Lots 1, 2 and 2G, Block 3, Ellenwood SD

**Owner's Name & Address, if known**

Eighth Church of Christ Scientist

**Other Surveys in Which Included**

27. Catholic Church

**Other Description of Important Features**

Constructed of variegated buff/brown brick trimmed with cream terra cotta and roofed with red tile. Principal triple-door entrance faces east and is sheltered by a shed roof loggia. Gable motif of large pointed-arch embracing triplet of Gothic windows, flanked by terra cotta capped buttresses, is repeated on the side elevations of the auditorium. Round-arched corbel table defines the cornice area of the vestibule while more elaborated pointed-arch blind arcading trims gables and cornice of the auditorium. The vestibule

**History and Significance**

The First Church of Christ Scientist on Kingshighway was founded in 1894 (present building 1904) and was one of the first five in the world. The Eighth was built to the designs of Aegerter and Bailey, who later designed the first phase of the St. Louis County Hospital. The lot was the site of the U. S. Life Saving Exhibit Lake during the 1904 World's Fair.

**Description of Environment and Outbuildings**

The building is on a wedge-shaped lot with Wydown Boulevard to the north, Alexander to the south, and the point facing Skinker Boulevard to the east.

**Sources of Information**

Building Permit 6-23-28, $180,000

**Further Description of Important Features**: Constructed of beige brick trimmed with light brown brick. Octagonal columns banded with darker brick support curvilinear porch roof on south and east elevations. Slab chimney is situated at east end. Pyramidal hipped roof garage is attached at west end, opening onto Alexander. Windows are 6-over-6, but there are several French doors. Hip-roofed frame dormers extend from north and east sides of the roof.

**History and Significance**: The original owner was Herman V. Shanks, Mutual Cleaning & Dyeing Co.; President, Sa'Rifa Investment Company. Shanks bought the lot from the Skinkers 11-22-46.

**Description of Environment and Outbuildings**: The house occupies a wedge-shaped lot at the southwest corner of Alexander and Woodbourne Drives. The northwest corner of the lot is in St. Louis County.

**Further Description of Important Features**
The front elevation is a window wall screened by a gallery. The gallery parapet is small ceramic tiles of a light blue shade, and the posts are slender steel I-beams. Each of the four rooms has a five-part window - two wide single panes and three narrower units of three panes each. The main part of the building is on a higher level than the ground floor of the adjacent temple, and the buildings are connected by a two-story link at the back of the lot, with the entrance through a forecourt. There is also an entrance from the side yard toward Fauquier Drive.

**History and Significance**
The building was named in honor of Rabbi Samuel Thurman (rabbi 1914-1958). The architects are now the largest firm in St. Louis, and this was one of their first designs.

**Description of Environment and Outbuildings**
The side yard toward Fauquier Drive was the site of a two-story brick house which was recently demolished.

**Sources of Information**

Alfred Steiner House
6222 Fauquier Drive

43. continued

Angelo Corrubia (c. 1880-1943) and Gale Henderson (1890-1969) both worked with other partners and alone. In 1923 Corrubia built Duncker Hall on the campus of Washington University, the only building on campus not designed by Jamieson & Spearl until 1953. He was also known as an artist and teacher. Henderson had been the partner of Raymond Maritz until 1920. In later years he often acted as his own developer, building luxury houses in Ladue.

Further Description of Important Features
   Constructed of textured, variegated yellow/buff brick and trimmed with white stone. Small round windows are glazed with art glass. Round arch French doors open from living room to terrace.

History and Significance
   The house was built by Albert Mayer, president of A. Mayer Building & Realty Company, who lived there until he constructed 6229 Fauquier in 1929. In 1932 James R. Brashear, president of Brashear Trunk Company, bought the house.

Description of Environment and Outbuildings
   A matching garage is located at the southeast corner of the lot.

