**42. FURTHER DESCRIPTION OF IMPORTANT FEATURES**

Built of a pleasing combination of what appears to be smooth stone and wood, this house was among the first built on Dal-Whi-Mo Court. Built during the period when Prairie influences appeared in Sedalia for the first time, the imbricated shingles, ornamental railing between the front dormers, and interior detailing are essentially Victorian. Dormers are an unusual pediment type. Second story bays also are an uncommon design. Entrance has sidelights and transom of beveled glass. Entrance hall has embossed metal ceiling. Fireplace mantels are set with glazed tile. Main facade presents a strong impression of symmetry.

Original owner apparently was Charles H. Rockwell, a timekeeper employed by the M., K., & T. Railroad. This address appeared first in the 1906 city directory. Dal-Whi-Mo was mostly built between 1909-15. It is said that the block-long street once was the home of Sedalia Jewish population. Chains were installed at night across street entrances for privacy, according to Dal-Whi-Mo residents. Stone posts said to hold the chains have been removed. By 1913, the owner was the Rev. Louis P. Norfleet. Other owners or occupants have included Roy W. Rucker, an attorney whose daughter Jane married Senator Abe W. Starkley, who became a U.S. vice president. (See Inventory Sheet No. 69), and Willard W. Howe.

**43. HISTORY AND SIGNIFICANCE**

Frame 18' x 20' garage (apparently a former carriage house or stable). Residential neighborhood.

42. FURTHER DESCRIPTION OF IMPORTANT FEATURES
   Ornamental concrete blocks, molded concrete porch supports, and
   imbricated shingle trim in a gabled dormer are features. While
   most other ornamental concrete block houses in Sedalia are
   squarish; this example emphasizes horizontal lines. The concrete
   porch supports, a popular feature of the "concrete age," are rare in
   Sedalia today. Gable roofs flare outward. Matching concrete
   chimneys.

43. HISTORY AND SIGNIFICANCE
   Block retaining wall along sidewalk. Molded concrete chimneys.
   The first owner of this house is believed to have been Ellsworth C. White, an attorney
   and manager of the Publicity Collecting Agency, when it was built in approximately
   1912. Another early owner was Claude Willkerson, an attorney. Subsequent owners have
   included Peter Schrankler, superintendent at the J. A. Lamy Mfg. Co. during the late
   1920s and 1930s.

44. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS
   There is a 20' x 20' concrete block garage in the rear. Residential neighborhood.

515 Dal-Whi-Mo Court
Sedalia, Mo.
The west half of this popular East Sedalia building originally housed the East Side Drug Store of Otis W. Smith. The east half contained the Willis Letts Grocery Store. The second floor contained a large hall which was used for public and social functions including lodge meetings and dances. Offices also were upstairs for a doctor and a dentist, Dr. Frank R. Morley and Dr. Charles H. Weaver, respectively. That was the lineup when the building was completed in ca. 1904. The original owner was Andrew J. Tillbury, who came to Sedalia in the early 1880s. The present building replaced a frame building which served as the Scally & Son Grocery Co.

Corner location in the heart of what is known as East Sedalia.

42. FURTHER DESCRIPTION OF IMPORTANT FEATURES
   Band of imbricated fish scale shingles separates the second story
   from the first on the east facade; same shingles in gable. "Wind-
   ette" (window which projects out slightly) on east facade.
   Small second story porch on southeast is original and its details
   were used to reconstruct main porch which had deteriorated. Room
   added over kitchen on northwest corner. Double carport added
   in rear connects to house; originally was small back porch. Interior
   has lovely woodwork in oak, cherry and pine.
   Built in ca. 1891 for Charles E. Yeater, a Sedalia attorney who
   later was appointed vice-governor of the Philippine Islands by
   President Woodrow Wilson (1917). When the governor-general
   resigned, Yeater succeeded him and served under President Harding
   as governor until November, 1921. Yeater also served in the Missouri
   Senate. He lived at this address with his first wife, Anna, until he
   was appointed governor-general. Anna died in 1918. The original
   cost of this house was reported to be $3,500.
   A subsequent owner was Jessie Blair, from whose estate the current
   owners purchased the property.

WILLHITE HOUSE
1019 E. 3rd St.

It was a railroad man’s house, possibly from its earliest days when a fellow could ride to Kansas City and back on a steam-powered train and get red carpet treatment all the way for under a dollar.

The first confirmed occupant of the ca. 1880s brick Italianate house at 1019 E. 3rd St. was John A. Willhite, who started as a brakeman for the Missouri Pacific Railroad in 1870. Apparently, Willhite and his wife, Mary Louise, purchased the house and sometimes rented rooms to other railroad men. City directories indicate the Willhites lived there for a dozen years or so, beginning in 1883.

Willhite became an engineer for the Mo Pac and used to make the run between Sedalia and Jefferson City. He also had other runs, such as between Lexington and Kansas City, and between Kansas City and Atchison. One day Willhite’s big locomotive collided with another train and overturned. He handled that all right but was helpless when his adopted daughter, Bessie, contracted diphtheria, and died. That was in 1895, and by the time of the next city directory a couple of years later, the Willhites had moved to a house in the 500 block of East Fifth Street.

Today the house has gone to seed a bit but is still impressive behind its baroque wrought iron fence. Distinctive details include a five-sided double bay, windows capped with double rows of header bricks in segmented arches, and white-painted brackets and paneled frieze which are repeated in the columned, wraparound front porch.

The house is owned by Arthur A. and Helen Andersen. It has been converted into apartments but only the downstairs is used.

"I’ve been told that those railroad men used to have some fancy dances in this house on Saturday nights," Mrs. Andersen said.

YEATER HOUSE
420 S. Grand Ave.
624 W. 7th St.

Sedalians may remember him because he was a governor of the Philippine Islands, but Charles E. Yeater is interesting for another, less dramatic reason: He managed to live in two of the city’s finest Queen Anne style houses. (And a third just a notch behind the others.)
Yeater, who served as governor of the Philippines during part of the administration of Presidents Woodrow Wilson and Warren Harding, lived at 420 S. Grand Ave. with his first wife, Anna, from 1891-1916. He lived at 624 W. 7th St. with his second wife, Elizabeth, from their marriage in the early 1920s until his death in 1943.

The houses are not similar, but both feature especially elegant woodwork and decorative wooden shingles on one or more facades. The house at 624 W. 7th St. contains glazed tiles and woodwork said to have been imported by Yeater from the Philippines.

According to the Sedalia Evening Gazette, construction of both houses began in 1891. The newspaper said the house at 420 S. Grand, commissioned by Yeater, would cost $3,500. The house at 624 W. 7th St., being built for J. H. Doyle, Elizabeth's father, was to cost $5,000. (This was the same year that Congressman John Heard was having a $7,000 house built at 501 W. Broadway, which also survives.)

The house at 420 S. Grand Ave. is owned by Mr. and Mrs. Robert Weikal. The Weikals have painstakingly restored the woodwork in its original colors. The parlor and living room are trimmed in cherry. The dining room, hall and staircase are oak. Numerous cabinets and casings also are oak. The door between the living room and dining room is a "sandwich" door, cherry on the living room side and oak on the dining room side. The second floor is finished in pine throughout.

Weikal, who operates Weikal Cabinet Shops, is able to appreciate the craftsmanship that went into the woodwork. The fine bevel on cabinet doors--precise at least to the eye--apparently was done by hand, he said. To duplicate the bevel in new cabinets, Weikal used a modern router.

Structural changes have been few. A double carport was added to the rear several years ago, replacing a small back porch. A room has been added in the northwest corner of the second floor, over the kitchen. The front porch was reconstructed, with new posts turned and other details based on a small second story porch.

Mrs. Judy Woolery, who lives in the house at 624 W. 7th St. with her husband, Dr. William G. Woolery, is convinced that the first owner's wife put her stamp on it.

