18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located on the northern edge of the CBD. To the north is an interstate connector; to the west is a surface parking lot; to the east and south are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This residential structure has been greatly altered. A large garage door dominates the first floor of the front facade. A two-story bay window occupies the eastern two-thirds of the front facade. The narrow rectangular windows have stone sills and lintels. The lintels have an incised floral design. A metal cornice runs across the front facade. A slate, truncated hip roof caps the bay. The remainder of the roof is flat. The windows have been covered with lattice work.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1884

Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer: 

This residence was probably built as an investment property by realtor David Updegraff. The 1886 Kansas City Atlas shows a twin structure adjacent to this on the west - now demolished. This building is threatened by its own deterioration and that of the surrounding lots.

21. Register Status: Not eligible

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located on the northern edge of the CBD. To the north is an interstate connector; to the south, east and west are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main entrance, centrally located on the north facade, has been boarded up. It is flanked by 2 store fronts, each with angled corner entrances. The one on the west has been modernized. Buff brick is used to provide a dramatic decorative contrast with the red brick walls. The buff brick forms pilasters, arched window hoods, and the corbelled cornice. Brick, set in a sawtooth pattern, forms panels above the 2nd floor windows. A garage has been added to the south facade. The northeast corner of the building has suffered significant structural damage in recent years. This damage has been stabilized but the original features are now gone.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1902

Architect/engineer/designer: ?
Contractor/builder/craftsman: Alex Kinghorn
Developer:

This building was probably built to house retail concerns on the 1st floor while providing residential space on the 2nd floor. This building is threatened by its own deterioration and that of the surrounding properties.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located on the northern edge of the CBD. To the north is an interstate connector; to the south is a commercial building; to the west is vacant land; to the east is a non-operating service station.

19. ADDITIONAL PHYSICAL DESCRIPTION:
Two entrance doors are centrally located; probably leading to the upper floors. Store fronts flank these doors. The altered store front on the east has an angled corner entrance. A row of transom windows run above the first floor windows and doors. Eight one-over-one double-hung windows fenestrate the 2nd and 3rd stories. These windows have stone sills and lintels. Corbelled brick forms the cornice. The top of the north wall has stone coping and features four finials, 2 centrally placed and one on each corner.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1912
Architect/engineer/designer: J.G. Lancieri
Contractor/builder/craftsman: ?
Developer:
This building was constructed to provide commercial space on the first floor and residential space above. This building is threatened by its own deterioration and that of the surrounding area.

This building is located on the northern edge of the CBD. To the north is an interstate connector; to the south are commercial buildings; to the west a residential building; to the east is vacant land.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building, built at or below ground level, has been boarded up. The garage doors still have their glass panels in place. The building is constructed of concrete block. A metal fascia surrounds the top of the garage area.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1967

Architect/engineer/designer: ?
Contractor/builder/craftsman: Lamar Construction Co.
Developer:

One of several downtown service stations constructed during the 1960s. The builder, Lamar Construction Company, specialized in the construction of gas stations and car washes. The building is no longer used as a service station.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located near the northeast corner of the CBD. To the north is the interstate connector; to the south is a surface parking lot; west is the Vista Del Rio Apartment Building; to the east is vacant land.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The north facade is composed of ornamental, faced cement block with vertical scoring. Single windows are placed at each end of this facade. Other north facing windows are paired. All windows are single panes with a horizontal sliding window at the base. A dark painted spandrel is below each window. Paired glass doors are centrally located, protected by a carriage porch. The building contains 12,300 square feet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1976-77
Architect/engineer/designer: Environmental Design Association
Contractor/builder/craftsman: Schoonover Brothers
Developer:
This building was projected as an 80-bed facility in 1973, but when actually constructed, three years later, it became a 50-bed unit.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located at the northwest corner of the CBD. To the north is an interstate; to the south is a hotel; to the east is a parking structure; to the west is vacant land.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces north toward West 7th Street. The entrance is located on the bevelled northeast corner. The fenestration consists of multi-light vented windows placed in a pattern of rectangular openings. Engaged piers and spandrels divide the north and east facades into bays. The parapet and engaged piers are capped in stone blocks set in a stepped pattern. An overhead service door is located in one of the north bays.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1961 c.

Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:

A service station was located on this site as early as 1930. When the hotel was constructed in 1961, the "air rights" over this station were acquired so the parking garage could extend over the building. Plans also called for a new station with compatible architecture to be constructed.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Surface parking lots are located to the north, south, east and west.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main entrance is located at the southwest corner; and another entrance at the southeast corner is recessed. The first story has tripartite windows with transoms. The second story has single pane sash which have replaced double-hung windows. The 3rd and 4th stories are fenestrated with paired, fixed sash on the western half of the main facade, and triple, fixed sash on the eastern side. The central bay is narrow and has single-pane sash at all floors. A stone string course runs between the 2nd and 3rd stories. The centrally located stone name plate shows the building’s name. A shaped parapet wall with stone coping terminates the building.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1919

Architect/engineer/designer: Smith, Rea and Lovitt
Contractor/builder/craftsman: J.R. VanSant Construction Co.

Developer:
Western Union first opened an office in Kansas City in 1865. This building opened on Feb. 1, 1920. In 1959 the Kansas City Branch of Western Union was selected as the switching center for service to the west and south.

To the east is a rehabilitated hotel; to the west is a building which has been joined to this building for condominium use; to the north and south are commercial/industrial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces south and is divided into three bays. Entry occurs in the central bay. Fenestration consists of bands of three, one-over-one double-hung windows with a single, narrow transom. The cornice is corbelled.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1917; rehab.1984

Contractor/builder/craftsman: Latimer & Benning

The building was erected by the prominent pharmaceutical firm of McPike Drug Co. to serve as an annex to their wholesale enterprises. The building is a major commercial work by architect, G.H. Thomas Washburn. The building was converted into condominiums in 1984. The project began the trend of the Wholesale District’s conversions of commercial/industrial buildings to residential units.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
To the north and west are surface parking areas; to the south is another of the company's industrial/commercial buildings; to the east is a converted residential building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade south on 7th Street and is divided into three bays. The first two stories are rusticated brick with two-story, segmentally arched openings with concrete screens at the first story and one-over-one windows at the second story. Entry appears at central bay. Third through sixth stories have bands of multi-light, industrial-type windows. The top story wall surface is faced in stone; each bay's fenestration is divided into three portions - similar to a Chicago-Style arrangement. A projecting stone cornice with exaggerated dentils is located above the windows. The parapet is stepped above the central bay. A one story addition extends to the east.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1916
Architect/engineer/designer: Shepard, Farrar & Wiser
Contractor/builder/craftsman: George L. Brown & Son
Developer:
The building was erected in 1916 by a prominent local firm, the Kansas City Paper House to serve as their manufacturing center and warehouse. The Paper House Co. was Kansas City's branch of the Carpenter Paper Corp. based in Omaha, NE. The building is a major work of the local, prominent firm, Shepard, Farrar & Wiser.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
To the east is an adjacent building combined with this building during the conversion to condominiums; adjacent to the west is an industrial addition to a multi-story building; to the north and south are commercial/industrial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces south and is divided into three bays. The main entry was removed from the central bay during the rehabilitation; the main entry now occurs in the central bay of 306 W. 7th. Fenestration consists of one-over-one windows with transoms. The piers which divide the facade into bays are rusticated at street level; a wide entablature separates the street level from the upper stories of the facade.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1904-05; 1984 rehab.

Contractor/builder/craftsman: ?

Developer:
The building was erected in 1904-05 for the McPike Drug Co. of Atchison, KS, the year the company transferred their headquarters to Kansas City. The McPike Co. acquired the former Builder's and Trader's Exchange building, the former Burns and Munger Dry Goods building at the northwest corner of 7th and central. The building is a major commercial design by W.W. Rose of KC, KS. The building was rehabilitated in 1984 and is now part of 306 W. 7th and used condominiums. This project initiated the Wholesale District's conversions of commercial/industrial buildings to residential units.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north are rehabilitated apartments and hotel rooms; to the south are commercial buildings; to the east is vacant land; to the west is another building owned by the same company.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces east toward Central and has a recessed entrance. The extreme north bays of the east facade have retractable service doors. The fenestration consists of industrial glass block windows surrounding single panes of glass. Stone string courses, lending horizontal accents to the mass, are located above and below the 1st and 2nd story windows. The 3 story entrance bay has a stone surround and vertical bands of glass block windows.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1946-47
Architect/engineer/designer: George B. Franklin
Contractor/builder/craftsman: Morris Hoffman Construction Co
Developer:
The building was erected in 1947 to serve as the east building for the manufacturing and storage of folding boxes as well as printing commissions for regionally prominent printing establishment of Burd & Fletcher. The structure is a major commercial design of George B. Franklin.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located within the Wholesale District of the CBD; to the east area parking structure and converted residential buildings; to the north, south and west are commercial and/or industrial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces north and the entry is located at the chamfered northeast corner. The fenestration consists of multi-light vent windows. An overhead service door is located at the west end of the facade. Pilasters divide the facade into six bays. The pilasters, which extend past the roof line, have stone coping. The entry parapet is embellished with geometrically patterned blocks. Angled, canvas awnings mark the openings.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1930
Architect/engineer/designer: Victor J. Defoe
Contractor/builder/craftsman: Morris-Hoffman Construction Co
Developer:
The building was erected in 1930 by the locally prominent printing firm, Midwest Envelope Co. to serve as their printing plant and storage area. The building is a major commercial design by local architect, Victor J. Defoe.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the east and west are surface parking lots; to the north and south are parking garages.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The first floor of this building retains the layout of its original store front but the main facade has been drastically altered. Brick sills remain below the 2nd story windows and the stone coping at the roof line is also in place. The entire facade has been covered in stucco and the 2nd story windows have been narrowed from a paired fenestration to single one-over-one windows.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1900
Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:
This building was originally constructed as a saloon. The building has been drastically altered. It is threatened by its lack of integrity and surrounding parking facilities/lots.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale District of the CBD. To the north, south and west are commercial buildings; to the east is a surface parking lot.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces south and is divided into three bays. The chamfered southeast corner contains the entry. The first story has iron store fronts and the second and third level have arched one-over-one windows with stone sills.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1888
Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:
This building was erected in 1888 by the law firm of Dobson, Douglass & Trimble for speculation. The building became the popular Phoenix Hotel on its completion. During the 1920s the building became the Claypool Hotel. The building is a rare surviving hotel building in the northern CBD. Part of the building was redone as an entry to the Old Spaghetti Factory Restaurant located to the west.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale District of the CBD. To the north is a commercial building; to the south, east and west are surface parking lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces north and is divided into five bays. Entry occurs in the central bay; the other street level bays have iron store fronts with plate glass windows and transoms. A belt course divides the first floor from the upper floors. Fenestration consists of one-over-one sash windows with stone sills. The parapet is embellished with rows of indented squares.

20. HISTORY AND SIGNIFICANCE: Date of Construction: 1889
Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:
The building was erected in 1890 by Azra A. Chamberlain, a prominent real estate and loan dealer of the firm, Hammit & Davidson. On its completion the building became the Exchange Hotel, presumably named because of its location across the street from the Board of Trade/Exchange Building. One of the rare, surviving hotel buildings in the northern CBD.

This building is located in the Wholesale District of the CBD. To the north is a commercial/industrial building; to the east and west are commercial/residential buildings; to the south is a surface parking lot.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces south and is divided into three bays by pilasters. Entry, currently not used, is recessed in the central bay; flanking bays have two plate glass windows. The upper stories are fenestrated with bands of three, one-over-one windows. The first and second stories are rusticated and are separated from the upper stories by an entablature. The third through sixth stories are separated vertically by Ionic pilasters and horizontally by paneled spandrels. The top story is also separated from the rest of the building by an entablature. The roof cornice projects and is supported by paired brackets.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1902; 1986-89 rehab.

Contractor/builder/craftsman: George L. Brown & Son

The building was erected by C.W. Armour in 1902 to house his business enterprises. In approximately 1905 the building became the home of William Volker & Co., which manufactured and retailed window shades, shade cloth, furniture, sundries, floor and wall coverings. The building is a rare commercial design by William W. Rose of Kansas City, KS. In 1986-87 the building was converted to 54 loft apartments by developer and general contractor, Vista Construction Co. The project, costing approx. $4.8 million, was financed by Metro North State Bank. In 1989, 70,000 square feet of the building was rehabilitated, at a cost of approx. $1.5 million, for the Old Spaghetti Factory Restaurant. Entry to the restaurant occurs in 303 W. 8th, the building to the east.

This building is located in the Wholesale District of the CBD. To the north and west are commercial/industrial buildings; to the east are rehabilitated commercial/residential buildings; to the south is rehabilitated commercial building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces south and is divided into three horizontal divisions. The first and fifth floors are divided from the rest of the building by entablatures. Entry occurs recessed at center. The end bays project slightly and the center bays of floors two through four are divided by Ionic pilasters. Fenestration consists of two-over-two sash windows and segmentally arched one-over-one sash windows in the end bays. At street level the fenestration consists of plate glass windows with transoms.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1899; 1986-87 rehab.
Architect/engineer/designer: Adriance Van Brunt & Brother; Jones-Strahan Architects (rehab.)
Contractor/builder/craftsman: Vista Construction (rehab.)
Developer: Vista Construction (rehab.)
The building was erected in 1899 by the Bond Shoe Co. to serve as their business and manufacturing headquarters for shoes and foot apparel. In approx. 1905 the building became an auxiliary building for William Volker & Co., which specialized in the manufacturing of window shades and cloth. In 1986-87 the building was converted to 32 loft apartments by developer and general contractor, Vista Construction Co. Project architects were Jones-Strahan Architects. The project, financed by Metro North State Bank, cost approximately $3.8 million.

The main facade faces north, the secondary facade faces west. The entrances are placed in two-story arches. Water table cornices visually separate the second and third stories and the seventh and eighth stories. The fenestration consists of 1/1 sash, grouped in threes. The facades are adorned with engaged piers and spandrels. The building is embellished with classical details. No visible alterations.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1903-04; 1985 rehab
Architect/engineer/designer: George Mathews; R. Bradley Hansen (rehab.)
Contractor/builder/craftsman: George L. Brown & Son
Developer: R. Bradley Hansen & Western Equity (rehab)
The building was built as a factory and storeroom for the Burnham, Hanna, and Munger Dry Goods Co. in 1903-04. The building is a major design by local architect George Mathews. Construction was supervised by architect Horace LaPierre, following Mathews' death in 1903. In 1984-85 the building was rehabilitated at a cost of approx. $10 million.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This private club is located on the north edge of the Quality Hill neighborhood. Park land is located to the north and west of the building and vacant lots are located to the east; to the south are high rise apartment buildings and parking areas.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of the building faces east; entry occurs on the east facade. The focal point of the structure is the varying, overhanging roof lines and the transparent quality given by the wealth of glass used in the design. The floor plan is irregular and features various projections. Fenestration primarily consists of plate glass windows with transoms. The minimal wall surface is primarily veneered in crab orchard stone.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1949-50

Architect/engineer/designer: Voskamp and Slezak
Contractor/builder/craftsman: Hiram Elliot Construction Co.
Developer:

This exclusive social club was organized in 1947. The club was built on the site of Clark's point, overlooking the convergence of the Missouri and Kaw rivers. The building contains murals by Thomas Hart Benton, painted in 1956. Formerly on the site were the homes of two prominent Kansas City residents, Samuel Machette and Dr. Joseph Fuld. The building is one of the few modernist buildings located in the CDB.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north is the Federal Courts Building; to the east and south are commercial buildings; to the east is a surface parking lot.

19. ADDITIONAL PHYSICAL DESCRIPTION:
Facing north, the main facade has 5 bays with an entrance door in each of the end bays. The bays are separated by fluted, attached, Ionic columns and a pair of pilasters at either corner. Stained glass windows with decorative surrounds and arched heads with keystones fill each bay. The main facade is terminated with a plain pediment which stretches the entire width of the building.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1909-11

Architect/engineer/designer: John McKecknie
Contractor/builder/craftsman: ?
Developer:

A Methodist church at the southeast corner of 9th and Grand was razed in 1909. There had been speculation for years that the church would give up this valuable downtown real estate and build a new church in a residential district. However, this church was built along with the adjacent office building to the west (903 Grand). The office structure was seen as a means to finance the spread of Methodism. Money for both the church and the building was borrowed from New York capitalists. When the church opened in 1911 it had an active membership of 750. It became known as the "Church of the Stranger" because of its focus on the boarding house and hotel population. This building is threatened by its own deterioration and surrounding developments.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north and east are commercial buildings; to the south and east are surface parking lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces south; secondary facades face west and north. The original structure consisted of a nearly square U-shaped mass. An addition built in 1917-18 closed the rectangle. This building has formal Classical details. The main facade contains a recessed loggia along the 2nd floor. The west facade contains a secondary entrance in one of its 2 bays. Entrances are recessed and sheltered by entablature doorframes. The original double-hung windows have been replaced with fixed pane windows in a paired configuration. The east facing facade is assymetrical.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1895-97; 1917-18 add; 1984 rehab
Architect/engineer/designer: Hackney and Smith; Soloman and Claybaugh (rehab)
Contractor/builder/craftsman:
Developer: Board of Education; Ozark National Life (rehab)

The building originally housed the library and the Board of Education. See national and local register nominations for further detail. In 1984, 62,000 sq. ft. of the building was rehabilitated by Ozark National Life Insurance Company at a cost of approx. $2 million. Project architects were Solomon and Claybaugh.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north, south and west are surface parking lots; to the east is a hotel.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The entrance is centrally located on the East 9th Street facade. The stone faced 1st story has modern windows and doors set in aluminum frames. Metal panels have been placed in the transom areas. Two of the window bays have been partially bricked up. Above the 4th floor is a simple terra cotta cornice. At the east and west ends of the parapet wall are arched gables. A metal garage was attached to the south wall of the building in 1976.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1923; 1976 add

Architect/engineer/designer: Greenbaum, Hardy & Schumacher
Developer:

The original owner of this building was Barnett L. Hoffman, of the Hoffman Investment and Construction Co. The first tenants in the ground floor shops of this 21 unit apartment hotel were the Silver Laundry, Gordon's Toggery Shoppe, and a drug store. This building is currently threatened by encroaching parking lots and surrounding deterioration.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north is vacant land; to the south and east are parking lots; to the west is a commercial building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces south and is built of brick with stone trim. Stone quoining decorates the corners while alternating bands of stone and brick exist on the first floor columns. The cornice at the building's roof line has been removed. The porch cornice has been modified and the front stairs have been changed.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1912
Architect/engineer/designer: ?
Contractor/builder/craftsman: Herbert W. Leland
Developer:
The apartment contains 26 units. It is one of the few remaining historic apartment buildings in the eastern portion of the CBD. The building is threatened by encroaching parking lots and the deterioration of its surroundings.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the West 9th Street Historic District, in the CBD. To the north is a parking garage; to the south are commercial buildings and a parking garage; to the east and west are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces south down Baltimore Street. The structure consists of two, ten story arms linked together by a 12 story tower. The first three levels are surfaced in brownstone.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1887-90
Architect/engineer/designer: McKim, Mead & White (with F.E. Hill and VanBrunt & Howe)
Contractor/builder/craftsman: ?
Developer:
At the time of construction this building was Kansas City's first skyscraper, 210 feet. The building, designed by the nationally prominent firm McKim, Mead and White, was completed in 1890 at a cost of approx. $1.5 million. Frederick E. Hill served as construction architect and Van Brunt and Howe assisted in the design. The eagle above the main entry was designed in the studio of Augustus Saint-Gaudens. The building has been vacant for several years; several attempts at rehabilitating the building have brought attention to the building, but have yet to produce any physical assistance.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the West Ninth Street Historic District of the CBD. Commercial buildings are located to the east and west; to the south is the site of a recently demolished building; and to the north is a patio and parking area.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces south and is divided into five bays. Street level contains plate glass store fronts; an entablature divides the first floor from the upper stories. The center and end bays of the upper three stories have three story, oriel windows with molded spandrels. The bays between have jack arches at the second level, projecting window hoods at the second, and arched windows at the third story. A projecting cornice is located at parapet wall.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1895; 1981 c. (rehab.)

Architect/engineer/designer: George Matthews (attrib.)
Contractor/builder/craftsman: ?
Developer: Cumberland Assoc. (rehab.)

The Lyceum was erected by the Missouri, Kansas & Texas Trust Co., a local investment firm headed by Arthur Stillwell. The Lyceum served as ticket office for the Kansas City, Pittsburg & Gulf Railroad, a subsidiary of the M.K. & T. Trust Co. located in the building was Lyceum Hall, a space for elegant social affairs. In 1907 the building became the Orient Hotel, and later the Delmar Hotel. The building was rehabilitated c. 1981 as a part of the Cumberland Urban Redevelopment Project.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the West Ninth Street Historic District of the CBD. Commercial buildings are located to the east and north; to the south is a parking garage; and to the west is a surface parking area.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facades of this building face south and west. The facades are divided horizontally into three distinct portions. Fenestration consists of one-over-one sash windows with transoms at the first level. A two story oriel window is located at the southwest corner. Molded bands which connect the spandrels, are located in the central portion of the facades. A detailed, projecting cornice is located at the base of the parapet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1886-88
Architect/engineer/designer: Bradlee, Winslow & Wetherell (Boston)
Contractor/builder/craftsman: ?
Developer: Cumberland Assoc.

The building was erected by the New England Safety Deposit and Trust Co., an Eastern firm which occupied the ground floor level. Their vault in this building was the largest vault west of Cincinnati, Ohio. The building was rehabilitated as part of the Cumberland Urban Redevelopment Project.

18. DESCRIPTION OF ENVIRONMENT AND OUTFIELDS:
This building is located near the West Ninth Street Historic District of the CBD. Commercial buildings are located to the north; to the south is a parking garage; to the west is a surface parking area.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this structure faces north and is punctuated by large openings. A portion of the facade, to the left of the large opening for auto access, is enclosed for an office area. Roof top parking is accessible off Wyandotte.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1963-64

Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:

Beginning in 1946, John Cottitta operated a surface parking lot at this site. In 1963-64 he had this garage built to house 189 cars.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north, south, east and west are surface parking lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces north and is horizontally divided into two distinct portions. The first floor is faced in glazed terra cotta and contains entries in various bays; the window openings are filled with stained glass panels in an Art Deco design. The upper floors have one-over-one windows; some windows have transoms. Three of the bays project slightly and two have quoined edges. The projecting cornice has modillions. Between 1898-1901, the original five story, symmetrical, seven bay building was altered to a ten bay building. The original cast iron street level facade was sheathed in terra cotta and the cast iron marquee was removed. Fifth story transoms were removed; seventh story west addition was divided into hotel rooms; the Savoy Grill was moved into the addition from the original portion of the building in 1905-06 with further expansions into most of the ground story.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1888 c.; 1898-1900 add.

Architect/engineer/designer: S.E. Chamberlain; Van Brunt and Howe (add.)
Contractor/builder/craftsman: Schnick, Massman and Flanagan; S.J. Hayde Construction Co. (add.)
Developer: Ninth and Central Corp. (rehab.)

The Savoy Hotel and the Savoy Grill were constructed in phases around the turn of the century. The 1888 wing was designed by S.E. Chamberlain who was Superintendent of Buildings. The construction of the building was by Schnick, Massman and Flanagan. Van Brunt and Howe designed the C.1898-1900 addition and the construction of this portion was by S.J. Hayde Construction Co. The leaded glass windows were designed by Frank Anderson. Interior murals of the Sante Fe Trail are by Edward J. Holslag. The early owners of the building were the Arbunkle Brothers, known locally as the "Coffee Kings." The hotel was leased to the Ewings-Child Hotel Co. during the turn of the century enlargements. Of major significance are the rich interiors of the Savoy Grill and Savoy Hotel lobby.

21. Register Status: Individually eligible

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is surrounded by surface parking lots on the south, east and west; to the north is a rehabilitated commercial building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces south and is divided into three bays. The first floor has a glass storefront with entry at the west end. Fenestration at second and third stories consists of one-over-one double-hung windows placed in segmentally arched openings. Corbelled pilasters divide the facade into bays. Corbel tables are located at the top of each bay. The parapet has a projecting cornice and a detailed frieze.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1887
Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:

This building was probably built as a lodging house. In 1888 it was known as the Denver House and by 1892 was called Hotel Villard.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale District of the CBD. Commercial buildings are located to the north, east and west; new residential buildings are located to the south.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this structure faces south and is dominated by the non-original enclosure of the first floor. The enclosure is comprised of vertical wood siding with round arched openings and tall narrow window openings. Fenestration at the second story is comprised of one-over-one double-hung windows set in segmentally arched openings. A corbel table is located at roof line.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1889
Architect/engineer/designer: 
Contractor/builder/craftsman: 
Developer:
The building was erected in 1889 by the McMilliam Brothers, locally prominent real estate dealers, for speculation. At the turn of the century, the building was used by John Merkle as a boarding house.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The building was remodelled and a fifth floor, faced in terra cotta, was added in 1920. The main entrance is recessed and centrally located on the south facade. Flanking the entrance are strips of double-hung windows with transoms. Brick piers divide the 2nd, 3rd, and 4th stories into 7 bays fenestrated by Chicago-style windows. Metal spandrels are located beneath the 3rd and 4th story windows. On the 5th story, above the brick piers, are simple terra cotta cartouches. Triple hung windows are located between the cartouches. The southern-most bay of the east facade has been filled with faux stone.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1905; 1920 add

Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:

The Spalding Commercial College was established by James Spalding in 1865. At the time of construction the school had more than 20,000 graduates. This building was "taken from the plans of some of the best of the Eastern business colleges." The original four-story building was to accommodate 600 students, and contain 20 school rooms and a gymnasium. The building is currently threatened by its own deterioration and the Federal Court House Development Project.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north are historic hotel buildings; to the west are occupied and vacant commercial and educational buildings; to the south are surface parking lots; to the east are surface lots, a commercial building and a parking garage.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The 1st story is distinguished by polychrome bands of brick and stone. The recessed central entrance has a smooth finish, quoinned surrounds with the entablature above inscribed with the building's name. Above the entablature is a cartouche; an antefix is at each end. The central and end bays contain of vertical bands of paired windows with the same quoinned surrounds as the entrance. The remaining bays are fenestrated with undecorated windows. A modillion cornice tops the building.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1907-09

Architect/engineer/designer: Charles A. Smith

Contractor/builder/craftsman: ?

Developer:

The Y.M.C.A. is one of the city's oldest institutions, having been organized in 1860. After raising over $250,000 by subscription, construction of this building began in June, 1907. The cornerstone was laid in October, 1907, and the building was completed in 1909. The 6th floor contains a 20x40 swimming pool. Among those using this facility have been Harry Truman and Joyce Hall. The building is threatened by its own deterioration as well as by the Federal Court House Development Project.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north, east and west are surface parking lots; to the south is vacant land.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This corner building's principle facade faces north. It consists of glass store fronts, many of which have been covered with signage. The 2nd and 3rd story windows have terra cotta surrounds with anconae supports below. Pilasters grace the building's corners and a low relief corona and parapet wall top the building. The coping is decorated with modillions at the center of each wing.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1915
Architect/engineer/designer: Charles M. Williams
Contractor/builder/craftsman: Matthew J. Fleming
Developer:
The original owner of this building was Locke Sawyer, an Independence banker. It was constructed at a cost of $60,000. The building is in poor condition and is threatened by its own deterioration as well as encroaching parking lots.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located within the West Ninth Street Historic District of the CBD. Commercial buildings are located to the north, south and east; a surface parking lot is located to the west.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces south and is dominated by a marble temple front. Six Ionic columns support a projecting entablature and parapet. Fenestration consists of Chicago-style windows. A five story addition, also faced in marble, is located on the north facade and has parking access at the sloped ground level; the upper stories are comprised of tripartite windows with transoms.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1904-06
Architect/engineer/designer: Wilder & Wight; Wight & Wight (w. add.); Marshall & Brown (n. add.)
Contractor/builder/craftsman: George L. Brown & Son
Developer:
The First National Bank was founded in 1886. Edward F. Swinney was President of the bank when this structure was commissioned. The building was Wilder and Wight's first project in Kansas City. The building's construction cost approx. $450,000. Wilder and Wight designed the main part of the building in 1904. The four story addition to the east was designed by Wight and Wight; the five story addition to the north was designed by Marshall and Brown.