First Albert Mayer House
6228 Fauquier Drive
Further Description of Important Features: Constructed variegated & textured buff brick, trimmed with stone. Large wood brackets & exposed rafters appear at eaves. Projecting entrance bay features dark wood door with circular art glass & 2nd story half-timbering effect of brick & stucco. Round-arch French doors open to terrace. Attached 2-car garage is at east end.

History and Significance: The house was built by Albert Mayer, president of Mayer Building & Realty Co., who lived there until 1935, when he sold to Albano Marchi, vice-president of Italo-American Importing Company. Mayer moved here from 6228 Fauquier, across the street.

Description of Environment and Outbuildings: The west side of the house faces Woodbourne Drive.
Second Albert Mayer House
6229 Fauquier Drive
Further Description of Important Features

Symmetrical facade with stone trimmed entrance. Rafters are exposed on primary facade; wood brackets trim gable ends. Red/ochre textured brick is employed.

History and Significance

This house was built for Herman Spoehr, Sec't Union Electric Light and Power Company; and Sec't National Subway Company of Missouri. The architect Walter P. Manske began his career in 1921 and designed many houses in the 1920's and 1930's, particularly in the River Oaks and Bellefontaine Road areas of St. Louis County and Country Club Hills in Belleville, Illinois. His Ritz Hotel in Paducah, Kentucky, is listed in the

**Further Description of Important Features**  
Planar facade - center door with stone surround. First story windows on primary and side elevation are gauged brick jack arches with slender stone keystones. 8-over-8 double-hung windows on front and sides. First story primary facade windows originally may have extended to ground level sills but now have wood panels one-third way up. Upper windows break a few inches into the plain white frieze.

**History and Significance**  
Although no building permit exists, the house most likely was built in 1937 by Amzi Realty for the Kroenlein family. Amzi, incorporated in 1908, was headed by John Zimmerman and Bertram Amber, who also were partners in a general building contracting firm. Amber lived next door at 6244 Fauquier; he purchased adjacent lot 7 in 1924 and transferred it to Amzi the same year. 6250 Fauquier does not appear in reverse City Directories.

**Description of Environment and Outbuildings**  
A matching garage is at the Southeast corner of the lot.

until 1938, a year after Amzi sold the property (1937) to the Kroenlein family, three members of whom were public school teachers.
Further Description of Important Features: The first floor of this Dutch Colonial house is stuccoed. The front door has sidelights and a gabled hood on brackets. The front windows are in three parts with 6-over-1 center sashes and narrow 4-over-1 sides. The roof has a concave curve and a broad overhang in front. A wide shed-roof dormer has three 8-over-1 windows with hinged shutters. At the east end a one-story wing has a rooftop terrace with iron balustrade. There is also a 3-bay gambrel-roofed rear wing with shed-roof dormer.

History and Significance: The house was originally built for William B. Knight Jr., a broker. No reference to the building permit has been found in the St. Louis Daily Record.

Description of Environment and Outbuildings: The west part of this lot is in St. Louis County. A flat-roofed frame garage opens west from the rear of the house.

**Description of Important Features**

The church was constructed in two stages. The earliest part (now the Church School) built 1925-26, consists of a bell tower rising 85 feet, joined to the north side of a rectangular structure (oriented east-west longitudinally); a two-bay wing projects from the west elevation. The 1931 rectangular auditorium joins the original chapel on the north elevation.

The 1925 Chapel features east and west crenellated gable-ends trimmed with crocketed pinnacles, and an oriel with crenellated parapet and

**Description of Environment and Outbuildings**

The church is placed at an angle to Skinker so that the front also overlooks the intersection of Alexander and Wydown.

**Sources of Information**

Scharff, History of St. Louis (1803), p. 1709
Memorial Presbyterian Church
201 South Skinker

42. continued

richly carved base. Two and three part rectangular openings with drip moldings are employed throughout, except in a shallow bay on the south elevation where two tracery Gothic windows appear.

The tower entrance on the east elevation is articulated with a richly embellished pointed arch displaying carved stone ornament enframing oak doors with leaded glass; a large tracery Gothic window surmounts the entrance.

