

DEPARTMENT OF NATURAL RESOURCES

MISSOURI AIR CONSERVATION COMMISSION

PERMIT TO CONSTRUCT

Under the authority of RSMo 643 and the Federal Clean Air Act the applicant is authorized to construct the air contaminant source(s) described below, in accordance with the laws, rules and conditions as set forth herein.

Permit Number: **052013-013** Project Number: 2013-02-006

Parent Company: The Meadows Pet and Small Animal Crematory

Parent Company Address: 771 NW Mays RD, Maysville, MO 64469

Installation Name: The Meadows Pet and Small Animal Crematory

Installation Number: 063-0017

Installation Address: 771 NW Mays RD, Maysville, MO 64469

Location Information: DeKalb County, S27, T59N, R31

Application for Authority to Construct was made for:

The installation of a new R & K Model 34 Burn Easy Incinerator and a new R & K Model 36 Burn Easy Incinerator. This review was conducted in accordance with Section (5), Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*.

-
- Standard Conditions (on reverse) are applicable to this permit.
- Standard Conditions (on reverse) and Special Conditions are applicable to this permit.

MAY 28 2013

EFFECTIVE DATE

Kynard Moore
 DIRECTOR OR DESIGNEE
 DEPARTMENT OF NATURAL RESOURCES

STANDARD CONDITIONS:

Permission to construct may be revoked if you fail to begin construction or modification within two years from the effective date of this permit. Permittee should notify the Air Pollution Control Program if construction or modification is not started within two years after the effective date of this permit, or if construction or modification is suspended for one year or more.

You will be in violation of 10 CSR 10-6.060 if you fail to adhere to the specifications and conditions listed in your application, this permit and the project review. In the event that there is a discrepancy between the permit application and this permit, the conditions of this permit shall take precedence. Specifically, all air contaminant control devices shall be operated and maintained as specified in the application, associated plans and specifications.

You must notify the Departments' Air Pollution Control Program of the anticipated date of start up of this (these) air contaminant source(s). The information must be made available within 30 days of actual startup. Also, you must notify the Department of Natural Resources Regional office responsible for the area within which you are located within 15 days after the actual start up of this (these) air contaminant source(s).

A copy of this permit and permit review shall be kept at the installation address and shall be made available to Department of Natural Resources' personnel upon request.

You may appeal this permit or any of the listed special conditions to the Administrative Hearing Commission (AHC), P.O. Box 1557, Jefferson City, MO 65102, as provided in RSMo 643.075.6 and 621.250.3. If you choose to appeal, you must file a petition with the AHC within 30 days after the date this decision was mailed or the date it was delivered, whichever date was earlier. If any such petition is sent by registered mail or certified mail, it will be deemed filed on the date it is mailed. If it is sent by any method other than registered mail or certified mail, it will be deemed filed on the date it is received by the AHC.

If you choose not to appeal, this certificate, the project review and your application and associated correspondence constitutes your permit to construct. The permit allows you to construct and operate your air contaminant source(s), but in no way relieves you of your obligation to comply with all applicable provisions of the Missouri Air Conservation Law, regulations of the Missouri Department of Natural Resources and other applicable federal, state and local laws and ordinances.

The Air Pollution Control Program invites your questions regarding this air pollution permit. Please contact the Construction Permit Unit at (573) 751-4817. If you prefer to write, please address your correspondence to the Missouri Department of Natural Resources, Air Pollution Control Program, P.O. Box 176, Jefferson City, MO 65102-0176, attention: Construction Permit Unit.

Page No.	3
Permit No.	
Project No.	2013-02-006

SPECIAL CONDITIONS:

The permittee is authorized to construct and operate subject to the following special conditions:

The special conditions listed in this permit were included based on the authority granted the Missouri Air Pollution Control Program by the Missouri Air Conservation Law (specifically 643.075) and by the Missouri Rules listed in Title 10, Division 10 of the Code of State Regulations (specifically 10 CSR 10-6.060). For specific details regarding conditions, see 10 CSR 10-6.060 paragraph (12)(A)10. "Conditions required by permitting authority."

