#### Concern No. 34143

**Concern Info**
Caller states that renovation of the old nursing home on the east side of town is being conducted by a Mr. Gary Wilson. No asbestos inspection is alleged to have been conducted in the structure prior to the start of renovation. The caller states that the structure was sold to the new property owner about a month ago, and renovations began approximately 2-3 weeks ago. They elaborate that the structure is being converted into a restaurant/hotel.

**Comments**
Unable to make contact with anyone at the site. Information is being mailed to the site. No violations were observed during the site visit.

#### Concern No. 34790

**Concern Info**
CP called stating air and groundwater concerns due to activities at the Ideker Asphalt plant. CP stated that a soot is located 300 yards from CP residence and runs 24 hours/day causing health problems from the CP’s family. CP also states that stormwater run-off is leaving the site and polluting the nearby stream. CP stated that the area of concern would be pointed out if the department contacts the CP upon arrival. CP wants the department to ensure all permits/regulations are being followed.

**Comments**
No violations observed. Recommend additional watering and/or sweeping of plant entrance.

#### Concern No. 34984

**Concern Info**
Mr. Gary Derteram of EPA called on June 5, 2018 and informed that Ms. Paula Newman called and informed him that her neighbor (Ms. Lisa England) piled household trash from a truck and getting ready to burn. The trash include plastic bottles, diaper and wood. This is the second time Ms. England has piled and burnt trash at this location.

**Comments**
No violations were observed. Information about Missouri’s open burning regulations will be mailed to the property owner.

**Concern No. 35068**  
**Concern Info** The Peak residence in Calhoun is burning unknown items. It is located at 3rd and Maple and is the first house on the left after going north on Hwy J (Maple). They are burning now at 12:35, June 14, 2018. There is lots of black smoke and a terrible/horrible smell. They have previously been cited by the Department. The caller does not know exactly what they are burning.

**Comments** No violations were observed. Information was provided.

**Concern No. 36610**  
**Concern Info** I have neighbors that are constantly burning trash in their yard. Putting out black smoke and making the neighborhood smell of burnt plastic and trash.

**Comments** The owner admitted to violations, but there was no evidence that this was a continuous problem. The owner was informed about the regulations and what to do to avoid problems in the future.

**Concern No. 36645**

**Concern Info**

Caller says a barn was burned down on farm at intersection of County Farm Road and Highway O in Lexington (just north of County Farm Road and West of O Highway). He said it was still smoldering today. There is a track hoe sitting there, so he thinks they are going to bury it. He said it’s the property with a newer house with a machine shed behind it, and you can see the pile of dirt from them digging the hole. Caller says he looked up the owner in the plat book and it was listed as Valoree Maycock, whom he says is a city attorney.

**Comments**

Demolition debris was burned in violation of the Open Burning Regulation.

**Concern No. 36660**

**Concern Info**

Dumping by Sultany trucking onto Hunt Midwest property is keeping us inside due to concerns over the air quality and what we are breathing. As of today, the dumping only continues to get worse. They dump all night long which in itself should provide a clue as to whether or not this is permitted or should be allowed. Of course no one will come out to check at night. Please help us.

**Comments**

I have been out at the site and the odor off the property could not be detected at a 2:1 ratio. If we are in the area, we will swing by to see if there is an odor.

**Concern No. 36680**

**Concern Info**

Fumes from soldering and welding noticed at residence, as well as bright lights from metal working. Submitter lives across the street from the company. Submitter wondering if the company in compliance and is it permitted/legal?

**Comments**

Activities are unlikely to be in violation. Directed the concerned party to the City of St. Joseph. No site visit conducted.
Concern No. 36675  Concern Info  Chemical smell in the air around 7:30am on 12/18/2018, that is so strong that CP can't breath without covering their face. The odor was still present when the CP called at 12:10pm. There is the Courtney Ridge Landfill and a quarry nearby. The quarry was recently active according to the CP.

I called the CP for more information and she indicated that the odor had a sulfur quality but could not be more specific. The smell is noticed about once a month but usually overnight and weakends during the day.

There is a tree farm to the north and golf course to the west right next door that she listed as potential sources of the odor.

A report was filed with EPA - #1233366

Jessica Collins was in the area and drove by the concern location at 1:45pm on 12/18/2018. She did not observe any odor.

Comments  Insufficient information available to determine a responsible source. A solid waste inspector was in the area the afternoon of the call and did not detect the odor. No further action can be taken until more information is available.
Concern No. 36698  Concern Info

Good morning,

I am passing along an air complaint. Information below:

Details:
Bad odors over I-435 bridge and state line, Missouri side. Wants to ensure they are not toxic/poisonous.

Submitted by:
Paula
816-896-0812

Alleged violator:
Unknown industrial source – possibly sewage treatment plant
Source contact: Aveen Noori

Best Regards,

Keith Johnson
U.S. EPA Region 7
Air Permitting and Compliance
11201 Renner Blvd.
Lenexa, KS 66219
913-551-7737

Comments: Event is no longer occurring. Will inform Blue River and water pollution unit of incident. Air unit will monitor when in area.

Concern No.  36736  Concern Info  Large tanker type trucks, and some smaller. They release co2 in large quantities from these trucks into the air "DAILY". Usually between 1:30am and 4:00am. The noise awakens us DAILY!!!

Comments  The activity described does not appear to be regulated. I provided the concerned party with contact information for the City of Independence's codes enforcement.

Concern No.  36738  Concern Info  Surrounding neighborhoods including Gracemoore and adjacent city of Pleasant Valley, MO. Foul odor of automotive paint and mixing products fill the air - depending which direction the wind is blowing odors can be smelled in different locations. I live in the City of Pleasant Valley and could not keep windows open in the spring or summer time for fear that it would lead adverse affects on my family. The other evening it was so over powering it almost made me sick to my stomach when I pulled up to my child's school in the Gracemoore neighborhood to pick her up. Most homes in this area are older, have ver poor insulation and are very drafty - so who knows how much contact people have with these chemicals.

Comments  No onsite investigation was conducted because the plant is currently on winter shutdown. Information was provided to the concerned party.

