Instruction for Completing Mine Plan Form (MO 780-1327)

This form should be submitted with all permit applications except renewals, amendments and bond releases. A separate Mine Plan must be submitted for each permitted site. **Note:** This form should be submitted when a change of landowner takes place.

Complete the following site specific boxes: Permit Name, Site Name, Mineral Commodity(ies), Estimated Tons per Year (Sand and Gravel only), Mine Plan Acres, County, and Legal Description (Land Grant, Section, Township, Range). Indicate if the mine plan boundary is 1,000 feet or closer to the property boundary of an accredited school that has been established for 5 or more years. Check the box that applies. Enter estimated operation end date. **Note:** Each site must be shown on a locator map, a detailed map, and must be published in a public notice.

Reclamation and Operation Plan

This section is comprised of individual categories that describe how the site appeared prior to mining, how the site will be operated and how the site will be reclaimed.

Lateral Support Requirements: Applicant must describe the distance of the mine excavations to the right-of-way of any public road and/or specify depth of unconsolidated material if excavation will occur near public road right of way or property line. If excavation is within noted distances, you must include written approval from the road authority. A description of the situation must be provided, and the applicant must indicate whether a variance has been or is being requested from the Missouri Mining Commission regarding the noted distance requirement.

Safety Barrier Requirements: Applicant must indicate if any mine excavation will occur within the specified distance from the road right-of-way or within 50 feet of any property line, and if so indicate the type of safety barrier that will be erected.

Acid-Forming Material Requirements: The applicant must indicate if acid-forming materials are present and how they will be handled if found.

Substitution of Previously Mined Land for Reclamation: Applicant must indicate if the operator plans to substitute previously mined lands for actual permitted area when reclaiming land. A map of the substituted land and mine plan form for this area must be submitted.

Topsoil Requirements: Applicant must answer six questions about topsoil amounts, removal, sales, retention for reclamation, stockpile, and erosion control.

Overburden Requirements: Applicant must indicate if overburden will be used as a substitute for topsoil. If overburden will be stockpiled, describe the location, and the seed mix to be used for stabilization.

Grading Requirements: Indicate if the site will be graded to a free draining topography. If not, please describe. Indicate if a consolidated highwall will be left on site.

Timing of Reclamation: Applicant must indicate they agree to begin reclamation within 1 year of removal of viable mineral reserves and to complete it within 2 years. If the applicant cannot meet this time schedule, they must describe how the site will be reclaimed.

Post-Mine Land Uses: Describe the condition of the site prior to mining. Applicant must check any post mining land uses from the list that applies, mark the number of acres allocated to each land use, and circle specific descriptions applicable to the land use. The acreage of post-mining land uses must total the mine plan acreage indicated on the first page and in the public notice.

Landowner

Fill in the following boxes: Name of Landowner, Phone Number with Area Code, Mailing Address, City, State and ZIP Code. **Note:** Complete a separate page for each landowner.

Mineral Rights Owner

Fill in the following boxes if different than landowner: Name of Mineral Rights Owner, Phone Number with Area Code, Mailing Address, City, State and ZIP Code. **Note:** Complete a separate page for each Mineral Rights Owner.

Legal Right to Mine

Check the box that applies: Mineral Deed, Warranty Deed, Lease, Verbal or Other. Enter the date of the agreement. If you have a lease or verbal agreement, the date the agreement was made should be entered on the form.

Landowner Signature

All boxes must be completed.

Revegetation Plan: Applicant must complete a Revegetation Plan for each post mine land use. The Revegetation Plan must include seeded species, tree or shrub species, and their quantity in pounds per acre or stems per acre. There must be at least one complete revegetation plan.
