RE: Class 1 Permit Modification with Prior Director's Approval – Rotary Mill
Green America Recycling, LLC, Hannibal, Missouri
EPA ID# MOD054018288

Dear Ms. Farr:

The Missouri Department of Natural Resources (Department) approves Green America Recycling, LLC's Class 1 Permit Modification request, dated December 16, 2011, and electronic response to comments dated December, 21, 2011. The request was to utilize a rotary mill for cleaning scrap metal in the containment building designated in the permit as Feed Prep #1.

We are approving the Class 1 Permit Modification requiring prior director approval with the following conditions:

1. A 10 percent contingency cost was added to the closure cost estimate for a total of \$15,302. This will be the approved closure cost estimate for the Rotary Mill Unit. The current financial assurance mechanism is adequate to cover this increased closure cost for the unit; therefore, no increase will be required at this time. Green America Recycling, LLC, must include this cost estimate in the next annual inflation adjustment that is required.
2. Green America Recycling, LLC, should be aware that the contained-out determination may or may not be applicable or approved after review of the Human Health Risk Assessment.