**Concern No. 36742**

**Concern Info**
Ward Development/KAT excavation are once again burning trees in the Woodbury subdivision. This was a nuisance last fall...They stopped after multiple complaints of ash/smoke affecting neighboring properties. On or around 12/28/2012 (first noticed on the 28th) they started AGAIN. I can smell the burning inside my home. Smoke was seen late into the evening or 12/28/2012. They ARE NOT working or doing anything at all to control this, smoke is being pulled into my home's HVAC system. It is absolutely a nuisance to nearby property owners and they need to be stopped. They've shown in the past (permits have been revoked previously) that they don't care about following regulations, they need to be shut down permanently. Last fall the fires were left unattended overnight, witnessed by neighboring property owners in both the Woodbury and Whitney Hills subdivisions. As I type this it literally smells like I'm grilling inside my living room, I'm concerned not only about the smell/nuisance/loss of use of my property but the health affects on my child who has asthma (aggravated by the burning last fall leading to multiple ER visits) as well as the possibility of elevated CO levels inside neighboring homes.

**Comments**
KAT may have burned for about one week toward the end of December without a permit; however, there is no burning currently occurring at the site.

**Concern No. 36834**  
**Concern Info** Driving North to South from 800 Road head to 50 Hwy there was the smell of manure. The skies are clear, I believe the temperature was about 21 degrees at about 0815 today 011019. As you are aware Valley Oaks sits to the East of Al Gossett road. I could smell the odor with the windows rolled up and it was stronger of course when I rolled the window down. According to the weather the wind is from the SE at 5 to 10 miles per hour.

**Comments** This facility is exempt from the Missouri Air Commission regulations for odors.

**Concern No. 36823**  
**Concern Info** The Valley Oaks Facility produced a strong odor all day that day. For some reason, they were moving a lot of manure and it went on all day. Very strong odor. Not acceptable to anyone.

I have my complaints of odor logged. Is there an email that I could send the whole log, or I can continue to do one day at a time, as your site allows.

This happened on January 6, 2019

**Comments** This facility is exempt from the Missouri Air Commission regulations for odors.

### Concern No. 36997

**Concern Info**  
CP had concerns about St. Joseph air quality being poor in general and about three facilities specifically. Since each facility concern was slightly different they are being entered separately.

> CP reported odors from the City of St. Joseph sewer system and says you can see gases coming out of the sewer. He said it is really bad after rain. CP has contacted the city sewer department - they told him they have cleaned the sewer, but he says he hasn’t seen them doing it or noticed any difference. City sewer department also told him what he’s seeing from the sewers is heat.

### Concern No. 36998

**Concern Info**  
CP had concerns about St. Joseph air quality being poor in general and about three facilities specifically. Since each facility concern was slightly different they are being entered separately.

> CP reported a problem with odors from Triumph Foods. He said it smells basically every day and all the time, although summer is worst. He said it may not smell much with it being very cold out, but when it warms up a bit or rains it is a problem.

**Concern No. 36999**

**Concern Info** CP had concerns about St. Joseph air quality being poor in general and about three facilities specifically. Since each facility concern was slightly different they are being entered separately.

CP lives near Lifeline Foods. He says there is frequently mill dust in the air and he finds it all over his car. He says he has called Lifeline Foods twice and it will stop for a day or two, but then it gets bad again.

**Comments**

We could not determine if tires were being used to light the brush piles on fire. We will be sending him some information on the open burning regulations to help prevent anything from happening in the future. No violations observed.

**Concern No. 36996**

**Concern Info** Neighbor is using old tires to start brush fires on their farm. CP spoke with Jason Bennet at the Butler Fire Dept. who went to investigate a burning call at the same site. Burning happens intermittently but not consistently. Usually started in evening. Fire started at 10:40 am on 2/1/2019 during the call to report the concern.

**Comments**

We could not determine if tires were being used to light the brush piles on fire. We will be sending him some information on the open burning regulations to help prevent anything from happening in the future. No violations observed.

**Concern No. 36965**

**Concern Info** Discharging pollutants in the air.

**Comments**

This concern is in regard to a facility located within the city limits of Kansas City, MO. Furthermore, the facility has been issued construction permits by the delegated local agency, Kansas City Air Quality, and does not appear to need an operating permit. Therefore, this concern has been referred to the Kansas City Health Department's Air Quality Program for investigation.

Missouri Department of Natural Resources  
Tuesday, March 12, 2019  
Page 16 of 69
Concern No. 36984  Concern Info  I work for an out of state ready mix concrete plant owned by Dawkins Onsite of South Carolina.

I have brought all of these concerns to management's attention and have been told not to worry about it.

The plant is not operating under the conditions of their construction/operating permits. They do not have a three apron cement retention system in place where the trucks are loaded. The baghouse or cement reclaimer has been full and not working since 09/2018. They have no replacement cartridges on site to replace the full ones. When the plant is in operation there is a constant and steady cement cloud that flows out into the atmosphere. The cement coats the job site and is also blowing and covering the surrounding residences near the construction site. This is an everyday occurrence that last for up to 16 hours a day. It blows so much at times it darkens the sky!

The wash out pits they have in place were not built to spec. They are just holes dug in the ground at the rear of the plant and are dumped into. The water from these pits overflows into the ditch and field behind the plant. It then travels down a natural waterway into a private lake and creek.

They have several leaky concrete chemical tubs that drain out onto the ground and flows into the same waterway.

This out of state company is making millions off this job and has no concern about the pollution they are creating.

I have repeatedly ask them to address the issues and made them well aware that they are in direct DNR violations.

### Concern No. 37001

**Concern Info**

Fire Department reports that the property owner has been burning multiple times. He has an old house that was torn down and he lights the demo debris on fire and then leaves. Fire includes shingles.

Fire Department is currently waiting for a Ray County Deputy to arrive on scene before they respond. They will take pictures and write up an incident report.

**Comments**

Brandon Rowell admitted to tearing down an old house on his property and burning it. He was not aware of the regulations regarding the removal of construction debris that prohibited the burning of such debris. Mr. Rowell agreed to comply with the regulation and signed an acknowledgement letter. A letter of unsatisfactory findings has been mailed to Brandon Rowell.

**Concern No. 37067  Concern Info**  Caller states that Axiom Impressions is bypassing their control equipment again. He says there was so much smoke it looked like it was on fire when he was on his way into work this afternoon. He had also noticed a smell again last night.

