**Monthly Air Pollution Control Program Detail Report**  
**Concerns Received or Investigated Between**  
**March 16, 2018 and April 15, 2018**

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
KCRO	3/30/2018	9/11/2017	Ford Kansas City Assembly Plant	Claycomo Clay	Odor	CS		

**Concern No.** 32676    **Concern Info** Heavy strong paint smell, I assume this is coming from the Ford factory. I live in the 64158 area code and can still smell it.

EPA believes we (KCRO) are currently working on this already?

**Comments** No odors observed at the time of the investigation.

KCRO	3/30/2018	9/14/2017	The Kandy Shop	Raytown Jackson	Odor	CS

Division of Environmental Quality

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p><b>Concern No.</b> 32707    <b>Concern Info</b> The body shop behind CP's house is venting paint fumes every day that have a lacquer/solvent odor. On a scale of 1 to 5, the odor can get to be a 5 at times.</p> <p><b>Comments</b> Went to the Kandy shop. Met with the owner who explained he stopped painting in October in order to avoid the concerns from the neighbor. He has a secor shop on Prospect Ave. where he takes the cars for painting. I viewed his operation and they only sand the cars at this location. There were no odors and no painting equipment on site.</p> <p>No violations observed. No odors. Painting has been discontinued at this location.</p>								
KCRO	3/30/2018	9/21/2017	Ford Kansas City Assembly Plant	Claycomo Clay	Odor	CS		
<p><b>Concern No.</b> 32782    <b>Concern Info</b> Strong odor believed from the Ford Assembly Plant in Claycomo.</p> <p><b>Comments</b> No odors were detected at the time of the inspection.</p>								
KCRO	3/21/2018	11/16/2017	Dennis Prochazka	Belton Cass	Open Burning	KS		
<p><b>Concern No.</b> 33247    <b>Concern Info</b> Concerned person complained that Mr. Dennis Trochazka burns stacks of 15 to 20 feet of wooden palletes usually at night at about 10 PM. Neighbors have complained to Mr. Trochazka several time but has not stopped burning. The Fire department was also informed but nothing has been done to stop Mr. Tochazka from burning.</p> <p><b>Comments</b> No violations were observed. An open burning permit application and fact sheet were sent via email to the responsible party.</p>								
KCRO	3/30/2018	11/21/2017	Ford, Kansas City Assembly Polant	Kansas City Clay	Odor	CS

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<p><b>Concern No.</b> 33276    <b>Concern Info</b> Anonymous caller alleged that there is a chemical odor at time like melting plastic sometimes like and sometimes both emanating from the Ford Plant in Claycomo near the Gracemor Christian Church and that at the given intersection there may be the smell for week, then it will stop, and then randomly for a few days. She talked to someone at the plant that stated the odor is much worse in the plant but perhaps may call back with a better assessment of dates when the production (of the process that produces the odor) will occur. Alleged that when dog walking in the area, a mask has to be worn because the odor is that bad.</p> <p><b>Comments</b> No odors detected during the investigation.</p>								
KCRO	3/21/2018	3/9/2018	Unknown	Harrisonville Cass	Open Burning	KS		
<p><b>Concern No.</b> 34068    <b>Concern Info</b> Neighbor is piling up trash and burning it. The property is classed residential. The smoke is blowing onto neighboring property. The trash also blows off the property as well.</p> <p><b>Comments</b> Unable to make contact with anyone at the site. Contact information was left at the site requesting contact with the regional office. No violations were observe during the site visit.</p>								
KCRO		3/16/2018	Mr. Gary Wilson	Gentry	Asbestos			
<p><b>Concern No.</b> 34143    <b>Concern Info</b> Caller states that renovation of the old nursing home on the eastside of town is being conducted by a Mr. Gary Wilson. No asbesto inspection is alleged to have been conducted in the structure prior to the start of renovation. The caller states that the structure was sold to the new property owner about a month ago, and renovations began approximately 2-3 weeks ago. They elaborate that the structure is being converted into a restaurant / hotel.</p> <p><b>Comments</b></p>								
KCRO		3/16/2018	Mr. Travis Bradley	Belton Cass	Open Burning			

**Monthly Air Pollution Control Program Detail Report**  
**Concerns Investigated Between**  
**March 16, 2018 and April 15, 2018**

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	<b>Concern No.</b> 34144		<b>Concern Info</b> Travis Bradley is a contractor that is hauling building waste and demolition waste to his house and burning it, on his driveway or in the back yard. Burning events occurred on February 17, 25, 27, March 3rd and 15th. The concerned party called the police on the February 17th event and the police called in the Belton Fire Department, and Mr. Bradley had to douse the fire with his garden hose.  Concered party had been in contact with Mr. Jim Brown, Belton Code Enforcement Unit who has surveyed the situation. His number is 816-331-4331, email: jbrown@belton.org  Mr. Bradley is reported to have hauled in dirt to cover up the burn marks in his yard and his driveway.					
<b>Comments</b>								
KCRO		3/19/2018	Livestock Nutrition Center	North Kansas City Clay	Fugitive Particulate Matter  Fugitive Particulate Matter			
	<b>Concern No.</b> 34149		<b>Concern Info</b> EPA received a letter from Eddy Watkins, of Watkins Lithography. Mr. Watkins states that the facility across the street from them, Livestock Nutrition Center (200 W 11th Avenue, North Kansas City) is creating a green fugitive dust which is blowing across the str and covering Watkins Lithographic's parking lot and cars. EPA states that they are certified as a minor air source, but has not been inspected recently.					
<b>Comments</b>								
KCRO	3/20/2018	3/19/2018	Westside Wastewater Treatment Plant	Kansas City Jackson	Odor	JH		
	<b>Concern No.</b> 34166		<b>Concern Info</b> In the twelve years since I brought my property on the bluffs above the Kaw River, the odor from this plant has grown increasingly worse. It's particularly noticeable when crossing the Lewis & Clark viaduct, but when the wind is from the north/northeast the smell is so bad that I can not entertain outside. It's embarrassing and inconvenient and the time to address the issue is long overdue.					
<b>Comments</b> No Odor violation noted								
KCRO	3/20/2018	3/19/2018	Westside Wastewater Treatment Plant	Kansas City Jackson	Odor	JH		

