Dale E & C Florene Adams
Adams Trust
202 SE 25th St
Oak Grove, MO 64075

Dear Dale E & C Florene Adams,

Valley Oaks Real Estate, LLC would like to inform you of its plans to own and operate a Missouri no-discharge beef cattle feeding operation. The operation name will be Valley Oaks Feeders, LLC. The operation will be designed and constructed to meet the current standards of the Missouri Department of Natural Resources.

The operation will consist of six production buildings that will be used for housing the cattle and manure storage, and two stack sheds that will be used for manure storage. The operation will be designed for 6,999 cattle, 3,500 growing steer and 3,499 finishing steer. The other structures on the property will be used for purposes other than housing cattle or manure storage, including but not limited to office space and storage of equipment and feed.

Manure (consisting of feces, urine, and bedding) stored in the production buildings will be cleaned out regularly, or when manure is bagged for commercial sale or land applied to fields as a fertilizer. At least fifty percent of the manure generated will be exported. The remaining manure may be land applied to fields in the land application area of the operation, as well as on other properties approximately ten miles to the northwest and thirty miles to the southeast of the operation. Manure application rates will be calculated based on manure laboratory analysis and expected crop yields. Land application will be performed using a large manure spreader to surface apply manure to the land application areas. Dead animals will be stored in confined area until render picks up within 24 hours.

The site is located in Sections 15 and 22, Township 47N, Range 29W, in Johnson County, Missouri. Valley Oaks Real Estate, LLC owns 449.4 acres at the site that will be used for the operation and its address is 1921 W 50 Highway, Lone Jack, Missouri 64070, (855) 667-2333. Additional information can be obtained from Anthony Ward, the registered agent of Valley Oaks Real Estate, LLC, or David Ward at this address or phone number.

The Missouri Department of Natural Resources will accept written comments from you and other members of the public concerning this operation for a period of thirty (30) days after receipt of Valley Oaks Real Estate, LLC’s operating permit application. Written comments should be directed to: Missouri Department of Natural Resources, Water Protection Program, Attn: Gregory Caldwell, P.O. Box 176, Jefferson City, MO 65102-0176.

Sincerely,

David Ward

Valley Oaks Real Estate, LLC would like to inform you of its plans to own and operate a Missouri no-discharge beef cattle feeding operation. The operation name will be Valley Oaks Feeders, LLC. The operation will be designed and constructed to meet the current standards of the Missouri Department of Natural Resources.

The operation will consist of six production buildings that will be used for housing the cattle and manure storage, and two stack sheds that will be used for manure storage. The operation will be designed for 6,999 cattle, 3,500 growing steer and 3,499 finishing steer. The other structures on the property will be used for purposes other than housing cattle or manure storage, including but not limited to office space and storage of equipment and feed.

Manure (consisting of feces, urine, and bedding) stored in the production buildings will be cleaned out regularly, or when manure is bagged for commercial sale or land applied to fields as a fertilizer. At least fifty percent of the manure generated will be exported. The remaining manure may be land applied to fields in the land application area of the operation, as well as on other properties approximately ten miles to the northwest and thirty miles to the southeast of the operation. Manure application rates will be calculated based on manure laboratory analysis and expected crop yields. Land application will be performed using a large manure spreader to surface apply manure to the land application areas. Dead animals will be stored in confined area until render picks up within 24 hours.

The site is located in Sections 15 and 22, Township 47N, Range 29W, in Johnson County, Missouri. Valley Oaks Real Estate, LLC owns 449.4 acres at the site that will be used for the operation and its address is 1921 W 50 Highway, Lone Jack, Missouri 64070, (855) 667-2333. Additional information can be obtained from Anthony Ward, the registered agent of Valley Oaks Real Estate, LLC, or David Ward at this address or phone number.

The Missouri Department of Natural Resources will accept written comments from you and other members of the public concerning this operation for a period of thirty (30) days after receipt of Valley Oaks Real Estate, LLC’s operating permit application. Written comments should be directed to: Missouri Department of Natural Resources, Water Protection Program, Attn: Gregory Caldwell, P.O. Box 176, Jefferson City, MO 65102-0176.

Sincerely,

David Ward

Valley Oaks Real Estate, LLC
Dear Countryclub Homes LLC,

Valley Oaks Real Estate, LLC would like to inform you of its plans to own and operate a Missouri no-discharge beef cattle feeding operation. The operation name will be Valley Oaks Feeders, LLC. The operation will be designed and constructed to meet the current standards of the Missouri Department of Natural Resources.

