust	MC	
Concern No.	32092	Concern Info	contractor is removing soil from field immediately to the south(east) of the FedEx Freight facility at 4077 N Norfleet Rd, Kansas City, MO 64161. This results in considerable amount of dust coming into the facility. The local shop manager, Mr. Greg Schreiber has photos showing the dirt accumulation in their loading docks and facility. Caller was FedEx facilities manager Mr. Chong Lee at 408-654-3112 (direct line, California) He requested that the assigned inspector please call facility contact Mr. Greg Schreiber ,Shop Manager, at 816-453-4287 as soon as they are assigned to let him know approximately when they might be out to investigate the situation.					
Comments	Referred to Kansas City Air Quality for investigation.							
KCRO		2017-07-13	Unknown	Lexington	Lafayette	Asbestos		
Concern No.	32113	Concern Info	CP called stating that the RP is removing asbestos materials from 301 Broadway. CP states that the asbestos is not being properly wetted for removal. CP stated that the RP is taking the materials off site and burying the materials. This has been ongoing for roughly a month. CP stated they are concerned about the residents at the Senior Citizens home nearby being affected by the asbestos removal. CP would like an update after the investigation.					
Comments								
KCRO	2017-07-17	2017-07-14	City of Wood Heights	Woods Heights	Ray	Burning	JS	
Concern No.	32154	Concern Info	Caller reports that the City of Wood Heights started to burn today after heavy rain. They have done this before, and the fire smolders for days. The pile is very large (size of a house), so there is no way the fire is going to be out by evening. The City is also allowing commercial business (i.e. Crouse Tree Service) to bring in their waste to burn.					
Comments	The fire department withdrew its approval of the permit, so the permit has been revoked. Since the City cannot burn until a new permit is issued, no on-site investigation was conducted. The City of Wood Heights has been notified; any further burn without a permit will result in further enforcement action..							
NERO	2017-06-21	2017-06-19	MFA - Clark	Clark	Randolph	Fugitive Dust	DB	
Concern No.	31808	Concern Info	Caller reports that the MFA in Clark runs grain through their elevator without applying oil, causing significant dust to blow onto neighboring properties, which causes him problems breathing. He said we would only see something if they were running grain, so we should ask them to run some grain through to see it. The dust comes from the bins south of the office along the railroad tracks. He said they had a fire recently and he had called in previously for similar concerns in the past, one of which was 1180901 (ACE# 31750). He said he was considering getting a lawyer to try to resolve the issue if we were not able to. Complainant requested the investigator call him after the investigation to discuss. Previous concerns: ACE# 9492 (July 2011, no dust violation found), ACE# 10915 (Dec 2011, no violation anhydrous release), ACE# 31750 (found no dust violation)					
Comments	No violation of the fugitive dust rule was found at the time of the investigation. The company stated they would address the issue.							

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
NERO	2017-07-27	2017-06-19	Scott Belisle	Fulton	Callaway	Open Dumps / Burning / Scrap Tire Dump	BS	
Concern No.	31830	Concern Info	<p>Caller states that people from the Belisle residence have been dumping waste consisting of tires, a water heater, car parts, diapers, res. waste, and shingles. Caller also states that burning has been going on at the Belisle property after dark and the caller is also concerned about mosquitos from the tire pile on the property.</p> <p>GR-Caller thought Scott Sr. may be recently deceased.</p>					
Comments	Violations of the MSWML were observed on the property. On July 21, 2017, NERO received an email from the SWMP advising that the Belisle property would again be bid out of removal of the scrap tires. At this time, NERO will wait the results of the removal and disposal of the scrap tires and allow the SWMP to conduct future communications with Mr. Scott Belisle, Sr. to resolve the matter							
NERO	2017-06-21	2017-06-20	Roof Depot	Jefferson City	Cole	Burning	DB	
Concern No.	31832	Concern Info	<p>Caller reports that Roof Depot is burning pallets and lumber from downed buildings (from recent storms) and the burning is causing a lot of smoke in the area. Caller reports that the business moved in a year ago and burns a couple times each week.</p>					
Comments	Violation of 10 CSR 10-6.045 Open Burning Requirements. A Letter of Warning will be issued.							
NERO	2017-06-22	2017-06-21	Plue Construction	Kirksville	Adair	Asbestos	SB	
Concern No.	31850	Concern Info	<p>Both the north McDonald's and the eye doctor office next to Sonic are being remodeled. I'm curious if they had the proper asbestos inspections done, or if they were even necessary.</p>					
Comments	No violation found of the state and federal asbestos regulations.							
NERO	2017-06-22	2017-06-21	Greystone Partners, LLC	Kirksville	Adair	Asbestos	SB	
Concern No.	31851	Concern Info	<p>Both the north McDonald's and the eye doctor office next to Sonic are being remodeled. I'm curious if they had the proper asbestos inspections done, or if they were even necessary. This was first noticed on Saturday, June 10 and reported on June 21.</p>					
Comments	In violation of state and federal asbestos regulations for failing to inspect a commercial building prior to renovation. Issue Letter of Warning and require a response within 30 days. Require an asbestos inspection prior to further demolition of suspect materials in the building.							