**Comments**  The facility was in violation of Construction Permit 122005-002A Special Condition 1.F., which specifies the facility shall maintain zero opacity, and Special Condition 1.A. which specifies all emissions from the four printing presses shall be vented to an RTO.

Axiom will include information on the malfunction/repair of the damper in its response to the 1/18/19 LOW.

| KCRO   | 2/13/2019         | 2/13/2019     | KCP&L - Hawthorn Generating Station | Kansas City Jackson | Other | MC |

**Concern No. 37071  Concern Info**  CP is concerned that neighbor burns a lot of garbage and lots of smoke reached them. CP said they are burning plastic rig now, but they have burned tires in the past. CP stated that the man who lives there brings truckloads of garbage from his work home to burn. He just moved into the house over the summer and has been burning since then.

**Comments**  RP property was described as first house on left on Lilac when turning onto Lilic from Highway HH, but also as 2nd trailer home there.

---|---|---|---|---|---|---|---|---
NERO | 12/21/2018 | 12/21/2018 | Shane McClintic | Monroe City | Open Burning | BK | |

**Concern No.** 36697  
**Concern Info** On 12-21-18, at approximately 9 a.m., caller reports someone has demolished a large house and is burning it little by little. Caller reports they are burning it currently.

**Comments** Violation of Open Burning Rule 10 CSR 10-6.045, issuing letter of Unsatisfactory Findings for burning less than 2 cubic yards of demolition waste.

---

NERO | 12/27/2018 | 12/21/2018 | Terry and Wanda Harrison | Laddonia Audrain | Open Burning | BK | |

**Concern No.** 36728  
**Concern Info** The caller reports that on December 20, a house in Laddonia caught fire and burned. The house is owned by the Harrison family of Laddonia. The smoke from the fire filled the caller's house with heavy smoke overnight. The house may have had asbestos siding. The fire department responded finally to the burning, but did nothing to put it out. The caller is concerned that there will be additional dilapidated houses in Laddonia burned for disposal. The city council tried to apply for a grant to demolish several houses, but found that there were liens against some of the properties that prevented them from doing so. The city council may be supportive of this way of clearing houses. Allegedly, the family owning the house was cleaning junk and items from the house the day it caught fire.

**Comments** No violation of the Missouri Open Burning Requirements was found during the investigation, informational letter being sent to property owners with requirement to properly dispose of remaining debris within 6 months.

---

NERO | 1/2/2019 | 12/26/2018 | Scott Christopher | Fulton Callaway | Open Burning | DB | |
### Concern No. 37081
- **Concern Info**: An anonymous letter received at Air Pollution reported that someone is burning something bad at 4160 CR1259 at Millersburg. The odors are so bad that it causes difficulty with breathing and can be smelled inside with the windows closed.

From previous investigations, this may be Terri Watson (573-881-0592) and Scott Christopher (573-881-3374), who were issued an LOW for open burning in 2017. Mr. Christopher was issued an NOV for open burning in 2014.

- **Comments**: Violation of the Open Burning Rule. Small amount, unable to confirm responsible party. Closed out.

### Concern No. 36796
- **Concern Info**: Received call from city official referring complaint regarding open burning at 609 (906?) Main in De Witt. Caller stated that complaint was that various materials including trash, wire, boxes, insulation is burned here often. Resident scraps out cars and appliances on site, has made place very junky. City has spoken to him and he has been very uncooperative. City sent certified letter to landowner about the issue and they responded that since he paid his rent on time they could not do anything.

Resident: Chris Woodsmall, 609 Main, (660-229-1139)
Landowner: Richard & Cindy Tietjens, ?? Hwy 24 (phone unknown)

Previously investigated 9/26/18 - ACE#36032, no violation, burning household trash in barrel. May need to call ahead since he is not usually home. Neighbors don't get along.

- **Comments**: No violation of the open burning rule was found at the time of the investigation. An informational letter will be sent.

### Concern No. 36910

**Concern Info** The caller reported that he works for a trash company that hauls into the Columbia Landfill and this afternoon at around 2 p.m., was allowed to drive up to the working face while an asbestos load was being dumped and/or buried. He was concerned that he was exposed to asbestos during the event. He said that the dozer operator waved him back into his truck and told him that he shouldn't be there as they were covering up asbestos. He said he was told that the scale operator was new and failed to stop the trucks at the scale while the asbestos load was being dumped. He said that there was a City of Columbia trash truck parked at the working face also. He said that he now had a scratchy throat and was concerned about asbestos exposure. Also, he said that he did not believe they were marking where the asbestos loads were buried. He said that they were covering over the asbestos with other trash and had dug a hole to dump it in.

**Comments** No violation of the Missouri Air Conservation Commission Law, including the Asbestos Requirements, was found to have occurred during the investigation.

### Concern No. 37080

**Concern Info** CP stated that their neighbor has been dumping their trash in their backyard, and burn it as a means of disposal. CP is concerned that the trash and burn residue will wash into their stream and contaminate it. CP stated that they have grandkids that like to play in the stream, and are concerned about the trash affecting their health. CP stated that they have not seen trash in the stream, but believe that it could happen with a heavy rainfall. CP stated that they reported a similar concern approximately one year ago, and never heard anything back. The MSWML and Missouri Open Burning Law were discusse with the CP, and they still felt that an onsite visit was needed.

**Comments** No violation of the solid waste management law was identified during the investigation. An informational letter will be sent.

### Concern No. 36500
**Concern Info** CP states he has lime all over his yard and his car is covered every morning. He also stated they are pumping more out at night when no one can see it. CP did not want to give his name or any major street he lived by but during the conversation he mentioned living by the VFW.

**Comments**
I investigated this concern on 12/18/18 and visited the streets around the VFW in Ste. Genevieve, which were approximately a mile from Mississippi Lime. I did not observe dust on vehicles or any property in the surrounding area as the concern states. As an inspector of the facility, I am aware that Mississippi Lime utilizes many control measures and stays on top of all permit conditions to remain in compliance.

I spoke with Mr. Kennedy of Mississippi Lime on 12/21/18 through email and he stated, "Our kilns are continuously monitored so there should be no concern of turning controls at night. In theory there should be less of a chance of issues that occur at night as there is much less activity compared the day."

No further investigation necessary on this concern at this time.

