

## **RULE AND SIP AGENDA**

**May 31, 2018**  
**Jefferson City**

### **ACTIONS FOR PUBLIC HEARING**

- \* 10 CSR 10-1.010 (amendment) General Organization  
  
This proposed amendment will remove the unnecessary use of restrictive words and remove an obsolete requirement.
- \* 10 CSR 10-6.180 (amendment) Measurement of Emissions of Air Contaminants  
  
This proposed amendment will remove the unnecessary use of restrictive words, restructure the rule into the standard rule organization format, and add definitions specific to this rule.

### **ACTIONS TO BE VOTED ON:**

- \* 10 CSR 10-2.310 (rescission) Control of Emissions From the Application of Automotive Underbody Deadeners  
  
This rule is no longer necessary because the only source subject to this rule ceased operation about 30 years ago.
- \* 10 CSR 10-2.360 (rescission) Control of Emissions From Bakery Ovens  
  
This rule is no longer necessary because the only source subject to this rule ceased operation over 15 years ago.
- \* 10 CSR 10-3.160 (rescission) Restriction of Emission of Fluorides From Diammonium Phosphate Fertilizer Production  
  
This rule is no longer necessary because the last source subject to this rule dismantled their fertilizer production equipment over 10 years ago.
- \* 10 CSR 10-5.120 (rescission) Information on Sales of Fuels to be Provided and Maintained  
  
This is an outdated rule because the information required by this rule is no longer necessary due to modern U.S. Clean Air Act requirements and other federal and state regulations that control emissions.
- \* 10 CSR 10-5.130 (rescission) Certain Coals to be Washed

This is an outdated rule because the requirements in this rule are no longer necessary due to modern U.S. Clean Air Act requirements and other federal and state regulations that control emissions.

- \* 10 CSR 10-5.450 (rescission) Control of VOC Emissions from Traffic Coatings

A later federal requirement is duplicative of the substantive requirement in this rule. Therefore, the state rule is no longer necessary, and is being proposed for rescission.

- \* 10 CSR 10-6.100 (rescission) Alternate Emission Limits

This is a proposed rescission of an obsolete rule. This rule was originally established in 1982, and was never approved into Missouri's State Implementation Plan (SIP).

- \* 10 CSR 10-6.350 (rescission) Emission Limitations and Emissions Trading of Oxides of Nitrogen
- \* 10 CSR 10-6.360 (rescission) Control of NO<sub>x</sub> Emissions From Electric Generating Units and Non-Electric Generating Boilers

These rules are being proposed for rescission because they have been superseded by the federal Cross-State Air Pollution Rule (CSAPR). The CSAPR ozone season trading rule limitations are more restrictive than the state NO<sub>x</sub> rules.

**July 26, 2018**  
**St. Louis**

#### ACTIONS FOR PUBLIC HEARING

- \* 10 CSR 10-2.215 (rescission) Control of Emissions From Solvent Cleanup Operations
- \* 10 CSR 10-5.370 (rescission) Control of Emissions From the Application of Deadeners and Adhesives
- \* 10 CSR 10-5.410 (rescission) Control of Emissions From Manufacture of Polystyrene Resin
- \* 10 CSR 10-5.440 (rescission) Control of Emissions From Bakery Ovens
- \* 10 CSR 10-5.455 (rescission) Control of Emissions From Industrial Solvent Cleaning Operations

These rules are not necessary because there are no longer any applicable sources.

- \* 10 CSR 10-2.390 (rescission) Kansas City Area Transportation Conformity Requirements

This proposed rescission will remove an unnecessary regulation. The Kansas City Area Transportation Conformity Requirements rule was created to comply with federal requirements for the 1997 1-hour ozone standard maintenance area. This rule is unnecessary because the one (1)-hour ozone standard which applied to the Kansas City

metropolitan area was revoked on June 5, 2005.

- \* 10 CSR 10-5.360 (rescission) Control of Emissions From Polyethylene Bag Sealing Operations

This rule is no longer necessary because the two sources subject to this rule are no longer in business.

- \* 10 CSR 10-5.520 (rescission) Control of Volatile Organic Compound Emissions From Existing Major Sources

This rule is not necessary because no sources are subject to this rule. This rule was created to help bring the St. Louis ozone nonattainment area into compliance by reducing volatile organic compounds (VOCs) from sources that were not affected by other rulemakings.

- \* 10 CSR 10-6.362 (rescission) Clean Air Interstate Rule Annual NO<sub>x</sub> Trading Program
- \* 10 CSR 10-6.364 (rescission) Clean Air Interstate Rule Seasonal NO<sub>x</sub> Trading Program
- \* 10 CSR 10-6.366 (rescission) Clean Air Interstate Rule SO<sub>2</sub> Trading Program

These rules are no longer necessary and have been superseded by the Cross-State Air Pollution Rule (CSAPR) annual nitrogen oxide (NO<sub>x</sub>), sulfur dioxide (SO<sub>2</sub>), and seasonal NO<sub>x</sub> Trading Programs. These rules provided the requirements of the U.S. Environmental Protection Agency's Clean Air Interstate Rule (CAIR) establishing a national emissions banking and trading program.