The Meadows Pet and Small Animal Crematory
DeKalb County, S27, T59N, R31

1. Process Requirements for the Animal Crematory (EP-01 and EP-02)
 - A. The Meadows Pet and Small Animal Crematory will burn exclusively non-infectious animal bodies or body parts (as defined in the Installation Description) and containers not containing chlorine.
 - B. Charging of waste during burn cycles is prohibited.
 - C. The crematory shall be equipped with a continuous chart recorder that monitors, displays and records the temperature in the final combustion chamber with an accuracy of two percent ($\pm 2\%$).
 - D. The Meadows Pet and Small Animal Crematory shall maintain the temperature in the final combustion chamber of both incinerators at or above 1300 degrees Fahrenheit.
 - E. The Meadows Pet and Small Animal Crematory (EP-01 and EP-02) shall each be equipped with an afterburner.
 - F. Remains shall be incinerated at a rate not exceeding 75.0 pounds per hour in each (EP-01 and EP-02) incinerator.
 - G. Patch weight shall not exceed 200 pounds for the R & K Incinerator Model 34 and 400 pounds for the R & K Incinerator Model 36.
 - H. The Meadows Pet and Small Animal Crematory shall maintain an accurate record of the number of cremation and the total mass of remains cremated at this installation per month. Attachment A or equivalent forms, such as electronic forms, approved by the Air Pollution Control Program shall be used to demonstrate compliance with Special Condition 1.F.

Page No.	4
Permit No.	
Project No.	2013-02-006

SPECIAL CONDITIONS:

The permittee is authorized to construct and operate subject to the following special conditions:

2. **Opacity**
The crematory (EP-01 and EP-02) shall have opacity of less than ten percent (10%) at all times.
3. **Requirements for Operators of the Animal Crematory (EP-01 and EP-2)**
 - A. All crematory operators shall attend a training program equivalent to that developed by the American Society of Mechanical Engineers (ASME), by the crematory manufacturer or by an individual with more than one (1) year experience in the operation of the crematory. The training shall include basic combustion theory, operating procedures, monitoring of combustion control parameters and all emergency procedures to be followed if the crematory should malfunction or exceed operating parameters.
 - B. The crematory operator shall have the essential steps necessary for satisfactory operation of the crematory readily available to him or her in an easy to read and follow manual.
4. **Restriction of Odors**
If a continued situation of verified nuisance odors exists in violation of 10 CSR 10-6.165, the Director may require through written notice that The Meadows Pet and Small Animal Crematory submit within ten days a corrective action plan adequate to timely and significantly mitigate the odors. The Meadows Pet and Small Animal Crematory shall implement any such plan immediately upon its approval by the Director. Failure to either submit or implement such a plan shall be in violation of this permit.
5. **Record Keeping and Reporting Requirements**
 - A. The Meadows Pet and Small Animal Crematory shall maintain all records required by this permit for not less than five years and shall make them available immediately to any Missouri Department of Natural Resources' personnel upon request.
 - B. The Meadows Pet and Small Animal Crematory shall report to the Air Pollution Control Program's Enforcement Section, P.O. Box 176, Jefferson City, Missouri 65102, no later than ten days after the end of the month during which any record required by this permit shows an exceedance of a limitation imposed by this permit.