**Monthly Air Pollution Control Program Detail Report**

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	<b>Concern No.</b> 34167		<b>Concern Info</b> I am a resident here in Strawberry Hill and just wanted to share with you, directly, that the past few days have been atrocious in terms of air quality, thanks to the treatment plant(s) in the Bottoms. I have a foster child in the house and she think the neighborhood, literally, stinks, thanks to the treatment plant. We need you, or whoever is tasked with such determinations, to assign blame for this problem to one or both facilities, whoever the source of the problem might be. And we need the problem resolved.  If this was happening in a suburban community, I would bet this would be resolved over the course of weeks, not left unresolved for literally years. And I am very troubled that despite all of the supposed the talk, it seems like nothing has actually been done to resolve this problem, as the problems occur as regularly now as they ever have before.					
	<b>Comments</b>	There was no odor violation						
KCRO	3/30/2018	3/20/2018	Rock Creek Treatment Center	Independence Jackson	Odor	KS		
	<b>Concern No.</b> 34165		<b>Concern Info</b> CP has noticed a strong smell coming from a waste water plant for the past 4 years. They say it is getting worse and it has a strong chemical smell. It is a consistent smell throughout the day, they do not notice a time of the day where it is stronger. CP has not talked with the facility about it.					
	<b>Comments</b>	No violations were observed during the investigation.						
KCRO	3/21/2018	3/21/2018	Todd Creek WWTP	Kansas City Platte	Odor	MC		
	<b>Concern No.</b> 34179		<b>Concern Info</b> Todd Creek Wastewater Treatment Plant has extensive and unbearable smells coming from it. We are located SouthEast of the plant and can smell it up to half of a mile away. Our property is off of NW Walker road. We have not walked East of Walker road but would imagine the smell is traveling over that way as well. There are houses being built all over this area and at times this plant sends off unbearable smells. We are wanting to build on our property soon but noticed this smell when the wind is blowing in the right direction. Not sure if these smells are even safe for say kids to be playing outside. With the area becoming more populated it might be time for the city of Kansas City to consider solutions to this problem. It looks like this is not the first time this has been a concern either. I would refer the city to concern number 32183. The problem has been noticed since the fall of 2016.					
	<b>Comments</b>	Referred to Kansas City Health Department's Air Quality Program

Division of Environmental Quality

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	<b>Concern No.</b> 34222		<b>Concern Info</b> Complaint: Spease is spraying a substance in the evenings (approximately 7:00 pm). Strong solvent smell. Sprayed out side of building through hole that is approximately 4 – 5 ft.  Concerned party requested inspector call them prior to the investigation.					
<b>Comments</b>								
KCRO	3/27/2018	3/26/2018	Westside Wastewater Treatment Plant	Kansas City Jackson	Odor	JH		
	<b>Concern No.</b> 34239		<b>Concern Info</b> The West Bottoms plant(s) are putting off the now-usual odor, and it's been blowing into the neighborhood all day. You can imagine my concern at this point, especially since I'll be having family on my back porch for Easter dinner this weekend. I'd rather not have explain that it's 2018 and the Kansas Cities still haven't figured out how to manage sewage.  I also cannot understand if a smell can be "resolved" once reported, why it isn't resolved as soon as the smell is detected. Like, aggressively neutralized as part of the normal course of business every day, rather than at the begging of residents.					
<b>Comments</b> No Odor Violation observed								
KCRO	4/19/2018	4/2/2018	Liberty Carbon Services Inc.	Excelsior Springs Clay	Odor	MC		
	<b>Concern No.</b> 34300		<b>Concern Info</b> Official with City of Excelsior Springs says he's received multiple complaints about an odor coming from a company on Industrial Dr. He drove around and thinks it might be coming from Liberty Carbon. The only change he noticed was they had large tote bags covered in tarps. Jack recycles the carbon. There are homes to the south side of the facility. He described it as a putrid/chemical smell.					
<b>Comments</b> No excessive odors were detected during the investigation