- \* 10 CSR 10-2.320 (amendment) Control of Emissions From Production of Pesticides and Herbicides

This rulemaking removes the unnecessary use of restrictive words and compliance dates found in the rule and reorganizes the rule into the standard rule organization format.

- \* 10 CSR 10-2.340 (amendment) Control of Emissions From Lithographic Printing Installations

This rulemaking will remove the unnecessary use of restrictive words, update incorporation by reference information, add definitions specific to this rule, and make administrative updates. It also replaces the word installations with operations in the title for consistency with its St. Louis area counterpart rule.

- \* 10 CSR 10-5.570 (amendment) Control of Sulfur Emissions From Stationary Boilers

This rulemaking will remove the unnecessary use of restrictive words, update incorporation by reference information, add definitions specific to this rule, and make administrative updates.

\* 10 CSR 10-6.030 (amendment) Sampling Methods for Air Pollution Sources

This rulemaking will comply with Executive Order 17-03 criteria and amend this rule to update incorporations by reference. This rulemaking will provide a more efficient way to incorporate by reference methods for stack testing as found in 40 CFR part 51, 40 CFR part 60, and 40 CFR part 61.

\* 10 CSR 10-6.040 (amendment) Reference Methods

This rulemaking will update the incorporation by reference date to include the latest Federal Register Notices that promulgated new equivalency methods for monitoring air pollutants. Adding these monitoring methods to the rule allows entities to use them for determining compliance with National Ambient Air Quality Standards (NAAQS). Additionally, this rulemaking will update incorporations by reference, remove the unnecessary use of restrictive words, and add American Society for Testing and Material (ASTM) standards referenced in other 10 CSR 10 rules.

\* 10 CSR 10-6.110 (amendment) Reporting Emission Data, Emission Fees, and Process Information

This rulemaking will update the applicable year(s) for the emission fee. There will be no change to the fees at this time. This rulemaking will also remove unnecessary use of restrictive words, add definitions specific to this rule, and make administrative updates.

\* 10 CSR 10-6.200 (amendment) Hospital, Medical, Infectious Waste Incinerators

This rulemaking incorporates by reference the federal regulatory requirements for existing hospital, medical, and infectious waste incinerators of 40 CFR 60 Subpart Ce—Emission Guidelines and Compliance Times for Hospital/Medical/Infectious Waste Incinerators. This assures that state rule requirements remain consistent with the latest federal rule requirements to avoid confusion.

ACTIONS TO BE VOTED ON:

\* 10 CSR 10-1.010 (amendment) General Organization

This proposed amendment will remove the unnecessary use of restrictive words and remove an obsolete requirement.

\* 10 CSR 10-6.180 (amendment) Measurement of Emissions of Air Contaminants

This proposed amendment will remove the unnecessary use of restrictive words, restructure the rule into the standard rule organization format, and add definitions specific to this rule.

**August 30, 2018**  
**Jefferson City**

**ACTIONS FOR PUBLIC HEARING**

- \* 10 CSR 10-2.260 (amendment) Control of Petroleum Liquid Storage, Loading and Transfer

This rulemaking will remove obsolete provisions, reduce the regulatory burden on facilities, improve consistency with the St. Louis rule 10 CSR 10-5.220 that regulates the same facilities, and clarify rule language on testing, reporting, and other items. The rulemaking will also remove the unnecessary use of restrictive words, add back definitions specific to the rule, and update incorporations by reference information.

- \* 10 CSR 10-2.300 (amendment) Control of Emissions From the Manufacturing of Paints, Varnishes, Lacquers, Enamels and Other Allied Surface Coating Products

This proposed rulemaking will remove the unnecessary use of restrictive words, clarify rule language, update incorporations by reference, and add definitions specific to this rule.

- \* 10 CSR 10-5.500 (amendment) Control of Emissions From Volatile Organic Liquid Storage

This proposed rulemaking will remove the unnecessary use of restrictive words, clarify rule language, update incorporations by reference, and add definitions specific to this rule.

- \* 10 CSR 10-5.530 (amendment) Control of Volatile Organic Compound Emissions From Existing Furniture Manufacturing Operations

This rulemaking will remove the unnecessary use of restrictive words, update references, and make minor clarifications and grammatical changes.

- \* 10 CSR 10-5.540 (amendment) Control of Emissions From Batch Process Operations

This proposed rulemaking will remove the unnecessary use of restrictive words, clarify rule language, update incorporations by reference, and add definitions specific to this rule.