"This house was designed by a woman--there's no doubt about it," Mrs. Woolery said. All the spatial arrangements and the layout of the rooms combine to make it eminently livable, she said.
Mrs. Woolery, who has researched her house's history, said the original floor plan called for it to be five feet deeper. Mr. Doyle decided on the modification because he felt that otherwise it would be too close to the street, she said. Mrs. Woolery said the Doyles had built a similar house, but of brick, in Hannibal.

Just east of a small entrance foyer is an oak staircase with hand-carved fresnels and a parquet floor of oak and walnut, a recessed alcove with a window under the stairs, a loveseat formerly owned by the Yeaters, and sections of spidery wooden trim set into the tops of interior doorways.

The living room contains a fireplace with a mirrored, beautifully carved wooden mantel inlaid with glazed tiles possibly either brought back personally or subsequently imported from the Philippines by the former governor. There is a stained glass window on the south wall.

On the west side, a porch has been converted into a breakfast room. Directly above it is a screened sleeping porch. The second floor also contains a servants' quarters on the north end, adjacent to a back stairway to the kitchen. An outside door and a small porch recently were added to the east side.

Yeater came to Sedalia with his father, John Yeater, by way of Kentucky in 1865. John Yeater was a banker, a grocer and a stock breeder. Charles E. Yeater was a Sedalia city attorney, then was elected to the Missouri Senate. He was instrumental in securing the city's Carnegie library, the Missouri State Fair and the Missouri Pacific shops.

In July 1917, Yeater was appointed vice governor of the Philippines by President Wilson. When the governor general resigned, Yeater succeeded him and served under President Harding until November, 1921. His first wife, Anna, died in 1918.63

While Yeater has been most closely associated with the two houses discussed above, he also lived for two or three years in the house at 609 W. 3rd St., prior to moving into his new home at 420 S. Grand Ave.

Sedalia has many other houses about which stories of one kind or another could be told.

Attractively painted in yellow, white and gray. A fine Italianate-style house. Scrollwork brackets with pendants. Band of irregular dentils and panel frieze beneath cornice. Threesided double bay on south. #36. Front porch was extended to the south and a double bay on the main (east) facade was removed after an attic fire. Entryway has been changed by installation of bath and closet under staircase.

43. History and Significance
Known as the Sturges House, this property was in the family of Gould Allen Sturges for many years. Sturges and his wife, Margaret, were among the early families of Sedalia, arriving during the 1860s from Ohio. The 1883 city directory lists the house as the home of Mrs. Margaret D. Sturges, widow. Sturges had been a banker. Two sons, Gould A. Sturges, Jr., and Thomas Jefferson Sturges, established a lumber yard in the 200 block of East Third Street in the 1890s. It was the Sturges Lumber Co. until the mid1940s when the company changed ownership and became Home Lumber Co.

44. Description of Environment and Outbuildings
Carriage house serves as two-car garage. Residential neighborhood within proposed Victorian Towers Historic District.

45. Sources of Information
City directories; Mrs. Judith Robinson; county assessor's records; observation; Life in Pettis County (Lang, 1975, p.475).

of the paper until his death in 1931. His wife, Alma, remained an owner and resided at the house until her own death in 1943.

Subsequent owners have included Rosemary Burrowes, a former city editor of the Democrat.

**STURGES HOUSE**

424 S. Grand Ave.

For most of its 100-plus years, the Sturges House at 424 S. Grand Ave. was painted a noncommittal white. Today it's canary yellow with only a dash of white and gray in the trim. This raised a few eyebrows in Sedalia, but to Jack D. and Judy Robinson, it seemed a perfectly respectful way to treat a fine old house.

The Robinsons formerly lived in Atlanta, Ga., a city with many sections where historic houses are practically ubiquitous. There, restorers use a palette with a variety of colors in addition to shades of white and other subdued hues, Mrs. Robinson pointed out.

What can't be denied is that the present combination of colors helps accentuate the mansion's Italianate features, especially the intricately detailed brackets (with pendants) that help support the eaves.

Originally built in approximately 1881, the Sturges House was in the family of Gould Allen Sturges for many years. Sturges and his wife, Margaret, came to Sedalia in the 1860s from Zanesville, Ohio. While the address is not listed in the city directory of 1873, the 1883 directory lists it as the home of Mrs. Margaret D. Sturges, widow. According to Lang, Sturges was a banker who died "a few years after coming here."

Two sons of Sturges, Gould A. Sturges, Jr., and Thomas Jefferson Sturges, established a lumber yard in the 200 block of East Third Street in the 1890s. Known as the Sturges Lumber Co., it became a major source of lumber and other construction materials in Sedalia. In the mid-1940s, the firm changed ownership and became Home Lumber Co.

Features of the house include a double bay on the south facade. The front porch was extended to the south edge and a double bay on the main (east) facade was removed after an attic fire sometime after 1915. The present porch has a large-bladed, vintage ceiling fan. The two-car garage is a converted carriage house.
Interior remodeling by previous occupants has been extensive. Mrs. Robinson said planned restoration includes removal of a bathroom and closet from the entryway (under the stairs) and removal of gray and white paint from interior paneling "which makes it more Georgian than Victorian."

Incidentally, the house also has a connection with the world of professional golf, Mrs. Robinson pointed out: The genealogy gets complicated, but Gould A. Sturges was the great-grandfather of golfer Tom Watson.

VAN DYNE HOUSE
1108 W. Broadway

Houses made from ornamental concrete blocks may be following the dodo and gingerbread trim on the road to oblivion. But the old Van Dyne House at 1108 W. Broadway is still going strong and is a convincing example of what could be accomplished when the fake stone was used to dress up the basic American Foursquare.

Built in ca. 1908, the house at first glance appears to be made of natural stone, possibly Warrensburg sandstone which was widely used in public buildings and churches throughout the region before it fell into disfavor. But closer inspection of the blocks shows a few identical "rough cut" patterns repeated over and over, a dead giveaway of concrete.

The ornamental blocks were offered in a variety of finishes as an inexpensive and yet strong alternative to stone and brick, with several companies mass-producing them as early as the 1870s. Finally it even became possible for individuals to buy concrete-block making machines from Sears, Roebuck & Co., and turn out up to 150 blocks a day in their own backyard.

Today America's automatic machines make concrete blocks cheaply by the millions but they all have smooth faces.

First owned by Mrs. Mary D. Murray, the house was purchased by the J. Rudd Van Dyne family in approximately 1916. The Van Dynes founded ADCO (American Disinfecting Co.), a manufacturer of dry cleaning products and related chemicals. The house remained in the Van Dyne family until the mid-1930s. Current owners are James and Barbara Cooney, who acquired the house in 1961.

42. FURTHER DESCRIPTION OF IMPORTANT FEATURES
   Originally the home of contractor Edward Hurley, this structure
   has been converted into four apartments. There have been exter-
   ior alterations as well, including removal of a wraparound, col-
   umned and balustraded porch from west to north and removal of a
   matching walkout porch over the west entrance. Entrance has
   been "modernized," detrimentally. This building retains its
   fascinating array of curved lines, towers, dormers, finials, belt
   courses and windows. Dominant original feature is a three-story
   tower on northwest corner. There is also a rounded, two-story bay
   on the north. An L-shaped porch has been added on the northeast.

   Owner-builder Edward Hurley, a native of Ireland, was a bricklayer who came to Sedalia
   by way of New York, Chicago and St.Louis. He built many of the city's buildings includ-
   ing the Lamy Mfg. Co. Original cost of this house was reportedly $10,000. A newspaper
   article in the Sedalia Daily Capital of May 5, 1895, expressed some surprise in report-
   ing that Hurley assigned architect Thomas W. Bast to supervise the job.

43. HISTORY AND SIGNIFICANCE
   Corner location in residential neighborhood. Within proposed Victorian Towers His-
   toric District.
44. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS
   No additional description.

pink and blue flowers centering her table. She was very exacting and when she was having more guests than chairs to her dining room table she had slip covers made for those chairs and the others she used so all would look alike. Many of the city's exclusive social functions were held there and frequently important people were house guests. The dinner parties were delightful affairs usually with a dozen to 20 guests, and until they could have the party just as they wanted it, they didn't have it.48

The half-page advertisement in McCoy's Sedalia City Directory said: "E. Hurley & Co., Contractors and Builders, Estimates on All Kinds of Building on Short Notice."