The 1931 seven-bay nave/auditorium is defined by crocketed, pinnacled buttresses. The principal entrance on the north elevation is recessed under a broad segmental arch; a large stained glass window with stone tracery is above. A stone porte cochere is located near the northwest corner of the structure.

The interior appears to be in near-original condition, surviving with carved dark oak pulpit, lectern, baptismal font, pews and hanging lamps of brass and glass. The vestibule opens to the auditorium through dark oak doors glazed with leaded glass set in Gothic arches. The ceiling is elaborated with a tie-beam truss system which defines bays.

In 1959, a Chapel and Educational Building was added at the southwest corner of the site; it intersects with the 1925 structure. The stone, Gothic detailed building is harmoniously integrated with the church through similar design and materials. The chapel section extends four bays (east-west) and is articulated with paired lancet windows separated by off-set buttresses. The west, gable-end is pierced with three lancet windows; a Gothic-arched entrance is located in the south elevation.

43. continued

and Compton Avenues. The "Washington and Compton Avenue Presbyterian Church" started a new building on Skinker in 1925 and the next year changed its name to "Memorial Presbyterian Church of St. Louis." The first service in the new building was June 13, 1926. The first part of the building included the tower and the wing facing Skinker. Its architect, Albert B. Groves, was born in Providence, Rhode Island, in 1868 and graduated from Cornell University in 1888. He came to St. Louis in 1891 to work for Grable & Weber. In 1895 the firm became Grable, Weber & Groves, in 1898 Weber & Groves. Weber died in 1905. Groves continued alone until his own death November 30, 1925, and this must have been one of his last designs. He had a very successful practice, and among his best-known designs are Union Avenue Christian and Westminster Presbyterian Churches, Christian Science Churches on Russell and Page,
the Tuscan Masonic temple and the Medical Society Building. His houses include 30, 32 and 47 Portland Place and 11, 14 and 43 Washington Terrace.

In 1931 the main auditorium of the church was added to designs of Aegerter & Bailey, who were building the County Hospital at the same time. It harmonizes closely with the original part of the building and may be derived from designs by Groves. A third building was added in 1959-1960. Built through a bequest of Mrs. Leonard Matthews, Jr., the Mathews Chapel and Educational Building was designed by P. John Hoener & Associates. This gave the church a total of 45 classrooms.

The church organ, a memorial to Dr. Frank W. Sneed, twice pastor of the church, is by the Aeolian Company of New York. It contains 3005 pipes, an Aeolian harp of 61 tones, and chimes of 20 tones.

**Further Description of Important Features**

The house is faced with rock-faced stone and trimmed with smooth stone. Green tile covers the roof. A round-arched porte-cochere is located on the north elevation. Some windows are 8-over-8 with transoms, and a few are round-headed. The entry is a large round arch, within which are set the door with toplight and sidelong.

**History and Significance**

The original owner was John J. Cahalin. Early directories give the number of this house as 47 South Skinker.

**Description of Environment and Outbuildings**

The house is adjacent to the large Memorial Presbyterian Church to the north and to a house converted to a religious organization to the south.

Further Description of Important Features

Constructed of textured, variegated red brick and roofed with red tile. Fluted wood columns support an entablature and round-arched pediment. First story window heads feature patterned brickwork in round blind arches. French doors open to shallow balconies.

History and Significance

The original owner was Myrtel M. Hanibal. The building permit seems not to have been recorded in the Daily Record.

Description of Environment and Outbuildings

A matching garage is in the yard behind the house. To the south is United Hebrew Temple and to the north a house that is now a Vedanta Temple. Skinker Boulevard is one of the city's major arteries.

