## Monthly Air Pollution Control Program Detail Report Concerns Investigated Between July 16, 2019 and August 15, 2019

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	39614		<b>Concern Info</b> Orrick Fire Protection District Chief Kelly Bilton called about a property owner who is letting people burn tires, furniture, etc on his property. The property owner does not live there (there is no residence on the property). She believes the property owner's name is Robbie Roberts, but has been unable to contact him and unable to contact people burning at this location  She and Sgt. Daniel Melchioris from the Ray County Sheriff's office went to the property last night to make a report. At the time they only found trees burning. The police report # is 1907-3480.  Chief Bilton said there are tires, Christmas trees, junk vehicles, and a gas can on the site. Some of these materials have been burned. There is also an old partially collapsed ground cellar that they are burning down in - it is hard to see. She stated there are booby traps on site and indicated there may be other illegal activities taking place on this property. She sa that the Orrick City Police had told her they thought people were burning plastic off copper at that location and that they started with logs to get the fire hot enough first.  The address she had for the property is 34863 Highway Z, Orrick, MO, but I couldn't get that address to map. The property located on Highway Z just south of Keeney Creek. The City lagoon is located on the north side of the creek from the site.					
<b>Comments</b>	We were unable to determine if they were in violation.

### Concerns Investigated Between July 16, 2019 and August 15, 2019

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	39631	<b>Concern Info</b>	<p>Caller stated there has been a smell since Wednesday evening that is so bad they can't go outside. The smell is now getting into her house too. She said it can be smelled for miles around. She describes it as smelling like "something dead but way worse than that". Caller says it has happened before for a couple days in April and June.</p> <p>Husband is on City Council and says they have been receiving lots of complaints about the smell. She says she has talked to workers at Missouri Organic Composting Plant (approximately 3 miles away) who said that EPA has been out and tested and not found anything.</p> <p>Caller speculated it may also be dead livestock from flooding, but hasn't seen any around. She noted there is also an old landfill in the area that isn't in use anymore but she still sees trucks go in and out sometimes.</p> <p>CP's husband also called about 20 minutes later to report the same issue, but he believes Missouri Organic is the source. He believes the smell is coming down the river.</p>					
<b>Comments</b> No violations were observed during the investigation. The source of the odor in Missouri City could not be determined.								
KCRO	7/19/2019	7/19/2019	Missouri Organic Recycling	Liberty Clay	Odor	JS

KCRO	8/1/2019	7/29/2019	Summers Grain Group	Buckner Jackson	Fugitive Particulate Matter	JS		
<p><b>Concern No.</b> 39747    <b>Concern Info</b> CP called about dust from a grain elevator near his house. He said the dust mainly occurs when they are unloading trucks, such as they've been doing this morning (7/29/19). The dust issue has been going on for a long time - CP stated his whole house is covered in dust and screens are caked with it. CP said he called in a concern last year too, but no unloading was going on during investigation so they didn't see any dust. CP says dust is worst in corn season which starts in about a month.</p> <p>Grain Elevator is located on Lake City Buckner Road, east of Buckner Tarsney Road.</p> <p>(Note: RP contact information below is from previous concern, but owner appears to be the same based on parcel information)</p> <p><b>Comments</b> No violations were observed during the investigation.</p>

