

Bridgeton Landfill, LLC

Weekly Data Submittal

Week of September 27, 2020 – October 03, 2020

**Required by Section IX.33.g of Final Consent Judgment, Case No. 13SL-
CC01088-01
Effective June 29, 2018**

Contents:

Attachment A – Temperature Monitoring Probe Analytical Charts

Attachment B – Leachate Levels in Leachate Collection Sumps

Attachment C – Work Completed/Planned

Provided Separately:

- Leachate Level in Leachate Collection Sump Raw Data Excel Spreadsheet**
- Temperature Monitoring Probe Raw Data Excel Spreadsheet**
- Heat Extraction System TMP Raw Data Excel Spreadsheet**

October 09, 2020

Commentary on Data

October 02, 2020

Attachment A - Temperature Monitoring Probe Analytical Charts

The following Temperature Monitoring Probes (TMPs) indicated profiles that were generally consistent with previous observations: TMP-1, -2R, -3, -3R, -4, -4R, -6, -9, -11R, -14R2, -16R, -17, -18, -21, -22, -23, -24, -25R, -26R, -27, -28R, -29, -33, -34, -35, -36R, -37, -38, -39, -40, -41, -42, -43, -44, -45, -46, -47, -48, and -49.

TMP readings for the evaluation of the Heat Extraction System (HES) are provided as an attachment "Heat Extraction System TMP Raw Data Excel Spreadsheet," but are not discussed in this report.

The TMPs listed above (and associated replacement TMPs) except TMP-6, -9, -11R, and -14R2 constitute the North Quarry TMPs as defined in the August 2017 *North Quarry Subsurface Temperature Monitoring Probes Work Plan*. No temperature in the individual thermocouples of the North Quarry TMPs exceeds the temperature threshold established in this workplan.

Attachment B – Leachate Levels in Leachate Collection Sumps

The pump in LCS-1D was non-operational during the weekly reporting period.

The pump in LCS-2D was non-operational during the weekly reporting period.

The Blackhawk pneumatic pump in LCS-3D was repaired on 8/26/20. Liquid level was measured manually.

The level sensor in LCS-4B is currently operational and responsive. Liquid level was not recorded by the level sensor during the weekly reporting period. LCS-4B is equipped with a flow meter that displayed no flow during the weekly reporting period. Therefore, it can be concluded that the liquid level was below the bottom of the pump and level sensor in LCS-4B.

The LCS-5B transducer was found to be non-operational on 9/21/20. The transducer was replaced on 9/24/20 and the pump is now fully operational.

The LCS-6B was turned off on 8/31/20 for forcemain repairs. Forcemain repairs were completed on 9/9/20. The LCS-6B pump was non-operational on 9/10/20 when the pump was attempted to be turned back on following forcemain repairs. The electric pump in LCS-6B was converted to a pneumatic pump on 9/30/20 and the pneumatic pump was fully operational during the reporting period.

Attachment C – Work Completed / Planned

This attachment presents a list of work completed in the past week and a list of work planned for the upcoming week.

TMP BRIDGETON LANDFILL NOTES

There **are no** new notes for **09/28/2020**.

TMP notes that are new for the reporting week are in **bold**.

TMP-1: NONE

TMP-2:

1. TMP-2 has been replaced by TMP-2R and will no longer be monitored or included in the presentation.

TMP-2R:

1. Data reported on 11/29/2016 was inadvertently left as the 11/22/2016 data. This was corrected on 12/5/2016 reading submittal.

TMP-3:

1. No reliable temperature readings have been obtained at 170 ft depth since 1/29/2014, except on 3/13/2014.
2. The connectivity tests on 4/11/2014 conducted by CEC showed that units at 10, 90, 130, 210 and 250 ft depths are no longer reliable.
3. The connectivity tests on 10/28/2014 conducted by Feezor Engineering showed that units at 10, 90, 110, 130, 210 and 250 ft depths are not reliable.
4. The unit at 50 ft depth was fluctuating resistance since 10/1/2018. Therefore the temperature is determined to be unreliable.
5. No temperature reading could be obtained at 70 ft depth since 10/22/2018.

