RE: New Source Review Permit Amendment - Permit Number: 052006-017A  
Project Number: 2018-02-026; Installation Number: 213-0037

Dear Ms. Baxter:

On February 20, 2018 Air Pollution Control Program received your request to amend Permit 052006-017 by changing Special Condition 2 from a National Ambient Air Quality Standards (NAAQS) Limitation for particulate matter less than ten microns in diameter (PM<sub>10</sub>) to a daily throughput limitation.

The ambient impact limits from Permit #052006-017 is being converted to daily production limits as Concrete Company of the Ozarks wants capabilities of bringing a new portable to the site. This change reflects the Air Pollution Control Program's updated construction industry policy "Ceasing the Use of Nomographs" dated May 1, 2016.

Concrete Company of the Ozarks is permitted to operate with other plants located at the site as long as the following scenarios are maintained. These scenarios are also summarized in the table below.

- When operating by itself, referred to as solitary operation, Concrete Company of the Ozarks is allowed to produce up to 3,624 tons of concrete per day.
- When operating with another plant Concrete Company of the Ozarks, LLC, is allowed to produce up to 2,228 tons of concrete per day.

Table 1: Summary of Daily Production Limits

| Type of Operation       | Daily Production Limit (tons) |
|-------------------------|-------------------------------|
| <sup>a</sup> Solitary   | 3,624                         |
| <sup>b</sup> Concurrent | 2,228                         |

<sup>a</sup> Operation without other plants

<sup>b</sup> Operation with plants that are owned and not owned by Concrete Company of the Ozarks
