42. FURTHER DESCRIPTION OF IMPORTANT FEATURES

The Humboldt School was the first elementary school Ittner designed with an auditorium (seats 463). Its twin stair towers dominate, having open pointed arches, corbelled & dentilled cornices and exposed rafters, with corbelled blind arches below. The red brick foundation gives way above to a brown and yellow mix, with a basketweave pattern in the gables, continuing around the building in the frieze. One-story, 7-bay section projects to the sidewalk, having a dentilled cornice, corbelled at the corners.

43. HISTORY AND SIGNIFICANCE
Originally named for naturalist Alexander Humboldt (1769-1859).
Original cost $181,131.

44. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS

45. SOURCES OF INFORMATION

REVISION DATE(S):
a flat roof, and seven pointed-arched windows with four round windows above; the latter filled with mosaic tiles depicting a skater, writer, shoemaker and climber. The pointed arches are repeated in the second floor of the body of the building; these are blind above with tracery below. Other windows are rectilinear, with soldier arches. Dentilled cornice of the center unit returns around the rest of the building at the second-story sill level. Grade slopes away from the building toward the rear. Iron fence.

#34 of 47

Photographer: Cynthia Longwisch
Date: February 1987
Negative: Landmarks Assn. of St. Louis, Inc.
Camera facing northeast
One-story, square bay projects forward in the center of the main body of the building, having a flat roof and raised brick diapering at the cornice that matches the rest of the building. The parapeted gables are filled with the same raised diapering and feature small round-arched windows. The raised diapered cornice returns at the sides and around the two stair towers. These are located in the corners made by the wings; they feature triple horseshoe arches trimmed in stone and basketweave-patterned brick at the first floor. Random, rough-faced limestone insets highlight the brick ground floor. Raised brick wreaths fit between 1st & 2nd floor windows. (over)

Windows have pressed-brick surrounds and stone sills. Elaborate tiered landscaping leads up to the entrances, which flank the 1-story center bay; brick and limestone retaining walls have brick balustrades and stone coping. Chimneys feature corbeling and blind arches. Two small square dormers. Iron fence.

**DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS**

Twin towers distinguish this school, each featuring open brick arcing with stone trim, a stone string course and small stone-coped parapets. Between the towers, round-arched arcing of stucco runs the length of the 3rd floor, each having a tiny round window in the center. This pattern is repeated below in the newer, non-contributing addition. Basement windows have brick surrounds set into rough-faced limestone foundation. Stone water table & coping on wings' parapets. Eaves have wide overhangs with exposed rafter ends.

Franklin School

HISTORY AND SIGNIFICANCE

Originally named for Benjamin Franklin (1706-90), statesman. Built initially as a "colored" elementary school; used briefly as Franklin Branch High School in the early 1930s; used as an elementary school in the 1950s-60s; more recently used as a vocational secondary school. Original cost: $214,528.

42. FURTHER DESCRIPTION OF IMPORTANT FEATURES

Balustraded, 2-story block projects out from the 4-story remainder of the building; it features quoined corners and window surrounds, stone lintel course & cornice and stone "Franklin School" plaques. The taller portion of the building also features corner quoining. Flat arches over windows have stone keystones. Stone is also used as a lintel course in the 4th story and for the modillions, water table and entrance surrounds (cornice is copper). Ground floor of 4-story portion is rusticated.

43. HISTORY AND SIGNIFICANCE

Originally named for Benjamin Franklin (1706-90), statesman. Built initially as a "colored" elementary school; used briefly as Franklin Branch High School in the early 1930s; used as an elementary school in the 1950s-60s; more recently used as a vocational secondary school. **Further Description of Important Features:**

Ground floor brick laid in a grooved pattern accenting the windows; secondary entrances have terra cotta surrounds featuring swag motifs. Primary entrance has projecting grooved brick surround with terra cotta entablature; doorway is capped with broken pediment and bust, also of terra cotta. Stone water table. Terra cotta cornices cap the 2nd and 3rd stories, more elaborately moulded on the primary elevation's center section. Eave has bracketed overhang. Cupola. Iron fence.

42. FURTHER DESCRIPTION OF IMPORTANT FEATURES

Ground floor laid in Flemish bond; red bricks with dark headers, interspersed with header courses and topped with basketweave course below stone water table. Upper floors of brown brick with random culls and basketweave frieze topped with a stone cornice below a stone-coped parapet in a diamond pattern of red & brown brick. In the main body of the building, paired windows separated by brick piers ending in stone buttresses. The projecting entrance bay features a stone lintel above the door and a shallow, bracketed balcony at the 2nd floor; windows have a terra cotta floral motif surround (this bay only); statues of a boy and girl stand at the parapet. Outsides of wings have inset designs of mosaic tile. Iron fence.

3½ story central projecting block flanked by two wings, each wing terminating in a block, all of which are three stories high. The central block features a hipped roof topped with a copper-clad cupola; its center three bays are surmounted by a pediment highlighted by terra cotta coping, cornice, modillion blocks and wreath. The terra cotta cornice & modillions return and are present on the full length of both sides. The entrance has an elliptical arch over.

