Jefferson City, MO 65102

Dear Mr. Nagel:

**Investigation of Odor Control Technologies – 1st Quarter 2018**

This Update on Odor Control Technology Investigation is being submitted by Bridgeton Landfill, LLC (“Bridgeton Landfill”) pursuant to Paragraph 27(C) of the Second Amendment to the First Agreed Order.

Bridgeton Landfill continues to execute state of the art odor control methodologies in the effort to minimize the potential for any off-site emission of odor. This has included continued investigation of new odor control technologies. In the first quarter of 2018 Bridgeton Landfill did not discover an emergent technology worthy of field testing at the site.

During the second quarter 2017, Bridgeton Landfill installed an upgrade to the existing fence odor control system, which included a larger blower. To better accommodate the increased blower size and increase odor neutralizer output efficiency, Bridgeton Landfill scheduled replacement of the existing 2 inch PVC pipe on the fence line with 3 inch PVC pipe for the fourth quarter 2017. Due to construction activities and freezing weather conditions, the PVC pipe replacement was completed in January 2018.

Sincerely,

Matt Stewart

Environmental Specialist