**Further Description of Important Features**

Exterior: The design features simple geometric masses culminating in a shallow dome. Expanses of planar walls of buff/yellow brick are subtly relieved by stretcher horizontal banding of a darker tone brick. Ornament is restrained, confined to a simple stone, chevron-pattern cornice wrapping around the main block (auditorium), and a stone diamond-pattern cornice running around the lower wings and the base of the dome. Triple-door entrance is monumentalized by a large round-arch rising above the dome base which.

**History and Significance**

At the time it was built, United Hebrew was reported to be one of the three largest Jewish temples in the nation. The design (massive & detailing) is closely related to Alfred S. Alschuler's Isaiah Temple (1923-24) in Chicago, a widely praised and published temple which heralded the Byzantine style and centralized, dome plan in Chicago synagogue architecture. Alschuler himself acknowledged influence of the 1908 synagogue at.

carries the inscription "My House Shall Be Called A House Of Prayer For All Peoples"; stone columns with "Byzantine" capitals carry round arches each glazed with art glass depicting a 7-arm candelabra; the Star of David; and the Torah. Filigree pierced stonework fills the spandrel of the outside framing arch.

Interior: Although the interior was renovated in 1967, the principal feature of the assembly room or auditorium remains intact: a dramatic and richly embellished octagonal "tent" ceiling. The center of the domical ceiling features a gold Star of David and radiating sunburst motif. Foliated motifs (emanating from cornucopias) are fashioned in plaster relief and cover the surface of the ceiling. Original leaded glass windows with amber/green panes remain as do oak pews with Star of David on the end panels (they have been "antiqued", however).

43. continued

Essen, Germany, and of motifs found on recently excavated fragments of a temple in Palestine. Both in early 20th century Europe and America, the Byzantine style was believed to be an appropriate expression of the ancient eastern origin and heritage of the Jews. Photos and plans of the temple were published in the November 5, 1928 issue of The American Architect.

Officially founded in 1841, the United Hebrew Congregation was the first established in St. Louis and in the trans-Mississippian west. It began as an Orthodox congregation, but by 1860 gradually began to swing to Reform. In 1881 a modified, less traditional ritual was adopted, the same year the group moved west into a new Temple at 21st & Olive which was installed with family pews instead of the traditional separate balcony for women. The Reform process was considered complete in 1913 when the Union Prayer Book was adopted.

The Skinker Avenue temple is the fifth building the congregation has occupied, three of which were constructed for the purpose; the first four have been demolished.

BASEMENT AND GROUND FLOOR PLANS, UNITED HEBREW TEMPLE, ST. LOUIS, MO.
MARITZ & YOUNG, INC., ARCHITECTS—GABRIEL PERRAND, ASSOCIATE ARCHITECT
Simple Gothic Revival structure has ashlar stone trim at corners and around doors and windows. Gable front has large double lancet window and round window above. Side windows are rectangular casements of small leaded diamond-shaped panes. Brick buttresses stand between windows. Main entry is last bay on Fauquier, where a gabled narthex stands out from main wall. There is a secondary entrance on the alley.

Although this building was constructed after the period of significance of this district, it harmonizes very well with the prevailing Period Revival style. The architect Gale E. Henderson (1890-1969) was best known for his free-style Georgian houses. He had briefly worked in partnership with Raymond Maritz and with Angelo Corrubia. In his later career he often acted as his own developer. The congregation has its origins in the
Central Church of Christ

Campbellite movement, which was organized in St. Louis about 1830. From this movement spring the Disciples of Christ, the Independent Christian Church, and the Churches of Christ in the U.S. Several small groups merged in 1940 to form the Central Church of Christ at Euclid and Cote Brilliant. The congregation moved to this location in 1951.

**Further Description of Important Features**  
Constructed of textured, beige/red brick (all stretchers) and accented with quarry-faced white stone. Dark red flat tile covers the roof. Dark stained wood forms lintels and door surrounds. Windows are casements. South wing has only one story in front.

**History and Significance**  
Original owner was John C. Greulich, president of John C. Greulich Realty and Investment Company. In 1934, Greulich sold to Oliver T. Remmers, a lawyer.