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
NERO	2017-07-06	2017-06-22	Victor Baldwin	Warsaw	Benton	Burning / Residential Waste Disposal	MH	
Concern No.	31891	Concern Info	Vic's Hillbilly Trash Hauling Service is taking trash that has been picked up from his trash route and is burning it in burn piles in the back of the property owned by Ted Roush. Burning takes place in the late evening or early morning. Odor is bad. Burn remains are removed and taken to some other location. Not sure where trash is going. CP says to take law enforcement with inspector. CP gives permission to go on his property adjacent to this property. Probation officer Robin Wall 660-438-2343 x222					
Comments	Not enough evidence to determine if burning of a large amount of waste has been burned. At this time there will be no further action. Mary Hopke and Terry Ball went to Warsaw to take a look at the concern raised in Concern. They were able to locate the home where the Concerned Party said that the garbage was being accumulated, sorted and burned. From the road we did not see much evidence of any illegal activity, as described in the concern. We did see a single, rusted out burn barrel with some ash in the bottom. There were also a couple of black plastic bags behind the house with what appeared to be aluminum cans in them. There was a corrugated tin structure that we initially thought might be a fire pit, but upon closer inspection it was a dog-pen enclosure for small dogs. We knocked on the door of the home where Baldwin was believed to be staying, there was no answer. It appears that the home has been recently lived in, some windows were left open and there is furniture inside as well as a mechanic's drop light that was illuminated tied to an outside tree via extension cords. There were several other extension cords powering a refrigerator on the porch and some other items. There were no piles of garbage, no large ash piles from a burn and no vehicles at the home. There was an older burn area in the front yard where a fire had been conducted, but the ashes were mostly cleaned up. The house next door to Baldwin's is vacant and listed for sale. No one appeared to be staying there at present.							
NERO	2017-06-29	2017-06-23	E&M Mobile Home Park	Jefferson City	Cole	Burning	DB	
Concern No.	31863	Concern Info	Caller reports that someone has burned old carpet, bicycles and other garbage that creates a big cloud of black smoke. Caller reports the burning occurred in mid-May (2 weeks before the Memorial Day holiday) and last week. The caller reported seeing the carpet/bicycle being burned in May, but said they just saw black smoke from what was burning last week. The caller said "they all burn out there."					
Comments	Violation of 10 CSR 10-6.045 Open Burning Requirements. A Notice of Unsatisfactory Findings is being issued.							
NERO	2017-06-29	2017-06-28	Floyd Fares	Clark	Randolph	Burning	DB	
Concern No.	31920	Concern Info	The caller report that demolition waste is being burned at night and evidence is being covered so it cannot be seen what is burned. This is the same property where we investigated a report and found no burning in April, 2017 (ACE #30,891). Also, there may have been an USF letter issued for similar burning at 204 Morris in 2016 that is the same property.					
Comments	No violation of the open burning rule was found during the investigation.							
NERO	2017-06-29	2017-06-29	Quixotic Farming LLC	Trenton	Grundy	Air Odors	BK	
Concern No.	31938	Concern Info	Lindsey Stevens called in concerned about a dead fish smell coming from Quixotic Fish Farm to the south. She said that several of her tenants had complained to her about the smell. The concerned party owns the trailer park to the north.					
Comments	No violation of the odor rule was found during the onsite investigation. Facility is exempt under the odor rule, 10 CSR 10-6.165, section (1)(B) pertaining to the management of livestock (fish).							

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
NERO	2017-07-05	2017-07-05	Ken Hollingsworth	Sweet Springs	Saline	Fugitive Dust	PM	
Concern No.	31986	Concern Info	As noted by MEERTS #1666: "Demolition of three 125+ year old buildings on Main Street. These buildings are suspected to have asbestos, lead, tarred roofs, and are two story. They have been knocking them down causing extreme dust and debris. Suspecting debris not being disposed of properly. Please come and inspect."					
Comments	At the time of investigation I determined violations of the Missouri Air Conservation Commission Regulation, 10 CSR 10-6.080, Emission Standards for Hazardous Air Pollutants, referencing 40 CFR Part 61.145, Subpart M, Asbestos. Violations include: <ul style="list-style-type: none"> • Failing to inspected for the presence of asbestos prior to demolition • Failing to notify the planned demolition of a regulated structure <p>A Letter of Warning (LOW) is being issued.</p>							
NERO	2017-07-05	2017-07-05	Carroll Enterprises	Columbia	Callaway	Burning	BK	
Concern No.	31987	Concern Info	On July 5, 2017 at approximately 1:00 p.m., caller reports burning of tires by Carroll Enterprises. Caller reports that this has been going on for some time, at least the past couple of years. Caller reports that the facility is cutting up tires into pieces and burning them in a 55 gallon barrel behind the A-frame building on the property. Caller is also concerned that oil is leaking from the vehicles onsite and leaching into the lake nearby. Caller reports that our office has been at this site before and has spoken to Mr. Ken Henderson in the past. Present owners are Robert and Patricia Tuft. Caller recommends DNR staff being accompanied by law enforcement due to prior history of a drug bust for a meth lab in the past, and common practice of people at the facility carrying around firearms and video recording activity in the area/vehicles driving by the property. On 7-5-17, I spoke to Josh Gathright, Callaway Co. Joint Communications (573-592-2486), regarding the incident. He said that the Millersburg Fire Protection District responded to the fire and reported that miscellaneous items were found to be burning and that no tires appeared to have been burned. The Millersburg FPD can be contacted for a copy of the report (report number 17-137). BK 7-5-17 Also see ACE#31988 on same issue.					
Comments	Issued an Unsatisfactory Findings letter to Mr. Tufts (including response to be signed by Mr. Williams and Mr. Tufts) for violation of the open burning regulations.							
NERO	2017-07-05	2017-07-05	Carroll Enterprises	Columbia	Callaway	Burning	BK	
Concern No.	31988	Concern Info	On July 5, 2017, at approximately 1:20 p.m., caller reports Carroll Enterprises had been burning something that smelled like burning tires. Caller reports that the fire department responded and said that they found a rubber mat that had been burned among other things. Caller reports that some of the neighboring residents' roofs and porches have a black residue on them that they suspect is coming from the burning. Caller reports that the business burns every couple of weeks, and prior to today burned late last week (around June 28-30 before the holiday weekend). See additional concern (ACE#31987) filed regarding this same issue for more details.					
Comments	Issued an Unsatisfactory Findings letter to Mr. Tufts (including response to be signed by Mr. Williams and Mr. Tufts) for violation of the open burning regulations.							