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	<b>Concern No.</b> 39814	<b>Concern Info</b>	<p>CP called concerned about chicken litter that has been piling up on a neighboring farm. According to CP, the odor is unbearable and the piles just keep getting bigger. CP said that the RP had told the sheriff that it was an accidental dump, but CP has seen this dumping happen several times in the past month. CP said that the litter is supposedly coming from a farm in Arkansas and is concerned about that as well. CP also said that the litter pile is positioned so that when it rains it will run into the creek.</p> <p>I told CP that there is not a whole lot we can do about chicken litter except make sure it does not enter the waterways. We can give guidance and recommendation to the farmer, but we can't force them to do much. I recommended that the CP contact the Department of Agriculture about the litter crossing state border since we don't regulate that. I also told the CP that I would give the odor information to our Air Pollution unit, but I told her that they may not be able to do much either. CP said that she has already had a Platte County Sheriff Deputy speak with the farmer, but the deputy was unable to do much. The Platte County Sheriff Deputy that was handling the CP's case is Catherine Brown. The case # is 192919. CP recommended calling the deputy if we needed more information about the RP.</p>					
<b>Comments</b>								
KCRO	8/8/2019	8/7/2019	Old Drum Real Estate	Warrensburg Johnson	Asbestos	MC		
	<b>Concern No.</b> 39842	<b>Concern Info</b>	<p>Caller reports a house is being gutted in order to be renovated into an Airbnb. The basement had a significant amount of asbestos insulated piping that has been removed. The work was not done by an asbestos abatement contractor, and the concerned party believes the removal resulted in a significant fiber release.</p>					
<b>Comments</b> The project appears to be exempt from any asbestos regulations implemented by the Missouri Department of Natural Resources. Therefore, no investigation was conducted.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	39732		<b>Concern Info</b> Hello, I live at 909 W. Prairieview Drive, Columbia, MO 65202. I live within three (3) blocks of Boone Quarry on Creasy Springs F The dust from Boone Quarry is daily and not being controlled. If someone from the City of Columbia approaches Boone Quarry, the Boone Quarry will water it down for a few days, then stop. There is no consistent management for the dust dai problem by the City or your organization. I contacted the City of Columbia about this consistent problem and they said your organization are responsible. Some of us in our subdivision are going take video's daily of this consistent problem and then do what is necessary to live a healthy environment. The dust is on our homes, cars, and other outdoor items. When I bought my home in 1997, the City of Columbia didn't use the Quarry that much and said it was going to make the Quarry a park. They didn't do it and lease it to Boone Quarry. Having a rock Quarry inside City limits near citizens of Columbia homes is unethical in my opinion. I await your response.					

**Comments** No violation of the fugitive dust rule was found during the investigation.

NERO	7/24/2019	7/23/2019	Mr. Gary Rackers	Jefferson City Cole	Open Burning		DB	
------	-----------	-----------	------------------	------------------------	--------------	--	----	--

	39744		<b>Concern Info</b> Caller alleged that open burning is being conducted at Greenleaf Nursery and Landscaping. The caller stated that a pit had been dug, and what appeared to be demolition / storm debris placed into the pit, the material was set on fire and had been burning for the last few days.  A prior notification of demolition could not be verified at this location, as the Department demolition notification page was down at the time of the concern. Caller called from a business phone number and provided mobile number to be reached a Additionally, the provided caller name did not match the caller ID provided name.

Caller stated that the burning is not conducted on a set schedule, but is usually done during the daylight hours. Rodaman or Rackers construction companies may be responsible.					
	<b>Comments</b>	No violation of the open burning rule was found to have occurred during the investigation.						
SERO	7/17/2019	7/11/2019	Prairie Valley Disposal, Inc.	Cuba Crawford	Odor	TR		
	<b>Concern No.</b> 39661	<b>Concern Info</b>	SP:22105 I'm writing to complain about the very foul smell on hwy 19 Cuba mo by the prairie valley landfill in the last 6 months the smell when driving by is getting very bad and strong you can smell it 1/2 mile before thier driveway and after is there anyth that can be done about the foul order or what steps can be made to correct the situation caused drive by many times a day going to work and back and the smell is horrible in my car when passing through that area thank you I hope something car be done and corrected with this situation  Sent from my Samsung Galaxy , an AT&T LTE smartphone					
	<b>Comments</b>	At the time of this investigation no odors were noted from the landfill. I was in the area between 10:31 a.m. and 11:31 a.m. The weather was fairly nori for summer in Missouri with sunny skies, temperatures in the 82 to 89 degrees range and wind from the southwest at 3-4 miles per hour. As part of thi investigation, I spoke with Mr. Steve Wherry, Operations Manager, at the Prairie Valley landfill. Mr. Wherry said that there had been only normal operations at the landfill on the day the environmental concern was received by this office (July 11, 2019). Mr. Wherry additionally stated that he make daily landfill inspections, which include odor observations. I gave him my card and two copies of the regulation at 10 Code of State Regulations 10-6.1 Restriction of Emission of Odors and of Odor, Dust, Asbestos, Open Burning and Freon Emissions, Fact Sheet--PUB 2200.