But Hurley's work, including his ca. 1895 mansion at 501 S. Grand Ave., was always its own best advertisement.

Originally known as Hurley's Hall, the three-story brick Queen Anne is a fascinating mixture of curved lines, towers, dormers, finials, belt courses and windows. Unfortunately, the building's character has been
altered by such additions as an intrusive shingled porch, decorative iron posts and railings, glass brick windows, etc. It has been converted into four apartments.

Actually, Hurley's mansion was more of a team effort than is generally believed. Hurley hired Sedalia architect Thomas W. Bast to design and supervise the project. Another contractor, W. R. Stewart, was hired specifically for the woodwork—which included a stairway with hand carved balusters and newel posts and parquet floors in the reception hall and dining room. The third floor had servant's quarters and, like the Harris House a block away, a billiard room.

While the house was under construction, The Sedalia Daily Capital on May 5, 1895, reported: "This building has double walls, the inside being of wood and the outside of Kansas City pressed brick, with an air space between the two, making it the best and most substantial building ever put up in this city, as it has the combined good features of both brick and wood, without the objectionable features of either."

In its earlier incarnation, the Hurley House also sported a wraparound, columned and balustraded porch from west to north and a matching walkout porch over the west entrance.

The Portrait and Biographical Record of Johnson and Pettis County discussed Hurley at some length. The following is an excerpt:

Our subject is a native of the Emerald Isle, and was born in County Roscommon in 1835, being one of five sons and three daughters who came to bless the union of Thomas and Mary (Maunion) Hurley... (On) March 2, 1872, our subject came to Sedalia and began in business here. Many of the substantial business blocks of the city bear evidence of his handiwork, and his taste is also demonstrated in the many private residences of the prominent citizens. Among the more imposing of the business blocks may be mentioned the Marien Building and the Cassidy and Clooney Buildings, the Hurley Block... his own fine residence and the Lamy Factory. The latter building is the largest in Sedalia.... It was completed in less than 60 days and is a remarkable piece of work. Besides his work in Sedalia, he has contracted for and erected many buildings in surrounding towns, being widely known for his careful attention to the details of his work, and he employs about thirty men.49

Hurley also was a developer. A five-acre tract in East Sedalia (McEnroe & Hurley's Addition) was platted by Hurley.

   Unusual bay on southeast corner, square on first level and hexagonal above. Curved bay on south corner. Arched decorative panel above main (east) entrance. Hipped roof with lower cross gables, which are truncated. Fish scale shingling in gables. The main entrance originally was enclosed by a two-story porch, removed sometime after 1914.  
43. HISTORY AND SIGNIFICANCE  
   Apparent original owner: William B. Mackey, salesman and later president of Mackey Shoe Co. Mackey is believed to have been owner from 1890s through approximately 1920. Mackey married Madge Sturges, a daughter of Gould Allen Sturges, one of the early Sedalia families who lived nearby at 424 S. Grand Ave. Mackey is said to have been instrumental in securing the Carnegie (Sedalia Public) Library. The next owner apparently was Jack F. Truitt, manager of the Sedalia Theater and the Sedalia Post Advertising Co. Property is within proposed Victorian Towers Historic District.

40. Visable from Public Road: Yes (X)
41. Distance from and Frontage on Road: N/A
42. Further Description of Important Features:
   This frame church building is shaped like a fat, short letter L. The essentially gable and wing design features a corner entrance with a single, ornamental concrete support. A square bell tower above the entrance has a bell-cast (flared) roof. Windows have flat tops rather than arches. There is a basement with an entrance near the main entrance.
43. History and Significance:
   This building was completed in 1923, following a fire which destroyed or badly damaged a ca. 1870s church building used by members of the Christian Church as well as Methodists. This building is representative of medium-sized rural church buildings in Pettis County, and might be considered for inclusion in a study of church architecture.
44. Description of Environment and Outbuildings:
   This building faces Johnson County, although it is situated on the east side of a N/S gravel road which is in Pettis County. (The road follows the county line near the church.

42. FURTHER DESCRIPTION OF IMPORTANT FEATURES
   Major alterations have transformed this structure from an Italianate-style house to a Queen Anne. Original large porch was changed from a wraparound with double columns to a double storyed porch on the east and a small entry porch on the south. Roofline was dramatically changed, with third-level veranda added to the double-story front bay on east. Window placement remained basically the same. There are two Palladian windows on south.

43. HISTORY AND SIGNIFICANCE
   Drawing of original house appears in July 3, 1891 issue of The Sedalia Morning Gazette (reproduced in Volume One of this survey). This was the S.P. Johns family home until approximately 1920, S.P. Johns, Sr., entered the lumber business after the Civil War and eventually had lumber yards in neighboring towns as well as Sedalia. Members of the family including S.P. Johns, Jr., also were involved in the business. In approximately 1920, the property was purchased by Harry W. Knight of Knight Hardware Co.

610 S. Harrison Ave.
Sedalia, Mo.
JOHNS HOUSE
610 S. Harrison Ave.

The massive Johns House at 610 S. Harrison Ave. came into this world as an Italianate with a widow's watch on its low-pitched roof and a one-story porch that wrapped around from east to south. Today it's a Queen Anne with a dramatically altered roofline, a double-decker porch that doesn't wrap, and enough dormers and other acquired appendages to satisfy the most asymmetrical of tastes.

There's also a diversity of windows. Readily visible are Palladians, paired quarter-round windows, 15-over-one dormers, leaded glass windows and various sizes of one-over-one (the mode) windows.

At least two things might be said about all of this:

1. It's definitely not recommended surgery.
2. It's probably lucky that Samuel P. Johns, Sr., and his family happened to run a lumber yard.

Actually, the result didn't turn out as badly as it might sound. This ca. 1880s house is not an intrusion in its neighborhood (as are some other vintage houses) despite its long hours under the knife. Many historic houses have experienced far less modification with truly disastrous results. The Johns House is a rare, happy exception; an experiment that should have failed but didn't.

S. P. Johns, Sr. entered the lumber business after the Civil War. An Ohio native, he started a retail lumber trade in Sedalia beginning in 1880. Johns also had lumber yards in such area towns as Lexington, Warsaw and Hughesville. He served as a director of the old Citizens National Bank. It was the Johns family house until approximately 1920 when it was purchased by Harry W. Knight, of Knight Hardware Co.

Dennis Thornton, the current owner, has an oil painting of the house (ca. 1914) that is passed along "each time it changes hands."

42. FURTHER DESCRIPTION OF IMPORTANT FEATURES

A basic, National Folk gable-front and wing house. Accompanying photo does not show wing but illustrates a somewhat unusual feature: its windows are disproportionately tall, extending nearly the entire height of the walls. Originally, this was a three-room house but two rooms and a bath were added during the 1940s. Front porch is width of the gable. Latticework trim has been added.

This address was traced back to 1883 in Sedalia city directories, when it was listed as the home of Nelson Hathaway, occupation unknown. John T. Taylor, a carpenter, was identified as the owner from 1884-1898. Subsequent owners were numerous and included railroad workers such as Casper Esser, a car inspector for the M., K., T. during the early 1900s. This may well be an 1870s house.

44. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS

There is a small frame garage attached to the two-room addition, in rear. Location is a residential block.

45. SOURCES OF INFORMATION

City directories; Clarence Stone; county assessor's records.

Concrete blocks molded to resemble natural stone were used in this building. The bell tower is truncated and the front entry on the east facade has been altered. This is a relatively simple gable-fronted building with the focal point being the square tower. Entrance doorway and main stained glass window are arched. Single rectangular window on west facade; other windows.

Historically significant, plain. Upper section of tower is clad in pressed metal.

Originally this building was the home of the First Cumberland Presbyterian Church, one of the oldest denominations in Sedalia. The church, first organized in Sedalia in 1869, was reconstructed in 1906 after a union with the Presbyterian U.S.A. The present building was erected in 1911.

Residential neighborhood. No outbuildings.