Commercial buildings are located to the north, south, east and west.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces north and is distinguished by its verticality. The first three floors are veneered in stone; the first two stories are rusticated. Entry is centrally located within an arch that extends through the second floor. Above the door is a sculptured stone eagle. Stories 4 through 12 are veneered in brick. Six windows, regularly spaced, fenestrate each floor. A string course runs above the 12th story. The windows on the 13th and 14th stories are united by decorative panels and terra cotta arches. A corbel table is located below the decorative, terra cotta parapet wall.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1923-24; 1985 (rehab.)

Architect/engineer/designer: Keene & Simpson
Contractor/builder/craftsman: Bickel Contracting Co.
Developer: Hadley/McHugh Partnership (rehab.)

The two upper floors of this building were designed to house the Kansas City Joint Stock Land Bank. The building won the Business District League's Gold Medal in 1924. The building was known as the Land Bank Building until 1950 when it was acquired by Richard Riss and renamed the Riss Building. Riss was a truck line executive. In 1985, 57,000 square feet of the building were rehabilitated by the Hadley/McHugh Partnership at a cost of approx. $2 million dollars.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north, south, east and west are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces north. The first three stories, the original portion of the building, are faced in stone and have arched openings which extend to the cornice line, dividing the original portion from the addition. The central portion contains alternating bays of single and paired one-over-one windows. The 13th and 14th stories are faced with glazed tiles and have paired pilasters between windows; the end bays are quoined with tiles. The top story has minimal detailing; windows are surrounded in tiles. The parapet is raised at center.

20. HISTORY AND SIGNIFICANCE:  
Date of Construction: 1907; 1930 add.

Architect/engineer/designer: Wilder & Wight; KoKecknie & Trask (add.)

Contractor/builder/craftsman: Patti Construction Co.

Developer:

The New England Bank moved into the building in June 1908 from 9th and Wyandotte, their location since organization in 1899. The 1930 expansion was a project of J.A. Bruening and William Pitt. The interior of the 80,000 square foot building was renovated in 1969.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the east, west and south; to the north is a surface parking lot.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces north. The first story has been veneered with granite and contains plate glass windows and an off-center, glass entry. The second and third story fenestration consists of non-original, plate glass windows. The upper three stories contain bands of one-over-one double-hung windows. The fenestration is surrounded by glazed tiles; those in the top story have more elaborate surrounds, including consoles and projecting cornice. The parapet has the name plate and coping, and is raised at center.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1909
Architect/engineer/designer: John McKecknie
Contractor/builder/craftsman: ?
Developer:
The Burnap Stationary and Printing Co. was established in Kansas City in 1878 and became one of the largest retail stationery and office supply houses in the United States. This building was occupied until 1925 when larger quarters were built at 1023 McGee.

This building is located in the CBD. To the north and west are commercial buildings and surface parking lots; to the south is a new parking garage; to the east is a commercial/parking building.

19. ADDITIONAL PHYSICAL DESCRIPTION:

The main facade of this building faces south and is divided into six bays. The center two bays and the end bays are distinguished by their projecting cornice and rusticated base. Fenestration consists of varying configurations of double-hung and fixed windows, which appear in bands of two or three per bay. A glass entry is located in the third bay from west and is topped with glass blocks.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1900-06 c.

Architect/engineer/designer: ?

Contractor/builder/craftsman: George L. Brown & Son

Developer:

This building housed electrotype firms and small publications such as the Kansas City Jewish Chronicle and Catholic Register. It was probably built in 2 stages between 1900 and 1906. The building was first listed in the Kansas City Directory of 1900. However, water permits show building activity in 1904 and 1906.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located within the Quality Hill Historic District, near the western edge of the CBD. To the north and west are other multi-family buildings; to the south are vacant lots and houses; to the east is vacant land.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces north and is three bays wide. The fenestration consists of six-over-one windows in bands of threes. A one-story, full-width porch with a flat roof runs along the facade. A cornice with wide frieze has brackets in groups of threes. Cut stone ornamentation is located flush with the facade at various locations.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1919

Architect/engineer/designer: Nelle E. Peters
Contractor/builder/craftsman: Chas. E. Phillips
Developer:

This apartment building was designed by locally prominent architect, Nelle E. Peters for Charles E. Phillips, owner and builder.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the western boundary of the CBD. To the north is Case Park; to the west are the bluffs which overlook the Central Industrial District; to the south is a parking lot and an office building; and to the east is a vacant building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this ten story, buff brick apartment building faces north. The fenestration consists of one-over-one sash windows in rectangular frames. The flat facades and lack of detail are typical of modernist trends of the period.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1950
Contractor/builder/craftsman: Winn-Senter Construction Co.
Developer:

This apartment building is one of two built in 1949-51 as part of the 353 River Park development plan. The project received a Certificate of Full Compliance in 1952. The buildings reflect an early response to urban flight by attempting to attract residents back into the downtown neighborhood; they do not reflect the housing stock historically located in Quality Hill.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north and south are commercial buildings; to the east and west are surface parking lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The first 14 stories were constructed in 1919 and an additional 14 stories were added in 1929, utilizing set-backs at the 22nd and 25th floors. The building was faced with terra cotta. The gothic detailing emphasized the vertical lines of the building. In 1974-76, the building's exterior was radically altered by the application of concrete panels and a stucco of marble aggregate. Tall concrete aggregate arches line the entrance level of the 11th Street facade. Metal panels are in-set within these arches.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1919; 1929 add; 1974-76 alts

Architect/engineer/designer: Hoit, Price and Barnes
Contractor/builder/craftsman: Swenson Construction Co.
Developer: Himmel Corporation (alts)

When completed, this was Missouri's tallest structure at 394 feet. The first fourteen stories were constructed in 1919 and the additional 14 stories were added in 1929 utilizing set-backs at the 22d and 25th floors. In 1929 the building won a medal from the Architectural League for best new commercial building. The exterior of the building was radically altered with the removal of the ornate Gothic exterior detail; the facade was veneered with a smooth surface in 1974-76. The building is partially vacant after a $15 million rehabilitation by the Himmel Corporation.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:

This building is located in the CBD. To the north and east are parking garages; to the south and east are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:

The main facade of this building faces south and follows the steep grade of 11th street. The building is characterized by a profusion of Gothic motifs which occur in the band courses separating stories, window surrounds, and in the stone detailing above the 18th story. The ground through third stories feature white marble chip facing and plate glass windows. Upper story fenestration consists of one-over-one double-hung windows. Extensive remodeling took place in 1958 and 1971. The 1971 remodeling effort created a new 11th St. entry and was the design of Herrin Frashier, Architects.

</table>

Architect/engineer/designer: McKecknie and Trask & Hoit, Price and Barnes; Herrin Frashier, Architects (remod. '71)

Contractor/builder/craftsman: ?

Developer: Old Hotel Development (rehab.)

In 1917 construction began for a clubhouse for the Kansas City Athletic Club, from designs by the architects, McKecknie and Trask. Financial difficulties forced construction to halt; construction did not resume until 1922, with Hoit, Price and Barnes serving as architects. The Clubhouse facilities included a swimming pool, locker rooms and a Turkish bath. In 1933 the building became the Hotel Kansas Citiain and in 1938 was renamed the Continental. The building was rehabilitated in 1985 by Old Hotel Development and Leo Eisenberg. The project covered aprox. 250,000 square feet and costs approx. $11 million.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill Historic District. To the north and west are multi-family residential buildings; to the south are commercial buildings and surface parking lots; to the east is a parking lot.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of the building faces north and is dominated by an elaborate steeple, ornamented with brick corbelling and cut stone, and topped with a gold leaf dome. The front facade is divided by brick pilasters with Corinthian capitals. The center bay is pedimented and is detailed in stone. A projecting cornice wraps around the top of the facade. Fenestration consists of recessed, arched stained glass windows.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1882-84; 1955
Contractor/builder/craftsman: ?
Developer:
The building was constructed at a cost of $125,000. The cornerstone was laid in 1882. The building was completed in 1884.

This building is located in the Quality Hill Historic District. To the west are multi-family residential buildings; to the east is a new commercial building; to the north is a new parking garage; to the south are ecclesiastical buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces south and is divided into three bays. The fenestration is one-over-one double-hung windows in segmentally arched openings. The top story has arched openings. Each story is divided by a string course. The main entry contains a pediment over an arched doorway; the top level of the entry bay has arched openings with decorative surrounds. The parapet has an arched design and stone coping.

20. HISTORY AND SIGNIFICANCE: Date of Construction: 1889
Contractor/builder/craftsman: S.J. Hayde Construction Co.
Developer: McCormack Baron Assoc. (rehab)
The Montague Hotel was built by the S.J. Hayde Construction Co., for Otis Gunn, the father of the well known Kansas City architect, Frederick Gunn. During the 1890s this hotel was used by prominent families who were waiting for their houses to be built in the Hyde Park area of Kansas City. The building was rehabilitated by McCormack Baron Assoc. as part of the Quality Hill Urban Redevelopment project.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the western boundary of the CBD. To the north are high rise apartment buildings and surface parking areas. To the east and south are surface parking areas; to the west are the bluffs which overlook the CID.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces north. The horizontal orientation of this modernist building is conveyed by bands of brick, granite and glass which compose the main body of the building. Projecting sun screens are located above the second floor windows. The main entry is located in a one-story portion of the building which projects north from the western edge. This portion is characterized by exaggerated overhangs and transparent walls. Located in front of the building is a 97 foot granite pylon which elevates a three dimensional bull.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1951; 1994 add.

Architect/engineer/designer: Joseph Radotinsky (KCK)

Contractor/builder/craftsman:

Developer:

This building was built as the headquarters for the American Cattle Breeders Association. The monumental steer on top of the granite shaft measures 5' x 13' x 8' and was built by the Swenson Construction Co. in 1953. President Eisenhower came for the dedication April 16, 1953. The building is one of the few modernist buildings in the CBD.

![Photo of Argyle Building]
18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north is a surface parking lot and a telephone building; to the south is the Main branch of the Public Library; to the west is a small restaurant building and surface parking; to the west is a parking garage.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The original 4 story building was designed to carry additional floors. Six stories were added in 1924. The main entrance is off-set to the west on the south facade. Stories 2 through 4 are rusticated and feature Chicago style windows. The upper stories are fenestrated with windows grouped in segments of 4. The first story facades and interior have undergone numerous renovations since 1954.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1905; 1924 add
Architect/engineer/designer: Louis Curtiss; Keene & Simpson (add)
Contractor/builder/craftsman: ?
Developer:
The popularity of this office building with outstanding leaders in the medical profession necessitated its expansion from four to ten stories in 1924. The Argyle State Bank and a Katz Drug store once occupied the ground floor. Louis Curtiss was the architect for the original building; the addition was designed by Keene and Simpson.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north and west are commercial buildings; to the south is the State Court of Appeals building and surface parking; to the east is the Jackson County Court House.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The upper floors of the library sit on a veneered limestone base. The main facade faces north and the windows and doors of the first story are recessed behind piers. The smooth surface of the upper stories is created by a combination of fixed glass panes and aluminum framing and panels. Entrances are located on the west and north. Portions of the west facade are decorated with mosaic panels. To the south is a parking garage.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1958-60
Contractor/builder/craftsman: Bennett Construction Co.
Developer:
The Kansas City Public Library occupies the first five floors of this building. The remainder is occupied by the Kansas City School Board.

This building is located in the CBD. To the north are surface parking lots; to the south is the Jackson County Court House; to the east are the Municipal Courts and Police Headquarters; to the west are commercial buildings and surface parking lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
Primary entrances are located on the north and south facades. The lower stories project to form a base for the main building shaft. There are three set-backs near the top of the building. A sculptured low-relief frieze runs around the top of the base section, depicting Kansas City history. Metal spandrels between the windows create a strong vertical emphasis to the building, which rises to 423 feet. An observation deck is located on the 30th floor set-back. A basement garage has its entrance on the west side.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1936-37

Architect/engineer/designer: Wight and Wight
Contractor/builder/craftsman: Swenson Construction Co.
Developer:

This building is Kansas City’s third City Hall. It replaced an 1890-91 building located on 4th and Main. The Kansas City chapter of the AIA named this the outstanding building completed in 1937. This building is significant in its design as well as its relation to Kansas City’s Ten-Year Plan, WPA, and the overall development during the Pendergast era.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north is City Hall; to the south are surface parking lots and commercial buildings; to the east is the Federal Building; to the west is the Public Library and Board of Education Building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The building consists of a broad base, with two set-backs. The building rises to a height of 300 feet. The main entrance is centrally located on East 12th Street, approached by a flight of steps. A secondary entrance is located on Oak Street. Metal spandrels connect the windows, creating a vertical emphasis. Ornamental grill work covers the windows of the upper stories. Sculptural panels depicting the figures of law and justice are located just below the first set-back. These are the works of Jorgen Dreyer.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1934
Architect/engineer/designer: Wight and Wight
Contractor/builder/craftsman: Swenson Construction Co.
Developer:
This is the third Jackson County Court House to be built in Kansas City. The first two were located in the City Market area, north of downtown. Presiding Judge Harry S. Truman was influential in the design, having it based on a courthouse in Shreveport, LA. The architect of that building, Edward Neild, served as consulting architect to the Kansas City Building. Truman dedicated the 225,000 building in December 1934. Hare and Hare were the landscape architects for the project. This building is significant in its design as well as its relation to Kansas City’s Ten-Year Plan, the WPA, and general City development during the Pendergast era.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Other governmental buildings are located to the north, south and west; surface parking lots are located to the east.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main portion of this building consists of an 18 story rectangular block with the long axis running east to west. Projecting from the north side of this block is a 3 story adjunct containing a post office. One entrance to the building is located on the west facade of this adjunct. The entrance on the south facade has a protective roof and windbreak constructed of crushed granite. The building rises 279 feet and features windows separated by alternating panels of totally opaque, dark gray glass and aluminum. The angular end walls (east and west) are faced with granite slabs. A sunken landscaped plaza is located on the northwest portion of the property. An entrance to the building is located just off of this plaza. An anodized replica of the official U.S. seal, 9 feet in diameter, is positioned above the main entrance on East 12th Street.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1963-66
Architect/engineer/designer: various, see history
Contractor/builder/craftsman: various, see history
Developer:

Construction began in April, 1963 and was complete in June, 1966. When completed, this building contained 1,210,000 sq. ft. and cost $25 million. It was the largest office building in the state. Parking for 111 cars is located at the basement level. More than 5,000 government employees work in this building. The building was the work of a consortium of local architects: Voskamp and Slezak; Everett and Kelet; Radotinsky, Myen and Deardorff; Harris Armstrong, consultant; HNTB, structural engineers. Contractors for the building were the Frank Briscoe Co. (NJ) and the Huber-Hunt-Nichols Co. (IN).

10. The Federal Building
THE FEDERAL BUILDING

The latest giant addition to downtown Kansas City. This striking picture of the 18-story, two-block-long structure represents a federal investment of more than 32 million dollars.

Photog: John A. Calovich
Late 1965 Is Target Date For Completion

By Fred Fitzsimmons.
(The Star's Real Estate Editor.)

By late 1965, Kansas City's skyline will be considerably augmented by an 18-story office building just begun by the federal government.

Rising just east of the Jackson County courthouse, the structure will be the largest office building in Missouri. It will have 1,210,000 square feet of floor space. Initially, 4,500 persons will be employed there. It will have a capacity office space for 7,000 workers.

Excavation work now is under way on the 2-block site which extends from Locust to Holmes streets, Twelfth to Thirteenth streets.

Preparation of preliminary plans and final working drawings took 15 months. Final plans were delivered to the government's landlord agency, the General Services administration, in November, 1961.

Late last year Congress appropriated funds for construction which, coupled with appropriations for land purchase and fees, will amount to $32,119,000.

Presently, it has been determined that principal occupants will be:

- A large postoffice installation, on the first floor, immediately off the Twelfth and Locust corner. It will have space in a 3-story wing on the north (Twelfth street) front. The postal unit will serve both the public and the gov-

(Continued on Following Page.)
EVEN THE EXCAVATION IS A MAJOR UNDERTAKING at the Federal Office building project. This deep cavern is necessary to provide the heavy pilings on which the 18-story structure will rest. This aerial view is from the northwest, looking toward the Crosstown-Southeast freeway interchange. Sidewalk superintendents will note the contractor apparently has encountered a minimum of stone formation which on occasion has plagued downtown building projects.
A SUNKEN GARDEN will be among landscaping and artistic touches at the federal structure. This drawing is the proposal at the Twelfth and Locust streets corner, northeast quadrant of the 2-block-long site. The building is to use only 31 per cent of the site, with the balance in landscaping, walks and drives.
AN OPEN-JAWED EFFECT has been designed into the ends of the new Federal Office building, for aesthetic reasons. The architects felt such a treatment would be more pleasing than a mere rectangular form. As this detail indicates, the unusual space has utility within its design. Most floors in the main area will follow this pattern.
The north wing of three floors will be 135 by 160 feet. Only about 31 per cent of the site will be covered. The structure will set back 45 feet from Thirteenth, 55 feet from Holmes and 75 feet from Locust. On Twelfth street, the 3-story wing will be set back 100 feet and the main structure, 255 feet.

These setbacks will provide an open area of about 250 feet square at the northwest corner of the site, preserving an openness established in the present Civic Center grouping.

A concealed dock for Post Office department use will be at Twelfth and Holmes.

EXTENSIVE landscaping is planned at the Twelfth and Locust corner, including a sunken patio arrangement and fountain. This will include a 140-foot diameter diamond-shaped plaza, paved with blue-gray pebbles. Flanking the entrance will be a series of sand-sculptured concrete panels. Other artistic works are to be provided throughout the building. Among these will be stylized bronze eagles over the main entrances and murals in the main lobbies.

The high rise section of the structure will be covered on the north and south sides with a "fabric" of aluminum and gray glass, arranged in checkerboard fashion. The aluminum panels will be formed into a "macroquilt" design to provide a changing pattern of light and shade as light moves across the face of the walls. The various aluminum components are to be finished by methods which will produce colors ranging from frosty white to dark charcoal gray.

These light-skin walls of aluminum will terminate at each end into massive angular and curved end walls of variegated brown granite. To further contrast with the smooth metallic aluminum surface, the granite blocks—5 feet wide and 13½ feet high—will have a rough, or "natural cleavage" finish.

Sixteen high-speed automatic elevators will serve the 3-story section. The building also will have two large service elevators.

Government agencies which have the most contact with the public will be concentrated on the ground, first, second and third floors. These will be connected by dual sets of moving stairways to relieve loads on the elevators.

TYPICAL FLOORS on the high rise section will have about 48,500 square feet each—sider than an acre. The space has been designed on a 5x6-foot module to facilitate rearrangement of partitions when required. Typical private offices thus will be 10 by 12 or 10 by 15 feet. Grouped at the center and each end of a typical floor will be service facilities—kitchens, stalls and space for electrical, telephone and heating-cooling equipment. Individual spaces for vending machines also are to be on each floor, as well as public telephones.

Scattered throughout the building will be several conference rooms of varying size for the common use of all agency occupants.

No off-street parking facilities will be provided within the building, but some underground area will be available for government-owned vehicles. The approach to the area will be off Holmes, and will not be otherwise visible from the exterior. The same entrance also is to be used for service to dock spaces and a cafeteria.

Cooling equipment totaling 4,500 tons will provide air conditioning. Two steam turbine-driven refrigeration machines will operate at 150 pounds steam pressure. An additional 200 tons of steam absorption refrigeration will be provided for the post office and other agencies working a 24-hour a day schedule.

Cafeteria and kitchen facilities on the lower level will be designed to feed 4,500 persons during the noon meal hour. It will be open around the clock to provide food service for government employees.
LOOMING IN THE FOREGROUND is the mammoth bulk of the new Federal building, which dwarfs other downtown Kansas City buildings in girth if not in height. The 18-story building fills most of two blocks as seen clearly in this aerial photograph. Now in place atop the building is steelwork for a penthouse which will contain elevator and air conditioning equipment. This low-level view looks to the northwest with a glimpse of the Missouri river visible at the top beyond other downtown buildings—(Kansas City Star photograph by Sol Studna).
You are cordially invited to attend
the dedication ceremony of the
New United States Federal Office Building
601 East Twelfth Street, Kansas City, Missouri
Eleven a.m., Friday, April 22, 1966
Open house following ceremony

YOU ARE INVITED

Dedication of the new Federal Office building, 12th and Locust Sts., will be 11 a.m. Friday, April 22, with Representative Richard Bolling as the featured speaker. The dedication program is open to the public.

Following the dedicatory address in front of the new $26 million building, Senator Edward V. Long will speak at a luncheon in the Hotel President, sponsored by the Chamber of Commerce of Greater Kansas City. The luncheon will start at 12:30 p.m.

Luncheon guests then may return to the Federal Office Building for a guided tour.

Since luncheon facilities in the President are limited, Chamber members who plan to attend should make reservations at the Chamber office immediately.

Former President Harry S. Truman is the honorary chairman for the dedication, and Robert P. Lyons is the general chairman.

In addition to the speeches by Bolling and Long, Senator Stuart Symington will deliver a few remarks at the dedication and luncheon. Senator Symington was the speaker at the earlier cornerstone laying program.

Arnold S. Dreyer, chairman, Federal Executive Board, said members of the federal agencies now occupying the building, will be present for the open house program.
Huge U.S. Facility—State's Largest Office Building

TH ITS 28 ACRES OF OFFICE SPACE, the new Federal Office building will be the largest of its kind in Missouri. Completion, at an over $32,119,000, is planned late in 1965. The 2-block-square site is immediately east of the Jackson County courthouse, indicated at far right.
RISING ABOVE GROUND LEVEL, THE STEEL FRAMEWORK of the 18-story Federal office building begins to take shape. The project, being constructed at a cost of $32,119,000, is on a 2-block site adjacent to the homes of city and county government. In this view, looking northwest from the intersection of Thirteenth and Holmes streets (right foreground), also are the Public library (extreme left), the Jackson County courthouse (left center), the City hall (upper center), police headquarters (center) and the Juvenile court (lower lef). The Federal building, scheduled for completion late in 1965, will provide offices and working space for 7,000 government employees—(Kansas City Star photograph by Sol Studna).
Purchase or browse—over 800 popular Government publications are on display.

Use the special mail-order service provided for the 26,000 other titles stocked in Washington, D.C.

How To Keep In Touch With U.S. Government Publications

- The Monthly Catalog of U.S. Government Publications, sold on a subscription basis, is available at $4.00 a year. This catalog lists the publications of all departments issued during each month, whether for sale or otherwise, quoting prices in all instances where publications are for sale.

- A biweekly list of Selected U.S. Government Publications, listing new and popular Government publications, with prices and annotations, may be obtained free upon request.

- Free subject catalogs are available upon request. No one catalog is issued covering all Government publications, as it would be too voluminous for practical use.

Many thousands of subjects are covered by the 30 million or more publications which form the sales stock of the Superintendent of Documents.

Catalogs and indexes, also many of the publications, issued by this office may be consulted in all large libraries, most of which also keep at hand, for the use of the public, a set of our subject price lists.

There is no free distribution of Government publications by this office, it being the sales department for Government publications as instituted by law.

For additional information relating to Publications offered for sale write to:

Superintendent of Documents
U.S. Government Printing Office
Washington, D.C. 20402

3 New "ONE STOP" Information Centers Of The U.S. Government

Federal information center

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:

This building is located in the CBD. To the north, south and west are surface parking lots; to the east is a bank building.

19. ADDITIONAL PHYSICAL DESCRIPTION:

The walls of the building are set behind paired concrete piers, forming a covered arcade around the building. Precast concrete panels form the roof line. The south wall of the building is glass. The north wall, and the northern portion of the east and west walls, are of brick.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1965-66

Architect/engineer/designer: Kivett and Myers

Contractor/builder/craftsman: Massman Construction Co.

Developer:

This $3 million transportation facility was built on land cleared through the Urban Renewal program. The larger size of buses necessitated replacing the older terminal with this facility. This terminal contained all kinds of passenger services and amenities as well as dock facilities and roof parking for 400 cars.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located at the eastern edge of the CBD. To the north is surface parking; to the south are surface parking and some commercial buildings; to the east is the interstate connector; to the west is a commercial/parking facility.

19. ADDITIONAL PHYSICAL DESCRIPTION:
Entrances to this building are on the east and west facades. The walls are fenestrated with vertical, fixed, rectangular windows. An extension from the north of the building serves as drive-in bays. The truncated hipped roof provides a deep eave. The sloping portion of the roof is red tile and the flat area is tar and gravel.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1961-62

Architect/engineer/designer: 
Contractor/builder/craftsmen: Metropolitan Construction Co.
Developer:

When constructed, this drive-in bank was one of the largest such facilities in Kansas City. Because of its proximity to major government buildings, it was referred to as the "Civic Center Bank."

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the east, west and north; the Muhelebach Hotel is located to the south.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this corner building faces south. The building is composed of alternating vertical bays of common bond pressed brick and buff colored terra cotta tiles with ornamentation on the mezzanine through 20th floor. The first floor is faced with polished mottled brown marble. Floors 4 through 18 have terra cotta quoining at the corners.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1929-31

Architect/engineer/designer: Boillot and Lauck

Contractor/builder/craftsman: 

Developer:

When opened in February 1931, this was the tallest hotel in Kansas City. The Glennon Hotel was razed to make room for this building. The building was placed individually on the National Register in 1979; it was also designated as part of the Downtown Hotel District in 1983.

21. Register Status: Individually eligible

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Hotels are located to the east, west and south. To the north, is a commercial building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main entry is located at the southwest corner and is set within a four story atrium-lobby. The first four stories are composed of granite veneer and plate glass. The upper stories are composed of reflective glass. The southwest corner is rounded and the remaining portions of the building are stepped back from the rounded bay. A parking garage is integrated into the north end of the building.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1983-85
Architect/engineer/designer: PBNA
Contractor/builder/craftsman: Tom Martin Construction Co.
Developer: Executive Hills

This building was a project of the Executive Hills Inc. It contains approx. 336,000 square feet of office space and 15,000 square feet of retail space. The building cost approx. $31.4 million.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the south is Barney Allis Plaza; to the north is the Lyric Opera; to the west is the Folly Theater; to the east is a new commercial building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces south. A two-story, flat roofed canopy protects the entry areas. The facade has a vertical regularity created by projecting columns of tri-sided windows that extend from the sixth through twenty-second floors.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1982-1984
Architect/engineer/designer: Killingsworth, Stricker, Lindgren, Wilson
Contractor/builder/craftsman: J.E. Dunn Construction Co.
Developer:
The newest hotel building to be constructed in the CBD. Built at a cost of approx. $60 million, the hotel has 19 meeting rooms and a ballroom with banquet space for 1,500 people. The project was financed by a combination of federal grants and pledges from more than 50 K.C. firms. The architects were the Long Beach California firm of Killingsworth, Stricker, Lindgren, Wilson and Associates. The hotel was built as part of the Hilton chain, and has since changed ownership.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the west of this building is a surface parking lot. Bartle Hall is located to the south; to the north is a commercial building; to the east is a hotel.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces south and is dominated by a Palladian motif. The rusticated first story contains three arched entries with glass typanums. Four pilasters visually support the Palladian arch windows, which extend through the third story. One-over-one double-hung windows with semi-circular transoms flank the Palladian motif. Following complete restoration of the building, a two-story addition was placed on the west facade in 1980-81. This 9,000 square foot addition was designed to be "complimentary but passive" - with the use of similar materials with simplified details.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1900; 1980-81 rehab.
Architect/engineer/designer: Louis Curtis
Contractor/builder/craftsman:
Developer:

This building is an important example of an early 20th century theater and an important design by local architect, Louis S. Curtiss.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located west of Broadway in the CBD. To the south is a commercial building; to the north are new residential buildings; to the east are ecclesiastical buildings; to the west is a new parking garage.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces south. The first floor of the facade is recessed behind brick piers. A carriage porch extends from the main entry. Fenestration consists of regularly placed, paired fixed windows. A series of long balconies is located at the south end of the east facade.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1977
Contractor/builder/craftsman: J.E. Dunn Construction Co.
Developer:
This building was sponsored by the Cathedral Square Corporation. The $5 million dollar project was partially funded by HUD and provided housing for the elderly. The architect's red brick building was designed to complement the Cathedral. The building contains a community center and provides underground parking.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This parking garage is located in the Quality Hill neighborhood of the CBD. To the north and east are rehabilitated apartment buildings; to the east is a new high-rise apartment building; to the south is vacant land.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This new parking structure offers four above ground levels of parking which differ at either side of the central circulation core. The half walls are brick with concrete coping. Painted chain link is located above the wall on the first and second levels of parking.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1987
Architect/engineer/designer: McCarthy Parking Structures
Contractor/builder/craftsman:
Developer: McCormack Baron Assoc.
This garage was built as part of the Phase I Quality Hill Redevelopment project.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the western boundary of the CBD. To the north and south are other rehabilitated apartment buildings; to the east is a new parking garage; to the west is vacant land.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces south and surrounds a central courtyard. The main entry is located at the center of the courtyard and has decorative surrounds. Fenestration consists of six-over-one double-hung windows with stone lugsills. A stone string course runs between the second and third floors. Rectangular, molded panels are located periodically at the base of the parapet. The center bay has a raised parapet. At the center of the bays of the walls which face south, the fenestration differs to reflect inside circulation.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1927; 1985 rehab

Architect/engineer/designer: Nelle E. Peters; PGAV (rehab)

Contractor/builder/craftsman: Mosby-Goodrich Construction Co.; McCarthy Const. Co. (rehab)

Developer: McCormack Baron Assoc.