	39602		<b>Concern Info</b> SP:22185 Charles Has been told that he can't burn in the city. He has had two tickets from the city. Also the Fire Dept. has been to three fires that Charles has or had someone burn. He has some wood from a house that he is removing and taking to this I the fire dept. told him not to burn it. He said it is just wood. He was still told not to burn this.					
See attachments for photos and report provided by the fire department.								
<b>Comments</b>	I arrived at the site unannounced with Mrs. Dunlap-Chronister on July 22, 2019. I drove on the main road of the facility and observed a burn pile rough 20 feet from the property road. The burn pile was not completely burnt as the fire department put the fire out. The pile included wood, metal, and at least one tire at the bottom of the pile. No one was available at the site to discuss the burn pile with.							
	We arrived at Mrs. Rowland's work and discussed the burn pile with her. We informed Mrs. Rowland that what was on the burn pile was not okay to be and the distance to the residential area was less than 200 yards. Mrs. Rowland said they would not burn anymore at the property. I gave Mrs. Rowland fact sheet on open burning regulations and she said she would let Mr. Rowland know. I let Mrs. Rowland know that a Letter of Warning or Unsatisfactory Findings would be sent to them, as it was apparent that they were burning on the property.

	39615		<b>Concern Info</b> SP:22196 Comments: Hello. I'm looking for information and/or help with the after effects of a soybean meal spill on the highway right way in front of our house. A semi overturned and dumped his load and a crew was sent in to clean up the meal. They did a fair job, but when it rained hard a few days later the meal swelled up, washed into our driveway and around our front yard. resulting mess caused a putrid, noxious odor and severely impacted my mother's COPD. After many phone calls to various people the clean up crew returned to scrape our drive way and re gravel it hoping that would end the odors. It did reduce the odor from the soy meal but did not end it. It still smells like something dead along the highway and in our yard. Our neighbors and passers by complain, how much more are we who live with it suffering? I'm afraid it is making Mother's COF worse. She has been to the doctor twice since this happened. Is there any way to neutralize this? Can you help us make the owner of the spill clean it up better? If not, can you suggest someone who can help. Thank you.

	39742		<p><b>Concern Info</b> SP:22304 Natural Gas/Sulfur Smell on Wednesday afternoon and Thursday Morning.</p> <p>You could smell it from 67 hwy. The CP is concerned for the health of surrounding area residents.</p> <p><b>Comments</b> I arrived at the property on August 1, 2019 at 12:06. I parked the car outside the facility where the employee parking was located as to not block any trucks the may be leaving the premises. I exited the van and briefly looked over the facility, I did not observe any visible emissions or any strong odors walked through the entrance onto the property and directly to the office. The door had a sign stating that everyone was out to lunch until 13:00. I exited the property at 12:15 since I did not observe anything of concern. I called the phone number listed on site at 15:26 and no one answered.</p> <p>On August 2, 2019 at 10:04 I called and spoke with the manager of the business (Scrap'n). The managers name is Jason Shipman. Jason was aware the situation that occurred on August 24, 2019. An excavator that has a sheer attachment had cut into what he believed to be a vented propane container. The container was not vented and emitted the natural gas odor. The fire department was notified and arrived at the scene to ensure that it was not an emergency situation. Jason also noted that sometimes when they cut into multiple empty propane tanks they will still emit an odor. Jason also stated that they have a shredding operation where they sometimes shred soap barrels. While the barrels are empty the can emit an odor from the remaining residue that can smell like a dryer fabric sheet. This occurs maybe once a month.</p> <p>I let Jason know that as of right now I don't believe any violations have occurred. I did let him know that if we were to perform a nasal ranger test that determined the odor concentration was stronger than what is allowed, a violation could be noted.</p>