TMP-3R:

1. The unit at 20 ft depth had a fluctuating resistance since 9/25/2017. Therefore the temperature is determined to be unreliable.

TMP-4:

1. The connectivity tests on 4/11/2014 conducted by CEC showed that the unit at 48 ft depth is no longer reliable.

TMP-4R: NONE

TMP-5: TMP NO LONGER IN SERVICE– Verified by Connectivity testing by Feezor Engineering in March 2015.

TMP-6:

1. The connectivity tests on 4/11/2014 conducted by CEC showed that units at 35, 55, 75, 155, 175, and 195 ft depths are no longer reliable.
2. No reliable temperature readings have been obtained at the unit at 215 ft depth since 6/13/2014.

TMP-7R: TMP NO LONGER IN SERVICE

TMP-8: TMP NO LONGER IN SERVICE

TMP-9:

1. Unit at 100 ft depth had an inaccurate temperature reading on 8/1/2013 and no reading since 8/6/2013.
2. The connectivity tests on 4/11/2014 conducted by CEC showed that units at 20, 60, 80, and 100 ft depths are no longer reliable.

TMP-10:

1. All units were verified by connectivity testing by Feezor Engineering on 6/1/2017 to be unreliable.

TMP-11:

1. All units were verified by connectivity testing by Feezor Engineering on 11/23/2016 to be unreliable.
2. TMP-11 is no longer in service and will not be included in the presentation.

TMP-11R: NONE

TMP-12:

2. All units were verified by connectivity testing by Feezor Engineering in October 2015 to be unreliable.

TMP-13: TMP NO LONGER IN SERVICE

TMP-14:

1. All units were verified by connectivity testing by Feezor Engineering in March 2016 to be unreliable.

TMP-14R:

1. Due to the connectivity test results by Feezor Engineering on TMP-14 (see note above), TMP-14R is added to this reporting data set as of 3/7/2016.
2. TMP-14R is no longer included in the presentation and is replaced with TMP-14R2.

TMP-14R2: NONE

TMP-15: TMP WAS NEVER IN SERVICE

TMP-16:

1. TMP-16 has been replaced by TMP-16R and will no longer be included in the presentation.

TMP-16R: NONE

TMP-17:

1. Thermocouple at 20' higher resistance than allowable on 9/21. Ongoing maintenance is being performed since it may be a surface corrosion issue at the switchbox.

TMP-18: NONE

TMP-19: NOT PART OF THIS SUBMITTAL (HEAT EXTRACTION TMP)

TMP-20: NOT PART OF THIS SUBMITTAL (HEAT EXTRACTION TMP)

TMP-21: NONE

TMP-22:

1. No temperature reading could be obtained and resistivity was fluctuating at the unit at 50 ft depth since 4/2/2018.

TMP-23: NONE

TMP-24: NONE

TMP-25:

1. TMP-25 has been replaced by TMP-25R and will no longer be included in the presentation.

TMP-25R: NONE

TMP-26:

1. TMP-26 has been replaced by TMP-26R and will no longer be included in the presentation.

TMP-26R: NONE

TMP-27: NONE

TMP-28:

1. TMP-28 has been replaced by TMP-28R and will no longer be included in the presentation.

TMP-28R: NONE

TMP-29: NONE

TMP-33: NONE

TMP-34: NONE

TMP-35: NONE

TMP-36: TMP-36 has been replaced by TMP-36R and will no longer be included in the presentation.