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
NERO	2017-07-13	2017-07-05	Mike Pugh	Hannibal	Marion	Air Odors / Particulate	DB	
Concern No.	31995	Concern Info	It is alleged a vehicle restoration business next door to 3132 Warren Barrett Drive in Hannibal is painting vehicles with vehicle grade paint outside with no filtering. The odors & the paint are apparently causing some problems in the area. They called the city, who is helping with the "junk" on site but recommended they contact DNR about the painting of vehicles outside. Photos are available of the painting outside.					
Comments	No violation of the odor or fugitive dust rules found at the time of investigation. Information was provided.							
NERO	2017-07-06	2017-07-06	Glen Griesbaum Construction	Palmyra	Marion	Open Dumps	JH	
Concern No.	32004	Concern Info	Email states: "Glen Griesbaum owns and operates a local construction company in the Palmyra, Missouri area. He has recently purchased property immediately west of the Palmyra High School. He is developing part of the property as a new subdivision. The property also has a large ditch on it where he has been dumping construction debris from what appears to be from multiple construction sites. He has already burned a decent amount of debris approximately 1 month ago. The ditch, and debris, are visible from Business 61, on the south edge of Palmyra. The ditch parallels Business 61 and is approximately 75 yards west of the roadway."					
Comments	At the time of the onsite investigation, violation of MSWML Section 260.210.1.(1) was observed. Mr. Griesbaum had dumped or allowed the dumping of approximately thirty cubic yards of regulated waste consisting of treated wood, shingles, drywall, vinyl siding, insulation, and job site waste such as buckets, empty tubes of caulking, cups, bottles, and lunch items onto the surface of the ground. On July 25, 2017, staff returned to the property and documented that all of the waste had been removed and receipts for proper disposal were provided. No further actions are required at this time.							
NERO	2017-07-13	2017-07-07	Karen & Jim Harrower	Vandalia	Audrain	Asbestos	DB	
Concern No.	32088	Concern Info	Caller reports that a party is demolishing numerous mobile homes.					
Comments	Violation of the asbestos rule. A Letter of Warning is being issued for failure to inspect and notify.							
NERO	2017-07-11	2017-07-10	Payne Property	New Franklin	Howard	Asbestos	PM	
Concern No.	32086	Concern Info	On July 10, 2017, a concern was filed of a man removing asbestos siding from his rental property and not taking proper precautions. This is a rental property that he has been doing house work on lately.					
Comments	I determined at the time of investigation no violation of the Missouri asbestos regulations.							
NERO	2017-07-11	2017-07-10	Keith Thompson	New Franklin	Howard	Burning	PM	
Concern No.	32087	Concern Info	The caller reports Keith Thompson burned a house on Friday, July 7, at approximately 2030. The caller reports the rural fire department authorized the burning. The duty officer made contact with the City Police Chief, Mike Wise, who reported the fire involved untreated lumber and brush only.					
Comments	At the time of investigation I determined Mr. Thompson to be in violation of the regulation 10 CSR 10-6.045, Open Burning Requirements. A Letter of Warning (LOW) is being issued.							

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
NERO		2017-07-12	MPG Auto	Fulton	Callaway	Air Odors	PM	
Concern No.	32118	Concern Info	<p>Caller stated that a business in Fulton called MPG Auto paints vehicles every day or two and open two big doors to let the fumes out, causing him headaches whenever they do it. Stated it gets bad enough he can barely mow his yard sometimes. Said they paint about 1/2 the time after dark. Caller stated he called last November or so on the same company and has reported to other agencies as well.</p> <p>Caller requested call back after the investigation.</p> <p>ACE 30041 was the previous concern at this site. One small paint booth was on site. Some open burning was being done in a barrel. Business had been operating for 2 years.</p>					
Comments								
NERO	2017-07-18	2017-07-14	Southeastern Grain Company	Laclede	Linn	Air Odors	SB	
Concern No.	32141	Concern Info	<p>Caller reports that the smell from the large mound of corn at the local elevator is terrible. Caller reports that the smell is so bad that when he has visitors, they can't stand to be outside. Caller believes the corn has gotten wet and that is why it is smelling so bad.</p>					
Comments No violation was found of the odor rule during an on-site investigation. Advised source on proper handling of grain that could not be used for feed or sold.								
NERO	2017-07-14	2017-07-14	Justin Cima	Gibbs	Adair	Burning	BK	
Concern No.	32142	Concern Info	<p>Caller reports burning with a strong smell coming from a property located in Gibbs. Caller reports that a house had burned down on the property previously. Caller reports a man throwing something on the pile but the caller was unsure of what it was. Caller said the smoke looked like they were burning shingles or tires. I asked the caller if they could see what was burning and they said they could not just that the smell was like what they would imagine burning tires/shingles would be like. I asked if the burning had occurred there regularly and they said this was the first time.</p>					
Comments Fire used for noncommercial preparation of food, no violation of open burning rule, advised property owner of open burning rule and proper solid waste disposal.								
NERO	2017-07-19	2017-07-14	CE Grain Company LLC	Farber	Audrain	Air Odors	DB	NE180001
Concern No.	32143	Concern Info	<p>Caller reports that CE Grain is continuing to haul in dead chickens and piling the pile up higher without hauling any out. States that odor is strong in morning and evening (she drives by about 7 AM and 5-6 PM) and on days when it is hot and wind is from the south or southeast. States that odors are so strong that you can smell it a mile away and driving by it is strong enough to make you vomit just driving by. Stated it has not gotten better since she saw the article in the paper saying DNR had asked them to address the problem.</p>					
Comments Violation of 10 CSR 10-6.165 Restriction of Emission of Odors. A Notice of Violation will be issued for this repeat violation. Require a revised plan of action. Require that they keep a daily log of actions being taken to manage the mulching operation and to reduce odors.