The Surrey Court apartments were designed by local architect Nelle E. Peters for J.N. Mehornay. The building was one of many apartments rehabilitated in 1985 as part of the Phase I Quality Hill Urban Redevelopment project. Project architect was PGAV Architects; contractor was McCarthy Construction Co.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood. To the north is another rehabilitated apartment building; to the west is a recently vacated commercial building; to the east and south is vacant land due to demolitions within the past 10 years.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces north. The main entry is located off-center, recessed within an arched opening; a secondary entry is located in the chamfered northwest corner of the building. The first floor of the building is illuminated plate glass windows with stone surrounds; an entablature divides the first story from the rest of the facade. Three story Corinthian pilasters are located at the second through fourth stories; fenestration of these stories consists of paired one-over-one double-hung sash. The top story, separated by a decorative entablature, contains bands of rounded arch openings. The parapet is ornamented with brick and stone; the entry bay is reflected in a raised parapet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1889; 1988-89 rehab

Architect/engineer/designer: Frank Resch; Soloman and Claybaugh (rehab)

Contractor/builder/craftsman:

Developer: DST (rehab)

This building is the only known surviving buildings in Kansas City to have been designed by architect Frank Resch. Resch, a native of Germany, worked in Kansas City between 1881 and 1892 and then moved to Chicago. The building was rehabilitated in 1988-89 from designs by Solomon Claybaugh Architects Inc. The rehab was part of the Quality Hill Urban Redevelopment Project.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located near the eastern edge of the CBD. To the north and west are other governmental buildings; to the south and east is the interstate connector; also to the east is St. Mary's Church.

19. ADDITIONAL PHYSICAL DESCRIPTION:
A landscaped plaza extends in front of the building to East 12th Street. Beneath the plaza is a parking area entered from either Cherry or Holmes. The first floor, with walls of glass, is recessed behind a series of piers. The upper stories contain rows of fixed windows set in bevelled precast stone panels.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1968; 1987 rehab
Architect/engineer/designer: Kivett and Myers
Contractor/builder/craftsman: Sharp Brothers Const. Co.
Developer: State of Missouri

This building was constructed to consolidate state offices scattered throughout the city. Originally planned as a three-story building, an emergency appropriations bill was passed during the construction phase to add an additional two stories. A spacious entrance plaza is located on the north side of the building. Two underground levels beneath the plaza provide space for 253 cars. The window wall system of the upper stories utilizes epoxy-joined thin, limestone panels. The first floor is sheathed with solar glass in matching anodized aluminum mullions. The building was rehabilitated in 1987 at a cost of approx. $4.9 million.

This building is located in the CBD. To the north is Barney Allis Plaza; to the south is part of Bartle Hall Expansion; to the east is a high rise hotel and parking facilities; to the west is Bartle Hall.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces north. The monumentality of the design is accentuated by minimal carved stone medallions and simple paneled friezes. Main entries occur beneath three marquees. The first floor of the facade is rusticated while the concrete of the upper floors appears smooth. The end bays are slightly recessed and have molded bands which wrap around the corners.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1933-34

Architect/engineer/designer: Gentry, Voskamp & Neville; Hoit, Price Barnes
Contractor/builder/craftsman:
Developer:

Since its construction Municipal Auditorium has served as a center for the cultural and recreational life both of Kansas City and a wide surrounding area. The building was built with PWA funds as part of the Tom Pendergast's Ten Year Plan.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the south is the Interstate; to the north is the Foisy Theater and surface parking areas; to the east is Barney Allis Plaza and Municipal Auditorium; to the west are surface lots and the Grace and Holy Trinity Campus.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This structure adheres to the modular concept of planning. The building is designed as a three level structure and takes advantage of the natural slope of the site. The exterior reflects the structural system of steel trusses, framing directly onto triangular end frames. These trusses provide a column-free exhibition interior space. The building is currently being expanded over the interstate to the south. The addition reflects the original design, however, the structural system is visible from the exterior.

20. HISTORY AND SIGNIFICANCE:
Architect/engineer/designer: Helmut Jahn & Convention Center Association; HNTB (add)
Contractor/builder/craftsman: Sharp Brothers Construction Co.
Developer:
Ground breaking ceremony for the Exposition center was March 25, 1974. The structures occupies two entire city blocks with the exception with the exception of a 10 foot setback. An underground tunnel connects this building with Municipal Auditorium. Convention Center Association, designers of the facility, consisted of Seligson-Eggen, Horner and Blessing, HNTB, and C.F. Murphy Association of Chicago. HNTB are the expansion architects. With the new addition the facility will be the largest column-free exhibition hall in the United States.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located at the southern edge of the Quality Hill neighborhood. To the north and west are surface parking lots; to the south is the interstate; and to the east is Bartle Hall.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The complex consists of three buildings; a 2 1/2 story stone guildhall erected in 1888-89; a three story nave erected in 1894; and a three-story belfry tower completed in 1938. Main entry occurs on the north facade. The west addition was constructed in the 1960s. Fenestration occurs within rectangular openings with separate transoms, and arched openings. The Apse of the church, facing east, contains altar and Tiffany Rood Screen.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1888-89; 1894 add; 1934 add
Architect/engineer/designer: A. Van Brunt & Co.; F.E. Hill (add - 1894); Wight & Wight (add - 1934)
Contractor/builder/craftsman:
Developer:
Grace and Holy Trinity is one of the oldest Episcopal churches in Kansas City. It began as the guildhall for Grace Church in 1888. In 1894 the nave was erected by F.E. Hill. Grace eventually merged with Holy Trinity Church and the Episcopal Cathedral in 1935. The tower designed by Wight and Wight was complete in 1938. The guildhall is a significant example of the work of Adriance Van Brunt and Co., and the nave containing several windows by Tiffany is a good example of Frederick E. Hill’s work.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located at the southeast corner of the CBD. To the south and east is the interstate connector; to the south are governmental buildings; to the west are a surface parking lot and a restaurant/bar.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building is constructed of precast concrete panels. The lower portion of the walls have a stone aggregate finish, while the upper floors have a smooth finish. The entrance to the multi-level garage is from Locust Street. The office area, along 14th Street, has single pane, fixed windows. The only decorative aspects of the building are the brightly painted air ducts and chimneys.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1977-78

Architect/engineer/designer: Seglison Associates
Contractor/builder/craftsman: Winn-Senter Construction Co.
Developer:

One of several construction projects by Southwestern Bell Telephone Co. in the CBD.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located at the southern edge of the CBD. To the south is the interstate; to the north is a surface parking lot; to the west is the Bartle Hall Expansion; to the east is another commercial building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces north. The upper two floors and roof of this building provide parking for 64 cars; garage is entry on the west. The ground floor office space comprises 9,000 sq. ft. and has an entry at the north. The parking floors are faced with limestone panels and is fenestrated with ornamental grills. Brick comprises the rest of the wall surface. A row of ribbon windows run across the first floor.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1957-58
Contractor/builder/craftsman: Frank Quinlin Construction Co.
Developer:
A downtown branch of the Kansas City Life Insurance Co. was first established in 1939 and occupied space in the University Club Building. The building was designed by locally prominent architect Edward Tanner and Associates.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located at the southern edge of the CBD. To the south is the interstate; to the north is the cathedral building; to west is surface parking; to the east is the Bartle Hall Expansion.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This elliptical building is attached by an arcade to the cathedral at the north. Fenestration is located within narrow slits in the wall surface and varying shapes along the eastern edge.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1978
Contractor/builder/craftsman: J.E. Dunn Construction Co.
Developer:

This building was built as a Diocesan Center to provide a maximum of compatibility with the adjacent Grace and Holy Trinity Cathedral of 1893-94, and parish house of 1890. The concrete walls of the center were textured and colored to resemble the stone of the older buildings. The building and courtyard, which includes a covered walkway and fountain, were part of an expansion effort by the Episcopal Diocese. The buildings are among the few ecclesiastical buildings that remain in the downtown area.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north and west are surface parking lots; to the east and south are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The windows of the building have been slightly altered and replaced with aluminum-framed sash. An overhanging cornice has been removed. Brick, accented by terra cotta blocks, frames the windows. Terra cotta panels decorate the wall above the 2nd story level. The original store fronts have been replaced with large plate glass windows in aluminum frames.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1914
Architect/engineer/designer: John McKecknie
Contractor/builder/craftsman: Aiken and Thayer
Developer:
John Glover, a grain merchant, had this small office building constructed. One of the early tenants was the Berry Dental Laboratory.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north and west are commercial buildings; to the east and south are surface parking lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The centrally located entrance is slightly recessed behind a lintel with modillioned keystone. The sides of the entrance are faced with marble. The base of the first story is faced with small ceramic tiles. Two windows, with brick surrounds forming a pitched lintel, can be found to either side of the main entrance. These windows have stone keystones. A stone string course runs between the first and second stories. The corners of the building are indented. The east facing basement level is faced in stone.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1908; 1958 add
Architect/engineer/designer: ?
Contractor/builder/craftsman: George L. Brown; Morris Hoffman Const. Co. (add)
Developer:
This was originally constructed as a warehouse for the Buick Automobile Company. A brick addition was placed at the rear of the building in 1958; builder: Morris Hoffman Construction Co. This building is threatened by its own deterioration and that of the surrounding properties.

This building is located in the CBD. To the north and west are surface parking lots; to the south and west are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The first floor of the main (north) facade is four bays in width. One of the central bays consists of a triple window with transoms; the other central bay contains a door in place of the middle window. The corner bays have single one-over-one double-hung windows with transoms. The transoms have all been painted. Floors two and three are three bays in width. The central bay is fenestrated with a series of six double-hung windows with arched brick voussoirs. The corner bays contain one double-hung window enframed by a brick sailor course. All of the windows have stone sills. The cornice is of corbelled brick with some set in a sawtooth pattern.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1910

Architect/engineer/designer: Herman Stroeh
Contractor/builder/craftsman: ?

The original owner of this building was Duston Adams, a broker. One of the early tenants, c.1917, was The Independant, a Kansas City society magazine. The publisher, George Creel, sold the magazine to Catherine Baxter and Clara Kellogg in 1909. In 1907 Baxter and Kellogg had started the first printing firm operated by women in Kansas City.

---
18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north and south are surface parking lots; to the east and west are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building is located on a grade, so the rear basement level is above ground. The entrance is at the east side of the south facade. The entrance is recessed behind a low-pitch lintel with keystone. The windows of the entrance have been replaced with wood. The two display windows at the south west corner have also been filled with wood. Each bay of the main facade, second story, features triple, single-pane sash which have replaced double-hung sash. These windows have stone sills. The shaped parapet wall has a rectangular panel formed by a sailor course of brick and is lined with stone coping. Inset stone arrows form decorative motifs across the front facade.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1913

Architect/engineer/designer: F.M. Michaelis
Contractor/builder/craftsman: Jones-Weaver Construction Co.
Developer:

This was one of several printing firms located in the immediate area. President of Bankers and Merchants Lithographing Company was August Bauer.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north and south are surface parking lots; to the east and west are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building is divided into four bays. The recessed entrance is located in the east bay. Plate glass windows fenestrate the other 3 bays. Each of the bays on the 2nd floor are fenestrated with one-over-one light, double-hung windows, two of which have been boarded up. In 1968 a cedar veneer was placed over the pilasters at the 1st story and a stucco-like aggregate placed above and below the 1st story windows. The steep grade allows the rear portion of the basement to be above ground.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1917; 1968 alts

| Architect/engineer/designer: | Madorie and Field |
| Contractor/builder/craftsman: | Ernest E. Robinson |

This building was constructed for George Gaugh for the Gaugh Printing Company, and leased to the Kelley-Reppert Motor Company. Gaugh’s Printing Co. was located at 408-10 Admiral. This building is threatened by its own deterioration and by that of the surrounding properties.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north, east and west are commercial buildings; to the south is a surface parking lot.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The first floor facade has been altered. Entrances are located at each end of the front facade and in the central bay of the east facade. A thin vertical window is located in the center of the front facade, in the first story. It is surrounded by decorative concrete block. The 2nd story has four bays connected by a series of four segmental stone arches with keystones. Paired double-hung windows with arched transoms are located below each arch. A stone string course runs below these windows. The shaped parapet wall has stone coping. Five decorative brick and stone diamond inserts are located between the arches and the roof line.

20. HISTORY AND SIGNIFICANCE: Date of Construction: 1910
Architect/engineer/designer: E.P. Madarie
Contractor/builder/craftsman: Edelman and Fleming
Developer:
This was one of several printing firms located in this general area. The building is threatened by the deteriorating condition of the surrounding buildings.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north is an outbuilding; to the west are commercial buildings; to the east and south are vacant lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building has three principle facades with the main one facing south. It is constructed of red brick with stone trim. Pilasters joining the 1st and 2nd stories are capped with plain capitals, architraves and friezes. The simple corona is surmounted by a brick parapet wall with stone name plates with "Ford" inscribed on them. The transoms have been removed from the first story windows. There are two principle entrances in the main facade; the first is centrally located in the west (1st) bay, the 2nd is centrally located in the east bay. This latter entrance is significantly altered from the original appearance retained by the former. The 2nd story is fenestrated with multi-pane hinged windows.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1920
Architect/engineer/designer: Keene and Simpson
Contractor/builder/craftsman: E.L. Winn Construction Co.
Developer:
Kelley-Reppert later became the Kelly-William Ford Motor Co. It is one of the oldest retail motor companies in the city. During WWII the building housed the Air Associates Inc. Aviation Equipment. In the 1950s ownership passed to the Holland Engraving Co. The founder of Holland was Lou Holland, an active industrialist. Lou Holland helped develop the 1930s, Five-year Chamber of Commerce plan which made Kansas City an active city even during the Depression.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
To the north, south, east and west are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces east and is divided into six bays. Entry occurs in the third bay from the south in a decorative archivolt; above the entry is an ornate panel inscribed "BUNKER." Within each bay are three, two-over-two windows in segmentally arched openings. Corbelled tables are located at the top of the first and fourth stories; stone belt courses appear above the second and third. The piers which divide the bays have brick and stone corbels at the intersection of the second and third stories and stone corbels at the top of the first and fourth stories. The entry bay has a raised decorative parapet.

20. HISTORY AND SIGNIFICANCE: Date of Construction: 1881; 1980 (rehab.)
Architect/engineer/designer: Midgley Assoc., Architects (rehab.)
Contractor/builder/craftsman:
Developer: Cumberland Assoc. (rehab.)
The building was erected by W.A. Bunker, land developer and manager of the Kansas City Journal and Western Newspaper Union, and John McEwen, land developer and author. It contained offices for the Western Newspaper Union and other local firms. In 1980, this building was approved, with several other buildings in its immediate surroundings, for an Urban Renewal Redevelopment Project referred to as Cumberland Redevelopment. The developer of the project was Cumberland Associates.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
To the north, south, east and west are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces east. Recessed entry occurs centrally and is flanked by plate glass store fronts with canvas awnings; a leaded glass transom is located above the store front. At each end of the store front is a cast iron pilaster with voluted top. A projecting cornice is located directly beneath the second floor windows. Fenestration consists of two, one-over-one sash windows per bay at the second story, and two, two-over-two windows per bay at the third story. A projecting cornice is located at the parapet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1905; 1980 (rehab.)
Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer: Cumberland Assoc. (rehab.)

This building housed firms specializing in photographic copying and printing. This building along with several buildings in the immediate area, was approved in 1980 for an Urban Redevelopment project, the Cumberland Redevelopment. The developer for the project was Cumberland Associates.

The main facade of this building faces east and is divided into three bays. The first and second floors are faced with cream colored terracotta, ornamented with molded, stylized designs between the windows of the second story. The recessed entry occurs at the south end of the street level facade and the two bays to the north have a continuous span of fixed windows. The upper stories are faced in brick and have two windows in each bay of each floor; paneled spandrels separate the windows. Terracotta embellishes the top two stories with stylized patterns.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1930-31

Architect/engineer/designer: William A. Bovard
Contractor/builder/craftsman: University Building Co.
Developer:

The Carbide and Carbon Building was erected by three locally prominent realtors, William Hall, Barat A. Guignon and J. North Mehorney. The building exemplifies the unprecedented growth of construction which occurred in the city during the depression of the 1930s.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
To the south and west are surface parking lots; to the north and east are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces east and consists of two full stories and a smaller rectangular third story penthouse. The main entry is located centrally and is formed by Neo-Classical doors and a projecting arch of fluted Tuscan columns. The second story consists of nine multi-light double-hung windows outlined by glazed surrounds and arched heads. The central bay of the second level has a projecting entablature. The cornice line projects and the parapet has balustraded panels.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1922-23; 1930-31 (add.)
Architect/engineer/designer: McKecknie & Trask (orig. & add.)
Contractor/builder/craftsman: George F. Green (orig. & add.)
Developer:
The University Club of Kansas City was founded in 1901 by ten alumni of six colleges and universities. In 1930-31 a third floor addition was placed at the rear of the building.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
To the north is a surface parking lot; to the south is a new parking garage; to the east and west are are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main entry to this corner building is centrally located on the east facade. Bands of brick and stone face the first two stories; an entablature separates the levels from the upper floors. Fenestration consists of paired windows on the north facade and end bays of the west facade; triple windows fenestrate the central portion of the east facade. Quoining separates the end bays from the rest of the facade. A projecting cornice runs above the 7th story, marking the termination of the original building. The top three stories are a 1927 addition designed by the firm of McKecknie and Trask.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1902-03; 1927 (add.); 1988 (rehab.)
Architect/engineer/designer: Charles A. Smith; McKecknie & Trask (add.)
Contractor/builder/craftsman: Hooke & Sexton
Developer: DST Realty (rehab.)
This office building was originally owned by Rodella Dwight. It was reputedly the first steel frame building in Kansas City and was constructed at a cost of $200,000. In 1985 the George K. Baum Group renovated 4,000 square feet of the building at a cost of approx. $1,000,000. In 1988 DST Realty renovated 341,000 square feet at a cost of approximately 3,000,000. Various tenant plans have been drawn for the building between the years of 1985-90.

To the east is a surface parking lot; to the north, south and west are are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces west. The building is divided into several horizontal divisions. The first level, with recessed entry, is veneered in marble. The second floor, faced in stone, features two modified, Chicago-style windows, topped with a projecting string course. Each of the two bays of floors three through six have paired, one-over-one windows flanked by individual windows. A string course runs between the 6th and 7th stories; above the 7th story is a cornice with exaggerated dents and three consoles. Stories three through seven are finished in glazed tile. The 8th story, a later addition, is of brick and is fenestrated with two groups of five windows.

20. HISTORY AND SIGNIFICANCE:  
Date of Construction: 1908; 1923 add.
Architect/engineer/designer: Smith & Rea; Charles Smith (add.)
Contractor/builder/craftsman: Flanagan Brothers
Developer:

This building was constructed to provide office space for financial firms and their attorneys. Numerous firms have leased space over the years, including many lawyers, realtors and investment companies. An additional story, designed by Charles A. Smith, was added in 1923.

To the north, south, and east are commercial buildings; to the west is a multi-story parking garage attached to a commercial building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces east and is divided into three bays. In the 1972 modernization of the building, the terra cotta of the first three stories was removed and replaced by panels of concrete and white marble chips. At street level are plate glass store fronts; the second and third stories have broad, fixed windows. The fenestration of the upper stories consists of individual, two per bay, one-over-one double-hung windows with brick spandrels. Glazed, terra cotta ornamentation located at the roof line.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1929-30; 1972 (alts.)
Architect/engineer/designer: Alonzo Gentry; Ramos Group Architects (alts.)
Contractor.builder/craftsmen: Manhattan Construction Co.; Universal Const. Co. (alts.)
Developer:
This building was a product of the 11th and Baltimore corporation. The Fairfax Airport offices occupied a major portion of the building. The building was sold to New York interests in 1959 but returned to local ownership in 1975 when it was purchased by the Unitog Company. The building was renamed after the President of Unitog, Dutton Brookfield. The 1972 remodeling of the building by the Ramos Group Architects won a modernization excellence award from Buildings Magazine. The contractor for the remodeling was the Universal Construction Co. The building contains apprx. 94,000 square feet.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
To the north, south, and east are commercial buildings; to the west is a multi-story parking garage attached to a commercial building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of the building faces east and has been altered. The southern portion of the building was erected in 1921, most likely by Fogel Construction Co. It was remodeled in 1955 by Sam Dasta and Sons Construction Co. from plans drawn by architect Herbert E. Duncan. At this time the flat aluminum canopy was added along with the facade of "crab orchard" stone, plate glass windows, and planter boxes. The northern 25 feet of the building was constructed in 1925 by Martin Goldbeck from designs by McKecknie & Trask. This portion of the building was remodeled in 1975. The northern portion of the roof is slate and features a small tower flanked by narrow dormers. The southern portion of the building has a flat roof.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1921-25; 1955 (alts.); 1975 (remod.)

Architect/engineer/designer: McKecknie & Trask (S) Herbert E. Duncan (alts.)
Contractor/builder/craftsman: Fogel Const.(N); Martin Goldbeck (S); Dasta & Sons (alts.)
Developer:

In 1921 the Kansas City Power and Light Co. erected the southern portion of this building. They used the three level basement as a substation. Part of the first floor was leased to Frank Wachter as a lunchroom. In 1932 the Italian Gardens Restraunt (estab. 1925) leased a portion of the building. In 1955 the Italian Gardens purchased the building, remodeled the interior and exterior, and expanded to occupy the entire building. In 1963 the restraunt purchased the northern portion of the building and remodeled it into the Ciao Cocktail lounge and banquet room.

19. ADDITIONAL PHYSICAL DESCRIPTION:

The main facade of this building faces east and consists of two narrow bays. At the street level are store fronts. A projecting cornice with solid, paneled railing divides the first and second stories. The second through sixth story each have a pair of double-hung windows with stone, quoining surrounding each bay. Another projecting cornice divides the top two stories from the rest of the building. The bays in the top two stories each have a large segmentally arched window surround; the spandrels are paneled stone. A gable above each bay extends past the crenelated parapet.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1915; 1984-86 rehab.

Contractor/builder/craftsman: F.A. Crites; A.L. Huber, rehab

Developer:

The hotel originally contained 100 rooms. In 1947 it was extensively remodeled and the name was changed to the New Yorker Inn. At this time a cocktail lounge and restaurant were added. In 1984-86 the vacant building was remodeled into 32 apartments. It was a privately financed project. Gastinger, Rees and Walker were the architects for the project and A.L. Huber & Son was the contractor.

Date:
18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
To the south and west are large additions which comprise the Muehlebach complex. The north is another historic hotel and to the east is a new commercial building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facades of this building face north and east. The building expresses an adaptation of Beaux-Arts Classicism in its paired pilasters of the upper stories, the repetitive cornices, and the use of classical ornament in the medallions and swags across the facade. The arched ground story windows are now covered with canopies. Fenestration primarily consists of individual, one-over-one windows with jackarches. The building has recessed entries on the east and north facades. In 1952 the building was expanded to the west with an eleven story addition.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1914-15; 1952 (add.)

Architect/engineer/designer: Holibard and Roche (Chicago)
Contractor/builder/craftsman: Westlake Construction Co.
Developer:

This hotel was erected by the Muehlebach estate on the site of the old First Baptist Church in 1914-15. The hotel formally opened in May of 1915. For many years the hotel was owned by the Trianon Hotel Co., and was managed by hotel entrepreneur Barney Allis. Through history the hotel has played host to many renowned personalities and was once called the "temporary White House of President Harry Truman." Over the past several years the Muehlebach has been the subject of much debate between developers, preservationists, and city officials.

Date:
18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
To the south is the Kansas City Club; to the north is the Muehlebach convention center; to the east is the Midland Building and to the west is another parking garage.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this structure faces east. Commercial spaces are located at either end of the facade and the central portion is open for vehicle access. The top three levels of parking are set behind a brick wall with large, central, brick screen.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1932 c.; 1959 (add.)
Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:

This parking facility was originally constructed in 1932. According to old photographs the building was set back from the street and two, smaller commercial structures were located in front. It is unclear if the smaller buildings were incorporated into the addition, constructed in 1959.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
To the west and north are parking structures; to the east is the Midland building; to the south is a commercial/parking structure.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The first and second stories of this corner building are faced with stone. Entrances are located on both Baltimore and 13th Street. The 13th street entry has an ornate metal canopy. The first story triple windows are set in an arch. A string course runs between the first and second stories. The upper stories of the building are vannered in brick. The windows of the third through fifth stories have terra cotta surrounds. Gothic terra cotta ornamentation runs above the arched fifth story windows. Slender columns running from the second through the 11th stories divide the facade into bays. Ornate gothic terra cotta surrounds mark the windows of the 12th and 13th stories. An elaborate terra cotta cornice projects above the 13th story. The window walls of the 14th story are topped with an overhanging flat roof. Two oriel windows are located on the east facade.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1919-22
Architect/engineer/designer: Smith, Rea & Lovitt
Contractor/builder/craftsman: J.R. Vansant Construction Co.
Developer:
The Kansas City Club was formally organized on February 22, 1883, as a social organization for the city's leading business and professional men. Many of Kansas City's most prominent citizens have been members. A club house built in 1885 was outgrown and construction of this building began in 1919. It was formally opened on May 19, 1922. The long construction period was due to building restrictions related to WWI.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main entry is recessed at the northeast corner of the building. There are no windows on the north facade except for a glass enclosed stairway leading from the roof parking to the interior of the building. The west facade is fenestrated with nine fixed, rectangular windows.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1948; 1968 (alts.)

Architect/engineer/designer: George McIntyre, engineer
Contractor/builder/craftsman: S. Patti Construction Co.; Hoffman Const. Co. (alts.)
Developer:

Because of a one-way street system, garage builder Harry Rubin modified his plans for a two-level garage to accommodate two retail shops, while maintaining parking for 100 autos. The retail shops were originally occupied by Eddy's Restaurant and the Dictaphone Corp. The Eddy brothers (George, Sam and Ned) opened their restaurant on Feb. 1, 1949, and until it closed in 1965 offered food, floor shows and dancing. Among the featured performers were George Gobel, Nelson Eddy, Andy Williams, and Burl Ives. In 1968 the exterior was altered to its current state by Hoffman Cortes Construction Company.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
To the north is the Midland Building; to the south is surface parking; to the east is a surface lot and parking garage; to the west is a commercial/parking building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facades of this building face north and west. At the street level the store fronts have been filled with stucco. The rest of the facade is original; the second floor is rusticated brick and has keystone lintels. The upper levels are divided into three bays, each defined by brick quoining. The end bays have two windows at each level; the central bay has four. The top story is divided from the remainder of the facade by a belt course. The rectangular windows of the top story are set below molded tympani. A projecting cornice runs above the windows. Balustrades break the stepped parapet wall on the Baltimore facade. The building contains 100,000 square feet.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1925-26

Architect/engineer/designer: Hoit, Price and Barnes
Contractor/builder/craftsman: Lonsdale Brothers
Developer:

The construction of this building was thought to mark an era of expansion in the development of the downtown district south of 12th Street. The Keith family began a furniture business in Kansas City in 1881, operating at various locations until the erection of this building. The firm pioneered in interior decorating. Following the death of Robert Keith in 1946 the firm was purchased by Speigel, Inc. of Chicago. The following year they sold the building to Yale University. The building was leased to TWA in 1957.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
To the north and east are surface parking lots; to the south is a historic parking garage; to the west is the old KCPL Building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces west. The first floor is currently faced in plywood. The second and third story fenestration is surrounded by decorative hoods and spadrels. The upper floors are fenestrated with paired windows. A terra cotta cornice forms a string course above the 12th story. Above this are pedimented window surrounds surmounted by an intermittent balustrade and quatrefoils. The east wall is pierced by a light court with a gable roof at its base and a bridge at the upper floors that connects the two wings.

