

ARRA (2009/2010) Report Status

The 2010 financial assistance awards are funded in large part by the American Recovery and Reinvestment Act of 2009. The contracts are part of a larger statewide funding effort, providing nearly \$1.5 million to Missouri public water systems for engineering reports and facility plans.

Recipients must be a community water system that serves or benefits 100,000 people or less. The funding can only be used to hire a Missouri-certified professional engineer. Recipients are required to provide a 10 percent match and make a good faith effort to obtain funding to construct the projects recommended in the engineering report.

Invoices and all receipts are to be reviewed and approved by the recipient system. Recipient systems will need to attach signed documentation affirming that they have reviewed and approved the submitted invoices. An example invoice is available on request if you have any questions regarding the detail required for approval by DNR.

Final engineering reports are now due and the budget period will end on August 15, 2011. If your project has been received and is awaiting review, the budget period will not close on the 15th. If the report has not been sent to the department and arrangements have not already been made, please contact our office to ensure continuation of your contract. Some or all funding may be denied after August 15 if prior arrangements have not been made.