	39835		<b>Concern Info</b> SP:22444 Per voicemail: Three elderly gentlemen open burning mobile home, lumber, and asbestos in a pit. Polluting the air and carcinogens on the golf course. Please investigate. Caller also said he would be contacting Senator Brown's office.					
<b>Comments</b> I contacted Chief Roger Hayes, of the Rolla Rural Fire District. Chief Hayes stated that they had not received any calls regarding burning near the golf course. He said that he would investigate. Chief Hayes called back in a few minutes and said that the burning was being conducted by Mr. Richard Lindsey Jones. The Chief said he observed Mr. Jones and several other men burning a small pile of lumber in a shallow hole. Mr. Jones stated that he was intending to operate a business of tearing down mobile homes. Chief Hayes told them that the burning was illegal and to put the fire out until they contacted DNR. They agreed to put the fire out. Chief Hayes provided me with the phone number for Mr. Jones and also the name and phone number of the property owner.  Recycling of the mobile homes was referred to Nancy Wilhelm who contacted Mr. Jones to discuss what could and could not be burned. She informed him that per the State Open Burning regulation he was allowed to burn untreated wood so long as the burning occurred greater than 200 yards from a structure other than those owned by him.  No further action at this time.

## Monthly Air Pollution Control Program Detail Report Concerns Investigated Between July 16, 2019 and August 15, 2019

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	39714		<b>Concern Info</b> Mr. Bellagamba has been reaching out to see if we can do anything about that "terrible stench" coming from the egg farm. states that the stench is worse in the evenings and on the weekends and makes it difficult for him to enjoy being outside at his residence.					
<b>Comments</b> I investigated this concern on July 16, 2019. I was accompanied by Danielle Bausch.								
We arrived at the site at 12:40. The temperature was 84 degrees Fahrenheit. There was a 6 mph wind coming from the west. The humidity was 70%.								
We took three odor observations on and near the property. The first observation was across Highway D near the northwest corner of the facility at 12: The second observation was north of the property, across the bridge at 12:47. The third observation was across Highway D near the south side of the facility at 12:53.								
There was a moderate observable manure/fertilizer odor on the property. The odor was not detectable across the bridge on the north side of the Cuivr River. None of the nasal ranger readings resulted in an observable odor reading at a dilution factor of 1:2 or greater.								
Two observable odor observations at a dilution factor of at least 1:7, at least fifteen minutes apart, at a location off of the property, are required to issu an odor violation. We were not able to detect any odor at 1:7 dilution on or off the property.								
This facility was recently inspected by Stephanie Felts, who plans on providing follow up visits for further odor investigation. Stephanie contacted the concerned party and informed them of the outcome of this visit on July 16, 2019.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
<b>Comments</b>	DNR received an e-mail on 7/26/19 from Mr. Marce Prewitt, EHS Manager of Certainteed, which contained the following:  <p>"We are going to have the RTO CNTRL 11/12 down for cleaning starting tomorrow. We will not be operating. The tanks will be sitting idle and running through the original CECO. The maintenance department will be onsite during this entire period. All tanks will be sitting idle and monitored. It will be down for cleaning/inspection from Saturday (7/27/2019) morning to Monday (7/29/2019) morning. I will send an email with the specific time when we sit it down."</p> <p>I visited the site on Tuesday 7/30/19. I was accompanied by Danielle Bausch. We arrived at the site at 12:30 pm. The wind was blowing from the northwest at 8 mph. The temperature was 83 F and the humidity was 55%. The sky was partly cloudy.</p> <p>We started on the north side of the facility near the entrance. We could not observe any significant odors coming from the site. There was no opacity coming from the facility's stacks. We continued driving down the east side of the facility, to Eden Trail, where the concerned party lives. No observable odors were noticed at any time during this visit.</p> <p>I contacted Mr. Marce Prewitt, EHS Manager, on 8/1/19. I told him that we had received the concern and investigated it, but found no significant odors told him that I saw the e-mail they had sent about the planned maintenance outage of the RTO. Mr. Prewitt told me that they had staff monitoring the plant all weekend, and that he went out several times on Monday after hearing from the concerned party. The RTO was functioning by 6 pm on Monday. No significant odors were found during this outage. I asked about the planned expansion and Mr. Prewitt told me they have added a limestone mill, and that this will be included in their upcoming operating permit. I told him that no violations would result from this investigation, but that we would continue investigate odor concerns as we receive them. Mr. Prewitt requested that I send an e-mail to him explaining the investigation and outcome.</p> <p>I contacted Cindy Fitch on 8/1/19 and left a voicemail explaining the outcome of the investigation, about the planned maintenance outage over the weekend, and about the upcoming operating permit. I told her that if she had any questions or wanted to report more odors coming from the facility, to contact us. I left my contact information.</p>

