Dear Mr. Nagel:

Investigation of Odor Control Technologies – 2nd Quarter 2017

This Update on Odor Control Technology Investigation is being submitted by Bridgeton Landfill, LLC (“Bridgeton Landfill”) pursuant to Paragraph 27(C) of the Second Amendment to the First Agreed Order.

Bridgeton Landfill continues to execute state of the art odor control methodologies in the effort to minimize the potential for any off-site emission of odor. This has included continued investigation of new odor control technologies. During the second quarter 2017, Bridgeton Landfill installed an upgrade to the existing fence odor control system. This system upgrade allows for variable output of odor neutralizer and also allows for increased odor neutralizer output. The existing fence odor control system was left in place and can be utilized concurrently with the upgraded system.

Sincerely,

Matt Stewart

Environmental Specialist