The operation will consist of six production buildings that will be used for housing the cattle and manure storage, and two stack sheds that will be used for manure storage. The operation will be designed for 6,999 cattle, 3,500 growing steer and 3,499 finishing steer. The other structures on the property will be used for purposes other than housing cattle or manure storage, including but not limited to office space and storage of equipment and feed.

Manure (consisting of feces, urine, and bedding) stored in the production buildings will be cleaned out regularly, or when manure is bagged for commercial sale or land applied to fields as a fertilizer. At least fifty percent of the manure generated will be exported. The remaining manure may be land applied to fields in the land application area of the operation, as well as on other properties approximately ten miles to the northwest and thirty miles to the southeast of the operation. Manure application rates will be calculated based on manure laboratory analysis and expected crop yields. Land application will be performed using a large manure spreader to surface apply manure to the land application areas. Dead animals will be stored in confined area until render picks up within 24 hours.

The site is located in Sections 15 and 22, Township 47N, Range 29W, in Johnson County, Missouri. Valley Oaks Real Estate, LLC owns 449.4 acres at the site that will be used for the operation and its address is 1921 W 50 Highway, Lone Jack, Missouri 64070, (855) 667-2333. Additional information can be obtained from Anthony Ward, the registered agent of Valley Oaks Real Estate, LLC, or David Ward at this address or phone number.

The Missouri Department of Natural Resources will accept written comments from you and other members of the public concerning this operation for a period of thirty (30) days after receipt of Valley Oaks Real Estate, LLC’s operating permit application. Written comments should be directed to: Missouri Department of Natural Resources, Water Protection Program, Attn: Gregory Caldwell, P.O. Box 176, Jefferson City, MO 65102-0176.

Sincerely,

David Ward

Lone Jack, Missouri 64070

March 28, 2019

Agee, Larry E Sr. & Carmen A.
1960 NW US Highway 50
Lone Jack, MO 64070

Dear Agee, Larry E Sr. & Carmen A.:

Valley Oaks Real Estate, LLC would like to inform you of its plans to own and operate a Missouri no-discharge beef cattle feeding operation. The operation name will be Valley Oaks Feeders, LLC. The operation will be designed and constructed to meet the current standards of the Missouri Department of Natural Resources.

The operation will consist of six production buildings that will be used for housing the cattle and manure storage, and three stack sheds that will be used for manure storage. The operation will be designed for 6,999 cattle, 3,500 growing steer and 3,499 finishing steer. The other structures on the property will be used for purposes other than housing cattle or manure storage, including but not limited to office space and storage of equipment and feed.

Manure (consisting of feces, urine, and bedding) stored in the production buildings will be cleaned out regularly, or when manure is bagged for commercial sale or land applied to fields as a fertilizer. At least fifty percent of the manure generated will be exported. The remaining manure may be land applied to fields in the land application area of the operation, as well as on other properties approximately ten miles to the northwest and thirty miles to the southeast of the operation. Manure application rates will be calculated based on manure laboratory analysis and expected crop yields. Land application will be performed using a large manure spreader to surface apply manure to the land application areas. Animal mortalities will be stored in a confined area until they are collected for disposal by a renderer within 24 hours.

The site is located in Sections 15 and 22, Township 47N, Range 29W, in Johnson County, Missouri. Valley Oaks Real Estate, LLC owns 449.4 acres at the site that will be used for the operation and its address is 1921 W 50 Highway, Lone Jack, Missouri 64070, (816) 697-1839. Additional information can be obtained from Anthony Ward, the registered agent of Valley Oaks Real Estate, L.L.C., or David Ward at this address or phone number.

The Missouri Department of Natural Resources will accept written comments from you and other members of the public concerning this operation for a period of thirty (30) days after receipt of Valley Oaks Real Estate, LLC’s operating permit application. Written comments should be directed to: Missouri Department of Natural Resources, Water Protection Program, Attn: Gregory Caldwell, P.O. Box 176, Jefferson City, MO 65102-0176.

The remaining manure may be land applied to fields in the land application area of the operation, as well as on other properties approximately ten miles to the northwest and thirty miles to the southeast of the operation. Manure application rates will be calculated based on manure laboratory analysis and expected crop yields. Land application will be performed using a large manure spreader to surface apply manure to the land application areas. Animal mortalities will be stored in a confined area until they are collected for disposal by a renderer within 24 hours.