**Description of Environment and Outbuildings**  
Iron gates supported by brick and stone piers are installed at driveway entrance at north end of lot. Garage is behind and matches house.

Further Description of Important Features
Constructed of red skintled brick with a salmon tile roof. Dark stained wood is employed for window lintels, porch supports and gables. Gable clapboards have wavy edges. Double-hung windows are glazed with diamond-pattern leaded glass. Garage is located in the basement.

History and Significance
Built by contractor/owner Herbert M. Edmunds. By 1933 the house was occupied by David C. Andrews, district manager, J. C. Penney. Saum Architects consisted of brothers Frank J. Saum (1885-c.1964) and Thomas P. Saum (1888-c.1954). Their father was master of Soulard Market. The firm operated from 1915 through 1947. Their best-known work is the Saum Hotel on South Grand.

Description of Environment and Outbuildings
The building permit for this house was taken out the same day as for 238 Woodbourne next door, although the two differ in style.

Constructured of variegated, textured red brick. Center bay entrance features pediment carried by fluted Doric columns of wood. Windows employ 6-over-6 lights, stone lintels, and false shutters. A gabled double-window dormer rises over the entry bay.

The house was built and occupied by contractor Herbert M. Edmunds. In 1933, Edmunds sold to John K. Switzer, partner in Switzer's Yellow Jacket Company; and Missouri Candy Company. Saum Architects consisted of brothers Frank J. Saum (1885-c.1964) and Thomas P. Saum (1888-c.1954). Their father was master of Soulard Market. The firm operated from 1915 through 1947. **Further Description of Important Features**

Constructed of variegated red brick with polychrome slate roof. Gable roof overhangs facade wall to create porch. Front entrance is set in round tower with steep, slate-clad conical roof. Wood lintels are employed. Garage is in basement at rear. Gable ends and dormers above porch are clapboards with wavy edges.

**Description of Environment and Outbuildings**

42 Further Description of Important Features: Constructed of variegated red brick with polychrome slate roof. Gable roof overhangs facade wall to create porch. Front entrance is set in round tower with steep, slate-clad conical roof. Wood lintels are employed. Garage is in basement at rear. Gable ends and dormers above porch are clapboards with wavy edges.

43 History and Significance: This house was built for Alfred N. Laret, assistant to the Chief Purchasing Agent of the St. Louis-San Francisco Railway. Dan Mullen (1888-1954) had trained in the offices of LaBeaume & Klein and Klipstein and Rathmann. He often worked with developers Meyer & Comfort, especially in Fair Oaks, Picardy and Clermont in Ladue, and he designed the Seven Gables Building in Clayton for their offices.

**Further Description of Important Features**

Complicated facade has bay window at left end, tall diamond-paned window to left of entry, and timber framing over 2nd-floor window at right corner. Entry has 3-bay stone loggia lined inside with olive green glazed tile in recess. Door is arched and is flanked by small arched window. Dormers are segmental-arched. Basement garage is approached through wrought-iron arch in a brick wall facing Woodbourne.

**History and Significance**

The first owner was Arthur E. Woerheide, Deputy Clerk, City of St. Louis. In 1954 he built four other houses in this subdivision. Roy Woerheide designed and built five houses on Alexander in 1929: Numbers 6345, 6347, 6349, 6363 and 6375.

**Description of Environment and Outbuildings**

The house really faces Fauquier, with the end chimney toward Woodbourne. The west side yard has a fountain and a fenced former tennis court turned garden.