Comments This is a duplicate of Concern # 12744 - Ace # 31730								
<p>Arrived at location on June 7, 2017. A small pile of demo waste was on fire. Left department fact sheets for Management of Construction and Demolition Waste and Open burning under the windshield of the red truck in the driveway.</p> <p>Acquired Mr. Tallman's address from Cape County Accessor information. Sent an unsatisfactory letter to Mr. Tallman with a 30 day cleanup goal.</p>								

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
SERO	2017-06-22	2017-06-21	SRG Global	Farmington	St. Francois	Other	JD	
Concern No.	31849	Concern Info	SP:12874 **Referred from the EPA Region 7-Melinda Luetke (913) 281-0991* SRG global has pink fumes coming from an air stack. The CP has had multiple health issues and is concerned it is coming from that. The CP wants to be contacted when someone goes out to the facility.					
Comments	<p>Before entering the facility, I spoke to Ms. Jarvis and we discussed her observations and concerns for the facility. Ms. Jarvis stated she sees the pink fumes in the morning on the roof over the dumpsters in the back. She stated her neighbor has pictures of this occurring.</p> <p>Ms. Jarvis was most concerned with the monitoring well that was placed in the City of Farmington's easement that is along Ms. Jarvis's property. SRG employees are taking samples from this well often and Ms. Jarvis is concerned about the results.</p> <p>I reviewed the processes, equipment along with the Emission Stacks for potential source of pink fumes from the ground and from the roof of the facility during an unannounced investigation. This facility does not have a source of pink emissions. However, during the investigation I observed the cooling tower steam with the sun behind it. This could appear to look like a pink color emission. This cooling tower is behind the large roll off dumpsters. There are no emissions with the cooling tower only steam.</p> <p>Also, Mr. Shawn Knapp, Environmental Manager stated in 2015 they had a small release of Nitric Acid that has a pink tint when off gassed. This was reported to the department at the time of the incident and followed up with reporting as required.</p> <p>I did not observe any unusual emissions from the facility at the time of the investigation.</p> <p>No violations observed, no further action at this time. I will continue to review during routine inspections and when in the area.</p>							
SERO	2017-06-28	2017-06-26	Smith Jacobs	Ste. Genevieve	Ste. Genevieve	Other	AB	
Concern No.	31900	Concern Info	SP:12920 The RP is continuing to pile up materials and is burning them again.					
Comments	<p>At the time of the original concern I visited the address on June 8, but no one was home. I left a business card and an Open Burning publication in the door. I later found a phone number on line for Mr. Jacobs and called the number and left a message. On June 28, I called again and spoke with a man who said he was not Smith Jacobs and did not identify himself further. He indicated that he could take a message for Mr. Jacobs. I informed him of the open burning regulations and asked him to let Mr. Jacobs know that he could not burn trade waste.</p>							
SLRO	2017-06-22	2017-06-16	Cletus Henry	Webster Groves	St. Louis	Air Odors	JM	
Concern No.	31906	Concern Info	Complaint alleges Cletus Henry is bringing plastic waste and other types of waste to his home and burning this material in a wood burning store from which various odors are produced.					
Comments	<p>I talked with the Webster Groves Fire Chief and the Fire Marshall. Webster Groves has received numerous complaints about this location. The Fire Chief informed me that they have been to the location and when there was a fire, the smoke was coming from the woods stove chimney. In the cases where there was fire, the only odor was of burning wood. On June 22, 2017 there was no burning taking place. With no burning, there was no odor. I talked with Mr. Henry about the complaint and odor. Mr. Henry stated he was burning wood and some paper.</p>							

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
SLRO	2017-06-20	2017-06-20	Raymond Eldridge	Barnhart	Jefferson	Burning	DB	
Concern No.	31856	Concern Info	I went by the Eldridge property on my way out of the neighborhood at 9:30am where I saw large plumes of black smoke arose by the green houses. The black smoke smelled like plastic being burned, I suspect discarded plastic planting containers. I did not see anyone on the property, so I don't know if it was unattended.					
Comments	I spoke with Greg Eldridge who identified himself as the owner. I told him about the concern that we had received and explained the open burning rules for the St. Louis Non-Attainment area. He stated that he was doing some burning a few days ago that consisted of yard waste and some scrap wood. We discussed that since his green house is in an unincorporated area of Jefferson County, burning yard waste only is restricted to September 16 through April 14 of each calendar year between 10AM and 4PM. He stated that he would not burn on the property again.							
SLRO	2017-06-26	2017-06-26	Dennis and Mary Amelung		Jefferson	Burning	DB	
Concern No.	31905	Concern Info	Disposing of a tree that fell down by open burning. The burning has been occurring all day for the past few weeks. The Antonio Fire Department has responded twice already but the people doing the burning are claiming that they are "hibachi" grilling. Huge flames periodically could be seen over the privacy fence. Complainant said the neighbor has guns and may be argumentative, so caution and/or assistance from the police department is suggested.					
Comments	I stopped by 1787 Fairfax address where the concern is occurring. Mr. Amelung was in his driveway and I spoke with him about the concern. He stated that the fire department had been at his address for the same issue and they determined that the burning that he was doing was recreational. He invited me to look at his burning pit in his backyard where his wife, Mary Amelung was. They were currently burning sticks and logs from a tree that they cut down inside of a 2'X'2 metal recreational burning pit that was purchased at a local retail store. The tree that is being burned has been cut up in to small logs that fit neatly on the fire pit. I observed three logs on the fire while I was at the site and a small amount of logs stacked next to the fence that remained from the tree. I explained the open burning rules to Mr. and Mrs. Amelung. We discuss open burning in unincorporated Jefferson County because the residence is located in unincorporated Jefferson County. We discussed ozone season burning (April 15- Sept 15) and non-ozone season burning (Sept 16-April 14).							
SLRO	2017-06-28	2017-06-28	Larry Walters	Byrnes Mill	Jefferson	Burning	DB	
Concern No.	32040	Concern Info	Anonymous caller made a 911 call about scrap that was brought home and being burned on site. The complainant said the High Ridge FD may be responding. The caller said that the open burning been a problem for at least 4 years and has called the SLRO about this matter at least 3 times.					
Comments	I visited the site on June 28, 2017. I observed a burning barrel in the back by the owner's garage that was smoking. No one answered the door to the residence. I called the High Ridge Fire District June 29, 2017. The fire chief stated that they didn't respond to the open burning because the Byrnes Mill Police Department had already responded before they got to the site. I contacted the Byrnes Mill Police Department on June 29, 2017 and spoke with Officer Robinson who responded to the open burning. He stated that the resident put out the fire at his request. The officer also stated that the owner was burning yard waste and rags. The officer said that he handled the concern under their city ordinances. The officer stated that if the police have further problems with the resident, they will contact the department.							
SLRO	2017-07-05	2017-06-28	Christine Swafford	Winfield	Lincoln	Burning	LZ	
Concern No.	32043	Concern Info	The caller stated that his father's neighbor is burning trees and brush next to his father's house. The property is in unincorporated area of Lincoln county. The caller explained that there are two piles of trees and brush. One of the piles is allegedly less than 200 yards from his father's house. The caller did not know the address of the neighbor but said that it is next to his father's address: 227 Argentville, Winfield, MO					
Comments	Lincoln County is an outstate area. Open burning is allowed with no special day, time or location restrictions. Outside area is defined as a geographical area comprising those counties not contained in the St. Louis metropolitan area, Springfield-Greene County area or the Kansas City metropolitan area.							