20. HISTORY AND SIGNIFICANCE: Date of Construction: 1925
Architect/engineer/designer: Shepard & Wiser
Contractor/builder/craftsman: George Siedhoff
Developer:

This hotel was a project of the Westport Hotel Operating Co. George Siedhoff served as the president of the company, with Benjamin Natkin serving as the secretary/treasurer. Built at a cost of 2.5 million, it was opened January 1926. The building contained 453 guest rooms and features a roof garden that seated 650 persons. By June 1926, a bankruptcy suit was filed and Kansas City hotel man Frank J. Dean was appointed receiver. In December 1926 the hotel was sold to the United Hotel Company of America. In 1937 the hotel was purchased by a Kansas City group, headed by Frank J. Dean.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
To the north and west of this building are surface parking lots; to the south is a vacant commercial building; to the east is a vacant hotel.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main entry to the building is centered on the Baltimore Street facade. Above the 30th floor, the building is crowned with a lighted lantern extending 97 feet above the main roof. Set-backs are located at the 16th, 20th, 22nd, 27th, 29th, and 31st stories. The steel frame skeleton is covered with light-weight aggregate concrete and limestone. Sunburst motifs are used for exterior ornament to symbolize light and energy.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1930-31
Architect/engineer/designer: Hoit, Price & Barnes
Developer:
The 501 foot building was the tallest in the State of Missouri at its time of construction. The construction of the building enabled consolidation of the Power and Light Co. offices, previously scattered in several buildings. The Kansas City Power and Light Co. sold the building in 1957 and leased back thirteen floors. The building has changed ownership several times since then; the last of the KCP&L employees moved from the building in 1992. The building is significant for its Art Deco design and has become an important element of the downtown skyline. In 1988 the building was determined eligible for listing on the National Register of Historic Places.

**Additional Observations:**
- The property is a multi-story parking structure located at 1401 Baltimore Ave. in Kansas City, Mo. 64105.
- The building was originally known as the Fourteenth and Baltimore Garage.
- The property is owned by Joan and Robert Armacost, who reside at 8420 Somerset Prairie Vll. Kansas City, KS 66207-7058.
- The building originally served as parking for commercial and residential purposes.
- The building features reinforced concrete construction, with a flat roof and tar and gravel materials.
- The building's exterior is clad in Kelstone material.
- The building's foundation is made of concrete.
- The building has rectangular plan shape, with Art Deco style elements.
- The property is currently in good condition, with fair integrity.
- The building is located in the Jackson County, Kansas City, Missouri area.
- The property is a significant example of Art Deco architectural design.
- The property is not demolished, and it remains an active commercial space.
18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:

To the north is the vacant, President Hotel; to the south and west are vacant commercial buildings; to the east is the vacant Empire Theater.

19. ADDITIONAL PHYSICAL DESCRIPTION:

The main facade of this structure faces west and is divided into eight bays. Garage entries are located in the 4th, 6th and 7th bays from the north. The 5th bay is marked by a stepped parapet. The 1st, 2nd and 3rd bays have a continuous store front at street level; a small store front is located in the southern bay. Fenestration consists of vertical strips of hinged windows with metal spandrels. Molded, decorated panels are located on the parapet wall. A figurative panel is located beneath the stepped parapet.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1929

Architect/engineer/designer: John McKecknie

Contractor/builders/craftsmen: ?

Developer:

The Balfour Investment Company, headed by Roy Nafziner, originally intended this garage to be enlarged and converted to a 10 story office building. The depression may have altered these plans. This is one of only a hand full of historic garages remaining in the CBD.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale District, near the western boundary of the CBD. To the north is a parking lot; to the south, east and west are commercial and industrial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces east and is dominated by a semi-hexagonal bay at the second story. The fenestration consists of two, small one-over-one windows at either side of the central bay and the double-hung windows in the bay. The first floor has been drastically altered from its original state. The store fronts have been removed and the southern bay has been recessed and has a double-door entry and transoms. The northern bay is still at the street, however, it has been bricked and contains a solid door.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1903

Architect/engineer/designer: Braecklein & Martling
Contractor/builder/craftsman: Ranagan Brothers
Developer:

The building was erected in 1903 by Mr. John Totten, to serve as a rooming house and saloon. In about 1909 the building along with the adjacent building to the south became the Caton Lithograph and Printing Co. During the 1930s the building became the home of the E.H. Wright, Ltd., which manufactured liquid smoke for the processing and curing of hams and bacon. The building is a commercial design by the local architectural firm of Braecklein and Martling.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale area, near the western boundary of the CBD. To the north is the interstate; to the south is a commercial building; to the east and west are parking areas.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces north and is symmetrically composed around a central arched opening, reflecting the atrium. The remainder of the facade is comprised of alternating bands of brick and glass which wrap around to the secondary facades. A band of brick dentils is located at cornice line. Entry is centrally located on the north facade beneath a barrel vaulted drop-off area. The street level is glass, and is recessed under the main body of the building; concrete piers act as supporting members. The building is adjacent to 618-28 Broadway.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1986
Architect/engineer/designer: ?
Contractor/builder/craftsman: V.S. DeCarlo
Developer: Rivergate Associates

This building was developed by Rivergate Associates in the mid-1980s for office space. The building cost approx. 8.8 million dollars and has a total of 130,000 square feet.

At street level the fenestration consists of fixed, plate glass windows with transoms; in each bay of the upper stories are two, four-over-one windows; the top story has six-over-one sash windows located within round arched openings with decorative typanums. The projecting cornice has exaggerated dentils.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1902; 1983 rehab.
Architect/engineer/designer: Brad Hansen (rehab.)
Contractor/builder/craftsman: ?
Developer: Roger Cohen, Alpert & Young (rehab.)
The building was erected in 1902 by the prominent millinery firm, Goldstandt-Powell Hat Co. to serve as their business headquarters. In 1908 the building became the first home of the local cigar wholesalers Rothenberg & Schloss. In a 1983 development project by Roger Cohen and Alpert & Young, this building, along with the two buildings to the south were rehabilitated and joined into one structure. Brad Hansen was the architect of the rehabilitation. The rehabilitation cost approx. 4.5 million dollars.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale area, near the western boundary of the CBD. To the north, south, east and west are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building faces east and is flanked at either side by commercial buildings. The facade is divided into two bays. At street level fenestration consists of fixed, multi-light windows; entry is recessed in central bay. The fourth-story windows are shaped by two arches with central terra-cotta keystone; panels of molded terra-cotta are located below the windows. The fifth-story has coupled pilasters which separate the windows.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1889; 1983 rehab.

Architect/engineer/designer: Walter Root; Brad Hansen (rehab.)
Contractor/builder/craftsman: ?
Developer: Roger Cohen, Alpert & Young (rehab.)

This building was constructed in 1889 by the prominent architect, Walter C. Root, for the K.C., Ft. Scott, Gulf Railroad Co. During its 1983 rehabilitation the building was joined with the buildings at either side. Brad Hansen was the rehabilitation architect and the project was developed by Roger Cohen and Alpert & Young.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale area, near the western boundary of the CBD. To the north and west are commercial buildings. To the south and east are parking lots and commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces west on Broadway and is divided into three bays by rusticated stone pilasters. The entrance is located along the south facade, beneath a flat roofed, metal canopy. The first story of the west and south facades were altered by the application of black marble facing and narrow, plate glass windows. The original fenestration consists of paired, four-over-four windows; in the central bay windows are grouped in threes. A projecting cornice is located at the roof line.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1910
Architect/engineer/designer: Smith, Rea & Lovitt
Contractor/builder/craftsman: Joseph B. Stone
Developer:
The building was erected in 1910 by Edward C. Gatlin, President of the Gatlin Manufacturing Company, to serve as the company's headquarters for the manufacturing and wholesaling of coffees and teas.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:

This building is located in the Wholesale area, near the western boundary of the CBD. To the north, south, east and west are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:

This building faces west and appears to be part of a larger building, due to a 1926 remodeling effort. The fenestration consists of five-over-five windows. The parapet has brick dentils and string coursing. The first story is fenestrated with plate glass windows with transoms.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1883; remod. 1926

Architect/engineer/designer: H.F. Brandenburger (remod.)

Contractor/builder/craftsman: Joe Eagles (remod.)

Developer:

The building was erected in 1883; its earliest occupant was the Powers and Thompson Saloon, a popular late 19th century drinking establishment. In 1926, Sam Pollman, a wholesale grocer and owner, remodelled the building and joined it to the two buildings to the north.

21. Register Status: Contributes to district

Kansas City Register Listing: National Register Listing: Wholesale District, 1979

Designation Case #: Certif. of Approp. Case #:

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale area, near the western boundary of the CBD. To the north and west are commercial buildings; to the south is a parking lot; to the east is a parking structure.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building is characterized by its series of projecting bays, and cast iron potico wrapping around the building at the first floor. At street level the walls are comprised of alternating bands of brick and stone, and the windows are plate glass. A projecting cornice separates the top two stories from the lower floors and wrap around the projecting bays. The spandrels of the projecting bays are ornamented with swags and patterns.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1886-87; 1889-91 add.; 1980 c. (rehab.)
Architect/engineer/designer: Van Brunt & Howe
Contractor/builder/craftsman: C.E. Clarke (Boston)
Developer: McCormack Baron Assoc. (rehab.)

The Coates House is significant in its association to Kersey Coates, an early civic leader in Kansas City's history. Kersey Coates built his home a few blocks away from the hotel in the Quality Hill, a neighborhood developed by Coates upon his arrival to Kansas City. The hotel precipitated the development of the wholesale district. It was visited by Presidents Harrison and Cleveland. The building was devastated by a fire in 1978, and the north wing was removed. The building was then rehabilitated into residential units.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale area, near the western boundary of the CBD. To the north and east are commercial buildings; to the west is a parking structure; to the south is a small parking lot and another rehabilitated apartment building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces east and is characterized by its Georgian design elements. The facade is horizontally divided into three distinct portions. At the first and second stories the wall surface is rusticated stone; entry occurs under an arched opening in the central bay; the end bays have recessed window panels and pedimented box windows at street level. The central body of the building is brick with stone quoins and window surrounds. The top story is faced in glazed brick. The fenestration in these two portions is comprised of one-over-one windows.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1901; 1985 c. (rehab.)
Architect/engineer/designer: John McKecknie; PGAV (rehab.)
Contractor/builder/craftsman: Williams Bros.; McCarthy Constr. Co. (rehab.)
Developer: McCormack Baron Assoc. (rehab.)
The Lorraine was designed in 1901 by the prominent Kansas City architect, John McKecknie. This building is one of several rehabilitated as part of the Phase I Quality Hill 353 Urban Redevelopment Project. The project developer was McCormack Baron Assoc. of St. Louis. Rehabilitation architects were PGAV Architects; contractor was McCarthy Construction Co.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale area, near the western boundary of the CBD. To the south and east are commercial buildings; to the west is a parking structure; to the north is a small parking lot and another rehabilitated apartment building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces east and is dominated by a five-story, full-width porch. The porches are supported by brick piers on brick plinths. The first floor has stuccoed piers. Fenestration consists of eight-over-two double-hung windows at street level and one-over-one windows above. Two five-story, rectangular bays are located on the north and south facade. Entry occurs in central bay.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1897-98; 1985 c. (rehab)
Architect/engineer/designer: PGAV Architects (rehab.)
Contractor/builder/craftsman: McCarthy Const. (rehab.)
Developer: McCormack Baron Assoc. (rehab.)
The building was erected in 1897 by the LaForce Bros. to serve as a hotel. The name for the hotel, Estill, was the maiden name of Butler LaForce's wife. This building was one of several apartment buildings rehabilitated as part of the Phase I Quality Hill 353 Urban Redevelopment Project. Rehabilitation architects were PGAV Architects; contractor was McCarthy Construction Co. Project developer was McCormack Baron Assoc. out of St. Louis.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale area, near the western boundary of the CBD. To the east is a commercial building; to the west and north are rehabilitated residential buildings; to the south is an office building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This new commercial building was designed to reflect the historic character of the Quality Hill neighborhood. The building is dominated by a rounded corner and projecting gabled bays, marking primary entries. The street level is comprised of store fronts; a corbeled band, beneath a denticulated cornice divides the street level from the upper three stories. Windows on the upper stories have concrete lintels and sills. A denticulated cornice is located at the roof line and follows the pitch of the gables. Arched window openings appear in the fourth story of the gabled bays.

20. HISTORY AND SIGNIFICANCE: Date of Construction: 1986 c.
Architect/engineer/designer: PGAV Architects
Contractor/builder/craftsman: McCarthy Construction Co.
Developer: McCormack Baron Assoc.

This building was designed by PGAV Architects for McCormack Baron Assoc. for Phase I of the Quality Hill Urban Redevelopment Project.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:

This building is located south of the wholesale district, near the western boundary of the CBD. To the east is the Cathedral of the Immaculate Conception; to the north, south, and west are parking areas.

19. ADDITIONAL PHYSICAL DESCRIPTION:

The primary facade faces east and contains the main entry in a small recessed bay; the second story of the bay contains an irregular pattern of glass panes. The section of the building to the south is fenestrated with rows of rectangular windows with small hinged panels. Metal spandrels in a cross shape divide the window area into four sections. A centrally placed rectangular area of glass bricks serves to fenestrate the northern portion of the facade. A brick soldier course and stone coping run along the top of the building.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1945-46; 1959 add.; 1965 c. add.

Developer:

This building was constructed as a memorial to pioneer priest, Father Bernard Donnelly. The building was constructed in two sections; the north portion, the gymnasium, was begun in December of 1945. The south portion, the school, was begun in the spring of 1946. An addition to the gym, extending it to the west, was constructed in 1959 (J.E. Dunn Const. Co.). A two-story, three car garage was added to the southwest corner of the building c.1965.

This building is located in the Wholesale District, near the western boundary of the CBD. To the north is a gas station; to the south is a parking structure; to the west is another rehab, hotel building; to the east is a surface parking lot.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facades of this building face east and west. The east facade is divided into three bays by pilasters. The entry is recessed in the central bay. Fenestration consists of pairs of one-over-one double-hung sash. The fourth story windows are placed within a single arched opening per bay; each bay has an oculi transom. The first and fifth stories are separated from the body of the facade by projecting cornices. The first story has plate glass store fronts and rusticated pilasters.

20. HISTORY AND SIGNIFICANCE: Date of Construction: 1895-96; 1988-89 rehab.
Architect/engineer/designer: Shepard & Farrar; Solomon & Claybaugh (rehab.)
Contractor/builder/craftsman: ?
Developer:
The building was erected in 1895 by the Barton Brothers Shoe Co. to serve as storage space for their wholesale shoes and foot apparel. In 1900 Barton Brothers erected a large warehouse and factory on 8th Street. Around the turn of the century, the building served the Morrin-Powers Wholesale Liquor Co. The building was designed by the prominent, local firm, Shepard & Farrar. The building was rehabilitated for SoHo IV (1988-89), a 52 unit apartment building, but then used as a part of the Historic Suites Hotel. The plans for the rehabilitation also included the new parking garage and pool, located south of the building.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale District, near the western boundary of the CBD. To the north is an adjacent commercial building which also serves as part of the hotel; to the south is an industrial building; to the east is a parking structure and a pool; to the west are commercial buildings turned residential.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces east and is divided into three bays. Entry appears in the central bay. Fenestration consists of one-over-one sash windows in bands of five in the end bays and band of fours in the central bay; fifth story has rounded arched windows supported by short columns. The central bay, fifth story windows are set within one arched opening. Corinthian capitals are located on paired pilasters at each side of the central bay.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1889; 1986 rehab.

Architect/engineer/designer: Knox & Guinotte
Contractor/builder/craftsman: ?
Developer:

This building was erected in 1889 by the Builders and Traders Exchange to serve as their organization's headquarters. The organization consisted of distinguished locally and nationally recognized contractors and architects. The building, a rare surviving commercial design by the local architectural firm of Knox & Guinotte. In 1904 it became, along with the building to the north, the headquarters of the McPike Drug Co. The building's renovation, creating 54 apartments for SoHo West, was completed in 1986; those apartments are now used for hotel rooms.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale District, near the western boundary of the CBD. To the north is a surface parking lot; to the south is an adjacent commercial building; to the west are commercial buildings; and to the east is a parking/commercial structure.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of the building faces east and is divided into three bays. The entry occurs at the south end of the facade and is surrounded by detailed molding and projecting cornice. The first story is rusticated; the spandrels above the second and third stories have panels of diagonal brick. The fenestration consists of multi-light vent windows at the first three floors, and ten-over-one windows at the top floor. A projecting cornice is located on the parapet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1919-20
Architect/engineer/designer: Arthur H. Buckley
Contractor/builder/craftsman: Bliss Construction Co.

This building was owned by the Western Type Setting Co./K.C. Electrotype Co. until the 1980s.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale District, near the western boundary of the CBD. To the north is a parking/commercial building; to the south are commercial buildings; and to the east and west are parking structures.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this corner building faces west. The central section projects slightly and is capped by a concrete block pedimented parapet. The north facade has an entrance at the east end. A central projection with a pediment repeats the motif of the main facade. Brick piers at the corners of the building are topped above the parapet with stone rectilinear capitals. A smooth stone band wraps around the facade above the windows.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1920
Architect/engineer/designer: F. McIlvain
Contractor/builder/craftsman: Swenson Construction Co.
Developer:

This building was originally a parking garage. In 1952 it was converted into office space for the Standard Milling Company. The firm, one of the largest flour milling operations, moved their headquarters from Chicago to Kansas City.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale District, near the western boundary of the CBD. To the north is a parking structure; to the south an attached commercial building; to the east is a theater/office building; and to the west is a new commercial building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces east and is dominated by a heavy temple front. The temple front occurs at the center of the facade, its pediment extending past the parapet. Where the garage doors originally appeared at street level, multi-pane fixed windows take their place. Entry occurs at the north end of the facade, outside the temple front. The engaged columns of the temple front, and wall surface between the columns is rusticated. The third story windows are set within a single arched opening. The remainder of the fenestration consists of one-over-one double-hung sash, typically placed in pairs.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1905; 1984 rehab.
Architect/engineer/designer: Albert Turney; Kenneth Graham - PBNA (rehab.)
Contractor/builder/craftsman: Geo. W. Huggins; Da sta (rehab.)
Developer: Landmark Mortgage

The site for this fire station headquarters was purchased in 1904 at a cost of $27,000. In order to accommodate what was to be in contemporary accounts "one of the most handsome and commodious structures" the old Moss homestead was torn down. Built locally of Quarried Phoenix white stone and enameled brick, the fire station boasted offices and sleeping quarters for 62 men on the second floor and a gymnasium with shower and locker facilities on the 3rd floor. In 1906 this building was capable of housing more fire apparatuses than any other fire department headquarters in the U.S. The building served as the Fire Department Headquarters and repair shop through 1980. The building was rehabilitated by Landmark Mortgage in 1984. The project cost approx. 2 million dollars and provided about 27,000 square feet of rehabilitated space. In October of 1984 the project received a Commitment to Kansas City Award. The rehab. architect was Kenneth Graham of PBNA.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north is a commercial building; vacant lots are located to the south and east; to the west is a surface parking lot.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces toward the east and consists of two stories. The first story has three portals filled with paired doors and stained glass transoms. The central wooden doors have been replaced with glass doors. The sides of the outer openings are quoined, while the central doorway has brick archivolts and triple pilasters. All three portals are crowned with gables. The second story has three tripartite windows in the central projecting bay. The tower bays have paired windows. All of these windows have stone quoined surrounds. Toward the edges of these bays are stone quoins that are carried from the stone foundation to the second story cornice. A modillioned cornice crowns the church. The twin belfries have Classical stone detailing consisting of string courses, arches, and pediments. The copper domes of the towers terminate with lanterns atop which are crosses.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1875
Architect/engineer/designer: Asa Beebe Cross
Contractor/builder/craftsman: D. Underwood, brickwork; M. Dunlap, stone cutting, L. G. McGillis, carpentry.
Developer:
This parish was established in 1869, when there were only two churches in Kansas City to accommodate the rapidly increasing Catholic population. A basement structure at 7th and Oak was used for church purposes. When Father James Dunn took over the parish in March, 1873 he sold the 7th and Oak site and bought this property. The cornerstone was laid on August 23, 1875. The interior remained uncompleted for seven years due to financial difficulties.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The first story of the main facade contains two garage doors. A row of seven windows, with a continuous stone sill, fenestrates the second story. Intended to affect a pylon, the brick central portion of the facade projects slightly. The windows of the north and south facades are set in segmentally arched surrounds.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1909

Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:

The first Kansas City insurance patrol was organized in 1889. It operated under city control until 1903 when it was taken over by a corporation of insurance underwriters. The patrol tried to save perishable commoditions, serving as a salvage operation, thus lessening damage costs. This structure served as their headquarters. The building is currently owned by the city and used for storage.

This building is located in the CBD. To the north, south and east are other government buildings; to the west is a commercial building and surface parking lot.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building is faced with glazed brick. The structure consists of two connected, polygonal sections, approximately 170 feet in height. Fenestration consists of horizontal, slot-like windows, 5.5 inches high. To the east of the towers, and connected by a tunnel, is a three story section. Horizontal window bands fenestrate this section.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1981-84
Architect/engineer/designer: Prindle, Patrick and Partners
Contractor/builder/craftsman: J.E. Dunn Construction Co.
Developer: Jackson County, MO

A bond issue was approved in November 1979 to replace the overcrowded Jackson Co. Jail with this building. Construction began in May 1981 and the building was occupied in mid-1984. The building was constructed at a cost of approximately $24 million. The jail is located in the double-tower section. The four story section contains courtrooms.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Surface parking areas are located to the south, east and west; a commercial building is located to the north.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The eastern 16 feet of this building were constructed in 1963. An addition, comprised of 3,200 square feet, was added in 1979, extending the building westward to the corner. Both sections are veneered in brick. The eastern portion has an entrance facing east and large plate glass windows. The addition has a south-facing entrance. The northwest corner of the building is curved. Three narrow arched windows mark the west facade. A similar window is located on the north wall.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1963; 1979 add
Contractor/builder/craftsman: Patti Construction Co.
Developer:

This structure began as a 15x20 foot parking lot office. The original owner was Anthony Spino. In 1979 a 3,200 sq. ft. addition created space for a restaurant.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Surface parking lots and structures are located to the north and east. To the south are commercial buildings and a church. To the west are commercial buildings and a parking garage.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The upper stories of this building are set back. Classical ornamentation is restrained, consisting of geometrical spandrels beneath the windows, string courses, and bronze eagles over the main doors. The limestone walls rest on a granite base.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1938-39
Architect/engineer/designer: Wight & Wight
Contractor/builder/craftsman: Swenson Construction Co.
Developer:
This building was constructed on the site of a 1896 Federal Court Building that was razed in 1938. It was the last major governmental construction project completed in the city in the 1930s. Senator Harry Truman participated in the cornerstone laying of the $3 million project. The Federal Courts have again out-grown this space and are developing plans for a new building on a site a few blocks to the east.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north and west are parking structures; to the east is the Federal Courts Building; to the south are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The slightly recessed entrance to this 17' X 60' building is located at the south end of the facade. The rest of the facade is filled by a plate glass window set in a brick wall. A belt course is located just above the entrance and stone coping encircles the flat roof. The north facade contains one entrance on the eastern end and two plate glass windows, asymmetrically spaced. A two-over-two window is located near the western end of this facade.

20. HISTORY AND SIGNIFICANCE:  
Date of Construction: 1952

Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:

This small building was built by the Carvello family who operated the parking area to the north.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the south and west are commercial buildings; to the north is a parking garage and small commercial building; to the east is the Federal Court Building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The Scarritt Building, constructed by the architectural firm of Root and Siemens, has an eleven story, steel frame skeleton, supported by a double basement and is primarily sheathed in brick. There are modified "Chicago windows" on the second story level. Above the first story the building has a modified "H" plan. The terra cotta ornamentation on the east and south facades represents the influence of architect Louis Sullivan and the "Chicago" school of architecture. Fenestration consists of two-over-two, and one-over-one windows.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1906-07; 1984 rehab
Architect/engineer/designer: Root and Siemens
Contractor/builder/craftsman: ?
Developer: Ameritas Inc., Atlanta, GA (rehab)
The Scarritt building is significant as a modern American building strongly influenced by the architectural dictates of Louis Sullivan and the Chicago School of Architecture. It is also typical of the new Skyscraper architecture of the early 1900s. It is the best example of a Chicago School skyscraper in Kansas City. The building was rehabilitated, at a cost of approx. $12 million, in 1984-85 by Ameritas Inc., a group out of Atlanta, GA; the firm also rehabilitated Peck's Plaza at 10th and Main. Since that time Ozark National Life has purchased the building and have continued to upgrade the integrity of the building with the help of architect Susan Richards Johnson.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located at all sides.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The first story was modernized circa 1967 but has recently been returned to a more historically appropriate appearance. Rusticated stone faces the first story. The upper stories are veneered with lightly colored stone. A light course pierces the north facade. The main entrance is on Grand, with a secondary entrance on East 9th Street. Paired double-hung windows fenestrate the upper floors. Lion and ram heads are used as gargoyles. An ornate modillioned, denticulated cornice runs above the 12th story windows. The building contains 104,000 square feet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1910; 1967 alterations

Architect/engineer/designer: Smith, Rea & Lovitt
Contractor/builder/craftsman: George L. Brown
Developer:

A previous five-story Rialto Building on this site burned in 1910 and was replaced by the current building. The building was originally owned by Albert Marty and remained a Marty family holding until 1967 when it was sold to John Kroh. It was then leased to the Ozark National Life Insurance Co.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the west; the Federal Court Building is located to the north; a church is located to the east; a surface parking lot and commercial buildings are located to the south.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The first story was modernized in 1958. The second story, with a rusticated stone finish, is fenestrated with Chicago-style windows; keystones were placed over these windows. A simple denticulated cornice runs below the third story windows. The upper floors are faced in brick and are fenestrated with double hung windows. Ornate cartouches are placed between the 11th story windows, and decorative terra cotta panels are placed between the 12th floor windows. A modillioned cornice runs between the 11th and 12th stories. An elaborate denticulated overhanging cornice with paired brackets tops the building.

Contractor/builder/craftsman: ?
Developer:

The Grand Avenue Methodist Church stood on this corner from 1870 to 1909. The church was razed in 1909 and the congregation, with borrowed money, elected to build this office building and a new church, adjacent to the east. Rental from this property was conceived as a way of advancing the cause of Methodism.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the north and west; a parking facility is located to the south; a surface parking lot is to the east.

19. ADDITIONAL PHYSICAL DESCRIPTION:
In 1968 the first story of the main facade was remodelled. A 6.5 foot set-back was created and concrete posts were used to support the upper floors. Panels of precast pebble aggregate concrete slabs were used as a signage strip above these posts. Three pilasters with a lozenge pattern and capitals divide the building into two bays and unite the 2nd through 4th stories. Each of these stories features a different type of keystone decoration for the windows. A dentil cornice projects beneath the parapet wall.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1905-06; 1968 remod
Architect/engineer/designer: Smith and Rea; Voskanp & Sleazak (remod)
Contractor/builder/craftsman: George L. Brown; Hiram Elliott Const. Co. (remod)
Developer:
This building was constructed for and named after J.H. Beckham, a retired grocer. One of the earliest tenants was the Kansas City Gas Co.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located at all sides; a surface parking lot is also located to the east.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The south end of the main facade, facing east, has three, three story piers that serve to visually join this structure to the adjacent building. To the north of this, at ground level, are the garage entrances. The upper portion is veneered in limestone. The sixth story is fenestrated with Chicago style windows utilizing casement rather than double-hung windows on the sides. The seventh floor (a 1971 addition) is faced in precast concrete panels containing narrow vertical window spaces.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1946-47; 1971 add

Architect/engineer/designer: Keene and Simpson, Monroe & Lefebvre (add)
Contractor/builder/craftsman: Long Construction Co.; Jesse Hastings Const. Co. (add)
Developer:

This parking garage was built to serve the adjacent building to the south. The 1971 addition was primarily to provide space for expansion of the cafeteria and for an electronic data processing center. Architects for the addition were Monroe and Lefebvre; contractor was the Jesse Hastings Construction Co.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the south and west; to the east is a parking structure; to the north is a surface lot and commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces west and is distinguished by six Doric columns which rise through the 2nd story. The 2nd story windows of the south and west facades are covered with decorative metal grills. A decorated frieze runs above this. Above the frieze is a series of windows divided by pilasters. The upper stories are fenestrated by paired, fixed windows. Two low relief sculptural panels mark the corners of the Grand Avenue facade. The building rises to a height of 305 feet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1920; 1986 rehab

Architect/engineer/designer: Graham, Anderson, Probst & White
Contractor/builder/craftsman: George Fuller Construction Co.
Developer: Federal Reserve Bank of K.C. (rehab)

When the Federal Reserve Banks were created by an act of Congress in 1913, local bankers believed Kansas City was too small to be selected for one of the sites. William Rockhill Nelson, publisher of the Kansas City Star, spearheaded the successful drive to get one of the twelve banks located here. Thus, Missouri is the only state to have two Federal Reserve Banks. The bank was first headed by J.Z. Miller, Jr. For two years he also operated a Co-operative grocery out of the building as a way to attack the high cost of living. This building represented the only accretion of office space since the construction was halted by WWI. In 1986 12,000 sq. ft. of the building was rehabilitated, by the Federal Reserve Bank, at a cost of approx. $2.1 million.

