Dear Mr. Nagel:

Investigation of Odor Control Technologies – 3rd Quarter 2017

This Update on Odor Control Technology Investigation is being submitted by Bridgeton Landfill, LLC (“Bridgeton Landfill”) pursuant to Paragraph 27(C) of the Second Amendment to the First Agreed Order.

Bridgeton Landfill continues to execute state of the art odor control methodologies in the effort to minimize the potential for any off-site emission of odor. This has included continued investigation of new odor control technologies. During the second quarter 2017, Bridgeton Landfill installed an upgrade to the existing fence odor control system, which included a larger blower. To better accommodate the increased blower size, Bridgeton Landfill will replace the existing 2 inch PVC pipe on the fence line with 3 inch PVC pipe. This will increase odor neutralizer output efficiency through the fence odor control system.

Sincerely,

Matt Stewart

Environmental Specialist