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
SLRO	2017-07-03	2017-06-29	St Louis Paper and Box		St. Louis City	Air Odors	LZ	
Concern No.	31978	Concern Info	The caller stated that St. Louis Recycling Center at 1800 Venderventer in St. Louis is burning plastic in order to recover wire. They do this in the open (outside) and the smell from the burning affects people in the area. The caller works from St. Louis Paper and Box Company located at 3843 Garfield.					
Comments	Citizens Service Bureau (314 622-4800) in the City of St. Louis was contacted. Ms. Nina at the Bureau stated that the same anonyms complaint was filed with Bureau in May 2017. Ms. Maria (314 657 1539) at The City Health Department investigated the complaint on May 22, 2017. Ms. Nina stated tat the report concluded that there was no violation at the time of investigation.							
SLRO	2017-06-30	2017-06-29	Howell and Sons Excavating,IN	Washington	Franklin	Burning / Fugitive Dust	SF	
Concern No.	32050	Concern Info	"I received a phone in call from a resident a Mrs Elaine Blackburn 636-239-9673 at 331 Lakeview Drive, Washington who stated she had ashes land her on deck and in her pool and also had a smoke in the area. I responded to the residence and contacted Washington Communications who stated they had a Department of Natural Resources control burn in the area. I arrived on scene at 331 Lakeview Drive and met with the owner who showed the spots on her deck and the ash in the pool. The owner stated she had tried to clean the areas off and was unable to remove the ash stains. I then went out to the burn located at Malvern Hill and Rabbit Hill Drive. I met with a Mr.Howell and he showed the burn pit. There was an ACD running and in place and the pile of debris was in a pit. Mr. Howell stated they would they would not put anymore debris on the pile today. I took photos of all the damage to the deck and also the burn pit and then contacted the Missouri Department of Natural Resources. Mrs. Blackburn called back and stated that she would most likely call the police tomorrow and get a report."-- EOR Captain Mike Holtmeier.					
Comments	<p>I was contacted by, Mike Holtmeier, by phone yesterday (June 29, 2017) to relay information about the burn concern. He sent the information above at 3:14 pm 6-29-17. Mike Holtmeier sent pictures of the burn pit and the resident's property for review. From the pictures, it looks like the ACD and burn pit are not being operated correctly. I also received a message and a call from the concerned party about the issue. The Burn Permit in question is SL17-018. Mike Holtmeier's pictures are attached for review.</p> <p>Mike Holtmeier, of the City of Washington Fire District, called me June 29, 2017 to relay information about a burn concern on a burn permit that the St. Louis Regional Office had issued. The burn permit in question is SL17-018. Mr. Holtmeier stated that he told Mr. Howell not to burn for the rest of the day until the Fire District could contact the St. Louis Regional Office, Missouri Department of Natural Resources.</p> <p>June 30, Mike Holtmeier emailed pictures of the burn pit and the concerned resident's property, which are attached to the concern form. From the pictures, it is observed that the burn pit debris is higher than the ACD air current. I also received a message and a call from the concerned party on June 30 about the concern, explaining that ash was still flying above and hitting her house.</p> <p>I spoke with Mike Holtmeier about the permit. He agreed to contact the City of Washington Dispatch to let them known not to give Mr. Howell permission to burn until we discussed the issue. I then called Brian Howell to let him know that he should stop burning and to not burn until I discussed the issue with my supervisor on Monday.</p> <p>July 3rd, I called Mr. Howell and told him to be mindful of the wind direction (not to burn if the wind is going towards the concerned party's house) and to correct the ACD burn pit. He responded that he didn't notice that the ACD pit was set up incorrectly, but that he would check it and be mindful of the weather. I let him know that I would talk to Mr. Holtmeier about lifting the "no burn" ban and that if we received another concern call, the MODNR, APCP program might have to terminate the burn permit. Afterwards, I left a message for the City of Washington Fire Department to life the "no burn" ban.</p> <p>July 14, I called Brian Howell to see if he had burned since the concerned call. He stated that the winds hadn't been favorable and it rained on the days where the wind was favorable. Mr. Howell said that if the weather continues like this, he will ship the debris rather than burn it. He also said the concerned party eventually contacted him about her concern and that his business may possibly power wash her deck.</p> <p>July 31, I called Mr. Howell again to follow0up on his operation and to see if he had burned recently. Mr. Howell said that he hadn't been burning, but that he might in the next dew days because the winds were supposed to be favorable.</p> <p>I called the concerned party on August 2 and left a follow-up message to see if she had any further concerns about the burning since her initial concern.</p>							