### Concern No. 36667
**Concern Info** This is a local trash service but they were burning shingles and roofing supplies on the property.

**Comments**
At the time of my investigation on December 19, 2018, no violation was observed. There was no open burning occurring and no evidence of open burn. I spoke with Mr. Marty Kintz on January 7, 2019, and I informed him that we had been contacted in regards to open burning. Mr. Kintz stated that only household trash was open burned at this location. The open burning of household trash in outstate Missouri (provided that the residential premises has not more than four residential units and the household trash is generated on the same premises) is exempted in 10 Code of State Regulations 10-6.045 Open Burning Requirements (3)(A)3. I sent the listed fact sheets by mail with my card in case there were any questions about the state of Missouri’s regulations.

No violation was observed.

**Concern No. 36775**

**Concern Info**

County Road 308 and 307. It can be seen plainly from the road.

They are down along the Mississippi river and they have cleared the banks and land around the river. This is causing the land to erode and is displacing sand onto surrounding farms. They have made huge brush fires and threw a bunch of auto tires on the pile and set them on fire.

Russ Mothershead is the one heading the dozing and his worker is Charlie Heisserer.

The CP believes the company name is Midwest Grain & Barge Co. at the SEMO Port authority.

**Comments**

I spoke with Mr. Russ Mothershead by telephone. He stated that he is the landowner at the location specified in the concern. He was cleaning up his farm and open burning some of the vegetative wastes (i.e. brush piles). I informed him that burning tires was not permitted by the state air regulations and I faxed him (at 573-334-5512) a copy of the fact sheet Facts on Open Burning Under Missouri Regulations. Mr. Russ Mothershead stated that he would pass this information along to his employees, so that they would be aware of the state’s regulatory restrictions. First Missouri Terminals is the parent company that includes such entities as Midwest Grain & Barge Company.

No violation was observed.

Concern No.  36709  Concern Info  Blowing sawdust everywhere. Cloud of dust.

CP is former MODNR Employee in the APCP and seen this while driving by the facility. Mr. Little let Kathy Kolb in the APCP unit in JC know, who in turn forward the info to our office. Mrs. Kolb telephone number is 573-526-2031.

Comments  At the time of the investigation, the wind speed was out of the west at 9 miles per hour. No violation was observed. The facility does have a sawdust pile on site but personnel suggested that it was sold in a timely way since there is a market for sawdust. I informed the facility personnel that there is a regulation that is applicable to dust crossing property lines that requires them to take reasonable action to prevent such occurrences. I left a copy of the air regulation (10 Code of State Regulations 10-6.170 Restriction of Particulate Matter to the ambient Air Beyond the Premises of Origin) and related fact sheets (Dust Suppression on Unpaved Roads, and Odor, Dust, Asbestos, Open Burning and Freon Emissions) with the owner. The facility's sawdust pile is near the north side of US Highway 60 (westbound lanes). The owner, Mr. Bruce Asplin, stated the facility had not had a problem before; but they will watch for and address any future problems. No violation was observed.
Concern No. 36710

Concern Info: Facility is pumping stormwater into creek and causing the water to be murky. Also the odors from the facility is really bad lately.

Comments: On 1/2/19, I met with Stephen Wherry (Prairie Valley Landfill) at the site. Mr. Wherry provided access to the facility grounds and outfalls on the site. He advised that they have been pumping water from a cell (not in use) that has a rain cover on it. The discharge goes to a retention basin that then discharges from Outfall 007. No visible concerns were identified in the basin, or the discharge coming from Outfall 007. The discharges coming from Outfalls 007, 008, and 009 provided no visible concerns, nor was there any visible impact to the receiving stream. We did discuss making sure that during rain events, that surveillance be conducted to identify any runoff concerns and additional BMPs needed.

I made contact with the CP on 1/3/19. He stated that he did not visibly see the discoloration, but was advised by another individual of the concern. In the past, he referenced the receiving stream was discolored during pumping. I provided him with my findings.

No visible runoff concerns were identified during the investigation.

**Concern No.** 36759  
**Concern Info**  From the EPA Tip or Complaint: The smoke and wood chips are falling from this wood burning company just outside of city on the people of the city and workers of Licking Missouri to the point of allergies, difficulty breathing, sore throats, swelling, skin disorders, etc. I have pictures of the daily solid thick smoke and wood chips falling but the site won’t let me send them. Thank you

**Comments**  I investigated this concern on January 10, 2018. At the time of investigation the weather conditions were, 39?, Partly Cloudy, Wind from the SE @ 3 mph and 40% Humidity. At the time of investigation, the plume from the cyclone was blowing straight up and dissipating on site/on property. There was no sign of particulate matter leaving the property at the time of investigation. The plume is mainly a large cloud of steam.

I then went on site and discussed the concern with Chuck Wilson, the Operations Director. He informed me that the facility operates from 5 a.m.-2:00 p.m. Monday through Friday. Therefore startup of the cyclone is early in the morning and sometimes may occur a time or two throughout the day for one reason or another. During these startup times, a darker smoke is usually observed in the plume for around 45 seconds. There were no wood chips blowing around in the air or off the property as the concern had addressed.

Mr. Wilson stated that they are still recovering from a fire that took place in July 2018 in the bagging area. There have been no other malfunctions since the fire.

I proceeded by performing an air compliance inspection while at the facility. Mr. Wilson is fairly new in his position but has worked at the facility for a few years. He replaced the previous director but is proactive in anything that needs done or performed differently. No compliance issues were observed at the time of inspection/investigation.

I called and left a message with the concerned party on 1/16/19 and have not heard back as of yet.

No further action.
### Concern No. 36764

**Concern Info**  
Call from the fire chief in Cuba about dealings with the owners of a burnt motel on the north outer road in Cuba. He has been on site a couple times after calls of them burning construction debris etc. The police have also been called there a couple times to cease burning the debris. He stated that they may be salvaging some materials, but a lot has already been burnt. The owner’s last name is Patel, also associated with other hotels/motels around the state and country. He mentioned that the owner stays/lives in another building right there by the burnt motel.