The site is located in Sections 15 and 22, Township 47N, Range 29W, in Johnson County, Missouri. Valley Oaks Real Estate, LLC owns 449.4 acres at the site that will be used for the operation and its address is 1921 W 50 Highway, Lone Jack, Missouri 64070, (816) 697-1839. Additional information can be obtained from Anthony Ward, the registered agent of Valley Oaks Real Estate, L.L.C., or David Ward at this address or phone number.

The Missouri Department of Natural Resources will accept written comments from you and other members of the public concerning this operation for a period of thirty (30) days after receipt of Valley Oaks Real Estate, LLC’s operating permit application. Written comments should be directed to: Missouri Department of Natural Resources, Water Protection Program, Attn: Gregory Caldwell, P.O. Box 176, Jefferson City, MO 65102-0176.

Sincerely,

Valley Oaks Real Estate, LLC
Valley Oaks Real Estate, LLC would like to inform you of its plans to own and operate a Missouri no-discharge beef cattle feeding operation. The operation name will be Valley Oaks Feeders, LLC. The operation will be designed and constructed to meet the current standards of the Missouri Department of Natural Resources.

The operation will consist of six production buildings that will be used for housing the cattle and manure storage, and three stack sheds that will be used for manure storage. The operation will be designed for 6,999 cattle, 3,500 growing steer and 3,499 finishing steer. The other structures on the property will be used for purposes other than housing cattle or manure storage, including but not limited to office space and storage of equipment and feed.

Manure (consisting of feces, urine, and bedding) stored in the production buildings will be cleaned out regularly, or when manure is bagged for commercial sale or land applied to fields as a fertilizer. At least fifty percent of the manure generated will be exported. The remaining manure may be land applied to fields in the land application area of the operation, as well as on other properties approximately ten miles to the northwest and thirty miles to the southeast of the operation. Manure application rates will be calculated based on manure laboratory analysis and expected crop yields. Land application will be performed using a large manure spreader to surface apply manure to the land application areas. Animal mortalities will be stored in a confined area until they are collected for disposal by a renderer within 24 hours.

Lone Jack, Missouri 64070  

March 28, 2019  

Luper, Harold D & Mavis J  
630 NW 1971st Rd  
Lone Jack, MO 64070  

Dear Luper, Harold D & Mavis J:  

Valley Oaks Real Estate, LLC would like to inform you of its plans to own and operate a Missouri no-discharge beef cattle feeding operation. The operation name will be Valley Oaks Feeders, LLC. The operation will be designed and constructed to meet the current standards of the Missouri Department of Natural Resources.  

The operation will consist of six production buildings that will be used for housing the cattle and manure storage, and three stack sheds that will be used for manure storage. The operation will be designed for 6,999 cattle, 3,500 growing steer and 3,499 finishing steer. The other structures on the property will be used for purposes other than housing cattle or manure storage, including but not limited to office space and storage of equipment and feed.  

Manure (consisting of feces, urine, and bedding) stored in the production buildings will be cleaned out regularly, or when manure is bagged for commercial sale or land applied to fields as a fertilizer. At least fifty percent of the manure generated will be exported. The remaining manure may be land applied to fields in the land application area of the operation, as well as on other properties approximately ten miles to the northwest and thirty miles to the southeast of the operation. Manure application rates will be calculated based on manure laboratory analysis and expected crop yields. Land application will be performed using a large manure spreader to surface apply manure to the land application areas. Animal mortalities will be stored in a confined area until they are collected for disposal by a renderer within 24 hours.  

The site is located in Sections 15 and 22, Township 47N, Range 29W, in Johnson County, Missouri. Valley Oaks Real Estate, LLC owns 449.4 acres at the site that will be used for the operation and its address is 1921 W 50 Highway, Lone Jack, Missouri 64070, (816) 697-1839. Additional information can be obtained from Anthony Ward, the registered agent of Valley Oaks Real Estate, L.L.C., or David Ward at this address or phone number.  

The Missouri Department of Natural Resources will accept written comments from you and other members of the public concerning this operation for a period of thirty (30) days after receipt of Valley Oaks Real Estate, LLC’s operating permit application. Written comments should be directed to: Missouri Department of Natural Resources, Water Protection Program, Attn: Gregory Caldwell, P.O. Box 176, Jefferson City, MO 65102-0176.  

Sincerely,