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
SLRO	2017-07-06	2017-07-03	Mississippi Sand (099-0008)	Festus	Jefferson	Fugitive Dust	TS	
Concern No.	32073	Concern Info	<p>Description on concern report #1660 as submitted online and referred to SLRO. "For several years, the sand plant has operated 24 hours a day. We live, literally, across the street from they are they are now mining. Recently, wetc discovered piles of sand on our pool deck. We found it odd. Then, while cleaning out the robotic pool vacuum, I found that it was full of sand. The problem with this its that Mississippi Sand is mining SILICA sand. Several years ago, we went there to purchase sand for our children's playground. They explained to us that we could only have certain sands that they mine, because some are so find, they are considered carcinogenic. So, now their sand pile is visible from the upper deck of my home, and their carcinogenic sand is blowing across the ridge onto my property. Where I'm raising my children. It is bad enough that the road is always covered in sand and rock dust from the 24 hour parade of trucks coming in and out. But, I will not have my children out in danger. I've been told that this is a definite concern. We have reached out to Fred Weber Inc, and they have shown concern. However, I worry that we need a third party involved to monitor "how" they resolve the issue. In my opinion, this should never have happened in the first place. Please. This must be some sort of violation of code when mining a carcinogenic, extremely find sand that has now become airborne. Thank you."</p>					
Comments	<p>On-site investigation commenced at 9:45am on July 6, 2017. It was 76 degrees F, and 6mph northerly wind, and mostly cloudy. I drove to the end of VFW Drive to where the road was closest to the quarry operations and walked around the immediate area. The vegetation, ground, and roadway visually appeared free of quarry dust, silt, or sand. No address or contact information of the complainant was provided other than the email address, so the impacted property was not checked. I conducted an air pollution source compliance evaluation inspection of Mississippi Sand and the findings indicated compliance. The report on that inspection is under a separate cover. The complainant's name was obtained after I sent her the email response below: On July 6, 2017 3:34pm "Sims, Tom" ,tom.sims@dnr.mo.gov.wrote: Good afternoon! I visited the site today and staff showed me the sand pile that looked like could have been a source of "fugitive" emissions you reported. They stated that they lowered the elevation and leveled the top, capped the surface with soil, grass seeded, and spread straw. They said they finished this work last weekend after receiving a report from a neighbor of sand getting on their property. I confirmed that a soil cover was added to the sand pile and inspection their operation while I was there. The inspection indicated compliance with issued air pollution permits, with proper operation of pollution controls. The site is operated with regular gravel road watering, a truck washing station (required use prior to egressing to pavement), and street seeping of VFW Drive and paved areas within the plant to control dust and tack-out; therefore, reasonable measures appeared as required. The facility is periodically inspected by our office for compliance with air pollution control requirements. From what I found out there today, it appears that the height of the subject sand pile could have allowed some sand to migrate during windy and dry conditions and when conditions are becoming stormy. I believe that the on-site actions taken should help reduce the potential for fugitive emissions to leave the site and Mississippi Sand was reasonable responsive to address the matter. If in the future you find or determine otherwise or if you have any further questions on the matter, please feel free to contact me. Thank you,</p>							
SLRO		2017-07-07	Stevenson Heating Cooling	St. Peters	St. Charles	Other	TG	
Concern No.	32057	Concern Info	<p>On 7/7/2017, I received a call from Susan Laird who stated that Stevenson Heating & Cooling has been releasing Freon from A/C units behind their shop which is across the street from her residence at 14 2nd Street in St. Peters. She witnessed the employees releasing Freon at approximately 9:00am on 7/7/2017 and emailed a photo during the release (See photo below). She noted that she and her children were inhaling the fumes.</p>

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
SLRO	2017-07-10	2017-07-07	Homeowner	Glencoe	St. Louis	Burning	SW	
Concern No.	32070	Concern Info	Anonymous caller stated that neighbor is a "frequent burner" of wood, leaves and branches in Wildwood. He has hundreds of split logs and has been burning for a couple of years on his 3 acres that are surrounded by subdivisions. Sometimes the smoke is very thick and crosses the road, impairing driving. Smoke also enters the caller's home. Yesterday he saw the Monarch FPD come and watch as the burner put the fire out; the caller stated that the fire was re-lit after the fire truck left. The police have also been called in the past and Monarch FPD has been out numerous times according to the caller. The caller water to remain anonymous because he ahs seen the burner outside shooting guns and fears he may have a temper.					
Comments	No visible signs of open burning were detected during a 10 minute site survey conducted prior to entering the property at 1122 Hwy 109, Glencoe, Mo. A pile of split wood was visible at the rear of the property and there was evidence that an open burn had occurred. Mr. Blechle stated he thought it was ok to burn out in the country as long as it was a small fire. Mr. Blechle stated he does not leave the fire unattended and has a water hose ready if needed, I provided Mr. Blechle with copies of Fact on Open Burning Under Missouri Regulations PUB02047 and OPEN BURNING REGULATION ST. Louis Metropolitan Area. We reviewed the sections pertaining to open burning yard waste in the St. Louis Metropolitan Area within an incorporated area. Mr. Blechle stated he would find out if he lived within the Glencoe incorporated area.							
SLRO	2017-07-11	2017-07-10	Thomas Hughes	Cedar Hill	Jefferson	Burning	DB	
Concern No.	32096	Concern Info	Cedar Hill Fire Department called with a concern about open burning at 44 El Jer, Cedar Hill, MO. The fire department sent five incident reports over from five times that they responded to burning at the above address. According to the reports, the owner, Thomas Hughes, was burning yard debris for the purpose of disposal on 03/18/2017,05/06/2017,05/30/2017,06/03/2017 and 07/07/2017. The fire department stated that in each offense, the owner was given MO DNR guidance on open burning rules.					
Comments	I spoke with Mr. Hughes by phone on July 11, 2017. He stated that he has been burning yard debris for the purpose of disposal. I informed him that he can not burn yard waste for the purpose of disposal unless he obtain a permit. We discussed open burning between September 16 and April 14 of each calendar year since he lives in an unincorporated area of Jefferson County. I mailed a copy of the department's "Facts on Open Burning Under Missouri Regulations" fact sheet with a business card.							
SLRO	2017-07-17	2017-07-14	Clemens House	St. Louis	St. Louis City	Asbestos	DB	
Concern No.	32146	Concern Info	On July 14th, I received a call from Stefene Russell stating that when the Clemens House located at 1849Cass Avenue burned down Wednesday, asbestos was released and spread covering surroundings areas with dust she believes contains asbestos. Ms. Russell noted that the Red Cross did sampling on July 13th of the dust and it came back positive for asbestos. Ms. Russell would like to be kept abreast of what action is taken to remediate this problem.					
Comments	Due to the release of asbestos being from a fire due to an abatement, demolition or renovation, the asbestos NESHAP does not authority over the environmental concern and has no authority to ensure that the debris from the fire is properly managed. I initially suggested that the City of St. Louis Health Department may have the proper authority to regulate the cleanup under their asbestos ordinances to Ms. Russell on July 13,2017. The City of St. Louis contacted MoDNR EER about their ability to provide assistance. Skip Ricketts with MoDNR Environmental Emergency Response called on July 17, 2017 about our authority over the asbestos concern due to the fire at the Clemens House. I explained the limitations of the asbestos NESHAP over this particular issue and Mr. Ricketts stated that the EER does not have that capability to collect and analyze samples of suspect asbestos containing material. I emailed Joe Trunko, MoDNR Solid Waste Unit Chief, about the potential of soil waste having authority over this concern on July 17, 2017. Mr. Trunko stated that the solid waste rules is not suitable to amage the situation either. EPA Region 7 EER was called in to assist by the MoDNR and has thus taken over the emergency under CERCLA. Tom Sims, SLRO Source Air Unit Chief, instructed me to close the investigation because it is now being managed under the direction of EPA Region 7.							