1822 Ingram Ave.
Sedalia, Mo.
house include boxed and decorated cornice emphasized by a wide, divided band of trim; windows with wide keystone lintels, and corners accented by quoins of matching brick.

Double rows of sidelights and column pilasters flank the main doorway. A belt course of smooth stone divides the two floors and a wider belt course separates the foundation from the brickwork. There is a balconied, open, L-shaped porch around the southwest corner and a smaller balconied porch near the southeast corner.

A compelling feature is the arched north window with tracery above the portico and especially its elaborate, pilastered surround which reinforces the Greek temple motif. Light spilling into a stairway landing at the base of the window provides good viewing for a family portrait gallery and nourishes a collection of house plants. There's another arched window with a simpler doubled brick surround on the rear (south) facade.

The house also has one of Sedalia's first basement recreation rooms, Mrs. Swearingen said.

The first owner, W. E. Bard, Jr., operated drug stores at 108 W. Main St. and at 416 S. Ohio Ave. His father was one of Sedalia's earliest merchants. Today there is still a Bard Drug Store, at 412 S. Ohio.

---

Electric Ring for Rheumatism. These are the first rings introduced into the United States, all others being imitations. Their popularity has caused many rings to be placed on sale in this city without any curative properties.

No. 8R1585 Gray metal, polished. Price, each...50c
If by mail, postage extra...3 cents.

Electric Insoles. A boon to those troubled with poor circulation and cold feet. If the feet are kept warm the body will be less subject to the various complaints arising from colds. These Electric Insoles contain the purest polished metal that a mild electric current is produced along the soles of the feet, which stimulates the blood and keeps it circulating constantly. They are worn with good results for cold feet, and to keep the feet dry.

No. 8R1685 Price, per pair...60c
If by mail, postage extra...10 cents.

BROCKMAN HOUSE
1822 S. Ingram Ave.

They used to call it "Sedalia's Old Castle." There wasn't anything quite like it. You could see the elaborately detailed stone house from miles away. A lot of years passed. It came to be used as a fruit market. Boys in the neighborhood convinced each other it was haunted.
Today, the house at 1822 S. Ingram Ave. is the original wing of the Rest Haven Nursing Home. The home, with an addition completed in 1963, has a capacity of 81 beds.

The house's early history is obscure, but the builder obviously had heard the axiom that a man's home is his castle. One theory is that an immigrant from Holland cut the stones and built the house himself. The 1884-85 city directory lists a Herman Paelenlong as residing on Ingram Avenue near 18th Street, but this house doesn't appear that old.

Another theory is that it was built by a man named Gresham who had stoneworks at 11th and Grand around the turn of the century. The first specific reference to 1822 Ingram is found in the 1898 city directory, which lists the owner as Samuel A. Rosse, a fireman. A 1900 directory lists the owner as S. M. Walker, manager of the J. N. Taylor Piano House. A farmer named John H. Brockman has become the owner by 1906.

The house remained in the Brockman family until approximately 1950. Its style seems to be a vernacular combination of Gothic Revival and Victorian Romanesque. The former is suggested by the foliated forms which decorate gables and bay window surrounds, achieving a kind of gingerbread effect in stone. Even the finials are of stone. Suggestions of Victorian Romanesque include the foliated forms and grotesques which decorate capitals of short stone columns supporting the arched doorway.

The house was "an old fruit market painted red, white, blue and yellow on the inside" by the time Mary Couts (today, Mrs. Mary Fillicetti) purchased it in 1956. Mrs. Fillicetti said young boys used to ask her if they could see the inside of the "haunted house." It was pretty rustic then, she said, and had been vacant for at least a year.

There were three stone fireplaces on the main floor including one with a likeness of Gabriel blowing his trumpet and the word "peace," Mrs. Fillicetti recalled. When she remodeled it as a nursing home, the fireplaces (except for a large brick fireplace in the basement) were sealed to meet state regulations.

While in the Brockman family, beginning in the early 1940s, the house served as the Brockman Produce Co., Brockman's Farmers Customs Markets, and the A. E. Brockman Realty Co.

In 1960 the house--then known as Couts Rest Haven Nursing Home--was purchased by the current operator, John T. Finley.
J.O. Smith’s Addition
Lot 4 and north 4’ of Lot 3
East side of Lafayette Avenue
between East 7th Street and East Broadway

Nearly flat upper-sloped gambrel roof. Each window, from attic to basement, topped with arched radiating voussoirs of brick. House is divided by a wall between north and south sections including basement. A unique type of house in Sedalia. Each duplex consists of three rooms on the main floor and two upstairs, plus basement. Recent one-story addition of frame walls on east.

Original owner undetermined. Apparently the building was designed to house two families. An 1884-85 city directory lists James D. Smith, a traveling salesman, as living in the south half (703). There have been many occupants and owners. The 1898 directory lists Mrs. A. Bergfelder in the north apartment and F.M. Motz in the south. In 1900, T.B. McKenzie, a brakeman for the M.K. & T. Railroad, lived in the north half and Frank D. Ormond, of Raben & Ormond Optical Goods, occupied the south.

Garage. Street is residential with railroad tracks directly east.

City directories; Mrs. Sylvia Gregory (former owner); county assessor’s records; observation.
701/703 S. Lafayette Ave.
Sedalia, Mo.
It's arbitrarily called the Lafayette House but it just as easily could be called the John Doe House for all that is known (or not known) about its beginnings. It's called Lafayette House because it's on Lafayette Avenue.

The ca. 1880s Dutch Colonial duplex at 701-703 S. Lafayette Ave. has had many owners and occupants, but the identity of the first remains something of a mystery.

With its nearly flat upper-sloped gambrel roof and its abundance of arched windows, the two-story brick is a unique type in Sedalia.

One of the most distinctive features is the extent to which the unknown builder has topped each window, from ground level to attic, with arched radiating voussoirs of brick. On the west facade alone, there are 14 such arches!

Supports of the simple north and south entry porches are turned columns. A single Victorian spindlework frieze still graces the north porch.

Apparently, the structure was designed with the intention of housing two families. There is a dividing wall between the north and south halves. Each apartment contains five rooms on two floors. The basement also is divided into halves. There are four chimneys. The original high ceilings have not been lowered. Eaves are more angled than flared as in some Dutch Colonials, but a flared effect is nonetheless achieved.

The 1884-85 city directory lists James D. Smith, a "commercial traveler" (traveling salesman), in the south apartment. The 1898 directory lists Mrs. A. Bergfelder in the north apartment and F. M. Motz in the south. In 1900, T. B. McKenzie, a brakeman for the M., K. & T. Railroad, lived in the north half and Frank D. Ormond, of Raben & Ormond Optical Goods, occupied the south.

There has been a long succession of tenants and as recently as 1982, according to a Sedalia assessor's report, you could have rented one of the apartments for only $100 plus utilities.

42. FURTHER DESCRIPTION OF IMPORTANT FEATURES

With its semi-circular arch door and window openings, this building is a variation on the Romanesque Revival style (which also typically involves more than one tower at both flanks of the main facade). Emphasis on smooth stone quoins and keystones. Square tower has brick battlements. Nice stained glass. Foundation of rough-faced stone.

43. HISTORY AND SIGNIFICANCE

Although cornerstone laid in 1911, building not completed until several years later. A Catholic church previously occupied the present site but was destroyed by fire. A booklet published for the Founders Day Celebration on June 27, 1982, notes that the building was constructed under the leadership of the Rev. James M. Harris.

44. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS

Corner location in residential neighborhood of north Sedalia.

---

**One of Sedalia's older houses.** The 1884-85 city directory lists the owner as Mrs. J.A. Greenleaf. By 1900, the owner is identified as Lon Wells, a laborer. This may be a relic of the 1870s. A local impression is that this structure served as a schoolhouse at some point. Local directories were inadequate for substantiating or refuting this possibility.

---

**Further Description of Important Features**

A basic "Shotgun Style" house, in brick. Shotgun houses typically were two or three rooms long with front gables. This example has a front porch with Victorian turned roof supports and trim. Windows are 4/1 and have segmental arches. Concrete slab porch floor is an addition. This house is 42 feet long (excluding porches) and 16 feet wide.