						Initials	NOV	RNOV
	39881		<b>Concern Info</b> Received a call on 8/6/2019 from Jessica Blanks, an employee at Spanish Cove Townhomes, 1708 San Remo Court, Spanish Lake. Ms. Blanks said the pool in the apartment complex that was built in 1971 has been under renovation for the past 2 weeks and she is concerned about potential lead content in dust from the sandblasting and demolition. She said the work is being done by outside contractors and that management told her the contractors tested for lead in the pool paint and found none. She said she watched the test being conducted and only a surface sample was taken, despite 1.5-2 inches of material being sandblasted away and is concerned that it was not an adequate test. She said there is an excessive amount of dust in the air, on the ground, vehicles, and buildings and the contractors are not using anything to contain paint chips or control dust, even using leafblowers to blow dust into the parking lot.					
			See attached photos emailed by Ms. Blanks on 8/6/2019					
	<b>Comments</b>		On August 8, 2019 (at 9:30 am) I called the St Louis County Air Pollution Control Program and talked to Mr. Jeremy Rogus (314 615 0926) to find out name and phone number of a contractor who is doing the renovation/sandblasting work. Mr. Rogus told me that no permit was issued from the St. Louis County Air Pollution Control Program at this address.					
			I visited the site on August 12, 2019. There was no dust at or near the pool. I contacted Ms. Luysa Baker(314 741 7447), Manager and Mr. Derric Cast Maintenance Supervisor(314-435 2000). They told me that Bazan Company blasting the swimming pool for the last 2 weeks and has completed its blasting operations. They left the property at the end of last week. A painting company is set to start painting the swimming pool. The blasting waste collected is stored in a dumpster for disposal. Bi-state Pools is the contractor for the renovation project while Bazan Company is a sub contractor.					
			I talked to the caller (Ms. Jessica Blanks) at her work place (Spanish Cove Townhomes). She told me that now the sand blasting is completed there is no dust anymore.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
	<b>Concern No.</b> 39879	<b>Concern Info</b>	Tuesday on August 6, and Wednesday on August 7, 2019 two online anonymous complaints (odor and dust) were received by this office. The complaints were regarding odor (smelling like poo all around the city swage plant) and dust from composting operations migrating to the drinking water treatment plant.					
	<b>Comments</b>	I talked to Mr. Elliot Schneider regarding the complaint today (8/8/2019) at about 2pm regarding the August 6 and 9, 2019 odor and dust complaint. I discussed the nature of the complaint. He stated to me that there was no odor or dust issues in those days. Mr. Schneider said there was no grinding or sludge pressing operations on those days. I investigated similar complaints several times in the past. All were anonymous. So far no odor or dust violations were noted.						
	Note: This office is in the process of issuing a LOW for the City of St. Peters for failure to determine if air pollution construction permit is required to operate the composting facility located at 100 Ecology Drive St. Peters, MO 63376.							
SLRO	8/13/2019	8/12/2019	Unknown	Washington Franklin	Open Burning	DR		
	<b>Concern No.</b> 39880	<b>Concern Info</b>	Caller reports that waste is being picked up from wherever and brought back to the property and then open burned in order to recover scrap metal to sell. Caller said the smoke from the open burning occurs about three times per week and creates a lot of noxious smoke and this has been going on for years.					
	<b>Comments</b>	I investigated the concern on August 13, 2019. I made several visits to the property between 2 and 3 pm but nobody answered the door to grant me permission to access the property. I could not see any violations from public roads, due to the trees surrounding the property.  I called Mr. West and explained my findings, and let him know that I would try to drive by when I was in the area to see if I find any burning, and that he can always call in additional concerns. I also told him that he should keep reporting these instances to local authorities.

SWRO	8/6/2019	6/26/2019	Denali Water Solutions	La Russell Lawrence	Animal Waste Odor	BM		

**Concern No.** 39427    **Concern Info** Company is land-applying animal waste (not chicken feces waste- gelly-like substance) to property across from CP. CP states they do it at night and the material comes in a metal shipping container.