**Comments**  
I investigated this concern on January 3, 2018 and met with fire chief Mike Plank with the Cuba Fire Protection District. I followed Chief Plank to the burnt motel and we met with the owners of the property. I spoke mainly with a lady, Ms. Heni Patel, who translated the conversation with the other manager/owners. She stated to me that the demolition of the burnt structure was complete and that the remaining building is to be remodeled. I inquired about open burning and disposing of the demolition waste. She stated that most everything had gone to the Prairie Valley Landfill just north of Cuba. I asked for her to provide me with landfill receipts. See the attached receipt that she later emailed. I also asked if an asbestos inspection had been performed and that a demolition notification should have been submitted to the Air Pollution Control Program at least ten working days prior to demolition activities. I asked about open burning as the fire department had an incident report from the night before and she stated that not much had been burnt of the structure.

There was no asbestos inspection performed and a notification of demolition was not submitted to the Air Pollution Control Program prior to demolition activities. There was also a burn site behind the remaining structure.

I gave Ms. Patel a couple fact sheets as listed below and stated to her that I would be in contact. I informed her not to burn anything else and to properly dispose of all remaining demolition waste.

A Letter of Warning is being issued for failure to have an asbestos inspection, failure to provide a notification of demolition and for open burning.

Concern No. 36792  Concern Info  Mississippi Lime is producing a ton of lime out of their stacks. It is happening a lot at night and it is getting all over vehicles and houses.

Comments  I just investigated this same concern on 12/18/18, see the notes from the last investigation.

"I investigated this concern on 12/18/18 and visited the streets around the VFW in Ste. Genevieve, which were approximately a mile from Mississippi Lime. I did not observe dust on vehicles or any property in the surrounding area as the concern states. As an inspector of the facility, I am aware that Mississippi Lime utilizes many control measures to maintain compliance with permit conditions. Records review does not indicate any exceedances. I spoke with Mr. Kennedy of Mississippi Lime on 12/21/18 through email and he stated, "Our kilns are continuously monitored so there should be no concern of turning controls off at night. In theory there should be less of a chance of issues that occur at night as there is much less activity compared to the day."

This is also the 7th similar concern on Mississippi Lime since January 2018. The caller never leaves a name to contact and there has not been any compliance issues or exceedances from the facility to report from the investigations.

No further investigation on this concern at this time.
### Concern No. 36833

**Concern Info**: Large amount of pallets are burning.

**Comments**
Lamphier Pallets has been out of business for several years. Ms. Jennifer Vandergriff is the owner’s daughter. Ms. Vandergriff is trying to clean up and sell the property. The local fire chief required Ms. Vandergriff to obtain an open burning permit prior to continuing to open burn.

No open burning was occurring during the investigation.

On January 17, 2019 an open burning permit was issued for the Lamphier Pallet location.

### Concern No. 36919

**Concern Info**: Business is burning fiberglass window frames in a pit.

**Comments**
Upon arrival Ms. Amy Baker and I observed a small pit with burned debris inside. There was not any open burning occurring at the time of the investigation.

The property is the location of the old Brown Shoe factory. The building was purchased by QMI Agricultural Product of Parma.

Mr. Bob Baker stated they had open burned untreated wood and other items from the storage building they purchased in 2018.

We discussed the open burning rule with Mr. Baker. Mr. Baker stated they would stop open burning the regulated waste generated from the business. No further action at this time, continue to monitor when in the area.

### Concern No. 36964

**Concern Info**
I talked to a AMEREN Technician unhooking the power to a vacant home on State highway E in Scott County. He stated the plan was to burn the house. I noticed the siding was similar to the asbestos siding my mother had on a shed in Springfield.

- I there a health hazard created when demolition is done by burning? What is a safe distance? The highway is within 50 ft T two nearest residence are 400 ft distance.

- Main concern is the potential asbestos particles created by a rural fire department burning an older home near the public.

**Comments**
I spoke with Mr. David Speidel on February 1, 2019, and I explained the fire training requirements and what is permitted under the state and federal air regulations. I answered the various additional questions that are in the initial interview above. I went to the location on February 7, 2019, and I noted r signs of any open burning. The residence had been disconnected from electric power, however. I failed to find anyone at the site and took some photographs and a gathered a global positioning system location while in the area. I returned to the office and had difficulty finding a telephone number for the responsible party. I contacted the Scott County Assessor's Office on February 20, 2019, and I was able to get a State Highway E physical address and a mailing address from the Assessor's office personnel. Scott County did not have a telephone number on file for Mr. Kyle Glastetter, however.

No violation was observed.

</tbody>
</table>
Concern No. 36748  Concern Info  EPA Region 7's report stated the Fleming Enterprise is burning wood with lead-base paint and asphalt shingles. The wood and shingles were generated from the demolition of houses.

Comments  I called Mr. Fleming on 1/2/19. He stated that burned a brush / scrap wood pile a few days ago. The wood came from clean ups at two sites where two residential structures were demolished at. The houses were not close by to each other. Mr. Fleming stated that the wood waste was taken back to his site at 618 Hill Creek Road, Beaufort, MO and burned in a 15x15 pile. 618 Hill Creek Road is not in an incorporated area and is greater than 200 yard from any occupied structure. There was no burn permit issued for this burn. Mr. Fleming denied burning any asphalt shingles and treated wood. He stated that he just cleaned up some scrap wood from around the demolished houses. He did not know who demolished the houses.

On 1/2/2019, I visited the site where the burning occurred. I spoke with Mr. Fleming on the phone about the concern and provided him a copy of Pub 2047: 'Facts on Open Burning Under Missouri Regulations'. Mr. Fleming stated that he understood the requirements and that he would either cease burning or get an open burning permit for burning untreated wood waste only. I filled out and Open Burning Acknowledgement Form in the field and had Mr. Fleming sign the form. I emailed a copy of the form to him.

### Concern No. 36809

**Concern Info** I received a phone call concerning an ACD Burning on a construction site in Fenton Missouri

**Comments**

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal
Concern No.  36810  Concern Info  On 1/4/2019 @ 8:02 AM, I received a complaint from Ms. Schepers about smoking and fire near her home. Ms. Schepers stated that Bloomsdale Excavating are having multiple fires and smoke is all over the area.

Comments  On 1/4/2019 @ 8:15 AM, I called Bloomsdale Excavating company at their main office (573) 483-2564. They gave me the name and phone number for their site supervisor Clayton.

