

**SAMPLE SITE REQUEST FORM –  
NONTRANSIENT NONCOMMUNITY WATER SYSTEMS  
(This form is to be used for Lead and Copper Monitoring)**

Tier 1 sampling sites are the highest priority site for monitoring. You may use any mix of sample site types as long as you have put a priority of first finding Tier 1, then Tier 2 sites. Use the F-2 category only if you have no place else to sample.

RETURN THIS FORM BEFORE TESTING BEGINS. EXPECT NO REPLY.

Please fill in the number of each type of site you will be using.

**TIER 1**

Number of sites in buildings with lead service lines or copper pipes joined with lead solder installed after 1982.....

**TIER 3**

Number of sites in building with copper pipes joined with lead solder installed during or before 1982 .....

**EXCEPTIONAL CASES**

**F-1**

Number of sites in buildings with:

Plastic pipes and brass fixtures .....

Copper pipes with flare fittings and brass fixtures.....

Galvanized pipes with brass fixtures.....

Copper pipes with lead free solder and brass fixtures.....

**F-2**

Sites that are connected to a water softener.....

**Total**.....

**OTHER SITES**

Please explain any sites that are not addressed above.