This building is located in the CBD. Commercial buildings are located to the south, east and west; a parking garage/commercial building is located to the south.

19. ADDITIONAL PHYSICAL DESCRIPTION:
Greek detail is used in monumental ornamental pails. There is an imposing entrance in the form of a Greek colonade infilled with fixed multi-paned windows. Double-hung sash is the predominant window type. The 12th story is contained within a frieze band and is capped with a shallow cornice decorated with widely spaced modillions. The cornice is lined with alternating pairs of large and small modillions and is capped with scalloped moldings.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1906

Architect/engineer/designer: Howe, Holt & Cutler
Contractor/builder/craftsman: 
Developer:

Original owner of the building, R.A. Long, was an early Kansas City lumberman. His residence now houses the Kansas City Museum. "Intricacies of the private electric light system, with generators in the basement and descriptions of thermostats and plunged type" elevators indicate the marvel of electricity and its use in the skyscraper.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located at each side.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The original seven stories of this building are separated from a ten story addition of 1930 by a dentilled string course. The paired windows in the lower portion have stone sills and lintels and are taller than the windows in the upper portion. The windows in the upper portion have stone sills only. The top of the building is decorated with terra cotta ornamentation, including anthemion finials. A light court was recessed into the north wall of the 1930 addition. An extensive remodelling project was undertaken in 1959 which consisted of rebuilding the first two floors and installing glass panels that extend from the ground to the top of the second floor. These are set in porcelain black aluminum. Architects for the project were Welton Becket and Assoc. (Los Angeles) and Fullerton and McCamis (Kansas City). The contractor was the Estrin Construction Co.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1909-10; 1930 add; 1959 remod

Architect/engineer/designer: A.B. Anderson; Hoit, Price and Barnes (add); Welton Becket & Associates, and Fullerton and McCa

Contractor/builder/craftsman: William F. Moll; Estrin Const. Co.(remod)

Developer:

Originally known as the Gates Building, this structure was built as an investment by J.C. Gates, Kansas City shoe manufacturer and philanthropist. Plans for the $160,000 building originally called for five stories, but this was probably increased to 7 stories during the period of construction. During the early years of the building, a deluxe pool hall operated in the basement. Tenants included a surgical supply firm and offices for Southwestern Bell Telephone. In 1926 the building was purchased by the Dierks Lumber Co. and became known as the Dierks Bldg. The building was sold to the Home Savings Association in 1954, who owned the building for approx. 30 years. The first and second stories were rebuilt in 1959.

The main facade faces west and is divided into six bays by brick piers that extend from the third to the seventh story. A pair of double hung sash windows is located in each bay. Each pier is topped with a decorative ornament. A string course divides the seventh and eighth stories. Decorative panels separate the eighth story windows. A slightly projecting cornice crowns the building. The first two stories were remodelled in 1955 and were refaced in Carnelian granite. The building contains 85,000 square feet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1913; 1935 remod
Architect/engineer/designer: John McKechnie; Voskamp & Sleza (remod)
Contractor/builder/craftsman: ?
Developer:
This building was erected by the Guaranty Building Co., whose president was Lloyd Medes. To distinguish it from another Lathrop building at 117 W. 6th St., it was originally named the Gardiner Lathrop Bldg. Gardiner Lathrop, a Chicago lawyer, was a member of the firm from which the company obtained a 99 year lease on the site. The first floor and mezzanine were used for shops; the upper floors were utilized as office space. Architects for the modernization were Voscamp and Sleza.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This structure is located in the CBD. Commercial buildings are located to the north, south and west; surface parking and commercial buildings are located to the east.

19. ADDITIONAL PHYSICAL DESCRIPTION:
A series of shops are located along the East 11th Street facade, set within an arcade created by the structural concrete piers. The parking levels, which occupy the 3rd through 7th stories, have open-air bays across their entire lengths.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1968
Architect/engineer/designer: Albert Yanda; Keene, Simpson & Murphy
Contractor/builder/craftsman: Sharp Brothers
Developer:
The construction of this low-price, quick-turn over parking facility was a joint venture of several downtown firms and businessmen. The shops and parking for 600 cars cost over $3 million. The old Kansas City Star Building was razed for this structure. The original design has been altered by the removal of the metal screening strips.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the central business district. To the south and west are commercial buildings; to the east and north are parking structures.

19. ADDITIONAL PHYSICAL DESCRIPTION:
Ornamental glazed terra cotta covers the north and west facades. One-over-one sash fenestrate floors 3 through 16; casement windows fenestrate the second floor, while display windows are found on the first floor. There are three entrances on the west and two on the north. The south and east faces are covered in buff and red colored brick. Styled floral and faunal motifs accent the north and west facades.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1929

Architect/engineer/designer: Charles A. Smith and George McIntyre
Contractor/builder/craftsman: Friedstein & Co.
Developer:

The Professional Building is significant as one of Kansas City’s earliest examples of Art Deco architecture, and as the first building in Kansas City especially designed and equipped to serve as office space for dentist and doctors. This building has been vacant for several years and is threatened by its own deterioration and CBD redevelopment.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located on all sides.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The building rests on a three story granite base. Above this, and separated by a decorative string course, the building is faced with light brick broken by spandrels of dark terra cotta. This, and a series of set-backs, creates a strong vertical emphasis. A stylized reed decoration draws attention to the entrance doors on the east and north facades. A similar decoration is used at the top of each set-back. Large glass display windows are located on the north and east facades. The building rises to a height of 352 feet and has 150,000 square feet.

20. HISTORY AND SIGNIFICANCE: Date of Construction: 1929-31
Architect/engineer/designer: Graham, Anderson, Probst and White
Contractor/builder/craftsman: Thompson-Sterrett
Developer:
This building is located on the site once owned by pioneer merchant and farmer, Thomas A. Smart. In 1866 he gave the property to his daughter when she married John Bryant. The building was erected by their heirs as an investment. The building is connected with political boss, Tom Pendergast, as the concrete was supplied by the Ready-Mix Concrete Co., owned by Pendergast.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north and west are commercial buildings; to the east is a surface parking lot; to the south is a parking garage.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building has been remodelled and altered several times. C.F. Ettwein was commissioned for a $5,000 remodelling job in 1912. In 1921 Tarbett and Gornall were the architects for a two story plus mezzanine addition to the original 4 story structure. In 1929, when a new facade was added to the building, Charles A. Smith was selected as the architect. The ironwork which creates the window framing for the entire facade; is surrounded by a terra cotta frame. A cornice lined with evenly spaced modillions caps the facade.

20. HISTORY AND SIGNIFICANCE: Date of Construction: 1905; 1921
Architect/engineer/designer: Wilder & Wight
Contractor/builder/craftsman: George L. Brown & Son
Developer:
The original owner of this building was Anna Mason. The original tenant was the Carl Hoffman Music Co. By 1922 the building was the site of the William Rock Flower Co. and was called the Rock Building.

This building is located in the CBD. Commercial buildings are located to the north and west; to the east is a parking garage; to the south is a surface parking lot.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The pedimented entrance door is flanked by fluted, ionic columns which extend to a denticulated cornice located between the third and fourth stories. These columns and the end piers divide the facade into three bays. The bays of the first three stories are recessed slightly. A flag pole protrudes from the base of the centrally located second story window. The end bays of the first floor have rounded pediment windows. The windows of the 4th through 6th stories are paired. The one-over-one assemblage of the 4th and 5th stories have decorative spandrels above them. The 6th floor windows have a quilloche band below them. Another denticulated cornice is located above the 6th story window and creates a base for the pediment at the top of the facade. This pediment has an anthemion band across the top.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1920; 1986 rehab

Architect/engineer/designer: Keene and Simpson
Contractor/builder/craftsman: Fogel Construction Co.
Developer: Roosevelt Holdings

The Gate City National bank was founded in 1906 and opened for business August 1 of that year in the Argyle Building. They built and moved to this building in 1920, occupying the first floor and leasing the upper floors to the Women’s City Club and various commercial firms. Through a merger, the bank became known as the Traders Gate City National Bank in 1930. In 1949 the name was shortened to Traders National Bank. 30,000 sq.ft. of the building was rehabilitated in 1988 by Roosevelt Holdings at a cost of approx. $1.2 million.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the north and south; a park area is located to the west; a surface parking lot is located to the east.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The facade of this parking garage is marked by structural steel columns and precast concrete panels. The garage is linked to the Mercantile Bank and Trust Company by a bridge at the 4th level. The ground level has shops with plate glass windows and the second story has a wind screen in place between the piers. The left end of the facade has fluted concrete panels which house the stairwell.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1974
Contractor/builder/craftsman: Martin-Salsbury Inc.
Developer:

This parking facility was built as an adjunct to the Mercantile Bank and Trust Co. at 1101 Walnut.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north is a parking garage; to the west is a park area; to the south and east are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this corner building faces east. The first floor piers have capitals and relief designs of urns and floral swags. As the piers rise they define the bays, fenestrated with Chicago style windows. In 1984 a modernization of the facades was removed and the building's original appearance was reinstated. The architects for this renovation were in the firm Gastinger Rees Walker. The building contains 90,000 square feet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1924; 1986 rehab

Architect/engineer/designer: Frederick McIlvain; Gastinger Rees Walker (rehab)
Contractor/builder/craftsman: Bickel Co.; A.L. Huber and Son (rehab)
Developer: Palace Assoc. Ltd. Partnership (rehab)

The Palace Clothing Co. occupied this building from December, 1924 until the firm closed in 1964. The Palace Co. was founded in Topeka, KS in 1888 by Henry Guettel and Henry Auerbach. The following year a store was opened in Kansas City. This $600,000 structure was built so it could be converted into offices or a hotel. The building was vacant between 1964 and 1971. In 1972 it was remodelled into offices. In 1985, 93,000 sq.ft. of the building was rehabilitated at a cost of approx. $3.5 million. Project architects were Gastinger Rees and Walker; contractor was A.L. Huber and Son.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the south and west are commercial buildings; to the east is a parking garage; to the north is a surface parking lot.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The north wall and a portion of the east wall are brick. A grey tone marble interspersed with porcelained steel panels, is used on the west and south facades up to the fifth floor. Above the fifth floor steel panels form a curtain wall, with aluminum mullions separating the four pane bands of windows that fill each of the three bays on the east and west facades and the seven bays of the south facing elevation. Adjoining the building on the east is a multi-level parking facility and a drive-in bank. The parking facility has a 136 foot frontage on McGee. The building is 274 feet tall and has 250,000 square feet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1960-62; 1983 rehab
Architect/engineer/designer: Thomas Stanley
Contractor/builder/craftsman: Beck-Truckee Co.
Developer: Traders Bank (rehab)

This building represents the first office building constructed in this portion of downtown in 25 years. Organized in 1900, the bank occupied 1111 Grand Ave., after a merger with the Gate City Bank, until the construction of this building was complete. In 1983, a rehabilitation of 210,000 sq.ft. of the building was conducted at a cost of approx. $3 million. The project received a Commitment to Kansas City Award from the Kansas City Corporation for Industrial Development in 1984.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north, east and west are commercial buildings; to the south is a new parking garage.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The original plans allowed for retail shops on the ground floor of the two primary facades. During the past 50 years, the first floor display windows and entryways have been altered so that little remains of the symmetrical design originally created by the architect. The rest of the building survives essentially unchanged. This building is an example of a rich and sophisticated Renaissance Revival style. The elliptically arcuated fenestration of the second story, a focal decorative element, is separated by pilasters and ornamented Corinthian colonnettes. Blind trefoil arcading is carried across the primary facades just below a terminating parapet, decorated with a series of quatrefoil reliefs.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1923; 1988 rehab
Architect/engineer/designer: Frederick Gunn
Contractor/builder/craftsman: Swenson Construction Co.
Developer: Copaken, White and Blitt (rehab)
This building is named for Frederick G. Bonfils who constructed it in 1935. In 1895 Bonfils and his associate, Harry Tammen purchased the Denver Post. In a partnership which lasted until Tammen’s death in 1924, they turned a floundering daily into the preeminent newspaper of the Rocky Mountain Region. A portion of the building was rehabilitated as part of the Galleria/Block 111, 353 Urban Redevelopment Project.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to all sides.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main entrance is at the south end of the west facade. The first floor of this corner building has been veneered in pebble aggregate. The 2nd and 3rd floors and the piers of the corner and end bays are of stone, as is the parapet wall. The remaining spandrels below the windows of the 5th through 8th floors are brick. The second floor windows are set in low arches. Each has a large central pane flanked by narrow side lights and surmounted by transoms. The spandrels above the 3rd story windows consist of three narrow arches. Small attached pendants are centrally located on each facade, running from the middle of the second floor to the middle of the fourth floor. Identical pendants line the parapet wall in a symmetrical pattern and are separated by fluted panels.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1929-30

Architect/engineer/designer: McKecknie and Trask
Contractor/builder/craftsman: O. Concannon

This was the last multi-floor office structure to be completed before the Depression deflated construction. Original plans called for a 17 story building, but were scaled down to an eight story building. Realtor Warren Wolfe headed the corporation responsible for construction of the office. Some modernization and remodeling took place in 1966, which accounts for the first floor wall surface. The building has been vacant for some time and is threatened by its own deterioration and CBD redevelopment.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the north, south and east; a parking garage is located to the west.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main entrance is centrally located and flanked by cast iron pilasters. A similar pilaster is at the south end of the facade. These pilasters were locally manufactured by the Armourdale Iron Foundry. The building is faced in sandstone. Narrow piers with ornate capitals extend from the second to the fourth floor. A string course runs below the fifth floor. The building was restored after fire in 1920, but the ornate cornice was lost.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1886
Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:
This building was erected as an investment property by Sigmund Z. Shutte, a pioneer lumberman and founder of the Schutte Lumber Co. The first floor was originally leased to H.M. Elliot and Co., dealers in mantels. Fifty-four office rooms were located in floors two through five. The building was restored after a fire in 1920, but the ornate concrete was lost. The building is in poor condition and is threatened by its own deterioration.

This building is located in the CBD. Commercial buildings are located to the north and south; surface parking lots are located to the east; a parking garage is located to the west.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The facade of this two story building has been altered. Plate glass windows dominate the first floor, with the entrance at the south end of the facade. The upper story has a marble veneer, punctuated by a row of transom windows.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1885 c.
Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:

This building has been used by a number of commercial firms over the years. The earliest tenant was probably Albert Alger, a gasoline stove salesman. The building is threatened by its close proximity to badly deteriorated and vacant properties.

**Note:** The document contains a survey form for a historic resource in Kansas City, detailing various aspects such as address, property name, owner's information, integrity, use, number of stories, type of construction, roof type, cladding material, foundation material, and porches. It also includes a photo file ID and roll/frame number for reference.
18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located at each side; surface parking is also located to the south.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This multi-level parking facility uses narrow piers and concrete slabs increase parking capacity within less vertical space. The individual levels (9) are wrapped with steel retaining rails. Each intersection of pier and parking level is faced with a small brick panel. The main entrance is framed with a steel post and beam surround, and has brick veneered piers.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1988

Architect/engineer/designer: HNTB Architects
Contractor/builder/craftsman: ?
Developer: Copaken, White and Blitt

This garage was built as part of the Galleria/Block 111 353 Urban Redevelopment Project. Developers for the project were Copaken, White and Blitt. The Jenkins Building, located on the west facade of the parking structure, was partially demolished and integrated into the west facade.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north are commercial buildings; to the south and east are surface parking lots; to the west is a parking structure.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This narrow commercial building features a terra cotta facade and a slightly projected terra cotta cornice. Display windows and a recessed entrance mark the first floor. The windows of the 3rd and 4th floors are divided into paired vertical strips and surmounted by transoms. An ornamental shield with a "W" is located at the center of the parapet wall.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1917; 1922
Architect/engineer/designer: J.C. Sunerland; Sunderland & Besecke 1922
Contractor/builder/craftsman: ?
Developer:
This was originally a two-story hardware store. In 1922 the owners wanted to enlarge it, but it was not structurally strong enough. The architects solved the problem by inserting steel columns into the brick walls and an independent frame was created for the third and fourth floors. The windows and storefront are not original.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the south and west; surface parking lots are located to the north and east.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The first floor facade has been slightly recessed and altered. A strip of four fixed windows runs across the second floor. The facade is faced with terra cotta. A small terra cotta cornice projects above the second floor windows and a shaped parapet wall runs above this. A name plate is centrally located in the parapet wall.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1916

Architect/engineer/designer: Madorie & Bridsall
Contractor/builder/craftsman: P.J. Morley

Developer:

One of the first tenants of this building was the Edward Light Co. The building was named after its owner John Doherty. In 1925 the building was used as a furniture store. In 1969 it was used as a branch post office.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the north, south and west; surface parking lots are located to the east.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The building was described in 1909 as having a face of "cream white brick, made from potter's clay, with white cut-stone trimmings." The first story, with its display windows, appears to be altered. A cornice projects above the second floor windows and a parapet rises above this. A name plate is centered in the parapet. The second story windows are one-over-one sash with transoms.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1909

Architect/engineer/designer: Shepard and Farrar
Contractor/builder/craftsman: Fogel and Son Const. Co.
Developer:
This building was constructed for Daniel D. Swearingen, a livestock dealer, probably as an investment property. One of the first tenants was the Hohman-Wolfsen Furniture and Carpet Co.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the north, south and east; surface parking lots are located to the west.

19. ADDITIONAL PHYSICAL DESCRIPTION:
Two store fronts occupy the first floor of the facade, with plate glass windows flanking the centrally located, recessed entrances. Brick piers divide the 2nd and 3rd floors into 3 bays. The middle bay has paired one-over-one windows with stone sills. The two outer bays have Chicago-style windows with stone sills. The area above the second story affects an entablature with a rectilinear pattern in the frieze and a highly detailed metal cornice at the top of the facade.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1902

Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:

This commercial building was constructed for W.E. Swentzel, a Kansas City financial agent. One of the earliest uses of the building was as a display room for the Crane Co. a plumbing supply firm. The building has been joined to the buildings at either side.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the north; surface parking lots are located to the south, west and east.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The entrance is centrally located and recessed. A metal screen has been placed between the first and second floors. The 2nd through 5th floors are fenestrated with one-over-one windows. Each row has a common sill and lintel. There are six evenly spaced bays. There are transom lights occupying the sixth floor of the facade. A projecting stone belt course separates the 5th and 6th floors, and the facade is topped with a terra cotta cornice.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1887 c.
Architect/engineer/designer: ??
Contractor/builder/craftsman: ??
Developer:

This building was erected by Walter Holmes, president of the Metropolitan Street Railway Co. and later head of the Pioneer Trust Co. Among the early tenants were the D.A. Moor Transfer and Storage Co., the harness manufacturing firm of Fred Weber and Sons, and the Hoquard Chair and Furniture Co. The building was damaged by a fire in 1905. In the 1920s the building was used by Kansas City Power and Light.

   Date:
18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north, south and east are surface parking lots; to the west is the plaza of the State Office Building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main entrance of this building faces north. The square tower has a pyramidal copper roof. The brick arched aisles, surrounded by a gallery above, extends around the sides and end of the nave. A central feature, the Marble High Altar, is one of two in the U.S. made in Italy and decorated by the Endolithic process of painting on marble. The chapel was renovated and redecorated and the tower rebuilt.

20. HISTORY AND SIGNIFICANCE:          Date of Construction: 1897-88

Architect/engineer/designer: William Hasley Wood

Contractor/builder/craftsman: ?

Developer:

Its tower, form and design, in contrast to the modern office buildings in the area draw attention to St. Mary's Church as the only historic building remaining in this quadrant of the inner-city. The church has survived a complete change of neighborhood.

21. Register Status: Individually eligible

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, located near the western boundary of the CBD. To the north is the River Club; to the west is Case Park and the bluffs which overlook the Central Industrial District; to the south are additional multi-family dwellings; and to the east is vacant land.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this ten story, buff brick apartment building faces west. The entry is marked by an arched awning which extends from beneath the flat roof of the entry area. The fenestration consists of one-over-one double-hung windows in rectangular frames. The flat facades and lack of detail are typical of modernist trends of the period.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1950
Contractor/builder/craftsman: Winn-Santer Construction Co.

Developer:

This apartment building is one of three built in 1949-50 as part of the 353 Riversite development plan. The project was issued a Certificate of Full Compliance. The buildings reflect an early response to urban flight by attempting to attract residents back into the downtown neighborhood; they do not reflect the housing stock historically located in Quality Hill.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this Italianate house faces west and contains a single leaf door placed on the north bay of the first story. The fenestration consists of one-over-one sash windows placed in segmental arched openings. The windows and door on the west facade are surmounted by molded window hoods typical of the Italianate style. The roof line entablature is ornamented with paired brackets and dentils.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1876
Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer: Quality Hill Partnership

This house was the residence of C.A. Brockett, who first organized the Kansas City Frear Stone and Pipe Manufacturing Co., which later became the Brockett Cement Co. Before Portland cement began manufacturing in the mid-west, the firm pioneered in the handling of American Hydraulics, German & English portlands. Mr. Brockett was an active civic leader, belonging to local clubs and served on the city council. He was also the proprietor of Brockett's Patent Well Auger. This building is one of the few original residences left in the Quality Hill neighborhood.

This building is located in the Quality Hill neighborhood, near the southwestern boundary of the CBD. To the north are vacant lots and residential buildings; to the south are vacant lots and one residence; to the west are stables; and to the east are vacant lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces west and is dominated by a one-story porch with brick, piers and pedestals. Entry with sidelight is located at the northern end of the facade. Fenestration consists of one-over-one double-hung windows with stone lintels and sills. Fenestration on secondary elevations is segmentally arched. The parapet is embellished with a corbel table and stone coping.

20. HISTORY AND SIGNIFICANCE: Date of Construction: 1907
Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:
The first owner was Martin Kane, a local laborer. The residence is one of the few original buildings remaining in the Quality Hill neighborhood.

21. Register Status: Contributes to district

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the southwestern boundary of the CBD. To the north are vacant lots; to the south is a commercial building; to the west is the interstate; and to the east are vacant lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This complex is composed of three false front portions, a 1890 single story brick structure, a 1902 brick addition and 1907 addition. The structures are joined by a recessed, brick bay, with tile pent roof, at the north, and a flush, concrete block bay at the south. The wall surface, aside from the concrete bay, is roughly stuccoed. Entrance are composed of hinged double doors. The parapets are stepped. Fenestration consists of rectangular sash windows within segmentally arched openings; windows in the concrete block bay are rectangular.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1890; 1902, 1907 adds.

Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:

The 1890 structure was erected by the Yates Ice Company. In 1902 and 1907 two brick additions were erected by the Jones Dry Goods Company. The false front building type was common in 19th century communities in the Kansas City region; there are only a few remaining false front buildings in the CBD. The structure is one of the few original buildings left in the Quality Hill neighborhood.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the southwestern boundary of the CBD. To the north are commercial buildings; to the south are vacant lots; to the west is the interstate; and to the east are vacant lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces east and is divided into three bays. The main entry is located in the central bay. The end bays have been filled with concrete block and have a central shaft of glass block. The parapet at the center bay is raised and contains a stone panel containing "CRANE CO."; the parapet areas above the original openings are corbeled and have stone coping. Stylized, rectangular ornamentation pronounces the bay divisions and interups the coping.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1911
Architect/engineer/designer: Louis Curtiss
Contractor/builder/craftsman: Flanagan Brothers
Developer:
The structure was erected in 1911, by the Crane Company. The Crane Company specialized in handling valves, fittings, pipe, fabricated piping, and plumbing and heating materials. The structure was designed by local architect Louis Curtiss, fluent in both residential and commercial designs. Although the design is considered to be "tapestry brick," the stone detailing, ultimately changing the look of the facade, reflects the attention to detail and the progressive nature of Curtiss' work. The building is one of the few original buildings left in the Quality Hill neighborhood.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north, south and west are surface parking lots; to the east is the Old Public Library.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces east and has brick pilasters rising the full height of the building. Art Deco details appear at the base and top of these pilasters. Framing the entire facade is a brick and stone surround of alternating projecting and recessed bricks. The parapet wall is stepped upward toward the center. Similar brick and stone details can be found at its summit. The main entrance is recessed and contains rectangular stone panels. Each bay, rising from the second to sixth floor, has been infilled with corrugated metal sheets. The entire building has been painted grey.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1920-21

Architect/engineer/designer: Smith, Rea & Lovitt
Contractor/builder/craftsman: John Neil and Son
Developer:

This is the third of three additions to the original Irving-Pitt Manufacturing Co. at 8th and Locust, now demolished. During the construction of the Federal Building at 8th and Grand in the late 1930s, this building served as temporary office space for the Post Office and Federal Courts. The building is currently threatened by the Federal Court House Development.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Surface parking lots are located to the north; a small bar is located to the south; vacant buildings are located to the west; a gas station is located to the east.

19. ADDITIONAL PHYSICAL DESCRIPTION:
Oriented eastward, this building has three bays. The facade has had many alterations including the bricking in of the second story windows. The plate glass windows of the northern bay have been in-filled with textured concrete block. The first bay of the first floor has plate glass windows intact, the second bay has plate glass windows, a garage entrance, and a standard doorway. Each of the bays on the first story has intact transoms. The lintels of the second story windows are intact as are the brick panels above them. The facade terminates with a shaped parapet with stone coping.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1925
Architect/engineer/designer: Hans Von Unwerth, engineer
Contractor/builder/craftsman: George E. Green Const. Co.
Developer:
The original owner was Etta Scott, who leased the building to W.R. Kinn. It is among the oldest parking garages in the CBD. The 190 car garage featured an innovation in its "staggered" floor design. In order to conserve floor space this design utilized slanting floors and balconies. This building is threatened by its own deterioration and the Federal Court House Development Project.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD; to the east and west are surface parking lots; to the north is a vacant lot; to the south is a commercial building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building has tripartite windows on the first floor, as well as a Greek Revival porch with doric columns and a denticulated cornice. The second story balcony runs the entire width of the building. The third story balcony is shallower and just over half as wide. Each of the openings in the 2nd and 3rd stories has a voussoir with keystone. There is a denticulated string course between the 2nd and 3rd floors as well as just above the 3rd floor openings. There is a brick panel just below the denticulated and modillioned cornice which terminates the facade.

20. HISTORY AND SIGNIFICANCE: Date of Construction: 1882
Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:
This residence was probably constructed by realtor, Collins McNutt. One of the early occupants (between 1884 and 1888) was Emily J. Critchlow. The building is threatened by the Federal Court House Development Project and the condition of the surrounding property.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the east and west are surface parking lots; to the north is a converted residential building; to the south is a high-rise apartment building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces east and has been altered, although the original display windows have been rehabilitated in recent years. There is a recessed entrance in the north store front and a flush entrance in the south store front. The second and third floors have sliding glass windows topped with surrounds supported by 4 ancone sills. Just above the third story windows is a denticulated cornice. A symmetrical parapet with keystones terminates the facade. The original building had an unusual feature in that it supplied indoor parking for 16 customers. The entrance was from the alley behind the building.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1926

Contractor/builder/craftsman: James E. Taylor
Developer:

The Midwest Wallpaper Co., the original tenant was owned by C.A. Timmons. In the 1940s the building was the location of the Kansas City School of Photography; in the early 1950s it became the Kansas City Engraving and Color Plate Co. The building is threatened by the Federal Court House Development Plan and the neglect of the surrounding properties.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north is a commercial building; to the south and west are surface parking lots; to the east is a vacant hotel.

