Major Flood Levels Forecast for the Lower Missouri River

- Major and moderate flooding continues on the Missouri River in northwest Missouri. Releases from Gavins Point Dam on the Missouri River have been increased to 30,000 cubic feet per second. The latest bulletin indicates that the flood control pool there is now 51.0 percent full.

- River levels as far downstream from Gavins Point as Parkville have begun to fall.

- Approximately 0.1 inches of precipitation (liquid equivalent) or less is expected during the next two days in northern Missouri. The precipitation forecast for 3/28/19 to 4/1/19 indicates northern Missouri may see totals of up to 2 inches of precipitation.