On 1/4/2019 @ 8:20 AM, I contacted their site supervisor Clayton at (314) 808-4892. Clayton informed me that all fire ceased and fire chief Bob Dunn was there in the morning to affirm that.

On 1/4/2019 @ 8:30 AM, I called fire chief Bob Dunn (636) 575-9572 and he told me there was no fire and steam was forming due to warmed ground covering the contents of the incineration pit and hitting cold moist air of the morning.

On 1/4/2019 @ 8:40 AM, I called Ms. Schepers to inform her of what was found, she was not pleased and hung up on me.

**Concern No.** 36988 **Concern Info** Received 1/28/2019:

Complaint. Forwarded for review/action. Please update ECO with the disposition of this complaint. Note: this inquiry was received during the government shutdown.

-----Original Message-----
1/2/2019 4:15 PM
HQ LEAD NUMBER: FY19-181234-3708-CV
SUBJECT: Referred to Region - Missouri
FROM:   
TO:  

Alleged Violator's Name: KC Fleming
Alleged Violator's Address: 618 Hill Creek Rd
Alleged Violator's City: Beaufort
Alleged Violator's State: Missouri
Alleged Violator's Zip: 63013

Tip or Complaint: There are old houses being torn down by Fleming Enterprises, they are hauling the houses and burning them @ 618 Hill Creek Rd Beaufort Mo 63013. They are burning everything from shingles and siding to everything on the inside. The houses are old, more than likely containing asbestos and lead. This has been going on for over a month. Please help so this can come to an end, as we are tired of breathing in this nasty air and before our water is affected by this carelessness. Thank you!

**Comments** I investigated the concern with Teresa Thevary, Environmental Specialist. We drove along the length of Hill Creek Road and did not observe any signs burnt materials. We saw what appeared to be a large barn being constructed on the east side of the road, near the north end. The area around the construction had been cleared and stripped of vegetation; under one acre. We saw several large piles of chopped lumber, as well as various scrap metal along the road, but none that appeared to have been burned. We did not approach the property owner due to the plain sight doctrine.
### Concern No. 36942

**Concern Info** Tip forwarded via retransferred voicemail:

> Apartment complex located at 107 N. Newstead in St. Louis City built in the 1920's is being remodeled and asbestos is being removed and thrown in the dumpsters

**Concern No.** 37113  
**Concern Info** PER EMAIL, THE OWNER IS MAKING PAINTERS PAINT IN A IMPROPER AREA. EXPOSING OTHER EMPLOYEES AND THE ENVIRONMENT.

**Comments** The complaint involves employees and environment being exposed to paint and solvents; paint being thrown in dumpster and internal fan to blow fumes and overspray outside. In addition, the complainant said he is getting dizzy and headaches from fumes.

An investigation was attempted on 2/13/19, however, the individuals stated to be the Comptroller and Purchasing Agent indicated the Owner and General Manager were out of town and they did feel they could let me in the site. The inspector left his card for the Owner. The owner contacted the inspector before the end of the 13th and indicated he would be back in town the week of February 18.

February 19, 2019, Mr. Kurt Alvarado, the General Manager of the plant, escorted the inspector around the plant. At the time of the investigation in addition to 2/13/19 visit, there were no odors present outside of the plant. Mr. Alvarado took me to the dumpster where I found dust filters and contain which showed dried paint on some of them. No liquid paint or filters with paint were found in the trash. There was no evidence of paint matter around the yard. Mr. Alvarado indicated that paint filters were put into containers and properly disposed of according to instructions from Mr. Lemma Zewdie who performed a hazardous waste evaluation in October of 2018.

Inside the facility, there was the odor of solvent, but it was not overpowering. Mr. Alvarado indicated that when paint was done, the painter wore protection, respirator, covering of clothes and eyes. Employees not involved with painting were given personal protection which they could wear or not.

#### Concern No. 37036  Concern Info  
"Auto painting business - fumes from shop on residential private party."

**Comments**

2/8/19: I found the site in question on Google Maps. The entity appears to be a couple of detached garages and a residential structure.

The address is not a registered generator per Fees and Taxes. I searched through the air pollution and hazardous waste complaint folders and determined that this site has not been investigated previously as a concern by air pollution or hazardous waste.

On 2/13/2019, I arrived at the site of the concern. I spoke with the owner, Mr. Hoops. He stated that the painting that he does in his garage is not part a business and that it is for a racing hobby that he has. He stated that he does between 2 and 4 cars in his garage per year.

Since this is not part of a business, the entity is not an installation and thus not subject to 10 CSR 10-6.060 "Construction Permits Required." The entity still is subject to the National Emissions Standards for Hazardous Air Pollutants. Missouri has not accepted enforcement of this rule yet.

---

#### Concern No. 37041  Concern Info  
The caller stated that Scubaz Auto Works is painting cars without a paint booth. The caller is concerned that Scubaz is not following regulations like everyone else and should be made to follow the same rules that other businesses are following. The caller also stated that the owner of the business was evicted from his house and has moved his family into the business.

**Comments**

I arrived at the site on 2/11/19 and spoke with the owner, Steve Richards. He explained that he is doing some touch up painting before he sells some cars. He does not currently have a paint booth. The painting is done in his garage. I explained to Mr. Richards that since he does not have a paint booth he would not qualify for the auto body construction permit exemption found in 10 CSR 10-6.061(3)(A)2.Z. I explained to Mr. Richards that he could either get a paint booth and meet all the other conditions noted in 10 CSR 10-6.061(3)(A)2.Z., he could evaluate his painting operation to see if it meets another exemption, he could submit an application for a construction permit or he could stop painting with spray guns. I told Mr. Richards that he could paint with aerosol spray paint without the need for a permit.

Mr. Richards emailed me on 2/14/19 and stated in his email that he was going to use aerosol spray paint instead of using his spray guns.

**Concern No. 37043**  
**Concern Info**  
Complainant said building materials such as floor tile, electrical, and wall boards are being removed that may contain asbestos from the remodeling of an automobile dealership, during afterhours mainly in order to circumvent local building notification and permitting requirements.

**Comments**

SLRO 2/14/2019 2/13/2019 Midwest Service Group St. Charles Asbestos DB

**Concern No. 37163**  
**Concern Info**  
An anonymous concern was forwarded from APCP about Midwest Service Group's management of equipment that comes out of asbestos containment. The concern includes pictures of equipment that appears to be covered in material that may I ACM.