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	34206		<b>Concern Info</b>					
			<p>Caller reports that the residents of the property at about 207 S Morris (actually 204 S Morris, house burned years ago) in Clark are burning waste and have no sewer since they moved out of the RV and into the garage.</p> <p>Caller states that the woman digs up boards from the old house that are buried along the foundation and by the fence and willow trees and burns them on the weekend, then buries the ash. Also reports that there has been black smoke on the weekends that smells like rubber.</p> <p>Caller also reports that there is a sewer smell from the site, so she knows they have no sewer connection. Caller believes that they are using a piece of electrical conduit as a fake sewer connection to fool the health inspector. Caller stated she hasn't gone over there herself to look, but can see from her house.</p> <p>Caller stated that Eric from the Randolph County Health Department will be coming down to look at the property and has previously written them a note requiring cleanup.</p> <p>Caller stated that she can't sell her house because of proximity to the messy property she is complaining about driving the value down.</p> <p>Assessor's site info: 204 S Morris, owned by Mid-Mo Homes LLC at 4952 CoRd 65, Belleview, MO 63623 Previous concerns: 8-3-17 - OB concern, found clean ash in burned stumps, no dirt from buried material, no evidence of illegal burning 6-29-17 - OB concern, found no recent burn, no recent dig sites 5-18-17 - OB concern, burned stumps w/ charcoal. Observed no remaining combustible demolition waste on site. Ash was clean with no mixed dirt from digging material up. 5-24-16 - OB concern, UF issued - small amount of C&amp;D waste burned. RTC 11-30-16.</p>					
			<b>Comments</b> No violation could be determined at the time of the investigation.					

NERO	3/23/2018	3/20/2018	Mr. Virgil Oberholtzer	Rutledge Scotland	Open Burning	BK		
------	-----------	-----------	------------------------	----------------------	--------------	----	--	--

**Concern No.** 34204 **Concern Info** Caller reported a garage owned by Virgil Oberholtzer near the burned building at 1st and Main sometimes burns something out back that puts out black smoke. Caller believes it may be oily rags or tires.

**Comments** Issued a Letter of Unsatisfactory Findings for violations of the Open Burning Requirements 10 CSR 10-6.045.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	<b>Concern No.</b> 34420	<b>Concern Info</b>	A letter was received at the Northeast Regional Office from Patricia Sommer with several concerns listed, including that the air at their property on the gravel road near Louisiana, MO is filled with dust. Because years ago there was a trash dump in the area that was used for dumping of dangerous chemicals, the complainant is concerned that there may be contaminants in the air they breathe. Other concerns were also expressed, including that the utility poles are leaning, the loose gravel makes their road dangerous to drive on, and the road is eroding. She would like a hard surface put on their gravel road.					
<b>Comments</b> No investigation conducted as what was alleged in the report was not a violation of the Fugitive dust rule. A referral was made to the Pike County Highway Department.								
NERO	4/5/2018	4/5/2018	Tague Steel and Iron	South Gorin Scotland	Open Burning	DS		
	<b>Concern No.</b> 34570	<b>Concern Info</b>	<p>Caller stated that railroad ties and scrap tires were being burned at a property near the school in South Gorin last night (04/04/18) around dusk and again today (04/05/2018). Caller stated that the smoke was thick and darkened the sky.</p> <p>Scotland County Sheriffs department informed me that they were called to the same property on the night of April 04, 2018 to put out the fire and make contact with the property owner. The Sheriffs department took photos and will return to the property today to put out the fire again.</p> <p>Upon return to the property the Sheriffs department stated that they were able to reach Mr. Bruce Parsons, property owner, and no further burning was noted, just thick smoke. Mr. Parsons informed the Sheriffs department that the fire was accidental from cutting catalytic converters from salvaged vehicles. During the removal of the parts, sparks or residual heat may have caused a fire at the property that was controlled on the night of April 4, 2018, with smoke lingering in the area. Mr. Parsons also informed the Sheriffs department that no salvaged vehicles were, or would be, rolled into a nearby pond.</p>					
<b>Comments</b> An accidental burning of prohibited materials occurred at the facility on April 4, 2018. The burning materials were extinguished by the local Fire Department to prevent further burning / damage to the property. The facility has taken steps to address this burning incident in preparations for further open burning events as the property is being cleaned up. An unsatisfactory findings letter, with the need for a response, will be sent to the facility in response to the burning incident.