**Sources of Information**

Building Permit 5-2-28

Prepared by
M. M. Stiritz

Organization
St. Louis County Parks

Date
11/87
The house was built for Fred J. Voepel. The architect Adolph F. Stauder, born in 1879, was the son of contractor-turned-architect Joseph Stauder. Trained at the Chicago Art Institute, Adolph began to practice on his own in 1920. In 1930 he was joined by his son Arthur, and Arthur Junior joined the firm in the 1950's. The Stauders were best known for their Catholic churches and institutions. Most of their work was in South St. Louis, but Adolph also did 20 Carrossel near here in 1927.
Fred J. Voepel House
262 Woodbourne Drive

42. continued

Above this is a second-floor oriel. Right bay is only one story high and has a gable at the south end, where an end chimney has scalloped chimney breasts. Other windows are 6-over-1.
The lot was purchased 4-01-29 by Guarlford Realty and Investment Company, whose president and vice president, Richard A. and George B. Bullock, were building contractors for the house. Guarlford Company sold the house 12-26-29 to Bernard Wides, president of Monark Petroleum Company. In 1964, Wides sold to Thomas Eagleton, who was elected U.S. Senator from Missouri in 1968. The Bullock real estate interests frequently employed architects and engineers for the houses they sold. In 1970, the Bullock family's real estate business was organized into Bullock Real Estate and Construction, with Richard Bullock as president. The company was later acquired by another real estate company. In 1981, the company began to focus on the development of new properties and the sale of them to investors and developers. The company was later acquired by another real estate company and continues to operate today.
Guarford-Wides House
268 Woodbourne Drive

43. continued

Nolte & Nauman, including three other houses in the Ellenwood Subdivision: 6336, 6340, and 6344 Wydown Blvd.

Edward F. Nolte (1870-1944) and Fred Nauman worked together from 1913 to about 1934. Their houses ranged from large ones on the private places to more modest ones done for real estate companies. Their Lambskin Temple on South Kingshighway is an early example of Art Deco.

<td>24 History and Significance</td>
<td>The original owner was Francis Saeger. The architect Julius E. Tarling (1890-1975) graduated from Washington University in 1913 and had his office in Webster Groves. He designed most of the houses in the Pasadena Hills area near Normandy but was best known for his additions to Eden Seminary and the Evangelical Children's Home. He retired about 1947. This design is typical of Early Modern houses in St. Louis, with hipped roof, casement windows, and a variety of brick moldings. The house is immediately west of the Eighth Church of Christ, Scientist, and is the first of the long row of residences on Wydown.</td>

**Further Description of Important Features:**
Projecting horizontal bands of brick create rusticated first story. Ornament is confined to denticulated second story sill and lintel courses, and dentils over the front doorway. Casement windows on both stories. False shutters detract from modern lines of the house.

42. Further Description of Important Features
The center 3 bays of this house have an almost pyramidal roof. The right front bay, which features the entry, is shallower and has a lower roof. To the left (east) is a one-bay, one-story sunporch wing, the windows of which have curly wrought-iron balconnettes. The main floor windows are casements, grouped over stone sills in groups of 3 on the first floor and 2 on the second. To the right (west) of the entry is a lean-to wing with fan-lighted casement windows. This is one corner of the rear.

43. History and Significance
The Daily Record reported that this house was to cost $13,000. The owner and contractor Harry F. Tacke lived at 5147 Rosa; the following year he built 6360 Wydown, a few doors away. Both were speculative. This house was purchased by Arthur F. Kerckhoff, who was an official of the Pevely Dairy. He was elected president of the firm in 1947 and about that time moved farther west. Treasurer and Chairman of the Board from the mid-1950s.

44. Description of Environment and Outbuildings
The front lawn is steeply terraced. The driveway is at the west side of the house. In the back yard is a small metal storage building and a larger garage-sized building with a gable roof. Until after WWII this was the first house on the south side of the street.

**History and Significance**

The lot was sold to Vlasta Klimt in 1926 for exactly $6,669.07, but the first street directory listing was in 1930, when Mrs. Madeleine Rossi, who had taken out the building permit in 1928, lived there. The architect Gustav P. Wuest had been active in local architecture for years, helping on the designs of Union Station and the St. Louis City Hall in the 1890s. He died in 1947 at the age of 85.

**Description of Environment and Outbuildings**

A garage was constructed at the same time as the house at the rear. It is approached from a drive on the west side of the property.