- \* 10 CSR 10-6.070 (amendment) New Source Performance Regulations

This proposed rulemaking will adopt new emission standards, updates, and clarifications to existing federal rule 40 CFR 60 that were promulgated from January 1, 2013 through March 12, 2018, and remove the unnecessary use of restrictive words. The rulemaking will also clarify the rule purpose, remove unnecessary rule language, clarify much of the remaining rule language, and present the list of incorporated federal subparts in a more user-friendly format. This rule as a whole establishes acceptable design and performance criteria for specified new or modified emission sources.

\* 10 CSR 10-6.075 (amendment) Maximum Achievable Control Technology Regulations

This proposed rulemaking will adopt new emission standards, updates, and clarifications to existing federal rule 40 CFR 63 that were promulgated from January 1, 2016 through January 29, 2018. This rulemaking will also remove the unnecessary use of restrictive words, update incorporations by reference, and make other clarifying changes. This rule as a whole establishes emission standards for sources that emit or have the potential to emit hazardous air pollutants.

\* 10 CSR 10-6.080 (amendment) Emission Standards for Hazardous Air Pollutants

This proposed rulemaking will adopt new emission standards, updates, and clarifications to existing federal rule 40 CFR 61 that were promulgated from January 1, 2016, through July 1, 2017. The rulemaking will also update incorporations by reference, remove the unnecessary use of restrictive words, and make other clarifying changes. This rule as a whole establishes emission standards and performance criteria for new or modified sources emitting hazardous air pollutants.

\* 10 CSR 10-6.120 (amendment) Restriction of Emissions of Lead From Specific Lead Smelter-Refinery Installations

This rulemaking will remove emission restrictions for a facility that has shutdown, update a federal secondary Maximum Achievable Control Standard, remove the unnecessary use of restrictive words, and update incorporation by reference information.

\* 10 CSR 10-6.130 (amendment) Controlling Emissions During Episodes of High Air Pollution Potential

This rulemaking will remove outdated, overly burdensome requirements and reaffirm the Department's authority to take necessary and appropriate actions to mitigate an episode of extremely high air pollution.

\* 10 CSR 10-6.161 (amendment) Commercial and Industrial Solid Waste Incinerators

This rulemaking will update the incorporation by reference date to include recent changes to the federal Commercial and Industrial Solid Waste Incineration (CISWI) rule and remove unnecessary use of restrictive words, update/add incorporations by reference as applicable, and make administrative updates. The rulemaking will also add an optional production-based mercury (Hg) emission limit as an alternative to the concentration-based Hg emission limit for the waste-burning kiln subcategory. These changes will assure that state rule requirements remain consistent with the latest federal rule requirements to avoid confusion.

\* 10 CSR 10-6.241 (amendment) Asbestos Projects—Registration, Abatement, Notification, Inspection, Demolition, and Performance Requirements

The purpose of this rulemaking is to comply with Executive Order 17-03 and related

comments and will remove the unnecessary use of restrictive words, add definitions specific to this rule, update incorporate by reference information, and remove the requirement to provide a 45-day comment period for revisions to department-supplied forms. This proposed rulemaking will also add conditions for denial of asbestos registration applications and clarify requirements to receive and keep asbestos registrations. This proposed rulemaking is consistent with 643.230.1 RSMo.

- \* 10 CSR 10-6.250 (amendment) Asbestos Projects—Certification, Accreditation and Business Exemption Requirements

The purpose of this rulemaking is to comply with Executive Order 17-03 and related comments and will remove the unnecessary use of restrictive words, add definitions specific to this rule, update incorporate by reference information, and remove the requirement to provide a 45-day comment period for revisions to department-supplied forms. This proposed rulemaking will also add conditions for denial of asbestos occupation certification applications and clarify requirements to receive and keep asbestos certifications. This proposed rulemaking is consistent with 643.230.1 RSMo.

- \* 10 CSR 10-6.280 (amendment) Compliance Monitoring Usage

This rulemaking will remove an unnecessary restrictive word, correctly incorporate reference material, and update the acceptable monitoring methods for compliance certification.

- \* 10 CSR 10-6.300 (amendment) Conformity of General Federal Actions to State Implementation Plans

This proposed rulemaking will remove the unnecessary use of restrictive words, add definitions specific to this rule, remove references to a rule that is being rescinded, and make other clarifying changes.

- \* 10 CSR 10-6.380 (amendment) Control of NO<sub>x</sub> Emissions From Portland Cement Kilns

This proposed rulemaking will remove the unnecessary use of restrictive words, remove obsolete dates, and add definitions specific to this rule.