19. ADDITIONAL PHYSICAL DESCRIPTION:
Fronting Locust to the east, this building has a terra cotta faced 1st story with segmented arches. A double doorway in the center has two filled gothic arches. Three grotesques above the second story support the canopy above the entrance with chains. A small vertical terra cotta band spans six of the seven upper stories. The top story has terra cotta spandrel panels, and brickwork gothic arches set into the wall above. The facade terminates in a cavetto cornice. Each window of the 3rd through 7th stories has stone sills.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1925
Architect/engineer/designer: William J. Koch
Contractor/builder/craftsman: ?
Developer:
In 1959 this 153 unit hotel was purchased by the Catholic Diocese and converted into housing for aged and retired men, operating under the names of Mercy Manor Hotel and later, the Montabaur Club Hotel. In the early 1970s the building was purchased by the Housing Authority of Kansas City and used for office space and low-income housing. The building is threatened by the Federal Court House Development Project.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north, south and east are surface parking lots. To the west is a residential building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade fronts Locust to the west. The first floor is faced in terra cotta and has a modernized canopy supported by chains anchored in vertical terra cotta bands. These bands separate the building into six bays. The first floor windows have segmental arches with modillion keystones. The four central bays are fenestrated with one-over-one windows; the corner bays are fenestrated with paired one-over-one windows. Between the seventh and eighth stories is a terra cotta cornice which acts as a sill for the eighth story windows. The four central bays of this floor have transoms and share an arched terra cotta surround. Above is a low-pitched gable parapet with elaborate coping.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1925
Architect/engineer/designer: William J. Koch
Contractor/builder/craftsman: Fisher Building Co.
Developer:
The building originally contained 172 rooms and suites, a lobby, and ballroom. Soon after completion it was purchased by Frank Hunleth, president of a St. Louis Music company as an investment. The building has been vacant for several years and is threatened by its own neglect, encroaching parking lots, and development.

This building is located in the CBD. To the north and east are parking areas; to the west is City Hall; to the south is Police Headquarters.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The walls of this building feature varied textures. Principle entrances are located on the north and south facades. Narrow, rectangular windows fenestrate the building. The central portion of both the north and south facades is slightly recessed, and features a smooth concrete finish. The east and west facades, and a band around the top of the building feature a textured concrete finish. Projecting ribs of concrete project beneath the band and have the same finish. There are fixed windows between each of these ribs.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1971-73
Contractor/builder/craftsman: Universal Construction Co.
Developer:
This building was constructed to consolidate the operation of the Municipal Court which had been meeting in various locations. City Bonds for the construction were approved in 1965. Various design and construction related delays occurred. Construction finally began in 1971 and the facility began to be used in January, 1974. Final construction costs was $4.4 million.

This building is located in the CBD. Government buildings are located to the north, south and west; surface parking is located to the east.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The west (main) and south facades are faced with stone; the north and east facades are faced with brick. The building is fenestrated with casement windows set in metal frames. The west facade windows of stories 4 through 7 are slightly recessed, forming vertical strips with metal panels separating the windows. A clock is centrally located at the roof line. A basement garage entrance is located on East 12th Street. Bold geometric motifs adorn the building below the eighth story. Vertical ribbing highlights the cornice, and stylized fixtures flank the central, two story entrance.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1938
Architect/engineer/designer: Wight & Wight
Contractor/builder/craftsman: J.E. Dunn Construction Co.
Developer:
This city structure was financed by the 1931 Bond Act. It was designed as part of a civic center and to harmonize with the nearby City Hall and Jackson County Courthouse Annex. Two large courtrooms on the fifth floor were used for municipal court until a new court building was constructed in 1973.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main entrance is located on East 13th Street. The north and east facades are fenestrated with Chicago style windows. A string course between the first and second stories, as well as one above the sixth story, feature Sullivanesque motifs. A connection above the alley joins this building to 1301 Oak Street. When built, the building was advertised as having no internal partitions, so that whole floors could be leased.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1914-15
Architect/engineer/designer: J.C. Sunderland
Contractor/builder/craftsman: Harvey Stiver
Developer: William Pickett

This building was constructed as an investment property by J.C. Merry, one-time city councilman and founder of the Merry Optical Co. Various commercial firms have occupied the building, including its architect, J.C. Sunderland. In 1947, the building was purchased by the Red Cross. In 1984, 47,000 sq.ft. of the building was rehabilitated by William Pickett at a cost of approx. $3.8 million.

The original portion of this building was designed to be compatible with the nearby City Hall and County Court House. A string course runs below the 2nd story windows. Piers unite the 2nd, 3rd, and 4th story windows. Metal panels are located beneath the 2nd and 3rd story windows. A floral string course runs beneath the slightly set back 5th story windows.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1935; 1949 add; 1974 add
Architect/engineer/designer: Keene and Simpson
Contractor/builder/craftsman: Swenson Construction Co.
Developer:
A thirteen year effort by virtually every women’s organization in the city, especially the Women’s City Club, resulted in the construction of this facility. Their aim was to separate the handling of the problems of delinquent children from the criminal procedure. After sitting vacant for several years, the building was revamped c. 1974 to serve as a community correction center with office space, court rooms, and a minimum security detention facility. The building was designed to be compatible with Wight and Wights government buildings to the north. A three story addition was added in 1949; an addition at the east end of the building dates from 1974.

This building is located near the northern border of the CBD. The interstate is to the north; to the south and west are commercial buildings with parking structures; surface lots, parking garage and apartment building are to the east.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this structure faces west. An enclosed bridge over 7th street attaches the two structures. The first floor has various treatments and has been altered to provide parking entries, restaurants and retail space. The building has buff brick walls with metal spandrels between the upper story windows.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1958; 1961 add; 1964 add
Architect/engineer/designer: Voscamp and Slezak
Developer:
This downtown motel was constructed on Urban Renewal ground and opened in 1958 with 102 rooms. The original cost was $1.25 million. In 1961 a 40 unit expansion was completed. In 1964 a 102 room addition extended the building south to 8th St, built by S. Patti Const. Co. A three story pedestrian bridge over 7th St. connects the two structures. The Humboldt Building formerly occupied the site of the north addition.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This structure is located in the north end of the CBD. To the east is a motel; to the north and west are surface parking lots; to the south is a commercial building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The parking garage began as a two-level, 324x126 foot structure in 1959. In 1961 a three-level, 175x146 foot addition was erected. Further additions in 1963 and 1964 expanded the capacity of the garage to 890 cars. The main entrance to the garage is off Main street. The concrete walls of the structure are unadorned except for decorative concrete blocks.

20. HISTORY AND SIGNIFICANCE:
Architect/engineer/designer: Keene, Simpson and Murphy Architects
Contractor/builder/craftsman: Frank Quinlan Const. Co.
Developer: Downtown Redevelopment Corp.

This parking garage was a project of the Downtown Redevelopment Corporation. It began as a surface parking lot and by a series of additions reached its current configuration.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located near the north edge of the CBD. To the north and south are parking garages; to the east is a motel; to the west are surface parking lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces east. The building has four walls of reflective glass and a brick base, visible below street level. The entry is central and recessed. A brick covered courtyard is in front of the building. At the north, a covered walkway connects this building to the adjacent parking facility.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1972-73

Architect/engineer/designer: Helmut, Obata and Kassabaum
Contractor/builder/craftsman: Winn-Senter Construction Co.
Developer: Downtown Redevelopment Corp.

This 200,000 sq. ft. building was designed by nationally prominent architects, HOK. Local architects assisting on the project were Keene, Simpson & Murphy. The building was a project of the Downtown Redevelopment Corp. The Corporation was established in 1952 to remove a five block area referred to as “skid row.” This was the sixth new building erected by the Corporation.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located toward the north end of the CBD. Commercial buildings are located to the north, south, east and west. A pedestrian bridge crosses above 9th Street to connect this building to the building to the south.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces west. The first floor is sheathed in marble; four levels of parking are located above. The office tower appears in two portions at different heights. The towers are composed of aluminum panels and fixed windows; aluminum strips run vertically every few feet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1975

Architect/engineer/designer: Keene, Simpson, and Murphy
Contractor/builder/craftsman: Winn-Senter Construction Co.
Developer: Downtown Redevelopment Corp., Tower Prop.

This building was constructed as part of a Downtown Redevelopment Corporation Plan at a cost of $5 million. The principal tenant of the building was American Telephone and Telegraph. This was one of the first downtown construction projects after extensive razing by the Urban Renewal program. At the time of construction it was the largest private private office structure in the downtown area, with a square footage of 170,000. The building was rehabilitated in 1989 at a cost of $4 million.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:

This building is located in the CBD. The building joins a parking garage on the north; to the east and west are commercial buildings; to the south is a parking garage.

19. ADDITIONAL PHYSICAL DESCRIPTION:

The main facade of this building faces east. It is constructed of pre-cast concrete forms. The slightly recessed entrance is approached by a walkway that passes over a sunken garden area. The entrance is flanked by two cylindrical forms, topped with skylights that extend the height of the building. On either side of these are fixed, triple windows of tinted glass that also extend the height of the building. Similar windows are on the south facade, recessed behind the projecting cubes of the corners of the building.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1976-77

Architect/engineer/designer: William F. Fullerton
Contractor/builder/craftsman: Fogel Construction Co.
Developer:

The Merchants Bank, originally at 5th and Walnut, was organized on July 12, 1916. The name was changed to Merchants-Produce Bank when it merged with the Produce Exchange Bank.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the north, east and west. A surface parking lot is located to the south.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces east. The exterior of the building consists of pre-cast concrete panels with windows recessed in beveled openings. The top portion of the building is unfenestrated, creating a parapet-like wall. The second story is recessed behind concrete piers. A six story continuation of the building to the north consists of office space on the first two floors and four parking levels above this. A two-story connection to the west unites this building with the First National Bank.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1966-69
Architect/engineer/designer: Charles Luckman, Los Angeles
Contractor/builder/craftsman: Winn-Senter Const. Co.
Developer: Robert Ingrahm and Assoc.

The construction of this $14 million building was sponsored by Robert P. Ingram and Assoc. on a site cleared by the Urban Renewal Program. Seven months after opening, the 272,000 sq. ft. building was 72% occupied. In 1974 the building was purchased by the Prudential Life Insurance Co. The Victor Building was razed for this structure.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is surrounded by commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces west. The first two floors above street level, slightly recessed, are enclosed by glass and metal. Precast stone panels provide the framework for a repetitive geometric pattern of glass at the upper floors. The building is set back from the street 25 feet to allow for a terrace and a sunken garden. The building contains approximately 542,000 sq. ft.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1962-65

Architect/engineer/designer: Keene, Simpson and Murphy Architects
Contractor/builder/craftsman: Henry Beck Builders (Dallas)
Developer: Commerce Trust Co.

This was the first locally designed tall building since the completion of City Hall. At the time of its construction it was Missouri's largest private office building. The project was undertaken by the Commerce Trust Co., assisted by Urban Renewal.

This building is surrounded by commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces west and the main entry to the garage is located on the south. A remodeling project in 1966 resulted in recessing the Main Street facade behind a series of piers. The first floors of the 10th Street and Main Street facades are veneered in marble. The second through fourth floors are faced in concrete and are fenestrated with narrow strips of hinged windows. The upper floors are hidden behind a metal screen that projects beyond the top of the building.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1940; 1966 remod

Architect/engineer/designer: Keene and Simpson Architects (remod)
Contractor/builder/craftsman: S. Patti Construction Co.; Hiram Elliot Const. Co. (remod)
Developer:

A Katz Drug Store occupied the first floor retail space of this building in 1950 and was touted as the "world's largest downtown drugstore." After the 1966 remodeling, it was the city's first drugstore to have an escalator. The remodeling was designed by Keene, Simpson and Murphy and the Hiram Elliot Construction Co.

This building is located in the CBD. Commercial buildings are located to the south, east and west. A surface parking lot is located to the north.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces east. This store extends through the block providing frontage on the east and west sides. The primary entry is at the south end of the east facade and is recessed. Above the entry is an elevated pedestrian walkway which connects the building to the Petticoat Building and the Town Pavilion. A panel of red tile extends above the entry to the roof line, while the remainder of the facade is veneered in buff brick. Display windows occupy the remainder of the first floor. The west facade has a secondary entry and loading docks. It is veneered with a metal panel above the entrance and buff brick. The building contains 435,000 sq. ft.

20. HISTORY AND SIGNIFICANCE:
 Date of Construction: 1949; 1987 renov
Architect/engineer/designer: Kivett & Meyers
Contractor/builder/craftsman: Winn-Senter Construction Co.
Developer: Copaken, White & Blitt (renov)

The John Taylor Dry Goods Company located at this site in 1881 and expanded over the years to include frontage on both Main and Baltimore. In 1915 the company erected a new six story building on Main. In 1947 the building was purchased by R.H. Macy and Co. In 1949 the square footage of the building was tripled in an expansion program. Only the structural skeleton and foundation of the old John Taylor Building were used. The building was renovated for Dillard's Dept. Store in 1987. Developers were Copaken, White and Blitt. The renovation cost approx.$3.5 million and covered 200,000 sq. ft. of retail space. The building is now vacant.

The main facade of this building faces east. Entry occurs in the central bay. The lower levels, which had been drastically altered, have been returned to an appropriate configuration of storefronts. The upper levels of the building are glazed brick and are fenestrated with bands of three windows. The top floor is separated from the rest of the building by a narrow, projecting cornice and decorative swags which cap the bays of the lower levels. The cornice is has exaggerated dentils and finials above the short parapet wall.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1914
Contractor/builder/craftsman: A.F. Beyers, rehab.
Developer: Ameritas, Atlanta, GA

The building is significant due to its design by Root and Siemens. The structure is also significant as having been an anchor of the retail district of the CBD. Due to demolitions, the retail district is now virtually extinct. The building was rehabilitated by Ameritas Corp out of Atlanta, GA., a national restoration specialty corporation, in 1983-84. A.F Beyers was the general contractor for the rehab., and PBNA Architects served as the rehab. architects.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located near the center of the CBD. Commercial buildings are located at all sides; the building is integrated into the AT&T Town Pavilion.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces west. The facade is faced with terra cotta and is distinguished by a profusion of classical and original ornamentation, including decorative surrounds, egg-and-dart molding, cartouches and a projecting modillioned cornice. The upper floors are fenestrated with paired double-hung windows. The 11th floor, divided from the lower levels by a simple cornice, was added to the building in 1920. In 1932 the building was connected to a building to the east which was demolished.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1913; 1920 add; 1985-87 rehab
Architect/engineer/designer: John McKecknie, orig.; HNTB (rehab)
Contractor/builder/craftsman: George W. Huggins; J.E. Dunn (rehab)
Developer: Copaken, White and Blitt (rehab)

Harzfeld's, a specialty store for women's and children's clothing, was started in Kansas City in 1891 by Seig. Harzfeld. The building was constructed by the Deardorff estate and leased to Harzfeld's. Harzfeld's later purchased the building. The building is significant for its association with the retail district of the CBD; due to demolitions, however, the district is virtually extinct. This building, along with the Boley Building, was rehabilitated c.1985-87 as part of the Galleria/Block 93 353 Urban Redevelopment Project. Project architects were HNTB Architects; contractor was J.E. Dunn Construction Co.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located near the center of the CBD. The building is surrounded by commercial buildings; park area is located across the street toward the southern end of the east side.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This new, post-modern, commercial/retail building occupies a city block and incorporates two existing buildings. The building is accessible at street level on all four facades and by an elevated walkways on three facades. The tower rises from the center of the building's base. The tower is characterized by green reflective glass and an octagonal cupola. The tower has a central, granite-faced bay with gabled parapets on each side. The base of the building is three stories composed of granite, glass and chrome. The first two floors are glass and are recessed behind granite columns. The building contains 330,000 sq.ft. of office space and 190,000 sq.ft. of retail space.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1985-87

Architect/engineer/designer: HNTB Architects
Contractor/builder/craftsman: J.E. Dunn Construction Co.
Developer: Copaken, White and Blitt

This building is the result of the Galleria/Block 93, 353 Urban Redevelopment Project. The project was developed by Copaken, White and Blitt in 1984. The project architects were HNTB Architects. The project cost approx. $155 million and included the renovation of the the Boley and Harzfeld Buildings.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the east and north are commercial buildings; to the east is a parking garage. To the south are surface parking lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The original building featured a veneer of white enameled brick and Chicago style windows. In 1956 the building was rebuilt around the old structure. The recessed corner entrance was enlarged and is now marked by various wall treatments. The walls were faced with Mancato grey stone and Kasota pink stone over a granite base. Display windows are located at the first level.

20. HISTORY AND SIGNIFICANCE:
Architect/engineer/designer: Wm. Fullerton; Voscamp & Sleazak (rehab)
Contractor/builder/craftsman: ?
Developer:
The Jones Store business began in Kansas City in 1895 and located at 12th and Main in 1899 after a fire destroyed their store at 5th and Main. They constructed a new building in 1901 and remodeled it to its present appearance in 1956. The construction was done in such a way that retail activities were not curtailed. Jones had an early policy of handling close-out merchandise, seconds, and irregulars. The company utilized several novel merchandising techniques. They operated a grocery store on wheels and in 1918 established an office in Paris to expedite gifts for U.S. Soldiers serving in France. The company also operated a vacation farm for the benefit of their women employees.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north and west, beyond the Midland Office building, are high rise buildings; to the east are surface parking lots; to the south is a vacant commercial building, a parking lot and garage.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces east. Entry, at the northern bay, is marked by a four story, arched window over the marquee. The street level has store fronts with transoms; second level has single pane windows with transoms; the top two stories are rusticated. The third through fifth stories have two-over-two windows, separated by Ionic and stylized pilasters. A Mansard roof encloses the top floor and is recessed behind the parapet wall.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1926-27; 1989 rehab

Contractor/builder/craftsman: Boaz-Kiel Construction Co.
Developer: Lowes Theater Co.; AMC Theaters (rehab)

Erected as part of the Midland Complex, the Midland Theater reflects the opulence of theater design during the 1920s. The theater at the time of its completion was the third largest in the United States. It introduced the cantilevered loge and contained the most extensive application of ornamental plasterwork of any theater in the country. In 1989, 72,000 sq.ft. of the building were renovated by AMC Theaters at a cost of approx. $5 million.

This parking garage is located in the CBD. To the east and south are surface parking lots; to the north is the Midland Complex; to the west is a vacant commercial building and a surface parking lot.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces east. The first floor contains altered store fronts. The garage entrances are located in the northern portion of the facade and are marked by glazed terra cotta panels presented in a gothic-like manner. The upper stories have rectangular openings with screens. Terra cotta ornamentation is also used for the top story and parapet; the parapet is raised above the entry at the north facade.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1928

Architect/engineer/designer: Charles A. Smith; George McIntyre, eng.
Contractor/builder/craftsman: S. Patti Construction Co.
Developer:

This building was built at a cost of $300,000. Space was provided for 800 cars. The structure was one of the early garages owned by Parking Systems, Inc. Harry Rubin was President of the company that formed in 1923. The building won a third place award for new downtown construction from the Business District League in 1928. It is one of the few, historic parking garages left in the CBD.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north and south are commercial buildings; to the east and west are surface parking lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces west and is divided into three bays. The entry is recessed and is flanked by display windows. Brick piers divide the facade into three bays. The end bays contain three one-over-one double-hung windows and the central bay contains a pair. A narrow stone cornice, supported by modillions, is located at the base of the parapet wall.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1908

Architect/engineer/designer: John McKechnie
Contractor/builder/craftsman: Henry M. Green

Developer:
This building was constructed for R.L. Winter, a realtor. One of the earliest tenants was the Brunswick-Balke-Collender Co., billiard table manufacturers. In 1922 the building was sold to the Boston Ground Rent Trust; the billiard company remained in the building. This building was designed by locally prominent architect, John McKechnie.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This theater is located in the CBD. To the north and east are surface parking lots; to the north is the interstate; to the west is an adjacent parking garage.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The focal point of the building is the elaborate corner entrance, topped with a gold tiled dome. Store fronts line the facade (now covered), while the second floor contains Chicago-style windows. The third floor is set back, veneered with buff brick and carries a pant roof of green tile. A floral string course runs below the second floor roof line.

20. HISTORY AND SIGNIFICANCE:
When this $1 million theater, part of the Orpheum Theater Circuit, was erected in 1921, its 3,000 seats gave it the second largest capacity in the city. It was originally used for vaudeville shows as well as motion pictures. During its first year of operation it averaged 4,000 customers a day. Popular features were a nursery and playroom in the basement. The Mainstreet Theater ceased operations in 1939. In 1949 the name was changed to RKO Missouri and it reopened after remodeling. In 1960 it underwent three months of renovation and opened with a seating capacity of 1,200 at a ceremony presided by director Otto Preminger. The theater has been vacant for several years and has become the target of numerous development schemes, none of which have reached fruition.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north and east are surface parking lots; to the west is the Empire Theater; and to the south is the interstate.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces west. The 60,000 sq.ft. building was designed to carry a fifth floor. Its irregular, angular lines are softened by a glass front that opens onto a two-story lobby. A second entry is located at the northeast corner. The exterior of the reinforced concrete structure features contrasting textures of flat, sand blasted concrete and rough, vertically fluted concrete.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1966-67

Architect/engineer/designer: Shaughnessy, Bower & Grimaldi
Contractor/builder/craftsman: S.R. Brun Construction Co.
Developer:

One of several government buildings constructed in the downtown area in the 1960s. Architecturally significant for its use of texture and plastic molding.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located at the northern edge of the CBD. To the north, south and east are surface parking lots; commercial buildings are located to the west.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building fronts both McGee and Oak Streets. The Oak Street facade has a garage entrance at its north end. The building is fenestrated with multi-paned hinged windows. The stepped parapet has stone coping. The McGee facade has entrances on the north and south ends, as well as a door just off center.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1925
Architect/engineer/designer: John Marra
Contractor/builder/craftsman: Patti-Moore Construction Co.
Developer:
The original owner of the building was Albert DeMayo who also operated a drug store from the building. It was probably named the Elk Garage because of its close proximity to the Elk Club at the northwest corner of 7th and Grand.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north are surface parking lots and a historic hotel; to the east are commercial buildings and a parking garage; to the west is a parking garage and surface parking lots; to the south are surface parking lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This structure has frontage on four streets; the main facade is on McGee. Concrete piers divide the building into bays and provide a strong vertical emphasis. Broad segmental arched windows unite the first and second floors. A decorative concrete parapet terminates the building. The southwest corner of the building was remodelled in 1972. A 16 foot setback was created to provide an arcade. Fenestration for the building is one-over-one windows. The Oak Street facade has a central clock tower with no structure built behind its upper floors.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1928-30
Architect/engineer/designer: Wight and Wight
Contractor/builder/craftsman: Thompson Starrett Co.
Developer:

This building was constructed as a multi-use complex that included a four story parking garage, a 7 story office building, a bus concourse and terminal, and a 10 story hotel of 400 rooms. Radio WHB operated from the hotel from 1954 until the hotel closed in 1968. In 1972 the hotel was converted into housing for the elderly. The office contains 38,000 sq. ft.; the garage handles 400 garages.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north is the Federal Courts Building; to the west is the Federal Reserve Bank; to the east is a residential/parking complex; to the south are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building is faced with marble panels with vertical slit windows of dark grey solar glass. The facade projects at the second floor level. The building is connected to the Federal Reserve Bank on the west by an underground passage. Three floors underground service various banking departments. The garage entrances front McGee Street. The grill work was designed to be compatible with that of the bank structure.

20. HISTORY AND SIGNIFICANCE:  
Date of Construction: 1966  
Architect/engineer/designer: Kivett and Meyers  
Contractor/builder/craftsman: ?  
Developer:  
The Reliance Building was razed to make way for this parking addition to the Federal Reserve Bank.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the east and west; parking structures are located to the north and south.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This simple structure is two stories high and has a corner entrance. The plate glass windows that were once visible, have been covered with panels. The secondary entrance located on the McGee facade, has a security gate. The building is constructed of blonde brick. The parking structure which occupies the 1008 McGee address was built at the same time and surrounds the corner structure. There are two above ground parking levels including the roof. The ground level has screens covering the 4 bays. One of the central bays serves as the entrance and there is another entrance off of East 10th Street.

This building is located in the CBD. Surface parking lots are located to the east; to the north and south are commercial buildings; to the west is a parking garage.

19. ADDITIONAL PHYSICAL DESCRIPTION:
Brick piers, outlined in stone, divide the facade into five bays. Five shops are at street level, where display windows are topped with transom lights. Each bay of the top three floors has triple, double-hung windows. Stone ornament forms a flush pediment above the 4th floor windows and a decorative treatment of the parapet wall. A stone name plate is centrally located in the parapet wall.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1917
Architect/engineer/designer: S.E. Edwards
Contractor/builder/craftsman: Martin Carroll Const. Co.
Developer:
In 1916 veteran Kansas City physician Dr. LeRoy Dibble, deeded vacant land on McGee to Iowa's Grinnel College. His wife Martha Dibble was an 1867 graduate of the school. He previously planned to leave his estate to Kansas City but became disgusted with civic affairs in which he perceived as a "lack of public spirit." The gift of Grinnel was for the purpose of establishing scholarships. Grinnel College erected the building the following year, naming it after Doctor Dibble. Numerous commercial firms have utilized the building. For many years it housed Dr. John Brock's optical plant. Later it was used by affiliated laboratories.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north and east are commercial buildings; to the west is a parking garage; to the south is a surface parking lot.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The verticality of this building is stressed by the slightly projecting piers that divide it into three bays. This is further emphasized by the set-back at the seventh floor level. The upper floors are trimmed with terra cotta ornamentation. Fenestration of the front facade is one-over-one sash. On the south facade, glass block surrounds two hinged single-pane windows. At the seventh floor a two-story tower terminates the building.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1924-25

Architect/engineer/designer: Frederick McIlvain
Contractor/builder/craftsman: ??
Developer:

The Burnap Building was constructed in Kansas City in 1878 and became home to one of the largest stationery and office supply houses in the U.S. When the firm moved from 104 West 10th Street to this building in 1925 it became known as Burnap-Meyers, Inc. During the Second World War, the building was used as a military canteen and dormitory, operated by the Salvation Army. In 1945 the building was acquired by the Methodist Publishing House. In 1960 the building was purchased by Continental Central Realty. In 1961 the Union Bus Depot to the south of the building was razed and plans were announced for the construction of a 30 story building on the site. By 1964 it was decided that conditions did not warrant the construction of the new building. Instead the ground to the south became a surface parking lot and a bus loading area was attached to the southern end of the building. Leon Maslan served as architect for this project. The building won second place in the Business District League's awards for outstanding raw downtown structures erected in 1925.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north is a parking structure; to the south is a surface lot; to the east and west are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The garage entrance is centrally located on McGee Street. Unadorned brick piers separate the structure into irregular bays and stress the verticality of the building. The building is fenestrated with one-over-one double hung windows. In the northern three bays of the east facade these windows are in groups of three. Each bay along the remainder of the east facade, and along the north facade, has two windows. A repeating curvilinear motif is found in the terra cotta string course between the first and second stories; Sullivanesque motifs adorn the second story lintels; and rectilinear and zig-zag patterns ornament the parapet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1930
Architect/engineer/designer: George McIntyre
Contractor/builder/craftsmen: S. Patti Construction Co.
Developer:
The Kupper Hotel was razed to make room for this 1,000 car garage. The upper stories and two stories below street level are utilized for parking. Store fronts along the first story have been used for a variety of commercial concerns. This building was constructed as an auxiliary for the Professional Building, completed the previous year. The buildings were connected by an underground passage. The building was constructed by Parking System Inc. and was considered a "daring venture" to undertake during the Depression years.

19. ADDITIONAL PHYSICAL DESCRIPTION:

The Louis Curtiss Studio Building has three stories and a full basement. It has a concrete frame reinforced with brick and concrete block masonry on the north and south sides. The east window wall, the main facade, is an early, glass-curtain wall. The first and second stories, as well as the second and third, are divided horizontally by spandrels ornamented with bands of red and cream tiles in a zig-zag pattern. The parapet wall has a modillioned cornice. The first floor store fronts have been modified. The original terra cotta facing of the cornice is intact.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1908-09

Architect/engineer/designer: Louis S. Curtiss
Contractor/builder/craftsman: 
Developer: 

The Louis Curtiss Studio Building is significant as an early example of reinforced concrete and glass curtain wall architecture in the U.S.