REVIEW OF APPLICATION FOR AUTHORITY TO CONSTRUCT AND OPERATE
SECTION (5) REVIEW

Project Number: 2013-02-006
Installation ID Number: 063-0017
Permit Number:

The Meadows Pet and Small Animal Crematory
771 NW Mays RD
Maysville, MO 64469

Complete: May 13, 2013

Parent Company:
The Meadows Pet and Small Animal Crematory
771 NW Mays RD
Maysville, MO 64469

DeKalb County, S27, T59N, R31

REVIEW SUMMARY

- The Meadows Pet and Small Animal Crematory has applied for authority to install a new R & K Model 34 Burn Easy Incinerator and a new R & K Model 36 Burn Easy Incinerator.
- Minimal Hazardous Air Pollutant (HAP) emissions are expected from the proposed equipment, but are less than their respective Screen Modeling Action Levels.
- None of the New Source Performance Standards (NSPS) apply to the installation.
- None of the National Emission Standards for Hazardous Air Pollutants (NESHAPs) apply to this installation. None of the currently promulgated Maximum Achievable Control Technology (MACT) regulations apply to the proposed equipment.
- An afterburner installed on each of the crematories controls the emissions from the equipment in this permit.
- This review was conducted in accordance with Section (5) of Missouri State Rule 10 CSR 10-6.060, Construction Permits Required. Potential emissions of each pollutant are below respective de minimis levels. Section (1)(B) of Missouri State Rule 10 CSR 10-6.060 requires all incinerators to obtain construction permits.
- This installation is located in DeKalb County, an attainment area for all criteria pollutants.
- This installation is not on the List of Named Installations found in 10 CSR 10-6.020(3)(B), Table 2. The installation's major source level is 250 tons per year

and fugitive emissions are not counted toward major source applicability.

- Ambient air quality modeling was not performed since potential emissions of the application are below de minimis levels.
- Emissions testing is not required for the equipment. Stack testing was conducted on a similar unit and approved by the Air Pollution Control Program.
- A submittal of a Basic Operating Permit application is required for this installation within 30 days of this permit's issuance. This is required for all incinerators.
- Approval of this permit is recommended with special conditions.

INSTALLATION DESCRIPTION

The Meadows Pet and Small Animal Crematory is a new installation and will operate a R & K 34 Burn Easy Incinerator and a R & K 36 Burn Easy Incinerator. This facility also needs a Basic Operating Permit to operate. No operating permit has been issued for this facility. The Meadows Pet and Small Animal Crematory is located in Maysville, Missouri, DeKalb County.

No permits have been issued to The Meadows Pet and Small Animal Crematory from the Air Pollution Control Program.

On November 30, 2012, Kansas City Regional Office (KCRO) issued Notice of Violation #KCR20121211 12124392 to The Meadows Pet and Small Animal Crematory for the violations of Missouri Air Conservation Regulation 10 CSR 10-6.060, "*Construction Permits Required.*" KCRO documented two R & K Incinerator, Incorporated Burn-Easy units that were installed and in operation. One was installed and operating since 2007 and the other since 2011.

PROJECT DESCRIPTION

The Meadows Pet and Small Animal Crematory installed two R & K Burn Easy Incinerators without obtaining of construction permit. The manufacturer maximum hourly design rate is 75 pounds per hour and is fueled by ultra-low sulfur diesel fuel (15 ppm). The R & K Model 34 Burn Easy Incinerator (EP-1) has a 200 pound capacity. The R & K Model 36 Burn Easy Incinerator (EP-2) has a 400 pound capacity. Both incinerators are equipped with an afterburner which helps controls emissions from the cremation process. Stack testing performed on the R & K Model 34 Burn Easy Incinerator and the R & K Model 36 Burn Easy Incinerator on December 1, 1998 was submitted to the Air Pollution Control Program with this permit and also for Construction Permit 012010-014. The testing results were also used for Construction Permit 072011-007.

The crematory was required to submit stack test result/test to demonstrate compliance with the Air Pollution Control Program's requirements for crematories. These requirements include that the crematory achieve a combustion efficiency of 99.9%, that the maximum particulate concentration in the crematory's stack gas is less than 0.09 grains per dry standard cubic feet and that the crematory's opacity does not exceed 10%. These requirements were developed to ensure proper combustion, which ensures destruction of HAPs.