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
SLRO	2017-07-14	2017-07-14	Spirtas Wrecking Co	Hazelwood	St. Louis	Industrial Site Specific	JM	
Concern No.	32147	Concern Info	Complainant alleges that in demo of warehouse, the refrigerant of the air conditioners is released to the atmosphere.					
Comments	The site of a former warehouse is in the process of being demolished. Larry Thornton is the onsite supervisor. The inspector informed Mr. Thornton of the complaint. Mr. Thornton informed the inspector that Rapid Recovery removed the refrigerant from the air conditioning units. The inspector was shown some the air conditioning unit and a refrigerator. There was a red tag on the air units and the refrigerator which stated the refrigerant in a manner compliant with Section 608 of the Clean Air Act.							
SWRO	2017-07-20	2017-06-19	Billy or Bret Girrard (spelling?)	Camdenton	Camden	Burning	MU	
Concern No.	31805	Concern Info	Fiberglass boats being filled with construction debris, shingles, siding (maybe fiber glass), old large white pipe and burned. Neighbors are making burn piles 150-200 yards off Lain Ln, East side of the road. Smoke blows onto concerned party's property. Also tore apart a mobile home in April and burned it (on the west side of the property). Camdenton FD was contacted in April but referred concerned party to us, stating that environmental issues were outside of their jurisdiction.					
Comments	No violations observed No further action at this time.							
SWRO	2017-06-22	2017-06-19	Bill Schoeneweiz	Diamond	Newton	Burning	CG	
Concern No.	31828	Concern Info	Neighbor has demolished and burned a mobile home. Concerned party is worried that the owner will bury the debris. Mobile home was burned on 6/17/2017. Newton county sheriff officer Rico Engberg has been on site. CP also mentioned that a gas pipeline is in the area and Mr. Schoeneweiz may have placed shipping containers on the pipeline. Ms. Williams again made contact with the department and will provide pictures of the home, demolition, and burial. Ms. Williams said that Mr. Schoeneweiz is burying the building on June 19, 2017. Ms. Williams has again contacted the Newton County sheriff for assistance. Ms. Williams is concerned that the burial of the demolition waste may contaminate wells in the area. caller:ddranch22@hotmail.com (cell)(417) 439-7182					
Comments	Violation of open burning regulations.

SWRO	2017-07-13	2017-06-20	Mike Caddell		Lawrence	Animal Waste / Air Odors / Open Dumps	AM	
Concern No.	31841	Concern Info	<p>FROM: glendaew43@gmail.com TO: Name: Glenda Schoen Address: 16867 Highway H City: Mount Vernon, MO 65712 State: Missouri Zip: 65712 Phone: 417-235-4569</p> <p>Alleged Violator's Name: Mike Caddell Alleged Violator's Address: Pierce City, MO Alleged Violator's City: Lawrence County between Freistatt and Pierce City Alleged Violator's State: Missouri Alleged Violator's Zip: 65723 Tip or Complaint: My friend owns a farm across the road on 2170 West of Freistatt, MO. Mr. Caddell owns the farm directly across the road. The past two weeks a box trailer has been brought to the Caddell property and situated just inside the fence on Caddell property not far from my friend's house. At 2:30 in the a.m. a large tanker truck comes and dumps waste such as chicken guts, blood, etc. The smell for quite a distance is very noticeable and distracting. I am wondering if something such as this is allowed or is their a law against. Please advise if you can. Thank you for listening. GS Specific Directions: Across the road; intersection is 1/4 mile away. Violation Still Occurring? Yes</p>					
Comments	There is evidence of a spill along the fence line which has runoff into the road ditch.							
SWRO	2017-07-14	2017-06-21	Robert & Janette Raby	Miller	Lawrence	Burning	CG	
Concern No.	31859	Concern Info	<p>Caller reports that the Flea Market frequently burns tires behind their building. He said they did so over the weekend and were at it again today. They have been reported in the past.</p>					
Comments	No violation.							
SWRO	2017-08-04	2017-06-23	Brian Forsythe	Gravois Mills	Morgan	Burning	MU	
Concern No.	31878	Concern Info	<p>Concern Party is concerned his neighbor that is burning mobile home trailers is not following the proper procedures. He does not break down the mobile home to separate the materials it is made of. He just burns then down to ground for the iron, copper etc..</p>					
Comments	Some demolition waste was still seen on site, however no burning of demolition waste was observed at the time of the investigation. Solid waste will be writing a letter outlining proper disposal methods for the remaining waste on site.							