	<b>Concern No.</b> 34571	<b>Concern Info</b>	<p>On 4/4/18 at 7:55 p.m., the caller called the spill line to report an ongoing fire at a salvage yard in Gorin. The caller could not provide the address but said that Gorin is a small town and you can't miss it. The caller thought that the name of the business was Steel and Iron Co. The caller stated there was thick black smoke coming from the fire. The caller did not want to notify the local fire or police.</p> <p>EER (Sappington) contacted the Scotland County Sheriff (660) 465-2016 to report the incident and to request that they conduct a drive-by. The Sheriff's Dept had already received another complaint about the fire and were about to investigate anyway. Sappington later spoke with Deputy Jeremy Head (Badge #528) with Scotland Co. Sheriff who was on-scene. He stated that there was an ongoing fire at the salvage yard and that there was no one attending it. He saw railroad ties, tires, an old gas tank, poles, and other trash burning. He will document the fire and call the local fire dept to respond and extinguish. To obtain a copy of his report, call his office at the Scotland County Sheriff at (660) 465-2151.</p>					
	<b>Comments</b>	<p>An accidental burning of prohibited materials occurred at the facility on April 4, 2018. The burning materials were extinguished by the local Fire Department to prevent further burning / damage to the property. The facility has taken steps to address this burning incident in preparations for further open burning events as the property is being cleaned up. An unsatisfactory findings letter, with the need for a response, will be sent to the facility in response to the burning incident.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	<b>Concern No.</b> 34220	<b>Concern Info</b>	City is burning down a house with asbestos. City condemned the house and pushed it down. Now burning the demo waste.					
	<b>Comments</b>	The structure involved was an old residence that had been used by the church to house the minister working there. The house was selected for demolition by Pentecostals of Advance church at first and then because of demolition delays the house was condemned as unsafe and actually demolished by the City of Advance using a backhoe. Subsequently, Pastor Ferris had burned some demolition wastes that he thought were appropriate to open burn. These wastes included wood wastes and some trash from the demolition. Pastor Ferris had been told by the Mayor of Advance, the Honorable Carl Ritter, that open burning the wastes would not be a problem. Pastor Ferris was highly cooperative at all times during the process.  A Letter of Warning was issued to Pastor Chad Ferris.						
SERO	3/21/2018	3/19/2018	Tri County Ready Mix	Van Buren Carter	Permitting	TR		
	<b>Concern No.</b> 34227	<b>Concern Info</b>	A new concrete plant has opened in the Van Buren area. The business name is Tri County Ready Mix. I don't believe they are operating with any air or water permits.  (copy of this concern also given to SERO WPCP unit)					
	<b>Comments</b>	The new ready mix concrete plant is a 100 cubic yards per hour capacity plant manufactured by Saint Marc Materials. There are two aggregate bins (one for sand and one for gravel), weigh belt system, conveyor, and truck loadout point. The plant is a dry batch plant that uses transit trucks to mix the ready mix concrete. There is a dust collector or fabric filter on the cement silo only. There is no fly ash silo. There is a propane storage tank of about 1,000 gallons size. There is a one million Btu per hour propane-fired boiler on site. There was a one thousand gallon diesel fuel tank in a metal containment also on site. There are sand and aggregate stockpiles on site. The site is about 15 acres in size located just south of State Route H off of Highway 21 east of Van Buren. The plant has one front end loader and six transit trucks. The new ready mix plant was in operation at the time of this investigation. I delivered various fact sheets and telephone numbers for the Missouri Department of Natural Resources Air Pollution Control Program and the Missouri Department of Natural Resources Southeast Regional Office.  Letter of Warning (LOW) was issued for failure to obtain an air construction permit prior to operating an air pollution source.

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	Concern No. 34464	Concern Info	The old black river restaurant and motel in the middle of town (Iesterville) they are tearing off the upper part and have all the debris huge piles around back and they are burning it this includes rotten lumber black tar paper insulation etc. That are being burnt in the middle of town . Shouldn't that be disposed more properly?					
	Comments	At the time of this investigation, the former Black River Family Restaurant and Motel had been gutted and was being renovated and repaired. Materials that had been removed were mostly piled in the rear of the building. I spoke with the on site contact Mr. Andres Urquidi, Kitchen Manager, for the new Mexican Restaurant that is planned at this location. Mr. Urquidi is living on site with his wife and is supervising a team of employees from Potosi who are working on the renovations. The building has a restaurant area down stairs and six motel rooms. The building sustained some water damage that necessitated repairs to the front of the building and the upstairs motel rooms, and restaurant were being renovated for the reopening. Mr. Urquidi stated that, while some of the wood was generated by the renovation had been open burned on site for disposal, it was planned that the rest of the materials including some masonry would be hauled site to a landfill or transfer station for disposal. Mr. Urquidi explained that, since the masonry materials to be disposed of made the renovation waste material too heavy for a roll-off dumpster, a semi-tractor trailer would be used. Mr. Urquidi pointed out that the open burning pile was next to the small dumpster on site. Mr. Urquidi stated that the fiberglass insulation was in black trash bags because it had been blowing off the site. Mr. Urquidi stated that the building had been inspected as part of the purchase and recommended that I contact the owner, Mr. Chris Harbison, to find out about the asbestos building inspection, since Mr. Harbison was not on site. I telephoned Mr. Chris Harbison when I returned to the office and I explained the situation. At his request, I e-mailed Mr. Harbison the environmental information that I had given to Mr. Urquidi on site. Since Mr. Harbison was unable to locate an inspection report, he called Mr. Mark Bonney, a state-certified asbestos inspector doing business as TruTest Environmental Solutions, for an asbestos building inspection (after the renovation was well under way). Mr. Bonney located a debris pile containing a popcorn ceiling among the drywall and other debris piles in the rear of the building. The ceiling material contained 2.50% asbestos content when tested by SanAir Technologies Laboratory using point counting. The amount of popcorn ceiling material was less than 35 cubic feet and not regulated as a notifiable project amount under Title 40 Code of Federal Regulations Part 61 Subpart M---National Emission Standard for Asbestos.						
		A Letter of Warning (with return to compliance no response required) was issued to Mr. Chris Harbison for failure to inspect a business for the presence of asbestos prior to commencing a renovation project.

Division of Environmental Quality

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	<b>Concern No.</b> 33954	<b>Concern Info</b>	The caller report she has been noticing bad smell in the area (South Spring Street) for some time now. It looks like somebody is burning tire. The caller indicated that the smell is most likely coming from Precoat Metals located at 4301 South Spring in St. Louis 63116. It is the only manufacturing company in the area.					
	<b>Comments</b>	3/8/18, after 1:00pm a quick drive by of area and no odor was detected. 3/21/18, between 12:10 and 12:30 pm drove around area. There was heat wave observed from stack on south side of building. A very faint chemical odor was detected on the south side of the building. No odor other than there. 3/28/18 between 10:1 and 10:45am, no odor on the south side of the plant, this odor smelt of burning vegetation then chemical. 4/2/18 8:30 to 10:00 am, no detectable odor. Went in facility, met with Cheryl Rogers, General Manager, Kevin Zumbaum, Safety Manager and Anu Singh, P.E., Environmental Director. Records were provided which indicated that Operating Permit requirements were being met for a period of February 18, 2018 to April 4, 2018. There was a breakdown of the thermal oxidizer 2/21/18. The operation was shut down within 20 minutes of problem. The problem was fixed within 2 hours of breakdown.						

