

Section (5) Permit Required

Regulated Activities:	The modification of a major or minor installation when the modification by itself has the potential to produce emissions below the <i>de minimis</i> level for each regulated air contaminant. An installation with project potential emissions above <i>de minimis</i> levels may request voluntary limits to <i>de minimis</i> levels for review under this section. The limit can be based on the entire installation or the project itself, depending on the preference of the applicant. With installation-wide or project limitations, the installation will be required to track emissions from the entire installation or project for compliance with the designated limit.
Fees:	\$100 filing fee \$50 per hour of review time
Required Documents:	Two copies of the completed application form.
Length of Permit:	This permit does not expire. However, construction must commence within two years of permit issuance. The permit may be revoked if construction is not started within this timeframe. The applicant may apply for an extension for commencing construction as long as the conditions of 10 CSR 10-6.060 (6)(E)2 are applicable.
Pre-Construction Prohibition Waiver:	An applicant may request a pre-construction prohibition waiver. This allows <i>construction</i> of the applicable equipment. The department may grant the waiver if all criteria for a waiver are met. An applicant must receive the permit prior to start-up of operations. A fact sheet on pre-construction waivers is available at: http://www.dnr.mo.gov/pubs/pub2014.pdf
Processing Time:	State regulations require the department to issue a <i>de minimis</i> new source review permit within 90 days of receipt of a complete application. If additional technical information is requested during the permit review, the time spent by the applicant preparing this information is not included in the 90 days.
Pre-application Meetings	Pre-application meetings or conference calls are encouraged for projects at existing major installations that have a possibility of being a major review.
Public Participation:	None required
Applicable Statutes:	RSMo 643.075
Applicable Rules:	10 CSR 10-6.060, 10-6.020, and 10-6.010