TMP-36R: NONE

TMP-37: NONE

TMP-47: NONE

TMP-48: NONE

TMP-49: NONE

TMP vs DEPTH and TMP vs ELEVATION (for **09/28/2020**):

1. There were no reliable temperature readings for TMP-13 since 3/19/2014.
2. There were no reliable temperature readings for TMP-7R, as determined by the connectivity test on 4/11/2014.
3. There were no reliable temperature readings for TMP-5 since 11/5/2014.
4. There were no reliable temperature readings for TMP-12 since 9/28/2015.
5. There were no reliable temperature readings for TMP-8 since 9/9/2015.
6. There were no reliable temperature readings for TMP-14, confirmed since 3/7/2016.
7. There were no reliable temperature readings for TMP-11 as determined by the connectivity test on 11/23/2016.
8. TMP-2 has been replaced by TMP-2R and will no longer be monitored.
9. TMP-11 is no longer in service and will not be included in the presentation.
10. There were no reliable temperature readings for TMP-10 since 5/30/2017.
11. TMP-16, 25, and 28 have been replaced by TMP-16R, 25R, and 28R and will be no longer reported since 1/15/2018.
12. TMP-26 has been replaced by TMP-26R and will be no longer reported since 5/21/2018.
13. TMP-36 has been replaced by TMP-36R and will be no longer reported since 4/1/2018.
14. TMP-14R has been replaced by TMP-14R2 and will be no longer reported since 1/6/2020.

ATTACHMENT B

LEACHATE LEVELS IN LEACHATE COLLECTION SUMPS

LCS-3D Liquid Level Below Ground Surface

LCS-4B Liquid Level Below Ground Surface

LCS-5B Liquid Level Above Quarry Floor

*The transducer in LCS-5B was down from 11/6/19 to 11/19/19 The LCS-5B pump was turned off on 8/31/20 for foremain repairs leading to an increase in liquid level. The pump was replaced on 9/17/20.

LCS-6B Liquid Level Above Quarry Floor

The transducer became non-operational on 1/13/20. Liquid level was measured manually on 2/21/20, 2/28/20 and 3/6/20. The transducer became operational on 3/13/20. The VFD was observed to be non-operational on 4/23/20, it was replaced on 4/23/20, however the level sensor reading was not taken due to VFD communication loss with SCADA. The LCS-6B pump was turned off on 8/31/20 for forcemain repairs leading to an increase in liquid level. The electric pump was converted to a pneumatic pump on 9/30/20.

ATTACHMENT C

WORK COMPLETED/PLANNED

Bridgeton Landfill, LLC
Weekly Summary of Work Completed and Planned

Work Completed in Week of September 27, 2020 – October 03, 2020

Gas Collection and Control System (GCCS)

- Continued operation and maintenance of GCCS system.
- Continued upgrades to GCCS system as necessary.

Heat Extraction System (HES)

- Continued operation and maintenance of the HES (pilot and barrier wells).

Bird Management

- Performed bird observations and mitigation twice daily during the work week in accordance with the December 2016 Revised Bird Hazard Monitoring and Mitigation Plan.

Leachate Management System

- Continued routine operation of previously installed and upgraded features.

Pre-Treatment Facility

- Continued ongoing operation of facility.
- Continued to optimize operation efficiency of pre-treatment facility.
- Permeate continued to be discharged directly to St. Louis Metropolitan Sewer District (MSD) – Bissell Point Facility or other approved disposal facilities as determined by MSD.

Other Projects

- Continue Outfall 008 stormwater drainage project. No waste is expected to be excavated during this project.

Work Planned for Week of October 04, 2020 – October 10, 2020

Gas Collection and Control System (GCCS)

- Continue operation and maintenance of GCCS system.
- Continue upgrades to GCCS system as necessary.

Heat Extraction System (HES)

- Continue operation and maintenance of the HES (pilot and barrier wells).

Bird Management

- Perform bird observations and mitigation twice daily during the work week in accordance with the December 2016 Revised Bird Hazard Monitoring and Mitigation Plan.

Leachate Management System

- Continue routine operation of previously installed and upgraded features.

Pre-Treatment Facility

- Continue ongoing operation of facility.
- Continue to optimize operation efficiency of pre-treatment facility.
- Continue to discharge permeate directly to St. Louis Metropolitan Sewer District (MSD) – Bissell Point Facility or other approved disposal facilities as determined by MSD.

Other Projects

- Continue Outfall 008 stormwater drainage project. No waste is expected to be excavated during this project.
