RE: Location exemption appeal

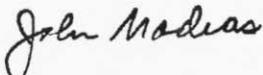

Dear Mr. Bleakley:

The State Oil and Gas Council addressed Colt Energy's location exemption appeal at their October 19, 2011 meeting in Jefferson City. Colt Energy requested a location exemption from the state geologist for two water flood injection wells on their North Rhoden Lease (wells 69-C3 and 69-E3) and one on their South Rhoden Lease (well N-45). The state geologist denied this request. Therefore, the council entertained the appeal of this decision.

After extensive discussion, the location exemption request for these three injection wells has been approved. You may submit your applications to the state geologist at the proposed locations for these three injection wells only. Additional location exemptions must be requested should you wish to drill addition wells within the 165 foot setback distance from the project boundary.

If you have any additional questions, please contact the office of the state geologist by mail at P.O. Box 250, Rolla, MO 65402; by phone at 573-368-2100; or by fax at 573-368-2111.

Sincerely,

John Madras, Chair  
State Oil and Gas Council
