### Preventive Maintenance

Owning a vehicle is a significant responsibility. Not only are motorists responsible for registration requirements, they are also responsible for maintaining their vehicle. The Gateway Vehicle Inspection Program recommends all motorists follow the manufacturer specific maintenance schedules for their vehicles. Motor vehicles are a significant source of air pollution in the St. Louis area. Preventive maintenance keeps vehicles running longer, performing more efficiently and polluting less. Steps taken today to reduce pollution will help ensure cleaner air tomorrow for those with respiratory illnesses and all of our families. For more information on the Gateway Vehicle Inspection Program, or to obtain a general preventive maintenance tip sheet, please visit [GatewayVIP.com](http://GatewayVIP.com) or call (314) 416-2115.
