RE: Approval of Class 1 Permit Modification with Prior Director's Approval to do a 2013 Site-Wide Recovery Well Evaluation and Sampling Event in lieu of two semi-annual sample events, Greenfield Environmental Multistate Trust, LLC, Greenfield Environmental Multistate Trust, LLC at Kansas City, Missouri, EPA ID# MOD007128978

Dear Ms. Gorton:

The Missouri Department of Natural Resources reviewed the Class 1 with prior Director approval Permit Modification for the Kansas City, Missouri facility that was received on October 18, 2013, from Greenfield Environmental Multistate Trust, LLC (Trust).

The Department agrees with the Trust that this is a Class 1 Permit Modification requiring prior director approval.

The Permit Modification requests doing one site wide monitoring event and well evaluation, rather than the two semiannual sampling events specified in the facility's Sampling and Analysis Plan. The Permit Modification also requests replacing the Annual report required by Special Permit Condition XXIII.F with the site wide monitoring event. Please note that the report should also include any yearly corrective action activities, like well repairs, well surface and subsurface integrity inspections, screen occlusion, and other modifications made at the facility.

The Trust shall provide notice of the permit modification to all persons on each facility mailing list and the appropriate units of state and local government no later than 90 calendar days after the date of this letter as required by Code of Federal Regulations 40 CFR 270.42(a)(1)(ii). The Trust shall also provide a copy of the notice to the Department.