**43. History and Significance**

Victorian details in this red brick, front-gable and wing house are few but for the most part prominent. The round tower above the front porch is the main element; it includes curved 1/1 windows and fish scale shingles. There is also a decorative flourish at the cornice tips. Rather unusual use of rough sandstone belt course in the gables. Same material used for lintels and lug-sills. Porch supports are square brick columns.

Rudolph Dean, a son of German immigrant Frederick George Dean, was the original owner. Rudolph and another brother, Daniel, formed Dean Brothers Construction Co. in the late 1890s. Earlier, Rudolph was partner with Edward Hurley in another construction firm. Dean Brothers built some of Sedalia’s primary buildings including the Carnegie Library, Heard Memorial Clubhouse, Smith-Cotton High School, St. Patrick’s Church, etc. This house was in the Rudolph Dean family from approximately 1903 through the 1930s.

43. HISTORY AND SIGNIFICANCE

in Tower (brick surfaced) section.

This house is one of three built and lived in by Daniel H. Dean, of the original
Dean Brothers Construction Co. (See also Inventory Sheets Nos. 67 and 103). Daniel
was a son of Frederick George Dean, a German immigrant and the first of five generation
of Deans in the construction business in Sedalia. Daniel formed a partnership with his
brother, Rudolph Dean, in the 1890s and this house apparently was among their early pro-
jects. Rudolph lived in the house just north at 1604 S. Moniteau Ave. (See Inventory
Sheet No. 101). Among subsequent owners was John H. Bond, a grocer, in the 1920s.

44. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS

Frame garage, 18' x 20'. Residential neighborhood.

42. FURTHER DESCRIPTION OF IMPORTANT FEATURES

Main section brick, gables wood
Unusual hipped and gabled roof. Notice two gables on north
facade with a small concrete stoop (7' x 13') separating them.
Gables have Victorian Queen Anne detailing (imbricated shingles and
sunburst or fan decorative motif, pent roof). Curved front
porch has Victorian turned roof supports. Two chimneys of brick
with flared tops. Rough stone lintels and sills on windows

OFFICE OF HISTORIC PRESERVATION
ARCHITECTURAL/HISTORIC INVENTORY SURVEY FORM
Full-width front porch with deck. Wide water table of smooth stone (same width and type as window lintels). Narrower smooth stone window sills, belt course (visible at window sill level of front porch) and topping for porch railing. Hipped roof dormers. Gutter system has diverters to send rain runoff either to cistern or to storm sewer. #36. Second floor screened porch has been enclosed and is used as a den/study room. This house has many identical features to House Dean subsequently built at 421 W. Broadway.

Daniel H. Dean, the contractor whose family has been building houses and larger structures in Sedalia since the 1860s, built and lived in this house from ca. 1914-1920. By 1921, he was living at 421 W. Broadway (See Inventory Sheet No. 67). Earlier, Daniel Dean built and lived in the house at 1608 S. Moniteau Ave. A brother, Rudolph Dean, lived at 1604 S. Moniteau. A subsequent owner at 1609 S. Moniteau was Victor B. Hilderbrand, a manager at the C. W. Flower Co., and a Mr. Crow, owner-operator of a fertilizer plant.

In the rear, an old horse barn with an interesting circular window has been converted into a garage. Residential neighborhood.

<td>Basically, this is a gable-and-wing National Folk house with spaces between the original brick units &quot;filled in&quot; with frame additions to create additional interior footage. It was selected primarily because of its historical significance. There are frame additions on three corners. (All but the NW.)</td>
</tr>
<tr>
<td>History and Significance</td>
<td>Although heavily modified, this is a house built by Absalom McVey, one of Sedalia's founding fathers, according to W. A. McVey, a great-grandson. The bricks came from a house Absalom McVey built at 7th and Murray Avenue but &quot;took down because he thought it might collapse.&quot; McVey died in this house in December of 1891, two months after he was injured when a switch engine startled the horse that was pulling his buggy, throwing him to the road. McVey died at the age of 89. In 1853, McVey had bought the land that was to become Sedalia. For inexplicable reasons, no directory could be found that listed McVey as living at this address. W. A. McVey attributes this to directory error.</td>

Prepared by: Maserang/Christopher
Organization: Show-Me RPC
Date: 12/84
Frame addition

423 S. New York Ave.

Sedalia, Mo.
This striking house has four turret windows on the corners of its central, second floor room which has flat-topped, hipped roof. The deck of this roof has a lacy metal fenced area called a "widow's watch." Top of east gable also is flattened. Victorian details include imbricated shingles on its upper level, a sidelighted entrance and matching small porches on the north and south wings. The east facade contains a bit of gingerbread trim at the apex of the gable, and a finial. The design is unique, at least for Sedalia. Interior is plain. There is a bedroom addition on the west.

Original owner probably William Craven, superintendent of the old Sedalia Foundry Co., in the 500 block of East Third Street in the 1880s and 1890s. Craven lived in this house until approximately 1899 when it became the home of Charles D. Brown, an employee of the Sedalia Daily Democrat. Former owner W.H. Eppenauer reported finding what appeared to be animal hide insulation while repairing a north wall.

Garage (former carriage house) in rear. On residential north-south street just north of East Broadway.

W.H. Eppenauer; city directories; county assessor's records; observation.
W. Z. Baum's building, the Sheldon residence, Opera House, Broadway Presbyterian Church, Messerly Flats, Prospect School, and the F. E. and Charles Hoffman buildings. In the busy season he employs from twenty-five to fifty men. His reputation for energy, skill and ability is of the highest, and at all times he has as much work as he can attend to.

At No. (1201) East Tenth Street, on the corner of Engineer, Mr. Colaflower has a commodious and well appointed residence, erected by himself and containing all the modern improvements. The lady who presides over this cozy home was formerly Miss Frances Mitchell.99

The Colaflowers only lived at 1201 E. 10th for a few years. Apparently none of the various other houses they called home have survived.

CRAVEN HOUSE
720 S. New York Ave.

There are scores of well-preserved little Folk Victorian houses in Sedalia. But only the Craven House at 720 S. New York Ave. has (a) an upstairs room with four turret windows, (b) animal hide insulation stuffed in its walls, and (c) a widow's watch to cap it off.

The ca. 1880s house was the home of William Craven, superintendent of the old Sedalia Foundry Co. (later the Wells & Craven Foundry Co.), during the 1880s and 1890s.

The highly symmetrical house (apart from a couple of additions) also has fishtail shingles on its upper level, a sidelighted entrance, and matching porches on the north and south wings. The basic shape is the unusual cruciform. But the turret windows on all four sides of the main upstairs room, which are actually gabled in, are its most distinctive element.

As former owner W. H. Eppenauer put it, "It's such an unusual house that it must have taken someone with a strong character to live there!"

It was Eppenauer, a retired surveyor, who discovered a fibrous material which appeared to be some type of animal hide while repairing the north wall. From its placement inside the wall, it apparently was intended as a type of insulation. It works just fine, he said.
Eppenauer said the abstract indicates that a Mr. Love borrowed money against the property in the 1870s. This could mean that the house was built then, or that a different house that no longer exists was built then, or neither.

The foundry which Cravens headed pioneered in the manufacture of gas and gasoline engines, and also produced store fronts, cane mills, grate bars, sash weights, and iron and brass castings of various types.

---

HARRIS HOUSE
705 W. Sixth St.

It's difficult to talk about the Harris House, 705 W. Sixth St., without gushing superlatives. But that's the way it often was when a Victorian had the wherewithal to indulge his fancies. Like a Clydesdale, the Harris House is more magnificent than ostentatious.

From its distinctive two-story tower and turreted oriel to its sweeping veranda and Quezal light shades, the big red brick mansion easily lives up to its reputation as Sedalia's "preeminent Victorian landmark." Architectural historian Claire F. Blackwell, who is used to looking at Missouri's finest, called it "significant as an exceptional example of Queen Anne architecture in the Pettis-Benton County area and as a building surviving in virtually unaltered condition."

