Groundwater Strategy

Issue: This is a presentation to the Clean Water Commission pertaining to groundwater in Missouri and future work related to a potential Clean Water Commission groundwater strategy.

Background: The Water Protection Program has identified the need to develop a groundwater strategy under the guidance of the Clean Water Commission to help identify ways to address discharges to the Missouri Groundwater resource. The strategy will identify resource partners within other Department programs, methods for the evaluation of resource impact regarding existing or proposed discharges, and best practices in response to groundwater contamination.

Recommended Action: Information only.
