Re: Proposed Quarry on Woodriver Rd., Miller County

Dr. Mr. Coen,

As a resident living on Woodriver Rd, I am opposed to the permit that is being requested by Magruder Limestone Co. to begin a quarry operation on Woodriver Rd. in Miller County.

This quarry would adversely affect the residents living near the area. The noise, traffic and dust would be a nuisance as well as a health concern for anyone with breathing disorders. I am concerned that the blasting will cause foundations of our home to crack. Also, most of us have wells for our water source. The blasting could also damage these wells.

I am also concerned about the City of Lake Ozarks' sewer treatment plant. The blasting could cause damage to that. Considering how close it is to the Osage River, this could be a serious issue.

Please be advised that I am strongly opposed to a quarry site on Woodriver Rd. I am requesting a public meeting to address this issue. Please let me know when and where this meeting will take place. No one in this area even knows about the newspaper where this notice appeared. Please notify us in writing or post in the Lake Sun or Eldon Advertiser.

Thank you for your attention to the matter.

Sincerely,

L. Thrasher

The sewer treatment trucks are bad enough on our dusty, gravel. I'm one that has the breathing problems. Please no more heavy duty, large wheeled trucks on WOOD RIVER.