Originally built in 1895 for Joseph Imhauser, a local entrepreneur, the house was purchased by Henry W. Harris less than three years later. Harris, one of the area's wealthiest and most enterprising businessmen who was soon to become president of Sedalia's Third National Bank, the house must have seemed perfect. Its style and layout of rooms made it an ideal focus for Sedalia society, and such it was to become.

There's even a third floor ballroom and billiard room where Harris or his guests could entertain themselves and then, with partner or cue stick in hand, stroll into the tower and survey the neighborhood scene below.

Even at night the house is spectacular as the moonlight plays over the "steeply-pitched, hip roof which bursts into gabled, pent, polygonal and hipped roofs over the many bays, porches and balconies."

42. FURTHER DESCRIPTION OF IMPORTANT FEATURES This is an example of an older style of Sedalia house, closer to the Adam or Federal than Victorian. It is a simple design, nearly square, with great symmetry in its layout of doors and windows. Alterations include rebuilding and reducing the size of the east porch. The building has been converted into apartments. Windows have segmental brick arches. Two chimneys, with elaborately decorated masonry tops, Transom window.

43. HISTORY AND SIGNIFICANCE During the 1880s, this was the residence of Benjamin F. Dean, a carpenter, and Benjamin F. Dean, Jr., a machinist, according to city directories. (These were not the same Deans who were associated with the Dean Brothers Construction Co.) Other early owners/occupants included Stephen Pirkey, insurance, 1898; Silas Longan, a teacher, 1900; and Mrs. Fannie Creagan, 1905.

27. Other Comments
   This originally was a square building with a truncated northeast corner. A one-story brick addition on the west side includes a garage and has approximately doubled the length of the structure from east to west. Pilasters (in effect) of brick extend from ground to cornice, adding an interesting touch. Second floor windows have been shortened, unfortunately. Original cornice ornamentation appears to have been removed. Storefront windows mostly residential neighborhood.

42. Further Description of Important Features

43. History and Significance
   Doll's Bakery, operated by Edward A. Doll, apparently was the first use of this building, in 1915. Mr. Doll, who lived at 710 E. Broadway (See Inventory Sheet No. 62) operated the bakery only for a short time. By 1917, the building was the Almquist Bakery and proprietor William J. Almquist was supplying hundreds of loaves of bread daily to area grocers. Mr. Almquist operated the bakery until the early 1940s. His own home at 415 W. Broadway also is included in the survey (See Inventory Sheet No. 65). Successive owners have used the building for such things as refrigerator sales, warehouse storage and an insurance claims district office, as well as the current ceramics store.

44. Description of Environment and Outbuildings
   Occupies corner lot where Ohio Avenue makes a westward jog.

42. FURTHER DESCRIPTION OF IMPORTANT FEATURES

Apparently this house was converted from an older style to the Craftsman style. Exposed rafters and wide, overhanging eaves supported by braces. The older brick section has relieving arch window heads and solid stone sills, indicating the house may be older than the "documented" date, above. House is unusually deep for its width. Patterned tin roof on east side and on centered shed-roof dormer; asphalt roof on west side. Sanborn-Perris map (1914) indicates that north side has been extended a few feet for approximately two-thirds of its length (there was a jog at the northwest end). Front porch and a small enclosed porch at the southwest corner apparently were added after 1914.

Original ownership undetermined. City directories listed the owner as Mrs. Emma E. West at around 1900. Subsequent owners have included two tanners (note the patterned tin roof), Thomas Perrin from approximately 1918 or 1919 through the early 1930s, and then Carl Richter, also a tanner, who previously lived next door at 1218 S. Ohio.

44. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS

Residential street.
Storage shed in rear.

42. FURTHER DESCRIPTION OF IMPORTANT FEATURES
    Gable-front with a gable kitchen addition on southwest corner, with gable extending into the main gable. Two small rooms over kitchen with trapdoor entrance. Modifications include lowered ceilings, concrete slab porches, conversion of northwest door into a window, dormer windows on east, and elimination of windows in a west wall.

43. HISTORY AND SIGNIFICANCE
    Original owner apparently a farmer. Accounts book, with 1880 and 1881 dates detailing sales and purchases of food and other products, was found sealed in roof when dormers added. Current owners Don and Nellie Mae Schlons purchased house in 1948. Room above kitchen is entered through a trapdoor. One of the oldest houses in Sedalia.

44. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS
    Occupies large corner tract (10 lots). Most neighboring houses are relatively new ranch style homes. Residential neighborhood.

48. DATE 12/84
49. REVISION DATE 12/84
2402 S. Ohio Ave.
Sedalia, Mo.

One of Rucker's daughters, Jane Rucker, became a public figure at the national level. She met and married Alben W. Barkley. Barkley was elected vice president of the United States in 1948, the year Harry Truman defeated Thomas E. Dewey. Barkley, a former Senator, served four years.

The backyard contains what at first glance appears to be either a one-room house or a very fancy shed, but is neither. It's a playhouse given to Jane and her sister Estelle by her father. It contains an iron pipe which Mrs. Curry believes was used as a fireman's pole by the girls.

The house is more sprawling than low-slung, but the effect is definitely Prairie--unless it's Colonial Revival! There are balustraded porches, bays, square columns, a porte cochere, multiple-windowed dormers and an exterior chimney with a flared top. Interestingly, the eaves also are flared.

Structural changes have been few. A pair of round wooden columns, painted white, dominates the spacious main hall. The dining room contains a one-story bay (east side) and wood paneling along the lower half of each wall. The living room (west side) has a brick fireplace painted a shade of white, as has most of the woodwork. On the south (rear) side is a sun-porch over a two-car garage. The kitchen has been expanded to include what had been an ice room. The original wooden porch has been replaced with a concrete slab. Walls are covered with steel siding.

Curry said Dr. Lamy, a survivor of the Bataan death march during World War II, built the bomb shelter. Dr. Lamy, who lived in the house during the 1960s and part of the 1950s, equipped the shelter with a hand-operated ventilation system and fortified it with sandbags, he said.

SCHLONS HOUSE
2402 S. Ohio Ave.

If houses could talk, the owners of the Schlons House at 2402 S. Ohio Ave. figure theirs might explain the tiny secret rooms over the kitchen that only can be entered through a trapdoor in the ceiling.

Although the builder's identity has not been determined, there is good reason to believe the Folk style dwelling was first used as a farm-house in the 1870s, making it one of the oldest houses in Sedalia. But why would a farmer need a place to hide?
Donald and Nellie Mae Schlons, co-owners since 1948, have a theory. They think bootleggers might have used the concealed rooms to store liquor or, in some cases, themselves when the law was expected. The Schlons have been reliably told, they say, that their house's basement was used as an illegal saloon during Prohibition. Today, the basement doesn't even have an empty bottle to suggest its possibly checkered past.

Actually, the stuccoed brick house almost did talk a few years ago. When a son of Mrs. Schlons was working on the east roof (dormers have been added), he discovered a ledger containing page after page of accounts apparently kept by the house's original owner and, presumably, builder. Pages dated 1880 and 1881 were filled with hundreds of neatly penned entries recording various sales and occasionally purchases of such things as plums, beans, cigars, grapes, cantaloupe, peaches, cabbage, etc. Unfortunately, the ledger seemingly doesn't contain the owner's name. But it does identify many of the farmer's customers. Schlons plans to hang onto this ledger.

The gable-front house has a gable kitchen addition on the southwest corner, with the gable extending into the main gable as if offset. The secret rooms are in the addition, which was probably designed with a cooking fireplace in the rear. Modifications have included de-windowing a west wall, replacement of wooden porches with slab porches, and lowering of ceilings. Interior woodwork is plain pine.

The Schlons, incidentally, have filled their house with a collection of bric-a-brac that must be seen to be appreciated.

SCRUTON HOUSE
724 W. 3rd St.

