

Missouri Department of Natural Resources
Public Drinking Water
Minimum Design Standards for Missouri Public
Water Systems
Regional Stakeholder Meetings

Location and time varies

You are invited to participate in a continuing discussion of the Public Drinking Water Branch's [Minimum Design Standards for Missouri Public Water Systems](#). The department is holding several meetings around the state to discuss revisions to this document.

What is the [Minimum Design Standards for Missouri Public Water Systems](#)?

This document is the latest draft revision of two currently separate reference documents that regulate the design of public drinking water systems in the state. This document combines the department's [Design Guide for Community Water Systems](#) effective 2003 and [Standards for Non-Community Public Water Supplies](#) effective 1982.

What is this meeting about?

The purpose of this meeting is to discuss the proposed revisions with stakeholders and seek your input on the changes. Final revisions will be published with the intention of being promulgated as a state regulation.

Are work groups available?

Two work groups are being offered in response to feedback during our September 9 meeting. Details are available on the agenda.

Where can I get more information?

If you have any questions or would like more information you can access the design guide revisions page directly at <http://dnr.mo.gov/env/wpp/pdwb/permits.htm> or contact Ryan Seabaugh at 573-751-8628 or at P.O. Box 176, Jefferson City, MO 65102-0176