SLRO	3/19/2018	3/12/2018	Midwest Service Group	St. Peters St. Charles	Asbestos Transfer Station	SW		
------	-----------	-----------	-----------------------	---------------------------	------------------------------	----	--	--

	<b>Concern No.</b> 34092	<b>Concern Info</b>	Midwest Service Group transfers asbestos waste from hundreds of jobsites at its facility in St. Peters. Friable and non-friable waste is separated out at the facility and is allowed to sit for weeks before it is hauled to a landfill. This has been occurring for 10 years (see attached concern letter)					
--	--------------------------	---------------------	--	--	--	--	--	--

**Comments** Robin Ledford and I arrived at 560 Turner Blvd. at 12:00 pm and drove to the rear of the building through the parking lots. We observed four blue (Republic Services) 40-yd roll-offs at the far end of the lot; three were labeled with asbestos labels and all were shut and locked. There were also numerous closed and stacked storage containers, box trucks rented from Enterprise, Midwest Service Group (MSGO trucks, Blanton Construction trailers and trucks, and an open top dumpster. There was no apparent waste on the ground or protruding from any container visible from our vehicle. We then proceeded to the front door, introduced ourselves, and asked Gail Kieffer and her coworker if we could speak to Corey Elliott or another Project Manager about asbestos and solid waste handling procedures. None were available so Jeff Blanton discussed general procedures with us and agreed to take us to the parking lot and allow us access to trailers, etc. We quickly confirmed that the open-top dumpster did not contain hazardous waste, it was used for metal items destined for recycling. One Enterprise truck had just returned from the field, it contained some equipment and 5 plastic asbestos bags, goose-necked, taped, leak-proof and with generator labels "Dick Ford". Through the plastic it was not possible to identify much suspect ACM, most of the waste appeared to be plastic and other waste. None of the bags appeared to be "adequately wet", however the project appeared to be less than regulated quantities. The Columbia Housing Authority containers are Asbestos Project #A7247-2017. The project has been on and off hold 22( amendments) times since beginning January, 2017, and has not been completed yet. The notified landfill is the Jefferson City Landfill. I informed NERO (Steve Boone) that some of the waste was being sent to Roxana, and on my request MSG amended the project with the Roxana Landfill (they confirmed that the build of the project waste had been transferred to the Jefferson City Landfill per the original notification. I had numerous conversations with Mr. Elliott in order to confirm that the waste in the roll-offs was being manifested and disposed of as ACM, that it was all from small projects except for A7247, and that was late call-backs to remove ACM discovered or uncovered as the ongoing renovation proceeded.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	34109		<b>Concern Info</b>		Concerned party prefers to remain anonymous; however, she has called numerous times and has spoken to the EPA and to Terry Ball (APCP Investigations, Jefferson City) and previously identified herself to them by phone and email.			
					Concern is about a wood-burning furnace located at Hermann Catering on State Highway H, southeast of the city limits of Hermann in a semi-rural area. Daily, from approximately 3:30 to 5:00 pm, the resident and co-owner of the catering company feeds the fire. Due to the amount and opacity of the smoke it can enter nearby residences, obscure visibility on the highway, impact school buses and students, and make it difficult for residents to enjoy their yards. The smoke is described as "toxic" and the complainant states she experiences a headache, sore throat, and burning eyes.			
					SLRO has sent 3 investigators to the site as anonymous complaints; the complaint was not confirmed. Complainant is requesting that someone be there between 3:30 and 5:00 pm and notes that the driveway at the residence across the highway is a good vantage point for observations - DNR has permission to park at that location.			
					SLRO has explained to the complainant the limits of our authority as regards to the wood-burning furnace that is apparently used for heating the buildings and water for the business and residence. We would need confirmation that the fuel being used is not clean wood and is something disallowed by state regulations such as trade waste. Complainant states that there is trash pickup along the highway; however no catering waste is observed leaving the premises in a dumpster and there is no other obvious non-residential waste appearance.

