1101 Riverside Drive  
Jefferson City, Missouri

April 5, 2017

### **Columbia Integrated Management Plan**

**Issue:** The city of Columbia is developing an Integrated Management Plan (IMP) to meet critical infrastructure needs for improving our community waterways. The goal of the Our Columbia Waters Plan is to develop adaptable and affordable long-term recommendations that meet Columbia's wastewater and stormwater management needs and address Clean Water Act obligations.

**Background:** The goal of the IMP is to develop an adaptable and affordable capital improvement plan that addresses the Columbia's wastewater and stormwater management needs and meets Clean Water Act obligations in a prioritized manner. Columbia's project team evaluated the performance of the current wastewater and stormwater systems and condition of Columbia's waterways and has shared the information with the community. During the development of the IMP, there have been opportunities for the public to share their input on the environmental improvements they would like to prioritize first. The outcome of the IMP is to include community input when targeting investments for the wastewater and stormwater programs that protect public and environmental health and to develop economically efficient infrastructure.