Call it coincidence, but the ca. 1876 Scruton House at 724 W. 3rd St. has been associated with Sedalia journalism for most of its existence. But maybe nothing less could be expected of a house once owned by an associate of Horace Greeley of "Go west, young man; go west!" fame.

Call it the Greeley Connection. Greeley and his paper, the New York Tribune, were giants of American journalism. And of all who have called the old brick house at Third and Grand home, the longest residency by far was that of the venerable George Henry Scruton family, certainly giants of the Sedalia Democrat.

**42. FURTHER DESCRIPTION OF IMPORTANT FEATURES**
A 90-foot tower with a pointed conical roof, speakers visible in its upper window openings, sets this church apart. Located in downtown Sedalia, this gray sandstone edifice is among the city's oldest church buildings. The original building plans specified overall dimensions of 64x112'. The balcony was sloped and used pews instead of chairs; reportedly this was the first application of its type in the midwest. The auditorium's dimensions were to be 64x64' with a 34' ceiling. #36. Major additions were made to the original building in 1925. The church was redecorated and renovated in the 1940s and 1950s. A new roof was installed in 1958.

The site was purchased in 1887 for $7,000 from William Latour, a prominent Sedalia photographer. The cornerstone was laid in 1888. Membership at this time was approximately 300. (The first Methodist service in Sedalia is said to have been in 1861.) The present building replaced a church at Fourth and Ohio (called the Ohio Street M.E. Church). The sanctuary was formally opened in 1891 by the Rev. H. G. Jackson, a former pastor in Sedalia who had come for the occasion from his new home in Chicago.

The church is said to have been fashioned from white sandstone blocks salvaged when the old Pettis County Courthouse burned in 1920. The original stones were recut as needed. A deacon said the Rev. W. T. Ward, founding pastor, was also an architect and was deeply involved in the construction. The main entrance consists of two large arched doorways in a flat-topped, two-story tower.

Numerous stained glass windows including a battery or cluster of windows set in one large, pointed arched opening on the Pettis Avenue side. Stone finials. Kitchen, dining area and office in basement have been remodeled.

Last summer (1984), the Ward Memorial Baptist Church celebrated its 106th anniversary. The church met at numerous other locations prior to obtaining its present building. The old Morgan Street Baptist Church congregation merged with the Ward Memorial congregation to form the present church.

**Description of Environment and Outbuildings**

Parsonage on nearby lot. Residential neighborhood. Also a frame 11' x 21' garage.

**HISTORY AND SIGNIFICANCE**

City directories indicate this was the home of W. T. Gorrell, "collector," from ca. 1894 until approximately 1900. The next owner or occupant apparently was James M. Castle, a carpenter, in the early 1900s.

Although the house was not traced back farther than 1894 in city directories, it appears to be at least as old as a house three blocks away which has some similar features (See Inventory Date Sheet No. 106, 916 S. Ohio Ave.).

**SOURCES OF INFORMATION**

City directories; observation; county assessor's records.
1222 S. Osage Ave.

Sedalia, Mo.
Truncated tower (two-story) on west facade. One-story porches on north and south facades, with balustraded railings at both first and second floor levels. Patterned masonry chimneys. Crowned windows. Doubled mini-brackets along cornice. Decorative trim around bay windows. Crowned windows. Tower's original roof and observation platform removed in 1934 when original front porch and entrance were redesigned by architect Thomas W. Best.

Considerable renovation including replacement of several second floor windows with shorter windows, elimination of windows, new wood siding and insulation. Interior very nice with Victorian furnishings.

Originally home of Judge Henry Lamm, who became a Missouri Supreme Court judge in 1905 after 30 years as a Sedalia attorney. Lamm was defeated when he ran for governor on Republican ticket in 1916. Other members of Lamm family have lived in house for many years including Donald S. Lamm and Donald S. Lamm, Jr. Lovelands purchased house approximately two years ago.

Occupy 3 1/2 lots on corner of residential block. Lamms originally owned entire block. Double-car garage in rear.
LAMM HOUSE
1303 S. Osage Ave.

With the exception of a modern kitchen and some padded arm chairs in the library, there isn't much inside the Henry Lamm House at 1303 S. Osage Ave. that doesn't look either old, Victorian, or both.

The view in almost any direction includes at least one candle in an intricate holder. Busts of Lincoln, Shakespeare, Napoleon and others are strategically placed. Even the modern kitchen, which lacks a fireplace, contains a transplanted wooden mantel. The trappings of another age, baroque more often than not, are seemingly everywhere. That's the way Loree Loveland likes it: very Victorian.

It had been one of Sedalia's finest, but by the time it was purchased two years ago by Mr. and Mrs. Walter B. Loveland, the ca. 1882 Italianate house needed extensive reconditioning. Among other things there were air leaks, water leaks, and the house was poorly insulated, Mrs. Loveland said.

Much of the visible exterior work involved windows. Eleven original windows, mostly on the second floor, were replaced by much shorter Anderson windows. Six other windows and two dummy windows were eliminated as part of the same project. This type of alteration is frowned upon since it destroys a structure's original scale and proportion. New wood siding and insulation enhanced the structure's livability without detracting from its historic worth.

Mrs. Loveland has a detailed photographic record of "before and after" snapshots.

An artist's drawing indicates that the house originally had an observation tower resembling a Turkish minaret above the double bay on the west (main) facade. Mrs. Loveland said the tower was removed in 1934, when the south porch was redone and enlarged.

Mrs. Loveland has architect Thomas W. Bast's original blueprints for the new porch, which called for cypress flooring with 1/4" spacing to provide ventilation and discourage rot.

Exterior features include patterned masonry chimneys, crowned windows, balustraded upper and lower porches, a double bay (the truncated tower), a single bay, decorative panels and other trim around all bay
windows, overhanging eaves supported by decorative brackets, double
doors with a double transom window, dentils, semicircular gable
window and decorative arch that flows from the cornice above the west
(main) entrance to the veranda.

Interestingly, this minor-keyed arch and the small semicircular gable
window provide virtually the only significant non-angular lines in the
entire exterior house.

The interior remains in very good condition with much that appears
to be original. There are five fireplaces and mantels made of various com-
binations of cherry, marble and slate. The first floor has 12-foot ceilings
with carved trim 18" below the ceiling line. The den or library has built-
in 10-foot walnut bookcases with glass doors. There are combination gas and
electric ceiling fixtures in the library, living room and parlor. Some
door archways contain spindlework panels. There's a lovely curved walnut
staircase in the entrance hall. There's a mechanical door bell. There's
a maid's buzzer on the floor under the dining room table.

The original owner was Henry Lamm, a native of Ohio who came to
Sedalia in 1869. An attorney, he formed a partnership with Peter H.
Sangree in 1875. This partnership lasted until 1905, when Lamm was appoint-
ed a Missouri Supreme Court judge. In 1916, Judge Lamm ran for governor
on the Republican ticket and lost by a narrow margin despite a Democratic
landslide.51

In 1904, a biographical sketch of Lamm described him as "one of the
purest men and ablest lawyers in the state. He is also a speaker of great
effectiveness, either at the forum or on the stump, and is a student who
loves books. He is a fluent and charming writer, though but all too
seldom contributing to the public prints. He has been a member of the
law firm of Sangree & Lamm since 1875--a firm that is known far beyond
the borders of Missouri."52

Subsequent owners have been his son, Donald S. Lamm, also an
attorney, and Donald S. Lamm, Jr.

42. Further Description of Important Features

A Folk Victorian house with imbricated shingles in gables, turned column porch supports and spindlework, some leaded windows. There are two small covered porches on the north side. Part of the porch at the northeast end appears to have been enclosed. A room addition is apparent at the southeast corner.

43. History and Significance

There is speculation that this building was used as a "caretaker" house for the Lamm House several yards to the north. Judge Henry Lamm and the Lamm family owned this property and the entire block for many years. An 1891 city directory lists the occupant as Mrs. Margaret Jennie Smith, widow of Daniel Smith. Evidently Mrs. Smith was the occupant until approximately 1915. Lee H. Peabody, occupation paperhanger, became the occupant or owner in approximately 1920.

