

ATTACHMENT 8 - WENTWORTH ABANDONED MINE WASTE AND REUSED TAILINGS

- Objective - Identify areas of abandoned mine waste.
- Approach
 - Evaluate imagery with MDNR Project Manager.
 - Use PM identified area as source for spectral signature for SAM analysis of entire imaged area.
 - Visually confirm areas identified as mine waste.
 - Collect representative XRF readings.
- Conclusion - HSI does appear to identify mine waste & areas where chat/tailings have been reused.