This building is located in the CBD. To the north, south and west are surface parking lots; to the east is parking for the Library Building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The windowless north and south walls have been covered in stucco. The front facade is faced in brick. Stone is used as coping at the roof line, banding along the corners, and for cornerstones at each front corner. A large plate glass window fenestrates the facade. The entrance is just off center to the south.

20. HISTORY AND SIGNIFICANCE:  
Date of Construction: 1906 c.; 1921 add

Architect/engineer/designer: J.C. Sunderland (add)

Contractor/builder/craftsman: ?

Developer:

The LaVeine family had a residence on this property as early as 1881. It was probably replaced by this commercial building around 1906. A 50 foot rear extension was added in 1921 (architect, J.C. Sunderland). Various commercial firms have used this structure. The facade has been drastically altered from its original appearance.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Surface parking lots surround this building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The central portion of this building is recessed beneath a tile shed roof. A brick parapet wall projects behind this. Two garage doors are located within this recession. Another garage door is located on the south wall. At either end of the front facade are store fronts with tile, side-facing, high pitch, gable roofs with intersecting crossgables. The store fronts have stucco facades. The rear portion of the building has a flat roof interrupted by sawtooth projections containing ventilator windows. The store front gable ends terminate in parapetted gables.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1926; 1945 remod
Contractor/builder/craftsman: Swenson Construction Co.
Developer:
This building was originally constructed as a parking garage, with several store fronts along the main facade housing commercial firms. In 1945 the building was remodeled to serve as the Missouri Pacific Trailways Garage. The Patti Construction firm did the remodeling. The building is threatened by disrepair and encroaching surface parking lots.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the north and south; surface parking lots are located to the east and west.

19. ADDITIONAL PHYSICAL DESCRIPTION:
Brick piers, with a herringbone pattern, mark the ends of the symmetrical front facade. A centrally located garage door is flanked by two entry doors and plate glass windows. The windows are smaller than their original design and the transoms have been replaced with plywood panels. The shaped parapet is trimmed in stone.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1917
Architect/engineer/designer: A.H. Buckley
Developer:
This building has been used as a parking garage, an automobile repair shop and a storage area. This building is threatened by disrepair and encroaching surface parking lots.

This building is located in the CBD. To the south, are vacant social buildings, to the north and east are surface parking lots and parking garages; to the west are commercial buildings, some vacant.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The first story, consisting of plate glass windows flanking a central glass door, has been altered. A simple string course runs beneath the 2nd story. The 2nd through 7th stories have single windows with terra cotta surrounds in the outer bays; while the central bay contains triple windows with floral terra cotta detailing in the spandrels. A balustrade fronts the central bay of the 7th story. A string course runs between the 6th and 7th stories. The parapet wall has a dentilated cornice with modillions intermittantly spaced between the windows. A polychromatic terra cotta cartouche with the initial "S" is placed at the center of the parapet wall.

20. HISTORY AND SIGNIFICANCE: Date of Construction: 1912
Architect/engineer/designer: Charles M. Williams
Contractor.builder/craftsman: ?
Developer:
Two pioneer grocers, brothers William P. and David T. Snyder, parlayed their income from a small fruit stand to finance this $200,000 hotel project. The hotel, originally called the Snyderhof, opened in October, 1913. In 1956 it was purchased by the National Chain Hotel Company and the name was changed to Ka-Cee Hotel. Since 1978 the building has been used by the State penal system house prisoners in a work release program.

Date of Construction: 1912

Architect/engineer/designer: C.M. Williams
Contractor/builder/craftsman: ?
Developer:
The North American Realty and Improvement Co. spent approximately $40,000 to build the Broadmoor Hotel, a small downtown Hotel. The hotel continued in operation until c. 1940 when it became the DeVine Brothers Clinic. In 1956 it was remodeled and became a private hospital of 85 beds operating under the name, Downtown Hospital. This building is threatened by its own deterioration and Federal Court House Project.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north and west are commercial buildings; to the south is the old YMCA; to the east is a parking garage.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This brown and tan brick building has stone trim. Bands of brick and stone are applied to the 1st story. At the center of the stone, raised basement level is a pedimented doorway. The 1st story contains three sets of one-over-one, double hung windows with large transoms. A string course runs above the 1st story. The 2nd through 4th stories are fenestrated with paired, double-hung windows. The windows in the central bay have stone, quoined surrounds with modillioned keystones. A modillion cornice terminates the building.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1913
Architect/engineer/designer: Smith, Rea and Lovitt
Contractor/builder/craftsman: George L. Brown
Developer:
This annex to the YMCA was built to provide services for boys ages 10-16, too young for the YMCA program. Owned by the Charles E. Brown Realty Co., it was finally purchased by the YMCA in 1926. At that time it was used as a dormitory for out-of-town students. The building is currently threatened by its own deterioration as well as by the Federal Court House Development Project.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the east, west, north and south are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building is divided into three bays. The first floor of this building has an entrance off-center to the south; plate glass windows and transoms surround the entrance. The second floor is distinguished by french doors, which open onto small balconies with iron railings. The doors have segmental heads supported with ancones. Between the doors, in the central bay, are casement windows enclosed behind a single-pane storm window. A balustraded frieze runs between the second and third stories. The third story, added in 1923, is marked by tapestry brick work and double-hung windows set in terra cotta surrounds. Both the first and second stories are accented by cloth canopies.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1914; 1923 add

Architect/engineer/designer: Saylor & Seddon

Contractor/builder/craftsman: Alexander Kinghorn

Developer:

Hoover Brothers School Supplies was organized in 1900 by Alvin and Orves Hoover, two brothers from Paola, KS. The firm originally dealt only in kindergarten and art supplies, but later expanded to include all areas of educational training materials. The firm was headquartered at this location from 1914 to 1950.

This building is located in the CBD. Surface parking lots are located to the north and east; commercial buildings are located to the south and west.

19. ADDITIONAL PHYSICAL DESCRIPTION:

The facade of this building is divided into three bays. The entrance is centrally located and recessed. The first floor end bays have been filled with brick but retain their lintel detailing. The fenestration of the upper floors consists of large fixed panes in a three-over-three configuration. The sills of these windows are stone and have stone detailing. There is a bracketed cornice demarking the base of the shaped parapet wall, which has stone coping.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1913; 1974 c., alt

Henry Hoit

Contractor/builder/craftsman: ?

The first tenant of this building was the Automobile Club of Kansas City. The Director's office was located on the 2d floor. A large elevator at the rear of the building transported cars to the parking areas, which had a capacity of 125 automobiles. The front facade was drastically altered in 1974-76; however those alterations were removed and the building's original character restored.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:

This building is located in the CBD. Commercial buildings are located to the north and west; City Hall is located to the east; a surface parking lot is to the south.

19. ADDITIONAL PHYSICAL DESCRIPTION:

The original stone foundation of the Temple B’nai Jehudah is visible on the southern wall. The north and east facades have irregularly spaced display windows and entrances. A slightly projecting metal cornice separates the two floors of the building. The second floor is fenestrated with single panes of glass which replaced one-over-one windows. Stone lintels and sills mark these windows. The wall above the second story windows features projecting brick headers placed in a diamond pattern. Stone coping tops the roof line.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1927

Architect/engineer/designer: Hoit, Price and Barnes

Contractor/builder/craftsman: C.A. Doty & Son

Developer:

The B’Nai Jehudah Temple was erected on this site in 1884. The congregation grew and commercial buildings gradually surrounded the Temple. In 1906 it was sold to internationally known engineer J.A.L. Waddell and his son, realtor Leonard Waddell. The congregation met in temporary quarters while a new synagogue was built. The building began to be used commercially and the Salvation Army used the second floor auditorium for a while. Oak Street was widened in 1927, necessitating the removal of the front eight feet of the building. The south and west walls of the building were retained while the remainder of the building was rebuilt and leveled to 2 stories in height. Numerous commercial establishments have occupied the building in the ensuing years and altered the store fronts.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Surface parking lots are located to the north and south; City Hall is located to the east; an AT&T building is located to the west.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The facade was radically altered in 1956. The center entrance was removed and recessed entrances were placed at either end of the facade. The first story was then stuccoed in a half-timbered effect. Slender, colored glass windows in the shape of gothic arches, were located within the half-timbered treatments. The bracketed sill of the original second floor windows is still in place below the two double hung windows. A corbelled and modillioned cornice supports an area with two brick panels. Wood trim outlines the entire facade. A one story addition has been added to the rear of the building.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1929; 1956 alts
Architect/engineer/designer: Clifton B. Sloan
Contractor/builder/craftsman: J.E. Crosby
Developer:
This building was constructed for the A.P. Nichols Investment Co., and leased to Oswald Griner. Griner had been engaged in the engineering and architectural instrument and supply business in Kansas City since 1910. The building has been considerably altered from its original appearance.

Entrances are located on both the north and west sides. Large plate glass windows distinguish the first and second stories. The building is faced in ceramic tile. The third through seventh stories are fenestrated with paired windows enclosed in metal mesh. The building contains 34,000 square feet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1919; 1985 rehab
Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer: William Pickett

This building was erected by the Merry Investment Co., as was the building to the east (1300 Locust). The principal early tenant was the Mutual Oil Co. In the early 1960s the building was briefly occupied by the Puritan Compressed Gas Corp., a K.C. firm founded in 1913 that grew to national proportions. The company produced oxygen and medical gases. In 1985 William Pickett rehabilitated 43,000 sq.ft. of the building at a cost of $2.5 million.

*Photo of the Communication Workers of America building.*
18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north is the State Court of Appeals Building; to the south and east are surface parking lots; to the west are commercial buildings and surface lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building has undergone numerous alterations. This building was constructed as a one story structure in 1909 by the Taylor and Winn Construction Company. In 1950, the rear side walls were faced concrete block and the first floor windows were altered. In recent years the second story windows were replaced with fixed panes resembling those of the first floor. The entrance is centrally located and recessed. Bricks set in a soldier course form a panel above the second story windows.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1909; 1916 remod; 1950 alts

Architect/engineer/designer: Henry C. Smith (remod); Emil O. Bayerl (alts)

Contractor/builder/craftsman: Taylor & Winn Construction Co.; Walter Joyce (remod); H.H. Fox Const. Co. (alts)

Developer:

The original tenant of this building was the William Demster Auto Repair Service. In the 1920s it was occupied by the MacMahon Plumbing Co. It was constructed as a one story building in 1909 by the Taylor & Winn Construction Co. In anticipation of the widening of Oak, a portion of the front of the building was removed in 1926 and the second story erected. Architect for this remodeling was Henry C. Smith; contractor, Walter Joyce. In 1950 the building was again altered by architect, Emil O. Bayerl; contractor, H.H. Fox Construction Co.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north, south, east and west are surface parking lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building features a recessed entrance centered in the west facade. Brick piers divide the facade into 5 bays. Plate glass windows fenestrate the first story. Triple, 4-over-2 and 4-over-1 windows fenestrate the three central bays of the upper stories. Paired windows of various configurations fenestrate the corner bays. Panels of glass block are found under the first story windows, and transoms are located above these windows. Each of the upper windows has a stone sill. There is a stone coping at the roof line. A band of corbelled brick encircles the building below the cornice.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1903-04

Architect/engineer/designer: Shepard and Farrar
Contractor/builder/craftsman: Swenson Construction Co.

This building was constructed for the L.B. Price Mercantile Co. Over the years it has housed a variety of tenants including the Gray Advertising Co., the K.C. College of Commerce, and the Liberty Starch Company. The building is threatened by its own deterioration and encroaching parking lots.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the south and east is an interstate connector; to the north is a surface parking lot and a small restaurant; to the west are surface parking lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The terra cotta finish of the building was replaced by brick in 1950. Aluminum spandrels separate the windows in the lower section of the building. The building sits on a granite base. The first and second story windows of the north facade are united by a stone surround with an incised of granite inset. The same detail can be found on the west facade. The top eight floors have few windows; the corner bays and central bays are fenestrated in the same way as the lower floors.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1930; 1950, 1963, 1973, adds

Architect/engineer/designer: Hoit, Price and Barnes

Contractor/builder/craftsman: Swenson Construction Co. (1930, 1950); Universal Const. Co. (1963); J. E. Dunn Const. Co. (197

Developer:

When the Bell Telephone Co. built the original three-story long distance center, they planned for future expansions and projected a final 14 story building. The Swenson Construction Co. served as builders for the 1930 building and the 1950 addition of five floors; Universal Construction Co. built the 1963 eight-story wing addition; the J.E. Dunn Construction Co. built the 1973 eight-story addition.

KANSAS CITY HISTORIC RESOURCES
SURVEY FORM

Resource Number: cblchdtyf
18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the western boundary of the CBD. To the north are parking areas; to the south is a multi-family residential building; to the west is another high rise apartment building; and to the east are vacant apartment buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of the structure faces east and is distinguished by its flat, repetitive facade, typical of modern apartment buildings. The street level is recessed behind piers which help support the main body of the building. The street level wall is sheathed in small, multi-colored tiles, and has regular window openings. The rest of the facade is composed of a pattern of metal beams which divide the facade vertically, and casement windows which interrupt the walls of metal panels.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1957-58
Architect/engineer/designer: Kivett, Meyers & McCallum
Contractor/builder/craftsman: Winn-Santer Construction Co.
Developer:
This structure is one of several high-rise apartment buildings built in Quality Hill as part of the 353 West Terrace development plan (Ordinance No. 19678). The plan was developed to attract people back into the downtown neighborhood. The project was issued a Certificate of Full Compliance in May of 1960.

*Photo of the building*
18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the western boundary of the CBD. To the north is a parking area and an historic apartment house; to the south is a vacant historic residence; to the west is a historic residence; and to the east are new multi-family units.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this residence faces west and is distinguished by its molded window hoods and flat facade. Fenestration consists of one-over-one, segmentally arched, sash windows with stone sills and decorative hoods. Double door entry with segmentally arched transom occurs in the northern bay. A paneled cornice is located at the roof line. A projecting bay is located on the south facade. Design elements which originally made this building closer to a high style example of the Italianate (wrap-around porch, paired brackets, iron grillwork, decorative chimneys) were removed during the 1960s rehabilitation.

20. HISTORY AND SIGNIFICANCE:
Architect/engineer/designer:  
Contractor/builder/craftsman:  E.T. Allen, contractor
Developer:
This residence is significant in its relation to Major William Warner and the development of Quality Hill as an urban neighborhood. The house was listed individually on the National Register in 1977; a year later it was placed on the Register again as part of the Quality Hill Neighborhood Historic District. Warner was a city attorney in 1867, a circuit attorney in 1868, and was elected Mayor in 1870. He was later a U.S. District Attorney for the Western District of MO. Warner was appointed for a second time in 1900. He was elected to the U.S. House of Representative (1884-78), and in 1905 Warner was elected to the U.S. Senate serving two terms until 1911.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the western boundary of the CBD. To the north is a recently vacated lot and a rehabilitated historic residence; to the south is a historic residence; to the east is a vacant residence; and to the west are vacant lots and vacant historic residences.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces east and is characterized by Spanish architectural elements. The first floor has an enclosed, full-width porch with tile, pent roofs; porch openings have spiral columns and brackets. Fenestration on the second and third floors consists of six-over-one sash windows; paired windows are located at end bays and the central bay has single windows; the third floor windows are set with arched openings with decorative typanums, spiraled columns, and balconet. Parapet cornice appears to be molded and glazed. A passageway extending to the Blossom House (south) extends from the south facade.

20. HISTORY AND SIGNIFICANCE: Date of Construction: 1928
Architect/engineer/designer: Walter A. Besecke
Contractor/builder/craftsman: J.E. Dunn Construction Co.

This building was erected in 1928 by Philanthropist, William Volker, for the Girls Home Association. The Association was founded by W. Volker. The building is one of the few original buildings left in the Quality Hill neighborhood.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the western boundary of the CBD. To the north is a historic hotel; to the south is a rehabilitated historic building with new addition; to the east is a parking area; and to the west are vacant lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this residence faces east and is distinguished by its massiveness and attention to detail. It is a subtype of the Queen Anne, referred to as Patterned Masonry. A first story veranda with brick piers and wood freeze runs the length of the front facade. Fenestration consists of one-over-one sash windows, appearing individually, in pairs and in threes, with stone lintels and sills. The northern bay has a parapeted gable; adjacent to the south is a patterned brick chimney. A roof dormer is located to the left of the chimney. The cornice is a band of corbeled brick. The house features a patterned chimney on the south facade which is surrounded by a wall dormer at the attic story.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1888
Architect/engineer/designer: Van Brunt & Howe, Arch.
Contractor/builder/craftsman: Norcross Bros. (Worcester, MA)
Developer:
The building was erected in 1888 by Mrs. George Blossom (Elizabeth Allman), proprietor of the Blossom House Hotel, for her residence. In 1902, philanthropist William Volker purchased the building from the Blossom family. Volker renamed the residence, and the adjoining building to the west, the "Girls Association," a hotel for girls. Volker later donated the complex to the Kansas City Roman Catholic Diocese. The Blossom house was renovated in 1973 by Urban Architects as an office. The building was later purchased by the Quality Hill Partnership which has let it deteriorate to its current condition.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the western boundary of the CBD. To the north is a historic residence; to the south are vacant lots; to the west is a parking area; and to the east are apartment buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of the building faces east and has a centrally located, hip roof porch supported by brick piers. Fenestration consists of new, one-over-one sash windows; except for the windows located in the central bay, windows are located within segmentally arched openings. Hip roof dormers with flared eaves reflect the flares of the main roof. A new addition is attached to the west facade and extends to the south. The main facade of the addition also faces east and features a central projecting, gable-front bay. Entry occurs recessed at first level; balconies at second and third levels have double doors with flanking windows; the third level opening is segmentally arched. Single fixed windows are located at either side of the doorways. The bays at either side of projecting center have three fixed windows at each level. A courtyard is located in front and contains the Romanesque porch from the building on the site which was demolished.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1899
Architect/engineer/designer: George Mathews; Calcara Duffendack Foss, rehab.
Contractor/builder/craftsman: ?
Developer: DST Realty, rehab.

This building was erected in 1899 by E.W. Shields, Secretary and Treasurer of the Simonds Grain Co. It was originally occupied by Herbert D. Cutler, president of the Cutler & Neilson Paint and Color Co. The 1924 addition, built by Carl Bliss, was demolished and a new addition was constructed at the time of the building's rehabilitation.

This building is located in the Quality Hill neighborhood, near the western boundary of the CBD. To the north are vacant lots; to the south are vacant, derelict buildings; to the west are vacant lots; and to the east are vacant lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces east and is divided into three bays. Entries occur in central, recessed bay; single window openings are located above. The end bays have bands of three windows at the second story and a pair at the first story; all windows have stone lintels and sills. Two gable-front dormers are located at the attic story. The building has deteriorated to a derelict condition.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1886-87

Architect/engineer/designer: Henry E. Hill
Contractor/builder/craftsman: ?
Developer:
The structure was erected in 1886-87 by Rev. Timothy Hill, a local Presbyterian minister, for speculation. Earliest occupants were L.P. Davis and B. Stone Paul. The design is attributed to Henry E. Hill who was Reverend Hill's son and a prominent architect in Kansas City. In 1901 the structure became the Pennsylvania Hotel.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the western boundary of the CBD. To the north are vacant, derelict buildings; to the south and west are vacant lots; and to the east is a parking garage.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this church faces east and is dominated by a central tower which was shortened in 1925. In 1948 a one-story commercial addition was placed across the facade. The addition has a flat roof and multi-light windows; the entry is located centrally under a raised parapet. Pier buttresses divide the north and south facade into bays. Lancet window openings between the buttresses have been covered. The facade is embellished with stone string courses and brick corbeling. The sanctuary originally seated 700.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1885-87
Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:
A church for Kansas City’s small Swedish community was founded in 1870 and was the forerunner to this church. The land was purchased in 1882 and construction of the church basement was completed in 1885. The congregation worshipped in the basement until the building was completed. When the cornerstone was laid on August 22, 1886, the congregation numbered 200. This building is one of the few original buildings remaining in the Quality Hill neighborhood.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the western boundary of the CBD. To the north and east are vacant lots; to the south and west is the interstate.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this home faces east and is distinguished Queen Anne details. The facade is symmetrical flat which is uncommon for Queen Anne homes, however it falls under the sub-type of Tapestry Masonry due to its detailing more so than its massing. The front facade has a one-story, full-width, shed roof porch supported by brick piers. Fenestration consists of one-over-one windows with stone sills; three windows are located on the first floor and four on the second. The front-gable end has two windows with brick designs at either side. A denticulated cornice divides the attic story from the rest of the building. Paired brackets occur at gable returns. The secondary facades have two-story bays and patterned chimneys.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1886; 1976-77 renov.

Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer: Electrical Assoc., renov.

The building was erected in 1886 by John Conkey, a local dry goods merchant, for his residence. In 1903 the building became a boarding house under John Siemon. The Electrical Association renovated the building for their use in 1976-77. The home has been recently worked on and is currently used as an architectural office. The building is one of the few original buildings left in the Quality Hill neighborhood.

This building is located at the north end of the CBD. To the south is a high rise apartment building; to the west is a motel; to the north and east are surface parking lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces east and is divided into four bays. The focal point of the building is the second bay from the south which projects forward from the body and past the roof line of the building; the bay is ornamented with stone details. The first floor windows have been covered and garage entry is located in the second bay. Windows in the second bay are united by columns that form rounded arches with decorative typanums. The other bays contain rectangular openings separated by pilasters.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1891

Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:

This garage was originally a theater with a Moorish interior. It now provides parking for 350 cars. This theater was constructed by Kansas City theater men Melville Hudson and A. Judah, operating as Kansas City Amusement Association. The Midland Theater was razed for this building. Previously on the site was the cylorama of the Battle of Gettysburg. Opening night for the theater was October 3, 1891 and it continued operation as a legitimate theater until 1916. It was briefly converted for motion pictures between 1916-18, and then resumed live theater. Many famous theatrical personalities appeared on stage, including Ethel Barrymore, Maude Adams and Eddie Foy. It was converted into a parking garage in 1926.

This building is located in the CBD. Surface parking lots are located to the north and south; to the west is an apartment building; to the east is a parking facility.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces west and has undergone major alterations. The first floor doors and windows are recessed in beveled, concrete surrounds. The remaining wall surface has a metal veneer. Running between the first and second floor is a concrete panel and a strip of structural glass. The second floor windows are covered by metal panels. Four pilasters with ornate capitals divide the building into three bays. A corbelled cornice runs at the base of the parapet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1916
Architect/engineer/designer: Wight and Wight
Contractor/builder/craftsman: George A. Fuller Const. Co.
Developer:
The Midland Building was previously located on the site to the north of this building. In 1916 the first floor of the Midland was leased, and this building was constructed to consolidate various railway ticket offices (with the exception of Union Pacific). Although the building would be significant as a Wight and Wight design, the extreme nature of alterations have destroyed the integrity of the design.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces west and features concrete construction faced with galzed terra cotta. Chicago style windows provide ample fenestration. Decorative details include the articulated columns marking bays, the ornate cornice and decorative terra cotta Roman eagles at the corners of the building. The first floor was modernized, and later restored to its original character during its rehabilitation.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1904; 1984 rehab

Architect/engineer/designer: John McKecknie; Gould Evans (rehab)

Contractor/builder/craftsman: A.F. Byers and Co. (rehab)

Developer: Murfin Oil Co. (rehab)

This building is the first commercial building in Kansas City to be constructed with reinforced concrete. John McKecknie, a prominent Kansas City architect and designer of this building was a pioneer in this method of construction. The building was rehabilitated in 1984 by the Murfin Oil Co. The project cost approx. $4 million and covered 50,000 sq. ft. of office space. Architect Bob Berkebile assisted Gould Evans on the rehab plans.

This parking facility sits on a grade sloping to the west. An interior parking facility, constructed in 1938 by the Hiram Elliott Construction Company, is entered from the East 9th Street facade. This facade, veneered in brick, is fenestrated with multi-paned hinged windows. The roof or top level of parking has a retaining wall approximately 2 feet in height around its perimeter. The entrance to this top level faces Walnut and is surrounded by a rectangular iron frame.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1938; 1977 add
Architect/engineer/designer: ?
Developer:
The original structure on this property was a one-story garage, constructed in 1938 by the Hiram Elliot Const. Co. In 1959, the property was leased for parking by the Columbia Union Bank, once located across the street to the south. In 1977, a drive-in facility was added to the property with entry from Walnut. The J.E Dunn Const. Co. handled this project.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the south and west are parking garages; to the east of the Scarritt Building; to the south is a commercial building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The Scarritt arcade is a four story, steel frame structure connected to the Scarritt building by a tunnel running from the ground floor of the arcade to the sub-basement of the main building. The west (main) facade is symmetrical and is divided into three bays. The ground floor has a recessed triple entranceway flanked by two slightly narrower areas which enclose large show windows. Above the ground floor, the three main are subdivided into columns of one-over-one double-hung windows. The central bay contains three windows and the flanking bays have paired windows. A band of elaborate terra cotta ornamentation runs the width of the facade. The Arcade contains Sullivanesque Art Nouveau detailing.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1907

Architect/engineer/designer: Root and Seimens
Contractor/builder/craftsman: ?
Developer: Ameritas Inc.

The Scarritt Arcade is significant as the last example of skylit interior open wall design in Kansas City. The Arcade is an example of the Chicago School of architecture, particularly with the Sullivanesque ornamentation. Both the interior and exterior designs are of the same vernacular as the main Scarritt Building, also designed by the prominent architectural firm, Root and Siemens.

Date:
18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north, south and east are commercial buildings; to the west is a parking garage.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building contains 41,000 square feet. The first floor is veneered with ceramic tile, and a metal canopy crosses the primary facade. The 2nd and 3rd stories (except for the 3rd story corner bays) have a stone veneer. The central bays of the 2nd story are fenestrated with broad, arched windows. The 3rd through 11th stories and the south-facing facade of the 12th story are fenestrated with one-over-one double-hung windows. The brick piers that extend the height of the building terminate in terra cotta tabernacle forms. The roofline has castellate dentilia. The upper corners (approximately one and one-half stories) of the Walnut Street facade are set back at 45 degree angles.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1930; 1958 renov
Architect/engineer/designer: Albert Wiser; Linscott, Kiene & Haylett (renov)
Contractor/builder/craftsman: Keyser-Desett Const. Co. (IL); Chester Dean Const. Co. (renov)
Developer:
The Waltower Building Co., headed by Frank Dixon, was responsible for the construction of this office building. Even in its early years, while used primarily as office space for lawyers and insurance companies, low occupancy was a problem. In the early 1930s two government agencies leased space in the building, the bureaus of Prohibition and Immigration Services. The Ricksecker building formerly stood on this site. The 1958 modernization included the addition of the first story veneer and canopy.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. To the north is a vacant lot; to the south, east and west are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The facade is divided into two store fronts, faced with terra cotta. The only decorative feature is a cavetto molding across the lower parapet and an anthemion band below it, which surrounds the two store fronts.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1917; 1923 remod
Architect/engineer/designer: Greenebaum & Hardy; Moliveine (remod)
Contractor/builder/craftsman: Swenson Construction Co.
Developer:
In 1917 Margaret Ridge had a two-story theater constructed on this site. The theater was never financially successful, so in 1923 it was remodeled for commercial use. One of its first uses after remodeling was as the Doric Billiard Parlor. It was leased to the Demaree Stationery Co. for nearly 50 years.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located on all sides.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building is visually joined by its facade treatment to 917-19 Walnut to the south. Red granite veneers the first story of both buildings. The upper stories are veneered in terra cotta. The 2nd and 3rd story windows are rectangular, fixed panes set in aluminum frames. Metal spandrels are found above each window.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1956-58
Architect/engineer/designer: J.F. Lauck
Contractor/builder/craftsman: Winn-Senter Construction Co.
Developer:
The First Federal Savings and Loan Association erected this building and joined it to their existing headquarters to the south. The building cost $200,000. The firm was organized in 1934.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located at all sides.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The 1st floor appears altered by the application of marble veneer. The upper stories are divided into bays by slender colonettes, and are fenestrated by double-hung windows. Metal spandrels run above the openings on stories 3 through 6, and terra cotta spandrels separate the 2nd and 3rd story windows. Slender pilasters with tabernacle terminations divide the 2nd through 7th stories into three bays. Gothic terra cotta ornamentation and a floral frieze adorn the cornice.

