

Mr. Greg Anderson
319 Nonpoint Source Program Coordinator
Missouri Department of Natural Resources
Water Protection Program

Date:

Re: Letter of Intent for *Name of Nonpoint Source (NPS) Project*

General Instructions: One paragraph should be adequate for each section listed below. An abundance of information is probably not needed at this stage. If the proposed NPS project is consistent with goals described on the website, <http://dnr.mo.gov/env/wpp/nps/index.html>, meets department needs and funding is available, staff will contact your organization to further discuss the project scope and budget. If selected for funding a formal contract or subgrant will be drafted to secure details of the agreement. Letters of intent can be submitted at any time during the year, though funding may be competitive and cannot be guaranteed.

Introduction:

Statements of the problem and intent:

Brief Description of the Project:

Objectives of the Project:

Products or measurable results expected :

Estimated cost in Federal Dollars (60/40 nonfederal match required)

Estimated Time for Completion: (please include estimated start and completion dates)

Partners:

Applicant name, association, and contact information (nonfederal government, 501c3 nonprofit, and educational institutions are eligible for 319 grant funds)