The crematory is permitted to cremate non-infectious animal bodies and body parts. The Air Pollution Control Program's definition of this term is animal bodies and body parts that do not fit the definition of medical/infectious waste as defined in the Code of Federal Regulations, 40 CFR 60.51, *Standards of Performance for New Stationary Sources*, Subpart Ec—"Standards of Performance for Hospital/Medical/Infectious Waste Incinerators for Which Construction is Commenced After June 20, 1996." The rule defines medical/infectious waste as:

Medical/infectious waste means any waste generated in the diagnosis, treatment, or immunization of human beings or animals, in research pertaining thereto, or in the production or testing of biologicals that are listed in paragraphs (1) through (7) of this definition. The definition of medical/infectious waste does not include hazardous waste identified or listed under the regulations in part 261 of this chapter; household waste, as defined in §261.4(b)(1) of this chapter; ash from incineration of medical/infectious waste, once the incineration process has been completed; human corpses, remains, and anatomical parts that are intended for interment; and domestic sewage materials identified in §261.4(a)(1) of this chapter.

- (1) Cultures and stocks of infectious agents and associated biologicals, including: cultures from medical and pathological laboratories; cultures and stocks of infectious agents from research and industrial laboratories; wastes from the production of biologicals; discarded live and attenuated vaccines; and culture dishes and devices used to transfer, inoculate, and mix cultures.
- (2) Human pathological waste, including tissues, organs, and body parts and body fluids that are removed during surgery or autopsy, or other medical procedures, and specimens of body fluids and their containers.
- (3) Human blood and blood products including:
 - (i) Liquid waste human blood;
 - (ii) Products of blood;
 - (iii) Items saturated and/or dripping with human blood; or
 - (iv) Items that were saturated and/or dripping with human blood that are now caked with dried human blood; including serum, plasma, and other blood components, and their containers, which were used or intended for use in either patient care, testing and laboratory analysis or the development of pharmaceuticals. Intravenous bags are also included in this category.
- (4) Sharps that have been used in animal or human patient care or treatment or in medical, research, or industrial laboratories, including hypodermic needles,

syringes (with or without the attached needle), pasteur pipettes, scalpel blades, blood vials, needles with attached tubing, and culture dishes (regardless of presence of infectious agents). Also included are other types of broken or unbroken glassware that were in contact with infectious agents, such as used slides and cover slips.

- (5) Animal waste including contaminated animal carcasses, body parts, and bedding of animals that were known to have been exposed to infectious agents during research (including research in veterinary hospitals), production of biologicals or testing of pharmaceuticals.
- (6) Isolation wastes including biological waste and discarded materials contaminated with blood, excretions, exudates, or secretions from humans who are isolated to protect others from certain highly communicable diseases, or isolated animals known to be infected with highly communicable diseases.
- (7) Unused sharps including the following unused, discarded sharps: hypodermic needles, suture needles, syringes, and scalpel blades.

Infectious and non-infectious human bodies and body parts are not permitted to be cremated in this incinerator.

EMISSIONS/CONTROLS EVALUATION

The emission factors and control efficiencies used in this analysis were obtained from the Environmental Protection Agency (EPA) document AP-42, *Compilation of Air Pollutant Emission Factors*, Fifth Edition, FIRE, and stack testing data. The emission rates for particulate matter less than ten (10) microns in aerodynamic diameter (PM₁₀) and carbon monoxide (CO) used in this review were obtained from a stack test performed on a similar incinerator. Emissions of sulfur dioxide (SO₂) were calculated using the emission factor from AP-42 Table 1.3-1 (diesel fuel). Nitrogen oxide (NO_x) and volatile organic compound (VOC) emissions were calculated using an emission factor from FIRE SCC 5-02-001-01. The emission factors used in the analysis of HAP emissions were obtained from FIRE for SCC 3-15-021-01. The composite emission factor of HAPs listed in FIRE was 0.076 pounds of HAP per body cremated. Potential emissions of the application represent the potential of the new equipment, assuming continuous operation (8760 hours per year.) The following table provides an emissions summary for this project.

