DEFINITIONS AND INSTRUCTIONS FOR WORKSHEET 1

Contact Information - Enter all requested information in the space provided on the first worksheet. On following worksheets, only the name of the agency and page number are requested.

Reporting period - Only submit information from the fiscal year that just ended. The fiscal year runs from July 1 through June 30.

Alternative fuel vehicles - (AFV) are equipped to be refueled with an alternative fuel such as ethanol 85, CNG, propane or electricity. Please note that hybrid gasoline vehicles.

Model year is the period from Sept. 1 of the previous calendar year through Aug. 31.

Vehicle classification - From the reference table, select the appropriate abbreviation and enter it into the space provided.

VIN - Enter the 17-character alpha-numeric vehicle identification number (VIN) that is assigned by the vehicle manufacturer. Include the VIN from only the acquisition of AFVs or vehicles converted to AFVs. Diesel vehicles refueled with biodiesel are not considered AFVs.

OEM or conversion - Either the AFV was designed by the original equipment manufacturer (OEM) to run on alternative fuel, or the vehicle was converted to

Conversion - An original equipment manufacturer's vehicle that is reconfigured by a conversion company. Conversion kit components are under warranty of the conversion company.

Flex fuel vehicles run on a mix of fuels stored in the same on-board fuel tank such as gasoline and ethanol 85.

Dual fuel vehicles can run on either an alternative fuel or gasoline. The fuels are stored on-board in separate fuel tanks. Each tank is specifically designated to hold one type of fuel.

Dedicated AFVs are vehicles equipped to be refueled with one type of designated alternative fuel.

CAFE - For vehicles on contract with the State of Missouri, refer to the CAFE ratings prepared by the department's Energy Center. For vehicles not on contract with the state, a complete list of vehicles is available at www.fueleconomy.gov.

Conventional fuel vehicles - (CFV) are vehicles designed to be refueled with one type of conventional fuel, either gasoline or diesel. However, since no equipment upgrades are necessary to use biodiesel, CFVs refueled with diesel can also be refueled with the alternative fuel, biodiesel.

Hybrids are vehicles powered by both a combustion motor and an electric motor.

Gas (nonhybrid) are all nonhybrid CFVs designed to be refueled with gasoline.
