DEFINITIONS AND INSTRUCTIONS FOR WORKSHEET 2

Contact Information - Enter all requested information in the space provided on the first worksheet. On following worksheets, only the name of the agency and page number are requested.

Reporting period - Only submit information from the fiscal year that just ended. The fiscal year runs from July 1 through June 30.

Exempt vehicles - Vehicles not subject to vehicle efficiency or alternative fuel requirements as specified in Missouri State Statutes, RSMo 414.400 to 414.417.

Hybrids - Vehicles powered by both a combustion motor and an electric motor.

Number of vehicles - Enter into the first column the number of vehicles that are less than or equal to 8,500 pounds GVWR. Into the second column, enter the number of vehicles that are greater than 8,500 pounds GVWR.

Fuel usage - Report in at-the-pump units of consumption. Use gallons for gasoline, ethanol 85, diesel, and propane. Use cubic feet for natural gas and kWh for electric. Report the usage of biodiesel in the exempt diesel vehicle section as an alternative fuel.

Biodiesel (B100) - To report biodiesel consumption, convert all biodiesel usage to B100. The breakout for the B100 abbreviation is *B* for biodiesel and 100 for 100% biodiesel blend level. Therefore, B20 is biodiesel at the 20% blend level. To convert B20 usage B100, multiply the total B20 usage by 20%. For example, 250 gallons of B20 contains 50 gallons of B100 and 200 gallons of conventional diesel fuel.