44. Description of Environment and Outbuildings

Frame garage. Residential block.

45. Sources of Information

City directories; Mrs. Loree Loveland; county assessor's records; observation.

12. Further Description of Important Features
    The truncated northeast corner, which contains the entrance door, is a prominent detail. Other features include semi-circular arches with keystones of contrasting stone and brickwork trim under an area which probably contained a projecting cornice. Alterations include new doorway, closed in arches, and one-story addition to west. Basement used for storage, second floor for offices.

13. History and Significance
    Originally the floral shop of Joseph Gelven & Son (from ca. 1900 to 1913 or so), this building was owned by Archias Floral Co. by 1914 and has been a greenhouse and nursery since that time. Archias Floral Co. is owned by Archias Seed Co., a wholesale and retail supplier of seeds, trees, and garden supplies of all types. The parent company was formed by Leon J. Archias, who came to the U.S. from France in 1853. The Archias firm was established in Sedalia in 1884.

12/84 -
CANNADAY HOUSE
420 S. Park Ave.

It had only been a few years since the century turned and she was just a little girl, but Mrs. N. U. Renshaw remembers very clearly going to look at the Cannaday House, 420 S. Park Ave., in a horse and buggy. Her parents were shopping for a new house. Her mother said, "It looked like shredded wheat." Her father said, "Let's buy it!"

And they did.

Dr. Julius E. Cannaday, Mrs. Renshaw's father, became the second owner of the distinctive brick house with the arched upstairs porch in approximately 1910. The ca. 1905 house was built for Joseph Gelven, a florist who had a shop down the street at 400 S. Park. Today Gelven's old building is occupied by Archias Floral Co.

Look for the "shredded wheat" in the porch railings. Little rough-faced blocks of what appear to be sandstone are set in a simple alternating layer pattern, with spaces. The railings are topped by slabs of smooth stone. A wider band of smooth stone is used as a belt course. Window lintels and lugsills are of rough-hewn stone. A horizontal panel with a floral design serves as a decorative plaque above the main entrance.

The arched porch is essentially a continuation of the entryway, which is perfectly matched by the arch's span.

Mrs. Renshaw, who today lives at another address in Sedalia, said the open porch often was used for sleeping on hot summer nights.

"The one thing my mother never liked about that house was the way it reminded her of an advertisement for shredded wheat!" she said.

Dr. Cannaday, who lived in the hipped roof, square Victorian bungalow until his death in the late 1950s, offered correspondence courses in eczema, his specialty, and in floriculture, his favorite hobby. A newspaper story on Dr. Cannaday claims that a million people purchased the courses over 30 years. The $50 floriculture course had the fewest students, 10,000, it reported.

Present owner Wayne W. Westbrooke, Jr., said the house originally cost $18,000, which would have been rather expensive for its day. The architect may have been John Colaflower. The style, especially the emphasis on the bricked arch and the use of a pressed design in the trim above the porch, is reminiscent of his work. The general contractor was Frank Hardin, Westbrooke said.
The interior is finished in cherry, oak and yellow pine. There are several leaded glass windows. The front door has a transom window.

Large square posts made of sandstone blocks are all that remain of a wrought iron fence that once encircled the property.

41. DESCRIPTION OF IMPORTANT FEATURES
   Gambrel roof facing east and west with gambrel-roofed dormers on north and south. A gable roof intersects in a north-south direction. Decorative belt course at first-floor window sill level. Straight window heads of smooth stone. Fishscale shingles dominate second story but diamond shaped shingles used on square bay near northwest corner as well as on dormers. Pressed decorative trim used at second story level. Unusual cornice above second story windows on west facade. Decorative motif in north gable consists of several designs (sunburst; cruciform; wavy lines). Arched main entrance with transom window. Replacement siding added to southwest dormer and west gable, etc. One of Sedalia’s more unusual houses. Assorted sizes of windows.

42. HISTORY AND SIGNIFICANCE
   Original owner possibly Dr. Thompson P. McCluney, Pettis County coroner, during early 1900s. Apparently there have been several owners. Some other early owners: James B. Mockbee, a grocer; Darwin D. Bennett, a marine engineer, and James M. Potter.

43. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS
   On a corner lot in a residential neighborhood.

1001 S. Vermont Ave.
Sedalia, Mo.
This house apparently built within a few years of adjacent house at 1001 S. Vermont (See Inventory Sheet No. 115). Similarities include a rough brick belt course at the lower sill level, the variety of gable decorations, the use of mixed shingles and varied window sizes. House has a steep gabled roof with unusual intersecting gables. Decorative shingles in gables are of different shape than at 1001 S. Vermont. Full-width front porch with square wooden columns.

George Edmonson, a clerk for the Missouri Pacific Railroad, was the owner in 1898. Charles E. Lancaster, a railroad mail clerk, was the owner in 1900. John T. Carman, a "traveler" (apparently a traveling salesman) was the owner in 1904. There have been numerous other owners.

Symmetry is the keynote here. Note the front gables flanking a central gable above the main entry. Porch supports are square, tapering, subtly decorated and precisely placed. Entrance is approximately three feet forward of front or main wall. Front porch is full-width. Roof is hipped and gabled. Porch on south is latticed. Interior has been remodeled.

Originally this structure was a farmhouse owned by Andrew J. Bowman from ca. 1908 until approximately 1930. It apparently was the first or one of the first buildings in its part of Sedalia. With the exception of the Wheel Inn Drive In, it is the westernmost structure included in the inventory.

Residential neighborhood. Two-car frame garage, 20' x 27'. Concrete patio.

42. FURTHER DESCRIPTION OF IMPORTANT FEATURES

Square tower has graduated pilasters accented by smooth gray stone at each gradation, similar to the United Church of Christ but plain in this case rather than shaped. Triangular keystones in window heads. Rounded bay on south facade with trio of extremely thin stained glass windows. Decorative brickwork along cornice and gables. Rough stone belt molding in tower complements rough stone of foundation. Two circular, bricked areas of tower contain crosses.

43. HISTORY AND SIGNIFICANCE

This church building apparently was a long time coming. W. S. Epperson, the architect, was commissioned to prepare plans in 1891 for a building that would cost $30,000. Patrick McNern, one of the early residents and entrepreneurs of East Sedalia, is said to have donated the stone for the foundation from his quarry northeast of the city. Other parishioners met the stone and funds for 1909. Construction apparently did not resume until approximately 1907. The church was dedicated in 1910.

The previous church was St. Vincent's, a brick building which burned in approximately 1902. Services were held in a school until the present building was completed. Because so many members of the parish were Irish, the new church building was dedicated to St. Patrick.

Corner location a few blocks east of downtown Sedalia.

44. DESCRIPTION OF ENVIRONMENTS AND OUTBUILDINGS

45. SOURCES OF INFORMATION Newspaper article, "Catholic Masses First Said in Homes," undated Sedalia Democrat; county assessor's records; observation.

### architectural/historic inventory survey form

**Location:** Show-Me Regional Planning Commission

#### description of location

Smith & Martin's 2nd Addition South 87½' of Lots 7 & 8 Block 25 Northwest corner of West Seventh Street and South Washington Avenue

*Alternate address: 317 E. 7th

#### further description of important features

Double porch with square columns on east side (Washington Avenue); single porch with square columns and decorated pediment on south facade (Seventh Street). Hipped dormers. This is a large, relatively simple brick example of a Greek Revival-influenced house.

#### history and significance

First owner believed to have been John F. Antes, manager of the Sedalia Gas Light Co. during its beginnings and later operator of a grocery store at 514 S. Ohio, called John F. Antes & Co. Antes also was proprietor of Capital Roller Mills, a flour manufacturing company on Mill Street near the Mo Pac Railroad. The next owner apparently was Timothy Gallivan, an engineer for the Mo Pac, from early in the century through approximately 1919 or 1920. The next owner apparently was Roy M. Keller, a chiropractor.

#### description of environment and outbuildings

Occupies corner lot in residential section of Sedalia.

#### sources of information

City directories; observation; county assessor's records; Life in Pettis County (Lang, 1975, p. 502)