<b>Comments</b>	<p>I arrived at the location at 3:35pm on 3/21/2018 and as I was driving by noticed only wispy, white smoke being emitted from the stack of the furnace. I turned around, waited for 10 minutes, and drove by again, noting there was no change at 3:35pm. I turned around, waited 20 minutes, and returned at 4:05pm. At the time I saw copious amounts of brownish smoke so I pulled into the parking area of the catering business building and parked. Opacity was around 100% and the wind was blowing the smoke towards the rear of the residence and not across the road toward that house. Due to the lower elevation of the location where the wood burning furnace is sited, I could not see across the road when I was standing ant the furnace. The furnace could be seen from the road. I observed the smoke for about 1/2 hour, and although there were slight changes in wind direction it generally below towards the house or towards the rear of the house and down the valley. At 4:35 pm the smoke was again white and wispy.</p> <p>When I arrived I knocked on the floor at the catering building and rang the bell at the house; nobody answered. I looked around the area of the furnace and saw wood in the shed with a small bottle of charcoal lighter and 2 butane lighters, as well as 2 steel cans used for ashes (one was 1/2 full, appeared to be wood ashes). After the smoke died down I drove to the road and noticed that someone had arrived at the residence, so I parked in the driveway and rang the doorbell. A man answered, I introduced myself and I asked if he was Mr. Bruno "yes" and if Deborah Bruno was home "no". I explained the purpose of my visit and he immediately announced that the neighbor across the highway was always complaining about everything and that he only burned wood and that he wasn't doing anything illegal. I deflected, and asked if he would humor me and walk to the furnace with me, open the doors to it, and show me what was inside. He said I could do it myself, but I demurred and he agreed to it. He opened the ash box and the fire box. Only wood was inside, no flame was visible. Mr. Bruno explained that the furnace was controlled by the thermostat in the house and provided heat or hot water on demand to the house and/or catering building. We discussed the benefits of using dry wood, cleaning out the ash box, and avoiding creosote buildup. I gave him EPA documents "Wet Wood is a Waste" and "Burn Wise Tips", MoDNR Open Burning regulation, and Hardy H4 Furnace manufacturer's recommendations to reduce smoke, avoid creosote buildup, perform regular cleaning and maintenance, troubleshoot, etc. The furnace manufacture date was 1/2005 and it has been operating there since then.</p> <p>After thanking Mr. Bruno I went across the street, at his suggestion, to speak with the complainant. She and her husband welcomed me into their house and discussed my observations. She was glad that someone had finally seen the amount of smoke and understood her complaint; however, she was still frustrated that there was nothing within our authority that I could do since the opacity restrictions do not apply to wood-burning furnaces and I did not observe any trash or other trade waste or disallowed materials being burned.</p>

	34111		<b>Concern Info</b> Contractor is building new homes in Falcon Crest Subdivision; before they grade and seed a lot when construction is complete, the burn the debris; debris includes wood, plastic, boxes and siding; they are currently not burning, but there are several older burn pile throughout the development; they do not have any dumpsters onsite; debris (boxes, insulation) will blow from job sites onto other properties; complainant has not witnessed any waste being buried and does not suspect that they are doing this. Complainant could not provide specific locations of burn areas, however there are homes being actively constructed in subdivision.					
	<p><b>Comments</b> The subdivision is located at the intersection of Stuermann Road and Falcon crest Road (photo1). I met Mr. Soest, who is a construction worker at the Falcon Crest Subdivision. He told me the owner and manager of the site Mr. Larry Terbrock (314 581 2854). He was not present during my visit. I explained the nature of the complaint and Mr. Soest if they are open burning debris from job sites. He said they were doing that till last summer. In response to an open burning complaint, Wright City Fire Department was on site last summer and told them not to open burn any leftover construction material and, therefore, they stopped burning leftover construction materials.</p> <p>He stated that they now have dumpster (photo 3) where construction debris are collected and hauled away offsite by On The GO company. I drove around the construction site and observed few active construction sites (photo 2). I did not see any open burning within the subdivision.</p>

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	34154		<b>Concern Info</b>	<p>The concerned party lives next to Big Creek Quarry and states that dust from the quarry is constantly getting onto her property. She calls the business owners on a daily basis to express her concerns, but doesn't believe that she should have to call everyday in order for the company to control its dust.</p> <p>The concerned party also claims that the trucks carrying rocks/gravel are uncovered.</p> <p>The concerned party wants the investigator to contact her before going out to the concern location, so that she can be sure to meet with them.</p>				
<b>Comments</b>	<p>The day of the concern was cool and cloudy with some humidity. Due to forecasts of rain for the next several days, I drove to the property in the morning in order to observe incidents of fugitive dust prior to rainfall.</p> <p>I visited the property of the concerned party on Thursday March 22, 2018. I arrived at the property at 10:20am and viewed the entrance of Quarry Road before parking at the concerned party's house. Track marks extended past Quarry Road and onto Mette Road in front of the concerned party's house. I parked in the concerned party's driveway and walked up to the entrance of the house. Ms. Fluehr walked outside upon seeing me arrive and I introduced myself. Ms. Fluehr introduced herself and I started asking her questions regarding the roads surrounding her property. She stated that Mette Road was a county road but that she believes her property extends to the other side of the road. I replied that, though the trucks were tracking dirt onto Mette Road, the county is most likely responsible for cleaning the road. I then inquired about Quarry Road. Ms. Fluehr stated that Quarry Road, the road to the east of the property, is owned by Big Creek Quarry and dust from the road is often coming onto her property as the trucks drive by. As we talked, haul trucks were driving to and from Big Creek Quarry, using the haul road, with a frequency of approximately two trucks every five to ten minutes. Puffs of dust lifted slightly from the road and the trucks drove by on Quarry Road before settling down after a few seconds. Ms. Fluehr stated that some of the trucks do not cover their loads as they should, which exacerbates the dust.</p>