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
SWRO	2017-06-26	2017-06-23	Dan Piddington	Ozark	Christian	Open Dumps / Burning / Land Disturbance	MK	
Concern No.	31879	Concern Info	This a Report an Environmental Concern [#1649] information sent from JC- My landlord purchased a property in which a large home burned. The agreement made with the previous owner, was the previous owner was responsible for the removal of the burned structure. The previous owner is tearing down the home and digging a hole to bury the contents. My concern is that there are two creeks near the home and unknown materials left over from the fire. I am a Deputy Sheriff who lives on the property and am concerned about the legalities of this disposal.					
Comments	Home burn accidental, clean up in progress. No violations.							
SWRO	2017-08-17	2017-06-26	NF Protein	Nevada	Vernon	Air Odors	CG	
Concern No.	31952	Concern Info	Caller states the odor started building and became strong around 2 p.m. on June 26th. Caller lives a few blocks south of NF Protein and 3 blocks west of I-49.					
Comments	No violation. No odor leaving property at time of investigation.							
SWRO	2017-07-27	2017-06-27	Heartland Pet Food	Joplin	Jasper	Air Odors	CG	
Concern No.	31953	Concern Info	Caller said she is frustrated at the terrible odors coming from the Heartland Dog Food Factory in Joplin. She said it is located at 32nd and Kodiak in Joplin but was unsure if it was Newton or Jasper county as it was close to the line. Caller said she has talked to the chamber of commerce, they spoke with the company who had agreed to cook on weekends so businesses are less affected by the odor but caller said it is unbearable on weekends. She last smelled it Friday Saturday and Sunday June 23, 24, and 25 all day and evening. She does not smell it now. She had relatives over and the smell was unbearable to be outdoors or driving. She smelled it from her location at 1743 Kodiak, Joplin. She is frustrated because the plant assured them before they built that it would be a 'state-of-the-art odorless facility' but later after building said 'it was not economically feasible to be odor free.' She is frustrated that they were told one thing but now the company is not honoring what they originally said. She is further frustrated that they are adding on to the plant now. She wants to know if there is anything else she can do or call to get the plant to stop emitting these odors as it is a nuisance, it brings down the value of property, and they can't go outside on days when it smells.					
Comments	No violations at time of investigation.							
SWRO	2017-07-06	2017-07-06	Lonnie Pederson	Fordland	Webster	Burning	MU	
Concern No.	32000	Concern Info	people tearing down house - the material is being pushed into a pile and burned resulting in heavy black smoke at this time. The SWRO APCP unit Chief was contacted regarding the burning.					
Comments	Some of the demolition waste was pushed into a pile and on fire during the investigation. The fire was unattended during the investigation.							

Monthly Air Pollution Control Program Detail Report

Region	Inspection Date	Date Received	Suspected Source Owner/Operator	City	County Name	Type of Concern	INSP Initials	NOV
SWRO		2017-07-07	City of Eldon	Eldon	Miller	Burning	MU	
Concern No.	32058	Concern Info	Concerned party concerned about an unattended open burning at a city of Eldon's public location at the edge of city limit near Highway Y. He said when the wind blowing west the smoke will get to the residences. The burning site is less than 1000 feet. The city burned last night and left the site. He said he contacted the city and the polices came warning him to stay off the site or got arrested. He did not know the exact burning material. He wanted the investigator to contact him first to get his exact story.					
Comments	burning slightly past burn permit timeframe, however isolated incident and will be more careful in the future							
SWRO	2017-07-06	2017-07-07	Unknown	Fordland	Webster	Burning	MU	
Concern No.	32099	Concern Info	Burning demolition wastes from an old house. Concerned party said the smoke was thick and smelled like burning plastic. Said the City of Fordland issued a burning permit for burning wood only and the alleged party just burned everything (insulation, asphalt shingles, plastic). Husband has asthma and could not breath due to the smoke. City of Fordland closed on Fridays.					
Comments	. Some of the demolition waste was pushed into a pile and on fire during the investigation. The fire was unattended during the investigation LOW issued via concern 13004 and tracked in that concern.							
SWRO	2017-07-26	2017-07-10	Christian County Highway Depar	Nixa	Christian	Burning	MU	
Concern No.	32078	Concern Info	Christian County highway department is hauling off old mattresses and couches and burning them. There are more at this location that they are planning on burning as well.					
Comments	The area where it is all located is a staging area to keep things until proper disposal. I saw no evidence of burned items in the pile. No violations observed							
SWRO	2017-07-06	2017-07-12	Marty Peterson	Fordland	Webster	Burning	MU	
Concern No.	32109	Concern Info	Caller said that someone is working on tearing down a house and is burning is in small increments. Caller thought that it could possibly be the property owner and said that the property owner lives in Lebanon and gave the name Marty Peterson. Caller said that the house has been in disrepair for years. The person doing the burning will spent a few hours getting a burn pile going, burn it, and then do it again. Caller said that cops have told the person several times to stop doing it and the Fire Department has been to the location as well. The approximate address is 728 W. Main in Fordland. It's the small house on the north side of the road located on the block between Jenkins St and Schultz Street. Caller said this started on the Fourth of July. Caller also mentioned that this is right across the street from the mayer's house.					
Comments	Some of the demolition waste was pushed into a pile and on fire during the investigation. The fire was unattended during the investigation. Letter of Warning issued through concern 13004 and tracked through that concern.							
SWRO	2017-08-02	2017-07-14	Sunny Hills Garden Center	Kirbyville	Taney	Burning	MU	
Concern No.	32162	Concern Info	On July 14, 2017, the concerned party reported that Sunny Hills Garden Center was burning green waste at the time of the phone call (Approximately 10:30 AM). Sunny Hills Garden Center reportedly burns their waste on a regular basis. At the time of the call, the concerned party said she could see the smoke from the burn pile from a mile away.					
Comments	I found that the facility had not applied for an open burning permit as required for a commercial facility. During the investigation I visually observed a single burn pile that was still smoldering. USF issued							

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.