CP was told that the company is only allowed to do it every 10-15 years. Last time the company did this activity was about 2-3 years ago and CP states the smell was intense (possibly be a violation for odor) and lasted two months "ruined entire summer and had to stay hotel." Last time it occurred, it was done and over with before the CP knew what to do. CP noticed that the company is planning to do this again and wants to prevent the smell from happening again. CP states she will call back tomorrow (6/27/2019) with RP information.

New 6/27/2019, land applying slurry by knifing into ground, applies at nighttime

--------	--------------------	---------------	---------------------------------	-------------	-----------------	--------------------	-----	------

**Concern No.** 39823    **Concern Info** Concern Received on August 4th via email. Concern states that the issue was first observed on Monday Jly 15, 2019.

To whom this may concern,

I would like to voice a concern to whomever can do something about the terrible odor coming from the dog food factory just northeast of the Highland Avenue overpass at I49/71 Hwy, Nevada, MO. This "dead animal" smell has waxed and waned many years. At times it has been so bad that I have smelled it when I've come out of the hospital, quite a distance from the plant. I remember when I drove into my driveway another time and as my grandchildren started to get out of the car, one of them gagged and said "what is that smell!"

Last week it was exceptionally bad. I've heard many other people talk about it, so I'm sure I'm not the only one who struggles with this. I've thought about how we want to bring businesses and families into our community to help it grow and remain strong. We try to beautify the city by keeping yards, parks and streets cleaned up. And yet, if this smell permeates much of the city when prospective businesses and families check into moving here, that could be quite a deterrent.

We have had Healthy Nevada programs to get people out exercising, using the parks and walking trails, but there are times we can't hardly stand the smell long enough to water my plants and flowers.

In the spring and fall, when the temperature is nice enough to open up the house, giving us fresh air and saving a little energy, often the smell is too sickening to do so.

My husband and I live just off Highland Avenue on North Elm Street and we probably have to deal with this more than the majority of Nevada citizens. But I'm sure our neighbors as well as many others in this part of Vernon County would agree that more needs to be done to reduce the terrible odor that this plant is emitting.

Thank you for taking the time to read my concern and hopefully taking action on it. If I need to do anything else, please direct me as such. Also I would appreciate your response to me as to what action is being taken.

Very sincerely,

			<p>The Spill Line received six calls over the weekend from different complainants on Pump Station Rd. near Anderson. The suspected responsible party is Bub Taylor of Bub's Inc., Tontitown, Ark. They were upset with the odors, noise, and potential water pollution associated with the activity. They are reporting that for the last two weeks, trucks have been delivering material to his property near 3671 Pump Station Rd. and land applying material on his property. No reports of impacts off-site, except for odors, but reportedly, trucks are seen about every 30 minutes and are running day and night.</p> <p>I will complete MEERTS reports for each shortly after I reach the office. MEERTS remote was not working very well yesterday. Relevant complaint info is summarized as follows:</p> <p>8/10 Nan Palmer, (MEERTS report has name as Jan Palmer) 3761 Pump Station Rd., 417-845-6545 General complaint of frequency of truck traffic and spreading of odorous material along their fence line.</p> <p>8/11 Maria Poulides, 3761 Pump Station Rd., SAA Claims the smell is unbearable and that anything the material touches turns browns and dies immediately.</p> <p>Corrinne Whited, 2612 Pump Station, 417-845-2910 Frequency and noise associated with trucks all night long. Their house is close to the road.</p> <p>Mark Beary, 3327 Pump Station, 479-925-8991 Doesn't reside on his property, but has been watching spreaders working on the field adjacent to his land all day. Turns everything brown.</p> <p>Ivan Drake, 2270 Pump Station, 417-845-6493 Odor and truck noise.</p>

**Concern No.** 39904    **Concern Info** The Quarry located on Pack Rd in Webster county is located on a gravel road and several dump trucks have been hauling from the quarry making visibility practically zero not to mention the health concerns the dust is causing nearby residents. I have tolerated the dust for several years but it seems to just be getting worse with more and more dump trucks hauling from the quarry. I have contacted the quarry to see about them spraying the road with water when traffic is so heavy but they ha yet to do that. All they tell me is they will see what they can do.