20. HISTORY AND SIGNIFICANCE:
Architect/engineer/designer: Smith, Rea and Lovitt
Developer: Hadley/McHugh Partnership (rehab)

In 1891 Dr. Issac M. Ridge, a pioneer physician, erected a four story building on this site. That building burned in 1909 and was replaced by this building, completed in 1916. A wide variety of tenants have occupied the building, including doctors, lawyers, and investment firms. The building was originally connected to the New Ridge building on Main by an arcade that has since been demolished. In 1984, the building was rehabilitated by the Hadley/McHugh Partnership. The project cost approx. $1 million and included 54,000 sq. ft.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located on all sides of the building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The first floor of this building was modernized in 1954 at which time the two original granite columns which flanked the entrance were removed. Two synthetic columns were placed in their positions during a recent renovation. The symmetrical entryway is flanked by large plate glass windows set in aluminum frames. The original multi-pane window treatments of the 2nd and 3rd stories have been replaced by single panes in each opening. The 3rd story windows are arched, each with a single arched voussoir with keystones and dripstones. A shaped parapet tops the primary facade.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1910-11; 1954 renov
Architect/engineer/designer: Shepard and Farrar; Keene & Simpson (John T. Murphy, assoc.) renov
Contractor/builder/craftsman: H.L. Stevens and Co.
Developer:
The Missouri Savings Association Bank was founded in 1891 by Watt Webb and was originally located at 720 Delaware.

The first and second stories are veneered in stone. The 3rd through 12th stories are fenestrated with bands of 5 windows each. The transom areas of the two-over-two, double-hung windows have been filled with metal panels. A vaulted canopy has been installed in front of the entrance and above the store front. A curved parapet terminates the building and a decorative cartouche is placed at each corner.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1909; 1944 remod; 1986 rehab

Architect/engineer/designer: John McKecknie
Contractor/builder/craftsmen: Ferro-Concrete Construction Co
Developer: Roosevelt Holdings (rehab)

Construction of this building was announced in 1907 but did not commence until 1909. It was built for the owners of the Gloyd Lumber Co. Each of the floors was constructed as a loft with no interior columns interrupting the floor area. It was intended that firms such as manufacturing jewelers and tailors would lease the building. In 1944 the building was purchased by the Columbia National Bank. At this time the interior and 1st and 2nd stories of the exterior were remodeled. The bank occupied the building until 1970. In 1986, 60,000sq. ft. of the building was rehabilitated at a cost of approx. $3.3 million by Roosevelt Holdings.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the north, south and east; a parking/commercial building is located to the west.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade faces east. The centrally located entrance is recessed behind 3 two-story arches. A balustraded projection extends above the arches and is supported by ornate modillions. A second entrance, at the north end of the east facade is protected by a large metal canopy. A similar canopy extends over the entrance on the south facade. The first three stories are veneered in dark granite, while the upper stories are faced in a lighter colored stone. The upper stories are primarily fenestrated with paired, double-hung windows. The top story windows terminate in ornate arches. Between the 13th and 14th stories there is an ornate string course. The 16th story blends into the ornate, projecting modillioned cornice which caps the building.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1908
Architect/engineer/designer: Jarvis Hunt
Contractor/builder/craftsman: George A. Fuller Co.

The National Bank of Commerce was organized in 1865 as the Kansas City Savings and Loan Association. In 1882 the name was changed to the Bank of Commerce, and in 1887 to the National Bank of Commerce. In 1921 the bank merged with the Commerce Trust Co. The bank has occupied this site since 1898 when the present building replaced an earlier structure.

This building is located in the CBD. Commercial buildings are located on all sides; a passageway at the upper level connects this building to the building to the east.

19. ADDITIONAL PHYSICAL DESCRIPTION:
A recent renovation of the first story's south and west facades removed alterations made in 1971. The bays on the Walnut Street facade are separated by terra cotta pilasters and are capped by the original terra cotta frieze. The 2nd and 3rd story windows are united by a terra cotta surround with a decorative panel between the windows. The remainder of the fenestration consists primarily of paired, double-hung windows. A string course runs between the 8th story windows and the denticulated cornice.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1922
Architect/engineer/designer: Sunderland and Besecke
Developer:
The Kansas City Title and Trust Co., incorporated in 1915, was the first Missouri company established for the purpose of insuring titles to real estate. By 1954 the company was operating in 22 states. The Kansas City firm was purchased by the Chicago Title Co. in 1961. The firm occupied the building until 1971.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the north, south and east; a surface parking lot is located to the west.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This contemporary office building is sheathed in a light colored stone. Each story is fenestrated by bands of tinted glass windows which continue in an irregular pattern around all four facades; individual panes are separated by thin aluminum muntins. The first story has a colonade created by structural concrete piers located at major load bearing corners. The 17th story also has a colonade which wraps around all four facades; these columns appear to be steel. The windows are interrupted by the stone facing. The 18th story has an exaggerated corbel effect. The windows of the 18th story, centrally located on the north and south facades are minimal in area and are flanked by columns in a Greek revival form.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1984-86
Contractor/builder/craftsman: J.E. Dunn Construction Co.
Developer: Tower Redevelopment Corporation
This building was built by Commerce Bank at a cost of approx. $45 million. The building has 378,000 sq. ft of office space and 29,000 sq. ft. of retail space.

This building is located in the CBD. Commercial buildings are located to the north, east and west; a surface parking lot is located to the south.

19. ADDITIONAL PHYSICAL DESCRIPTION:
In 1955, an ornate terra cotta cornice was removed and the first floor was modernized. Two recessed entrances are located on the west facade. All windows are modern, fixed, and double glazed. The first story is faced in a stone veneer; the second through fourth stories are faced in terra cotta. The west facade is divided into three bays, with the second and third floors united by double piers topped with an ionic ornamentation. Panels of garland separate the second and third story windows.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1914; 1955 remod

Architect/engineer/designer: Frederick Gunn; Neville, Sharp, & Simon (remod)
Contractor/builder/craftsman: George Siedhoff; C.P. Huck (remod)
Developer:

This building was constructed for Frederick G. Bonfils of Denver, President of the National Newspaper Association. Numerous commercial firms have used the building including a cigar company, cafeteria, shoe store and real estate office. After leasing the 17,500 sq. ft. building for 10 years, the Sentenial Federal Savings and Loan Association purchased it in 1969.

This building is located in the CBD. Commercial buildings are located at all sides.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This multi-use 20 story building was constructed using techniques novel to Kansas City at the time. Heat-shielded exposed steel girders both frame and enclose the building. The building is supported by 5 massive steel columns and the elevator core. The weight of the building is transferred to the supports by steel space trusses. The steel support columns are 60 feet in height and are filled with an anti-freeze/ water mixture for fire protection. Mechanical equipment for the building is housed in the area immediately above the support columns. Moving stairs at the corner of the building site lead to a sunken exterior courtyard ringed with retail shops. The courtyard is eight feet below the sidewalk level. The north and south facades are divided into 5 bays. The fenestration consists of bands of six panes separated by steel support piers. Aluminum panels separate one floor's windows from the next.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1973-74
Contractor/builder/craftsman: ?
Developer:
This building was constructed at a cost of approx. $7 million. The first six floors are utilized by the Mercantile Bank and Trust Co. In 1933 the Mercantile Trust Co. merged with two banks to form the Mercantile Home Bank and Trust. In 1949 the name was shortened to Mercantile Bank and Trust. Before moving into this building, the firm was located at 1110 Walnut. The Altman Building formerly occupied the site of this building. The Kansas City architectural firm of Patty Berkibile Nelson Assoc. were also involved in the project.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the north, east and west; a park area is located to the south.

19. ADDITIONAL PHYSICAL DESCRIPTION:
Plate glass windows dominate the first floor, with the wall area surfaced in marble. Some modernizations have been removed. Stories 2 through 5 are fenestrated with five windows each, those on each end being slightly narrower in width. The windows are modern one-over-one sash with aluminum frames. Louvered exhaust screens have been placed in the fifth bay of the second story, replacing the lower half of the window, and the second bay of the third story, replacing the entire window. The main facade is faced with a light green terra cotta. A modillioned cornice runs the width of the west (main) facade. Four keystone-like decorations have been placed on the parapet wall.

20. HISTORY AND SIGNIFICANCE:

Date of Construction: 1912

Architect/engineer/designer: Smith, Rea and Lovitt
Contractor/builder/craftsman: Fogel & Son Construction Co.
Developer:

This building was erected for Kansas City businessman, Harry M. Evans. The Weber Meat Market was razed to make way for this structure. (Col. Robert VanHorn's residence was initially located on the site). It retained the name Evans Building until 1927 when it became known as the Myron Green Building. Evans was the first president of the Security National Bank and established the Harry Evans Children's Home (later known as Kansas City Cradle).

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial building are located to the north, south and west; a park area is located to the east.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The Boley Building is a six-story steel frame commercial building of the "semi- Art Nouveau" style, designed by Louis S. Curtiss, an outstanding Kansas City architect. The steel columns of the frame are withdrawn from the facade to effect cantilevered floors and curtain walls. The south facade is divided horizontally by five iron spandrels into six levels of continuous glass ribbon windows. The east facade is similar in design. The renovation of 1987 removed alterations of the previous 3 decades and returned some of the building's character. The terra cotta surface extends the height of the building and has detailed Art Nouveau features.

20. HISTORY AND SIGNIFICANCE: 
Date of Construction: 1909; 1987 renov
Architect/engineer/designer: Louis S. Curtiss; Calcara, Duffendack, Foss Manlove, Inc. (renov)
Contractor/builder/craftsman: J.E. Dunn Construction Co. (renov)
Developer: Copaken, White and Blitt (renov)

The Boley Building is significant for its structural system, as it was one of the first curtain wall buildings in the world; for the first time anywhere the use of rolled steel columns rather than columns built up in sections were used. The design is by Louis S. Curtiss, a prominent, local architect. In 1986-87 the building was rehabilitated as part of the AT&T Town Pavillion; project architects were Calcara, Duffendack, Foss Manlove Inc.; the contractors were J.E. Dunn Construction Co.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the CBD. Commercial buildings are located to the east and west; a park area is located to the north; a new parking garage is to the south.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This contemporary office building was constructed with a steel frame, sheathed in granite and glass. The granite separates each floor into bands and divides the building’s facades into bays of irregular height and width. The main entrance is located on the northwest corner and is recessed behind two supporting piers. Recessed windows are located within the twelve bays of the first four stories; the windows of the remaining stories are flush with the exterior walls. The 30th (top) story is recessed several feet and has a belt course of granite around its upper perimeter. On the north facade, a centrally located, hipped protrusion extends vertically from the 9th to the 29th story. A skywalk extends from the west facade to the building on the southwest corner of 12th Street and Walnut (1202 Walnut) at the second story level. Above the fourth story the corners are beveled.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1989-91

Architect/engineer/designer: HNTB
Contractor/builder/craftsman: ?
Developer: Copaken, White and Blitt

This building is the product of the Galleria/Block 111 353 Urban Redevelopment Project, one of several 353 projects in the immediate area. Developers were Copaken, White and Blitt. Designers were HNTB, who now have offices within the building.

This building is located in the CBD. Commercial buildings are located to all sides.

19. ADDITIONAL PHYSICAL DESCRIPTION:
Though various alterations of the past several decades have been removed, the original details of the first story are not present. The building is fenestrated with paired, double-hung windows. Spandrels beneath the windows feature a pattern of squares. Above the fifth story windows are spandrels with a floral design. Colonnettes, supported by corbals, decorate the top floor. The parapet wall features decorative terra cotta work. The building contains 72,000 square feet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1915; 1922-23 addition
Architect/engineer/designer: Charles A. Smith
Contractor/builder/craftsman: Swenson Construction Co. (add) (add)
Developer:
The first five stories of this building were erected in 1915 with plans later to enlarge the building. Seven floors, also designed by Smith, were added in 1922. During the second building phase concrete was poured at night to avoid disturbing the tenants. The building was erected by the Chambers estate of California, who paid $10,000 a front foot for the lot in 1912, the highest amount paid for real estate in Kansas City up to that time.

This building is located in the CBD. To the north is a commercial building; to the east is a parking garage; to the south and west are surface parking lots.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This structure was remodeled in 1956. The first floor display windows are set in a "sunset red" marble base, protected by a canopy roof. The upper floors are faced in pink and grey porcelein panels and aluminum trim.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1907; 1956 remod  
Architect/engineer/designer: Charles A. Smith; Voskamp & Slezak (remod)  
Contractor/builder/craftsman: ?  
Developer:
The Jones Store began business in Kansas City in 1895. When a fire destroyed their store at 8th and Main in 1899, they relocated to 12th and Main. In 1907 the store expanded to the east with this building fronting Walnut. The architect for this addition was Charles A. Smith. In 1956 the buildings were updated by Voscamp and Slezak.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located at the northwest boundary of the CBD. To the north is the interstate; to the south are vacant lots; to the east are commercial buildings and a parking structure.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This Y-shaped building was designed to give all rooms an outside exposure. The building fronts to the north to provide a view of the rivers and the downtown airport. The main entrance is on Washington St. Exposed concrete beams and columns form a grid on the exterior of the building. Interspersed are brick panels and rectangular windows with aluminum trim.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1961

Architect/engineer/designer: Kivett & Meyers; McCallum
Contractor/builder/craftsman: Winn-Senter Construction Co.
Developer:

The construction of this 2.5 million dollar hotel was announced five years before it was ultimately constructed. Organizational changes and plan revisions delayed the project. The building contains 189 rooms.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Wholesale District in the CBD. To the north, east and west are other industrial and commercial buildings; to the south are new multi-family residential units.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces west and is characterized by its simplicity of form. The western facade is on a slope, which exposes a second floor at the northern end, and is divided into two portions, appearing as separate blocks. The facade is buff brick with bands of red brick. The large rectangular windows appear within two bands of red brick. Entry appears within a vertical band of red brick at the north end of the southern portion.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1949
Architect/engineer/designer: Alfred V. Benberg
Contractor/builder/craftsman: Schweiger Construction Co.
Developer:
The building was erected in 1949 for the Fashionbuilt Garment Company, a prominent garment manufacturing company, to serve as their factory and wholesale house. The building is a major local work of Kansas City Architect, Alfred V. Benberg.

This building is located at the edge of the Wholesale District and the Quality Hill neighborhood, near the western boundary of the CBD. To the north and west vacant lots; to the east are new multi-family residential units; and to the south is a vacant lot and new residential units.

19. ADDITIONAL PHYSICAL DESCRIPTION:
An addition (south portion of the building) in 1925 increased the building to 36,000 square feet. The addition is identical to the original building. Brick piers divide the building into six bays. The second and third stories contain pairs of large, two-over-two windows. The dividing piers extend slightly past the roof line. At street level the story front windows have been filled with vertical boards. The brick piers are rusticated at street level.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1909; 1925 c. add.; 1972 renov.
Architect/engineer/designer: Greenbaum, Hardy & Schumacher (add.)
Contractor/builder/craftsman: Daniel Sutter
Developer:

From 1904 to 1914 this building was the home of the J.E Walker Manufacturing Co., a firm that produced shirtwaists. From 1915 to 1966 it was occupied by the makers of overalls and work clothes, the Burlington Manufacturing Co. In 1966 Burlington was purchased by the Genesco Corporation and the building was vacated. It was remodeled and opened as a restaurant, the Washington Street Station, in 1972.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the western boundary of the CBD. To the north and west are new buildings similar in design; to the east is a parking structure; to the south is a rehabilitated building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this multi-unit residential building faces east and is composed of a repetitive pattern of architectural features. The facade is divided by fire walls into three sections. Entries, approached by stairs, are located in the central bay of each section, beneath a gabled hood. The body of the building is veneered in brick; the gabled bays at either end of the sections are covered in siding and have a circular vent in the gable end and paneled spandrels. The bays overhang the basement level and have paired windows at each floor. The basement level is accessed by recessed patios directly beneath the projecting bays.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1985-86
Architect/engineer/designer: PGAV Architects
Contractor/builder/craftsman: McCarthy Construction Co.
Developer: McCormack Baron Associates

This building was one of several constructed as part of the Phase I 353 Quality Hill Redevelopment Project. Project architects were PGAV Architects; the contractor was McCarthy Construction Co. The project was developed by McCormack Baron Assoc. of St. Louis, MO.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the western boundary of the CBD. To the west is a parking area; to the north and east are new multi-family residential buildings; and to the south is another rehabilitated building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building has been recently rehabilitated. The main facade faces east and is three bays wide. A non-original one-story porch dominates the facade. The porch has a flat roof with second story balustrade and decorative brackets. Fenestration consists of one-over-one segmentally arched windows at the second story and rounded arched windows at street level. Rounded arch entry occurs in the north bay. The cornice has been simplified from its original design and contains panels and paired brackets. A small, rounded arch window is located within the central bay peak.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1877; 1985-87 rehab.

- Architect/engineer/designer: PGAV Architects (rehab.)
- Contractor/builder/craftsman: McCarthy Const. Co. (rehab.)
- Developer: McCormack Baron Assosciates (rehab.)

This building is a good example of the Kansas City Peaked style. The first resident identified with this property was Peyton Montgomery of Quilan, Montgomery and Co., Kansas City Stock Yards. The house was originally built for Thomas Corrigan on speculation and is similar in design to the Virginia Hotel, located directly to the south. This residence is one of the few original buildings left in the Quality Hill neighborhood.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the western boundary of the CBD. To the west is a parking area; to the east are new multi-family residential buildings; to the north is another rehabilitated building; and to the south are historic apartment buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building has been recently rehabilitated; although it has been returned to its original form, the details differ from the original. The main facade faces east and is composed of several bays which step back from the center. The four-story portion of the building is closest to the street; the front facade has three, front facing, peaked bays. At street level, a porch with roof balustrade wraps around the facade. The fenestration consists of one-over-one sash windows within segmentally arched openings. The cornice is paneled and has paired brackets. A rounded arch window is located within each peak.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1877; 1892 add.; 1985-87 rehab.

Architect/engineer/designer: Louis Curtis (add.); PGAV Arch. (rehab.)

Contractor/builder/craftsman: Geo. Brown & Son; McCarthy (rehab.)

Developer: McCormack Baron Associates (rehab.)

The building is composed of two 1877 residences built for Thomas Corrigan. The 1892 addition, making the residences into a hotel, was designed by Louis Curtiss and built by Geo. Brown and Sons for Thos. Corrigan. Wallace Pratt, a prominent K.C. Attorney was the first resident of the 1877 structure to the south. In 1881 Thos. Corrigan moved into the house and stayed there until 1892, when the addition was built. Over the years the building was drastically altered - porches and roofs were removed. The building was saved from complete deterioration with the 1985-87 rehabilitation, part of the Phase I, Quality Hill Urban Redevelopment Plan. The building is now leased by the United Way.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located in the Quality Hill neighborhood, near the western boundary of the CBD. To the east is a parking structure; to the north, south are new multi-family residential buildings; and to the west are rehabilitated buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This building faces west and is characterized by its high, steep-sided hipped roof with metal cresting. Square towers, with steep-sided pyramidal roofs, flank a center bay which contains the elevated main entrance at the apex of an arcade of arched windows. The towers have centrally located wall dormers with, tall, arched windows and steeply pitched gables; arched window openings are located at the street level of the towers. The second floor is recessed from the curved front wall and is not visible from the street level. The partial wall of the second story which follows the curve of the first level is ornamented with ocular windows and bellflower swags.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1893; 1986-89 rehab.
Architect/engineer/designer: Louis Curtiss and Frederick Gunn; rehab. WNB
Developer: McCormack Baron Associates, rehab

The Progress Club served as headquarters for a social club composed of locally prominent families of Jewish descent. Card games, dinners and balls were the most common social activities. The Ohio delegates to the 1900 Democratic convention used the building as their headquarters. The structure is also architecturally significant in that it was designed by two well-known Kansas City architects, Louis Curtis and Frederick Gunn. The building is one of the few original buildings left in the Quality Hill neighborhood. The building’s renovation, designed for a YMCA by Warner Nease Bost Architects Inc., was completed by McCarthy Construction Co. The plans for the exterior renovation were prepared by PGAV Architects. This building is one of several buildings rehabilitated as part of the Phase I Quality Hill 353 Urban Redevelopment Project, developed by McCormack Baron Associates.

This building is located near the southern edge of the Quality Hill neighborhood, near the western boundary of the CBD. To the south is a parking area; to the west is a parking structure; vacant lots are located to the north; and a small bank building and parking area are located to the east.

19. ADDITIONAL PHYSICAL DESCRIPTION:
This three-story building is comprised of three main portions. The most dominant portion is located at the south end and is rounded toward the west facade. The northern portion of the building is rectangular; both portions have the same fenestration treatment comprised of paired casement windows within a recessed brick panel with concrete sill. The windows at street level are not recessed in panels. The central portion, containing the entry, is recessed with a courtyard. The fenestration is irregular.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1984-86
Contractor/builder/craftsman: Dasta Construction Co.
Developer: Zimmer Co., Brookwood Realty
This 45,000 square foot building was constructed for approx. 7.5 million dollars for Brookwood Realty, a company of Zimmer Companies.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces east and is divided into three bays. The facade is dominated by an arched entry with recessed stair and doorway. The ground story is faced with rough limestone. The majority of the fenestration has been removed and the openings filled with plywood. The parapet is embellished with lozenge patterned brick corbelling and rough stone coping.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1889

Architect/engineer/designer: Harry Lindsay
Contractor/builder/craftsman: T. Howard Oliver

Developer:
The building was erected in 1888-89 by the distinguished investment firm of the Missouri, Kansas & Texas Trust Co. to serve as their headquarters. In about 1898, Arthur E. Stilwell, president of the company reorganized the firm to Guardian Trust Co. The building is a rare design by local architect, Harry Lindsay. The building has been used as a haunted house for several years and its condition has deteriorated.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located east of the Wholesale District and is surrounded by surface parking lots to the north, south and west; to the east are commercial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces east and was altered in 1957 with the addition of perma-stone veneer. A garage entrance is on the north end of the facade. On the south end is a door and a rectangular panel of glass blocks. A stone pilaster runs up the south end of the facade. This is a remnant of the Gibraltar Building (demolished 1971) which formerly stood to the south.

20. HISTORY AND SIGNIFICANCE:  
Date of Construction: 1891 c.; 1957 alts.

Architect/engineer/designer: ?
Contractor/builder/craftsman: ?
Developer:

This building was probably first occupied by the cigar firm of W.P. Moores and Son. By 1917 it was the site of Goldberg Jewelry Co.

This building is located east of the Wholesale District; to the north are a surface parking lot and a parking structure; to the east and south are commercial and industrial buildings; to the west is a surface parking lot.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces west. Entry occurs at the north end of the facade and a band of windows at each level appears at the south end; currently, the windows are not transparent. The south facade has large spans of multi-light vent windows at the second floor.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1956
Architect/engineer/designer: Kivett & Meyers, Agnus McCallum
Contractor/builder/craftsman: Schweiger Construction Co.
Developer:

This building, built in 1956, was created by joining the south half of the present structure with a new two story building, unifying both structures with a new facade. A three story building which the firm had purchased in 1947 was razed to make the extension to the north. The McWhirter Co. was founded c.1917. From 1927-55 they occupied the building that comprises the south half of the present structure. In 1955 the firm ranked 13th nationally in volume of trade.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located east of the Wholesale District; to the south and west are surface parking lots; to the east and north are commercial and industrial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces west and is veneered with glazed tile. The facade is vertically divided into three bays and divided horizontally by narrow paneled, metal, spandrels. Non-historic entries appear in the north and south bays; the central bay at street level has been coved with a sign. The fenestration is comprised of multi-light, industrial windows. The parapet is paneled and has a central, raised cartouche.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1920

Architect/engineer/designer: Hoit, Price & Barnes

Contractor/builder/craftsman: Long Construction Co.

Developer:

The building was originally designed for the printing firm of Baker-Vawter, which later became part of the Remington-Rand organization. Remington-Rand owned and occupied the building more than 15 years before selling it to the Sosland family in 1950. The Soslands used it to consolidated their interests in the Sosland Envelope Co., Sosland Press Inc. and Southwestern Miller publications. Some interior alterations (tenant) have taken place.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located east of the Wholesale District; to the north and east are surface parking lots; to the south and west are commercial and industrial buildings.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The front facade of this building, facing east, has been rehabilitated in 1984. At street level are plate glass display windows and a central, double door entry; a full-width awning is located above store front. At the second story are one-over-one double-hung windows, which appear in a band of three over the entry and in pairs at either side. A projecting, metal cornice is located at base of parapet.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1916; 1984 rehab.
Architect/engineer/designer: S.B. Tarbet
Contractor/builder/craftsman: Pratt-Thompson Construction Co
Developer:
This building has been used for a variety of commercial purposes. In 1917 it was occupied by the Midwest Envelope Co. Later occupants include the Pierce Co., handling silo hardware, and the Charles Milbank Co., dealers in electrical machinery. The building was rehabilitated in 1984 and is now used as a restaurant and bar.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
This building is located east of the Wholesale District; to the east is a surface parking lot; to the south is a parking structure; to the west is a commercial/parking structure; to the north is a commercial building.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces east and is divided into five bays. At street level, the bays are enframed in stone and contain either double-hung windows with transoms or entries. The main entry occurs in the central bay. The building has a vertical emphasis created by stone bands, enframing the windows. Horizontal bands of stone divide the street and top levels from the body of the building. New fenestration consists of one-over-one windows in bands of threes at the central three bays; windows within end bays are divided by the stone bands which continue up the facade. The parapet has stone coping and is crenelated at the end bays.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1917; 1984 (rehab.)
Architect/engineer/designer: S.B. Tarbet; Shaughnessy, Fickel & Scott Architects (rehab.)
Contractor/builder/craftsman: Pratt-Thompson Construction Co; Ron Clevenger Const. Co. (rehab.)
Developer: John Mera (rehab.)

This building was built to house businesses in the publications and graphic arts trades, such as engravers, publishers and typesetters. The 66,500 square foot building was constructed at a cost of $150,000. Special structural considerations were observed to support 10-ton printing presses. The building was rehabilitated in 1984 by developer, John Mera at a cost of 2.5 million. Ron Clevenger Const. Co. completed the renovation planned by Shaughnessy, Fickel and Scott Architects, Gastinger, Rees and Walker, Architects and Robert Newell also completed tenant and lobby plans for the building.

This downtown parking facility is surrounded by commercial buildings to the north, east and west; to the south is a surface parking lot.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this concrete parking structure faces east where two drive-in entries are located. The facility can house 444 cars. The facades are comprised of concrete panels with simple, modern detailing.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1960-61

Architect/engineer/designer: Frank Trask
Contractor/builder/craftsman: J.E. Dunn Construction Co.

Developer:

This $500,000 parking structure was built of precast, prestressed and post-tensioned concrete beams. The beams make up the structure's main transverse members and afford a span of 68.5 feet without supporting columns, allowing for an increase in parking space.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
To the south of this structure is Municipal Auditorium; to the north is a high rise hotel; to the west is Bartle Hall and to the east are hotels and parking structures.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The garage is accessible by car on the east and west. The garage is connected by tunnels to the adjacent buildings. The plaza is now terraced with a diagonal walkway cutting through the block. A concrete arbor extends along the east part of the plaza and smaller arbors appear on the west side. A triangle of locust trees occupies the northwest corner. A fountain stretches across the north edge. A restaurant pavilion was built c.1967 on the eastern edge.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1955-56; 1987 (add.)
Architect/engineer/designer: Gentry & Voskamp
Contractor/builder/craftsman:
Developer:

Occupy ing a full city block, the Auditorium Plaza Garage was built to provide parking for events held at the Municipal Auditorium. The garage, to accommodate 1,200 cars, was built at a cost of $4 million. The roof of the garage was landscaped in 1956; when roof repairs were needed, the plaza was torn up and redesigned. Financing was assisted by a $10 million Urban Development Action Grant.

18. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS:
To the west of this structure is Municipal Auditorium; to the south and north are parking structures and surface lots; to the east is a commercial building and parking.

19. ADDITIONAL PHYSICAL DESCRIPTION:
The main facade of this building faces west. The upper floors rest on a broad base that serves as a parking garage. The garage can hold up to 350 cars. The entry wall is faced in stone and is recessed beneath the levels of the parking garage. The east and west facades of the upper floors are divided into bays of projecting precast concrete. Each bay contains three fixed window panes with metal spandrels. The top floor has a circular revolving restaurant which slightly projects from the facade.

20. HISTORY AND SIGNIFICANCE:
Date of Construction: 1968-70
Contractor/builder/craftsman: Winn-Senter Construction Co.

This 500 room hotel was the first large hotel constructed in the downtown area since the 1930s. It was built for a cost of $8 million.