Division of Environmental Quality

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Comments</b>	<p>I called Mr. Slusser and asked for more information regarding the concern. Mr. Slusser stated that the people, living at the concern location were renters that moved in last summer. They didn't burn at any particular time and had previously burned a mattress. Mr. Sulsser called the Franklin County Sheriff's Office and the Deputy told the source of the concern to not burn any plastics. I replied to Mr. Slusser that burning trash is banned in Franklin County and asked him if he knew the name of the property owner and Mr. Slusser stated that the last name of the property owner was "Picarelli."</p> <p>After the call, I contacted the Franklin County Assessor's Office (636-583-6348) and obtained the name and number of the property owners. I then called the Franklin County Sheriff's Office to inquire whether they have reports on the incident that the concerned party mentioned. A Deputy from the Office stated that there was no official report on record. I also checked with the local fire district, and asked if the address had any previous incidents, to which they replied they hadn't.</p> <p>I waited until a clear day to visit the property. I drove to the property on March 30, 2018, arrived around noon, and parked across from the concern location. I walked up driveway, to the front door of the house, and rang the doorbell two more times and knocked once. No one answered. Next, I retreated to the road to see if I could see anything in the backyard from the road. On the left side of the house, I observed a rusted drum with plastic material appearing over the top of the side. The material appeared to be unburned. I took a photograph of the drum and then walked back to my car to drive back to St. Louis. As I was preparing to leave, Mr. Slusser approached the car and we discussed the concern. I asked whether the source of the concern had burned since we spoke last and he stated that they had not.</p> <p>On Monday, April 2, 2018 at 4:00pm, I spoke with Barbara Picarelli. I mentioned the trash burning concern and told her that trash burning is banned in Franklin County. I asked for the names and phone numbers of the renters, which she provided as Ms. Marisso Reno and Mr. Tim Harting. She stated that the previous renter was Mr. Harting's younger brother and the brother had left a lot of junk on the property. Ms. Picarelli stated that she wouldn't have normally rented a property without removing the junk, but Mr. Harting stated he would remove it for her. She stated that she had no idea that he was burning the junk to remove it. I asked if they had a trash service and she replied that she mentioned acquiring a trash service when they first moved in, but did not touch on the subject afterwards. I asked her if I could provide her number of the complainant, in case there are future cases of burning, to which she agreed. After discussing the matter, we decided that I would call Mr. Harting regarding the concern and she wouldn't discuss it with them unless there are future/reoccurring violations.</p> <p>April 3, 2018 at 4:00pm, I spoke with Mr. Tim Harting, one of the renters. I told him that we received a concern regarding trash burning and informed him that trash burning is not allowed in Franklin County. He replied that the police visited the property and told him he could still burn paper. I told him that the regulation banning trash burning was a state regulation and that paper was included under the definition of "trash". He countered that he has lived in Franklin County all his life and that he and many of his neighbors burn trash. He found it rude that a neighbor would call the authorities to complain about the burning. I replied that regardless of any incidents of</p>

	34272		<b>Concern Info</b> " Saw a big fire last weekend next to highway 79 in a field north of Elsberry with lots of smoke smelled odd. Sign on the west side of the road said Heitman Farms. My neighbor says it was the guy that tore down the old factory on Main Street burning the debris and he's burned buildings before and the DNR done nothing about it. Other contractors can't burn there debris and he underbid the job just burnt it." (observed Sunday 03/25/2018)					
	<p><b>Comments</b> Cole Hough: On 3-29-2018, I met with Jim Heitman at the burn site on Dameron Road. I arrived at 7:55am and saw the fire was still burning. I saw thick smoke blowing west across the RR tracks and Highway 79. The smoke had a chemical smell similar to burning plastic. I told Mr. Heitman that he had agreed multiple times to contact the Dept and meet at the burn site before the fire was lit. He said he must have gotten confused on the phone. I. Hough reminded Mr. Heitman that the previous week he told me the phone he was going to sort the burn pile again at the burn site, and burn untreated wood behind the dirt pile as the material was being sorted. I reminded him that he told me he wanted to stay for a while once they start burning to make sure I was okay with everything. Mr. Heitman responded that they had sorted unburnable material from the pile at the demolition site as best as they could and that the material they removed was on the trailer present at the burn site. He said he removed 13 tires from the burn pile before lighting it. He also said he took the few bags of household trash from the pile and put them in his home dumpster.</p> <p>As we viewed the burn pile, Mr. Heitman stated that a few years prior, he had demolished the old grain elevator in town, hauled the demolition waste to the farm, burned it, and buried the unburned material in the field adjacent to the burn pile from the Gladney Building.</p> <p>I asked Mr. Heitman when he lit the fire. He said he brought a copy of the burn permit to the fire department on Friday, March 23 and lit the fire that morning. I provided Mr. Heitman a copy of his burn permit with all of the conditions that he violated highlighted. I went over each condition and explained that he violated the following conditions:</p> <ul style="list-style-type: none"> <li>-2. Burned materials other than untreated wood such as tires, metal, siding, and plywood.</li> <li>-3. Did not completely extinguish the fire by 5 pm each of the 5 nights it had been burning.</li> <li>-5. caused a downwind nuisance by obstructing vision on the highway and RR tracks.</li> <li>-6. did not notify the fire department each day the fire burned.</li> </ul> <p>7. did not have a permit present or person on site supervision the burn when I arrived or when I saw the site on Saturday 3-24</p> <p>I told Mr. Heitman that the requirements from the solid waste program would most likely be satisfied once we received landfill tickets for the asbestos and demolition waste separated from the pile. I told him that based on the inconsistencies from our conversations, the air program may pursue further enforcement action.</p>

