

Renewing a Permit

Permittees must submit a completed application for the renewal of a permit at least 180 days prior to expiration of a site-specific permit. The following forms must be included (may need more than one): Domestic wastewater systems are those listed as publically owned treatment works (POTW), or discharge primarily kitchen and/or bathroom wastewater. Industrial facilities are those having industrial wastewater, including cooling water, and/or stormwater discharges for qualifying industries as found in 10 CSR 20-6.200. Domestic wastewater at industrial facilities is included under the industrial operating permit but additional forms may be required, see below.

- Form A (<https://dnr.mo.gov/forms/780-1479-f.pdf>) for all non-domestic facilities; will also need Form C, and please review Form D; for systems also irrigating or spreading, see Forms I or R. For Domestic systems at industrial sites, please fill out Form B or B2 for any domestic outfall.
- Form B (<https://dnr.mo.gov/forms/780-1512-f.pdf>) for domestic wastewater less than or equal to 100,000 gallons per day.
- Form B2 (<https://dnr.mo.gov/forms/780-1805-f.pdf>) for domestic wastewater greater than 100,000 gallons per day.
- Form C (<https://dnr.mo.gov/forms/780-1514-f.pdf>) for all industrial and commercial facilities discharging wastewater and/or stormwater (also always include Form A). A table of the pollutant scan will need to be filled out for each outfall.
- Form D (<https://dnr.mo.gov/forms/780-1516-f.pdf>) for primary or categorical industries as defined by EPA, see form for list of industries (include with Forms A and C; usually required if an Effluent Limitation Guideline (ELG) is applicable to the facility). A table of the pollutant scan will need to be filled out for each outfall, which includes internal outfalls.
- Form I (<https://dnr.mo.gov/forms/780-1686-f.pdf>) for wastewater irrigation systems (usually called non-discharging facilities, or a combination of discharging and non-discharging facility; must accompany Form A or Form B/B2 if wastewater is irrigated or partially irrigated to the surface or subsurface).
- Form R (<https://dnr.mo.gov/forms/780-1684-f.pdf>) for land application of industrial wastewater, biosolids, or residuals (usually non-discharging facilities, or a combination of discharging and non-discharging facility; must also include Form A).

Completed forms should be submitted via e-mail to: cleanwaterpermits@dnr.mo.gov. For questions, please contact your previous permit writer, the Regional office, use the general email listed here, or call the Operating Permits Section at (573) 522-4502.