**Comments**

On 2/14/19, I completed a file review of the site. The entity was investigated last year after a concern about the management of asbestos waste onsite No violations were noted during this investigation. I was planning on investigating the site on 2/15/2019, however, due to bad weather, I was not able I investigate.

On 2/28/2019, I arrived at the location of the concern (Midwest Service Group's Warehouse) and spoke with Jeff Blanton and Cory Elliot with Midwest Service Group about the concern. I investigated the equipment in the warehouse. I found some debris on the foot of two ladders and took samples of debris. I did not find anything to sample on the wheels of the negative air machines or on any of the scaffolding equipment. Midwest sampled independently behind me of everything I sampled. My samples were dropped off at EMSL for analysis after my site visit.

On 3/6/2019, I received the lab analysis back. All samples were negative.
### Concern No. 37047

**Concern Info** "caller reported an individual is burning an unknown amount of used motor oil in a burn barrel at their residence."

**Comments** I visited East Sugar Lane in High Ridge, Missouri on Wednesday, February 20, 2019. From Meadow Drive and East Sugar Lane intersection, I drove on East Sugar Lane until the end of the Lane. There were 3 houses on the right and 4 houses on the left side of the East sugar lane. I parked at beginning and the end of the Lane and looked around. I did not see burning of used motor oil in a burn barrel at the residences I observed at the time the visit.

### Concern No. 36654
#### Concern Info
former Holy Cow Drive in being demolished without an asbestos inspection.

#### Comments
The results indicated that asbestos was present in floor tile of the facility, but less than one percent making the material unregulated. Another sample of roofing material tested at four percent chrysotile. The roofing material is considered to be a category one non-friable material and can remain in place during the demolition. Unsatisfactory findings issued to facility for violations and corrections completed before the report was written.

RTC 12/27/2018

---

### Concern No. 36668
#### Concern Info
Caller reports resident is burning plastics and rubber about every two weeks and the odor is very strong and offensive.

#### Comments
Did not observe any open burning occurring at the time. No further action at this time, if more concerns are filed, further investigation will be necessary.

BURNING EVERYDAY!!

Person is leasing to buy farm from Ray Stanley and leasees father has farm trucking business. Tires have been come from a business.

Fathers business is out of Golden City. They have multiple farm equipments and semi's that has generated the tires.
Comments

Mark Urbanek and I observed from the county road and the property driveway a pile of approximately 300 mixed tires on the ground. These tires consisted of passenger, light truck and semi-truck sized tires. Also observed in this area were numerous vegetative waste piles due to land clearing. After documenting the vegetative piles and the tires we began to drive away and encountered a semi-truck and trailer full of tires on 575th Road heading to the property. We returned to the property and observed the driver of the semi getting ready to dump approximately 100 tires onto the property. I approached the driver who identified himself as Mr. Harlan Reuter, employee of Mr. William Stefan. Mr. Reuter stated that he had been instructed by his employer to dump the tires onto the property and that the tires were to be used on the vegetative waste piles to make the fire burn hotter. I explained to Mr. Reuter that the tires could not be dumped on the property and that the tires had to be returned to the original site. Mr. Reuter agreed, and gave us the contact information of his employer, Mr. William Stefan. After our conversation Mr. Reuter got back into his truck and left the property.

After speaking to Mr. Reuter I contacted Mr. Stefan. Mr. Stefan stated that the tires were from his farm trucking business and that he had his employee transport the tires to the site so that they could use the tires on the brush piles to make the fires burn hotter and faster. Mr. Stefan at that time was told that it was illegal to burn tires and that he would have to properly dispose of the tires according to scrap tire regulations. Mr. Stefan stated that he would remove the tires from the current property and take the tires back to his farm where they originally came from. Mr. Stefan was told that that would be fine however since the tires were removed for the intent to burn then he would have to properly dispose of the tires and to submit receipts of proper disposal. Mr. Stefan was instructed to either take the tires to a local scrap tire collection center, obtain a permitted scrap tire hauler to remove the tires or that he could cut the tires into thirds and take the tires to a permitted transfer station or landfill.

Mark Urbanek tried to contact the property owner, Mr. Larry Stanley. Mark left a message for Mr. Stanley to call him back however return call has been received.

Letter of warning for the illegal disposal of scrap tires on property with the intent to burn.

<td>Caller states his neighbor raises turkeys. He believes about 6 months ago they put in an incinerator. However, he says for the last few weeks, they smell burning turkey feathers and diesel fuel frequently. The caller was informed that the majority agricultural odors are exempt, but that the proper operation of the incinerator and the disposal of the animals could be investigated.</td>

### Concern No. 36771

**Concern Info**
Typical odors from Joplin. The concerned party was very upset and frustrated indicating that this has been going on for two years. Said she loves the outdoors and can't enjoy it anymore. She did not know the sources but indicated it came from one of the nearby industries. She already called the City's Health Department.

**Comments**
No violation.

### Concern No. 36784

**Concern Info**
Persistent burning of shingles and possibly pvc, insulation from wire, etc. Usually occurs at night and is very strong. Does not occur every night but has become more frequent. Burned on night of January 7-8, 2019. Caller states that the odor is more than just a burn barrel and always at night. Caller contacted the local fire department on the night of January 7, 2019 and they were going to look into it. The property where the burning is occurring is between 6815 Dutch Elm Drive on the north and 6496 Dutch Elm Drive to the south. The property where the burning is occurring is on the northwest side of Dutch Elm Drive. Google Maps shows two large borrow or denuded areas on the property at this location.

36.990863, -94.521538

At the time this concern was taken the Newton County Assessor's office stated that their internet connection was down and they could not look up owner of record information. Caller stated they think the last name is "Blood".

**Comments**
No Violation.

### Concern No. 36786

**Concern Info**

I got an anonymous call about a burnt structure at 842 Hwy 42 in Iberia. The building was a restaurant that burnt recently and is now being demolished and the property cleaned up. The call came in Friday, but I've been in Jefferson City and just got the information today. The caller is pretty certain that an asbestos inspection most likely hasn't been performed and they've also been burning on site the demo debris.

#### Comments

No violation.