#### ACTIONS TO BE VOTED ON:

- \* 10 CSR 10-2.215 (rescission) Control of Emissions From Solvent Cleanup Operations
- \* 10 CSR 10-5.370 (rescission) Control of Emissions From the Application of Deadeners and Adhesives
- \* 10 CSR 10-5.410 (rescission) Control of Emissions From Manufacture of Polystyrene Resin
- \* 10 CSR 10-5.440 (rescission) Control of Emissions From Bakery Ovens
- \* 10 CSR 10-5.455 (rescission) Control of Emissions From Industrial Solvent Cleaning

## Operations

These rules are not necessary because there are no longer any applicable sources.

- \* 10 CSR 10-2.390 (rescission) Kansas City Area Transportation Conformity Requirements

This proposed rescission will remove an unnecessary regulation. The Kansas City Area Transportation Conformity Requirements rule was created to comply with federal requirements for the 1997 1-hour ozone standard maintenance area. This rule is unnecessary because the one (1)-hour ozone standard which applied to the Kansas City metropolitan area was revoked on June 5, 2005.

- \* 10 CSR 10-5.360 (rescission) Control of Emissions From Polyethylene Bag Sealing Operations

This rule is no longer necessary because the two sources subject to this rule are no longer in business.

- \* 10 CSR 10-5.520 (rescission) Control of Volatile Organic Compound Emissions From Existing Major Sources

This rule is not necessary because no sources are subject to this rule. This rule was created to help bring the St. Louis ozone nonattainment area into compliance by reducing volatile organic compounds (VOCs) from sources that were not affected by other rulemakings.

- \* 10 CSR 10-6.362 (rescission) Clean Air Interstate Rule Annual NO<sub>x</sub> Trading Program
- \* 10 CSR 10-6.364 (rescission) Clean Air Interstate Rule Seasonal NO<sub>x</sub> Trading Program
- \* 10 CSR 10-6.366 (rescission) Clean Air Interstate Rule SO<sub>2</sub> Trading Program

These rules are no longer necessary and have been superseded by the Cross-State Air Pollution Rule (CSAPR) annual nitrogen oxide (NO<sub>x</sub>), sulfur dioxide (SO<sub>2</sub>), and seasonal NO<sub>x</sub> Trading Programs. These rules provided the requirements of the U.S. Environmental Protection Agency's Clean Air Interstate Rule (CAIR) establishing a national emissions banking and trading program.

- \* 10 CSR 10-2.320 (amendment) Control of Emissions From Production of Pesticides and Herbicides

This rulemaking removes the unnecessary use of restrictive words and compliance dates found in the rule and reorganizes the rule into the standard rule organization format.

- \* 10 CSR 10-2.340 (amendment) Control of Emissions From Lithographic Printing Installations

This rulemaking will remove the unnecessary use of restrictive words, update

incorporation by reference information, add definitions specific to this rule, and make administrative updates. It also replaces the word installations with operations in the title for consistency with its St. Louis area counterpart rule.

\* 10 CSR 10-5.570 (amendment) Control of Sulfur Emissions From Stationary Boilers

This rulemaking will remove the unnecessary use of restrictive words, update incorporation by reference information, add definitions specific to this rule, and make administrative updates.

\* 10 CSR 10-6.030 (amendment) Sampling Methods for Air Pollution Sources

This rulemaking will comply with Executive Order 17-03 criteria and amend this rule to update incorporations by reference. This rulemaking will provide a more efficient way to incorporate by reference methods for stack testing as found in 40 CFR part 51, 40 CFR part 60, and 40 CFR part 61.

\* 10 CSR 10-6.040 (amendment) Reference Methods

This rulemaking will update the incorporation by reference date to include the latest Federal Register Notices that promulgated new equivalency methods for monitoring air pollutants. Adding these monitoring methods to the rule allows entities to use them for determining compliance with National Ambient Air Quality Standards (NAAQS). Additionally, this rulemaking will update incorporations by reference, remove the unnecessary use of restrictive words, and add American Society for Testing and Material (ASTM) standards referenced in other 10 CSR 10 rules.

\* 10 CSR 10-6.110 (amendment) Reporting Emission Data, Emission Fees, and Process Information

This rulemaking will update the applicable year(s) for the emission fee. There will be no change to the fees at this time. This rulemaking will also remove unnecessary use of restrictive words, add definitions specific to this rule, and make administrative updates.

\* 10 CSR 10-6.200 (amendment) Hospital, Medical, Infectious Waste Incinerators

This rulemaking incorporates by reference the federal regulatory requirements for existing hospital, medical, and infectious waste incinerators of 40 CFR 60 Subpart Ce—Emission Guidelines and Compliance Times for Hospital/Medical/Infectious Waste Incinerators. This assures that state rule requirements remain consistent with the latest federal rule requirements to avoid confusion.