	34327		<b>Concern Info</b> Strong smell at Five Below store on north outer road coming from the city composting place. It's been stinking all week. Smelling up my car and cloths. Can you see what they are doing?					
	<b>Comments</b>	<p>On 4/4/2018, 4/06/2018, and 4/12/2018, I visited the Earth Center Composting Facility of the City of St. Peters located at 100 Ecology Drive in response to the odor complaints received by this office on March 29, 2018 and on April 3, 2018.</p> <p>The first day my visit took place from 11 AM to 2 PM . Wind was 12 MPH out of south. On the second day, I visited the area from 6:15 pm to 7:30 pm. Wind was 14 MPH out of south. On the third day, I visited the site from 12pm to 2 pm. During the times I was there, there was no odor detected by me.</p> <p>The facility makes compost by mixing recycled yard waste and bio-solids from waste water treatment plant. The waste water treatment plant has two wastewater holding tanks approximately 200 yards north of the nearest stores (Five Bellow, Burlington Academy Sports) in the strip mall located between the Earth Center Composting Facility and North Outer road to 1-70. The press room (where the bio-solids is separated from liquid waste water) is approximately 500 yards away from the stores.</p> <p>The horizontal mound of compost also called windows which are turned five times within 15-days period (aerated) are located approximately 400 yards north of the plant.</p> <p>I talked to Ms. Kristen Kubat (Five Below Store Manager) who told me that she notices very strong odor during the evening and early morning hours. I recommended to Mr. Sctneider to talk to the stores and work with them. Organizing facility tours to create awareness may help. Mr. Sctneider and I discussed the possibility of providing some kind of wind barriers including trees or walls as part of the an SOP.</p> <p>I called MR. Sctneider on 4/16/2018 from this office at 10 AM. He sated that the composting facility understands the holding tanks, the windows, and the press room are the 3 possible sources of odor. He told me that he talked to the store managers and invited them to visit the composting facility and also provided his phone number asking them to call him any time odor is detected. On 4/12/2018 store manager of Five Below called him to let him know she noticed odor. Based on the information he obtained from her, he traced the source of the odor to be the receiving bays connecting the sewer lines to the waste water holding tanks (each tank is 450,000 gallons capacity) located right behind the Five Below store. Mr. Sctneider stated that his office is now working to improve the current SC to reduce odor from the hold tanks.</p>

<p>I spoke with Betty Jackson and her daughter Tina Asher. Betty's number is 417-679-2411. She said there was new ownership or management in the past couple years. She mentioned that they used to get obvious saw dust fibers but recently someone told her would get better but she said it has just gotten finer. She mentioned, at times, it is difficult for them to be outside when the mill is running because it has caused breathing problems. Plus they always have to clean sawdust off their property and it has ruined equipment (pool pumps). She said she has been told by others that the sawmill doesn't keep their property or equipment cleaned well. She made it sound like the sawmill has added some new equipment or processes in the past couple years. They appear to have no permit. I am attaching the permit data viewer document that showed in the late 1990s an operating permit was not required at the time.</p> <p>I mentioned that we had a regional office in Springfield and may have someone inspect the sawmill. I gave her my number and the regional office number. My suggestion is to have the SWRO follow up with Betty and also perform an inspection on the sawmill during their prime operating hours.</p> <p>I wonder if we should, upon inspecting the facility, be prepared to collect samples from Betty's property for lab analysis and possibly the facility?</p> <p>I also want to mention that she said she is concerned that the industry is trying to move in a legislative manner to the Agricultural Department so that there will be potential exemptions from rules.</p>

	34202		<b>Concern Info</b>					
<p>RP is burning tires on their property. Burned at least three tires on Tuesday, 3/20. They called the Fire Dept but when they got there the fire was only smoldering. They are also burning an assortment of trash again that releases a very thick black smoke.</p> <p>The caller stated that he previously reported this RP and we investigated. See Concern #13945 from October 2017 and #14933 from January 2018 (located in N\Jasper\General\APCP). The caller stated that the previous property owner, Donald Poulson, passed away in early February. The caller provided the most recent contacts for the property below.</p>

<p><b>Concern No.</b> 34373    <b>Concern Info</b> Burning and burying wastes including oil, mattresses, x-ray equipment, batteries, tires, shingles. Caller personally witnessed open oil drums exposed during rain. Materials may be remains from an auction.</p> <p><b>Comments</b></p>								
SWRO	4/18/2018	4/11/2018	Mrs. Lillian Bond	Eldon Miller	Open Burning Residential Waste Disposal	MU		
<p><b>Concern No.</b> 34385    <b>Concern Info</b> bringing in solid waste as a trash hauler and burning at night. Caller claims that they use big spotlights to empty out the trucks at night and burn. Then they scrape up all the debris and take it and dump it somewhere. All activities occur overnight and she would like someone to see it when it happens. She states Miller County refuses to respond as they don't have the staff to come see what is going on at night. Caller states the Bond family has stolen things from her yard and shines lights in her windows to make sure she isn't watching them. She stated that the investigator is allowed to come into her property to observe what is going on. She spoke for at least 20 minutes, very upset.</p> <p><b>Comments</b> SEE SHAREPOINT #15835</p>

SWRO		4/12/2018	Unknown Business	Joplin Jasper	Fugitive Particulate Matter			
	34388		<b>Concern Info</b> The City of Joplin received a complaint through their system regarding dust leaving a property and causing eye and throat irritation. The caller, Mr. Cass, works at a State office building at 1823 W. 20th Street, and the business of concern is west of him at 1859 W 20th. Mr. Cass says that there is a white dust blowing off the product that the company is unloading. This dust travels off property and has caused eye and throat irritation, as well as covering their vehicles in dust.