### Concern No. 36801

**Concern Info**

Property has been operating an on-going yard sale for several years and is burning the unwanted items. At times trash has been noted as being in the ditches along the Highway 65. Burning occurs along the left side of the driveway, along the fence line. Very obvious from the highway. Burning occurs frequently.

#### Comments

No violation.

### Concern No. 36795

**Concern Info**

Burned a house down on the property and other debris on the property. Now it appears they dug a hole to bury the remaini debris. Fire Department been to the site and put the fire out twice and was going to refer to Department of Natural Resources. Unsure if that was done.

#### Comments

The fire department responded and found the remnants of the burned house/framework had been pushed into a pile and was on fire.

### Concern No. 36870

**Concern Info:** Business next door to the Division of Youth Services in Joplin is creating a health and environmental hazard in regard to air pollution. The business is emitting some sort of particulate matter that is drifting down onto vehicles and is not easily washed off. This can cause driving hazards as it is difficult to remove the particles from the windshields of the cars.

**Comments:** No violation.

Concern No.  36869  Concern Info  A Mr. Ron Huber visited the office on January 16, 2019 and shared with me he concern with his neighbors. Mr. Huber state his neighbors next door have been spraying a banned chemical called Chlorpyrifos (Dursband) pesticide in heavy amounts. The drift from the spray is affecting his neurons and synapses causing extreme sensitivity. He has the exact dates of when this chemical was sprayed.

January 16, 2019 I attempted to contact EPA via phone to pass this concern along to them but received a message saying due to the government shutdown we are on furlough please leave a message.

I then called Dianna with the City of Springfield, Missouri requesting assistance and she took the information and said she would see what she could do. Her phone number is 864-1905.

Comments  See SharePoint; 19312
### Concern No. 36877

**Concern Info**

Fire Chief has informed RP repeatedly that they cannot burn treated wood items (wood from house, furniture, etc.).

Perry Fowlers is remodeling home and piling in a vacant lot. 300 Croy Street, Sheldon, MO pile is located on lot east of residence. Reeds Construction demolished house and did not have asbestos testing or notification to DNR and was hauled to landfill in KS.

Jannie Clathlan has painted wood and siding that is trying to burn 3rd and B Highway, Sheldon, MO 37.661545, -94.294291 behind rock house to the south and has a large pile of carpet at 310 north 4th street, sheldon, MO 37.660942, -94.295649.

Stephanie Bzuchowski remolded home and have disposed of furniture, cabinets, and other things from remodeling in a pile and plan to burn. Her residence is at 300 south 3rd street, Sheldon Area of concern is at residence she manages at 107 west anderson, Sheldon, MO (cream colored house of corner of 2nd and anderson). Remodeling for hair salon on Main St. (around 212 or 210) in Sheldon, MO, Owners are doing that project and Fire Chief concerned about where waste is being hauled off to.

SWRO | 2/4/2019 | Mr. Ed Lucas | Humansville | Open Burning | Open Dumps: Construction a |

**Concern No.** 36953  **Concern Info** Caller indicated that Mr. Lucas and his family are hauling in items and removing wires, and then burning the wires to get down to the metal. The caller said they are smelting the wire. The caller said the yard is like a salvage yard.

**Comments**
Concern No. 36978

**Concern Info**
The concerned party Ms. Nikki Bridges lives at 892 Huckleberry Rd, Strafford, MO, and she called to report that the person that lives across the street from her house is burning household trash and trade waste. The person is remodeling the home and burning all of the demolition and items removed from the home. The waste is burned in approximately six to ten barrels. Ms. Bridges was concerned about the pollution from the waste being burned, and the amount of trash blowing onto her property.

Ms. Bridges did not know the exact address of the location of the home where the burning takes place.

**Comments**
On February 8, 2019 I conducted an inspection at 892 Huckleberry Road, Strafford, Missouri. On arrival, I pulled into the driveway and walked to the front door. I knocked and found no one home so I left a business card at the door asking for a call back.

While standing at the front door I could see several 55 gallon barrels used to burn trash. These barrels were full of household trash with some of the trash on the ground near the base of the barrel. I did not see any waste leaving the property.

On February 11, 2019 I was contacted by Mr. David Haden, Property Owner of the above mentioned property. Mr. Haden was advised of the concern. Briefly discussed how the Missouri Solid Waste Law and Regulations would apply to him. Mr. Haden stated when he purchased the house it contained a burn pile with several items such as mattress and recliner that had already been burnt. He said he burns his household trash in the barrels seen in the front yard. Mr. Haden has been advised not to burn any furniture, carpet or demo waste. All waste of this nature would need to go to a landfill or transfer station. I told him he could burn his household trash but to not let it leave the property. He understood.

### Concern No. 36979

**Concern Info**
On the afternoon of 2/5/2019 two separate residents called to report a concern of a contractor, Mr. Pablo Tapia, burning brush from his excavation business and treated lumber approximately 50 feet from residential homes. See attached photo that was emailed to the Department by one of the concerned parties. The Western Taney County Fire Department was notified of the concern, as well. The responsible party refused to give his name to the fire department; however, the residents completed a search based on his address and found his name. Mr. Tapia lives at 234 Mesquite Drive, Branson, MO. The concerned parties live to the east of Mr. Tapia on the other side of the woods, near Tall Oaks Drive and Blossom Valley, Branson, MO. Mr. Tapia owns approximately 11 acres between his home (234 Mesquite) and the homes of the concerned parties. The waste is burned regularly down the gravel road that goes to the northwest from Tall Oaks Drive and Blossom Valley (A photo is attached, which shows a fork in the gravel road where the waste is burned).

**Comments**
Violation of open burning regs.

### Concern No. 36982

**Concern Info**
Mr. Devin Blankenship, Environmental Public Health Specialist II with the Joplin City Environmental Department, reported the City of Joplin received an anonymous complaint about the odors at the Heartland Petfood Manufacturing facility at 8101 E 32nd St, Joplin, MO. Mr. Blankenship took a nasal ranger reading of 7:1 at the Heartland plant at 9:27 AM on 2/5/2019, and a 7:1 reading at the nearby Ajinomoto plant at 9:32 AM on 2/5/2019.

Mr. Blankenship stated that he would send the surveillance records to Ms. Tanya Turner and Ms. Camille Graves.