Table 1: Emissions Summary (tons per year)

Pollutant	Regulatory De Minimis Levels	Existing Potential Emissions	Existing Actual Emissions (2012 EIQ)	Potential Emissions Model 34	Potential Emissions Model 36	Potential Emissions of the Application	New Installation Conditioned Potential
PM ₁₀ ¹	15.0	N/A	N/A	0.1121	0.1163	0.2284	N/A
PM _{2.5} ¹	10.0	N/A	N/A	0.1121	0.1163	0.2284	N/A
SOx	40.0	N/A	N/A	0.9198	0.9198	1.8396	N/A
NOx	40.0	N/A	N/A	0.4928	0.4928	0.9855	N/A
VOC	40.0	N/A	N/A	0.4928	0.4928	0.9855	N/A
CO ²	100.0	N/A	N/A	0.0728	0.01886	0.0917	N/A
HAPs	10.0/25.0	N/A	N/A	0.1597	0.1597	0.3194	N/A

N/A = Not Applicable; N/D = Not Determined

¹It is assumed that all PM₁₀ to be PM_{2.5}. PM₁₀ emission rates are from the stack test.

²CO emission rates are from the stack test.

PERMIT RULE APPLICABILITY

This review was conducted in accordance with Section (5) of Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*. Potential emissions of criteria pollutants are below de minimis levels.

APPLICABLE REQUIREMENTS

The Meadows Pet and Small Animal Crematory shall comply with the following applicable requirements. The Missouri Air Conservation Laws and Regulations should be consulted for specific record keeping, monitoring, and reporting requirements. Compliance with these emission standards, based on information submitted in the application, has been verified at the time this application was approved.

GENERAL REQUIREMENTS

- *Submission of Emission Data, Emission Fees and Process Information*, 10 CSR 10-6.110
The emission fee is the amount established by the Missouri Air Conservation Commission annually under Missouri Air Law 643.079(1). Submission of an Emissions Inventory Questionnaire (EIQ) is required June 1 for the previous year's emissions.
- *Operating Permits*, 10 CSR 10-6.065
- *Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin*, 10 CSR 10-6.170
- *Restriction of Emission of Visible Air Contaminants*, 10 CSR 10-6.220
- *Restriction of Emission of Odors*, 10 CSR 10-6.165
- *Restriction of Emission of Sulfur Compounds*, 10 CSR 10-6.260

STAFF RECOMMENDATION

On the basis of this review conducted in accordance with Section (5), Missouri State Rule 10 CSR 10-6.060, *Construction Permits Required*, I recommend this permit be granted with special conditions.

Kathy Kolb
New Source Review Unit

Date

PERMIT DOCUMENTS

The following documents are incorporated by reference into this permit:

- The Application for Authority to Construct form, dated January 30, 2013, received February 1, 2013, designating The Meadows Pet and Small Animal Crematory as the owner and operator of the installation.
- U.S. EPA document AP-42, *Compilation of Air Pollutant Emission Factors*, Fifth Edition.
- Stack test report on R & K Model 34 and 36 Burn Easy Incinerator by Monarch Analytical Laboratories, Inc. on December 2, 1998.

Mr. Estel Owens
Owner

RE: New Source Review Permit - Project Number: 2013-02-006

Dear Mr. Owens:

Enclosed with this letter is your permit to construct. Please study it carefully. Also, note the special conditions on the accompanying pages. The document entitled, "Review of Application for Authority to Construct," is part of the permit and should be kept with this permit in your files. Operation in accordance with these conditions, your new source review permit application and operating permit is necessary for continued compliance. The reverse side of your permit certificate has important information concerning standard permit conditions and your rights and obligations under the laws and regulations of the State of Missouri.

If you have any questions regarding this permit, please do not hesitate to contact Kathy Kolb, at the department's Air Pollution Control Program, P.O. Box 176, Jefferson City, MO 65102 or at (573) 751-4817. Thank you for your attention to this matter.

Sincerely,

AIR POLLUTION CONTROL PROGRAM

Susan Heckenkamp
New Source Review Unit Chief