Named after Massachusetts senator Charles Sumner (1811-74), an early supporter of Negro rights. Original cost: $311,665. The first Sumner High School was the first high school for Blacks west of the Mississippi (1875); the school moved to its present site upon completion of the building in 1909. The school has served as an academic and cultural center for the Black community known as The Ville ever since. It also has Manual Arts facilities, an innovative step at the turn of the century.
supported by ionic columns, all of terra cotta; a square 28-paned fanlight is surmounted by a terra cotta keystone and surround. Secondary entrances have terra cotta surrounds with pediments and Palladian style windows above. Blocks terminating wings have dormers. The large dormers of the wings are a recent alteration; illumination was originally provided by flush skylights where the dormers are now located (smaller dormers above the secondary entrances are original). Stone water table. Brick quoining at all corners. The building's roofline is punctuated by nine unusually tall chimneys. Non-contributing additions to the east, south and west of the building still permit viewing of the original elevations.

Extensive use of stone trim highlights this school, including window surrounds, water table, gable coping & finials, entrance surrounds and a string course in the main body of the building. Bay windows in the gable ends of the wings are surmounted by diaper bond brickwork. A one-story bay with basket-arched windows projects from the center of the building, flanked by two gabled entrance bays which repeat the basket-arch pattern. Small dormers in the side elevations of the wings are half-timbered.

Original cost: $189,768.

43. HISTORY AND SIGNIFICANCE

Originally named the William Glasgow, Jr. School, the school was early changed to the Dunbar (Colored) School, after poet Paul Lawrence Dunbar. Original cost: $226,168.

44. DESCRIPTION OF ENVIRONMENT AND OUTBUILDINGS

Built above grade, this school has a red brick foundation and predominantly brown brick upper stories. Stone trim is used extensively: as the water table, coping, entrance surrounds, upper-story hood moulding, entrance bay window surrounds, and two first-floor bay windows. Buttressed entrances feature basket arches on the sides and rectilinear openings on the fronts, with basket arches behind. Gables in entrance bays are half-timbered. Chimneys (over)

Yeaton High School (original); Central High School (after 1927)

Facade is dominated by two stai towers topped with four-sided curved copper domes with finials and decorative metalwork. Each tower features extensive stone trim, especially in the window surrounds and quoining. Entrance between towers features paired pillars and an ornately-carved elliptical arch and an ornately carved parapet stretching between the towers, all of stone. Wings are topped with balustraded parapets. Annex (Photo #13b), 1907 by Ittner is 1 story with basement and closely follows the design of the main building. Iron fence in rear.

Named for James E. Yeaton, who organized the Western Sanitary Commission, the school became Central High School in 1927 when a tornado destroyed the original Central High (Central moved there "temporarily" and remained). The Annex was built in 1907 for the purpose of housing Manual Training classes. Original cost for main school: $400,194.

# FURTHER DESCRIPTION OF IMPORTANT FEATURES

This school, built above grade, employs a mixture of buff and brown brick, with some culls. Stone is used in the water table, sill course (center bay only), and entrance and tower trims. The entrance bay is centered and projects forward, having three round arches supported by pillars at the first floor, and a balcony fronted by smaller arcing than that used below. The pillar and arch design is repeated in the two stair towers located in the junctures of the main building and wings. Paired rectilinear windows are separated horizontally by pilasters and vertically by stuccoed panels. Chimneys feature corbeled blind arcing.

Named for Rose Wright Fanning (1844 - ), St. Louis educator. Original cost: $182,226.

42. Further Description of Important Features

Twin entrance bays highlight the primary elevation of this school, featuring semicircular stone porticos supported by four stone columns and having balustrades at the second story; these form small balconies accessed by French doors. Corners are quoined. The stone cornice features stone modillion blocks; it is arched above the entrance bays. The two central bays have stone surrounds and each has a small basket-arched doorway. The chimneys have blind round arches.

43. History and Significance

Named after St. Louis founder Pierre Laclede (1724-78). Original cost: $211,959.

Twin crenellated towers flank the massive entrance bay of this fortresslike school. The front parapet is also crenellated, as are two shorter stair towers tucked into the corners made by the body of the school and the wings. Red brick is interspersed heavily with darker culls, and extensive use is made of stone trim, as in the coping, water table, window and door surrounds, string courses, roofline finials and decorative carving. The main entrance features a.

basket-arched opening into a portico, with the arch repeated again above the door to the building proper. Smaller entrances, one on either side, also reflect the arch; above these one-story bays are stone balustrades. Because the building is built on a grade that slopes away to the south, the south secondary entrance is reached by a flight of steps additional to those leading to the north entrance. Between the second and third stories above the central entrance is a series of bas-relief figures in glazed terra cotta or tile, depicting a chemist, glass blower, blacksmith, stone cutter, carpenter, person churning, brickmaker, spinner and a printer. Chimneys are tall, with a separate shaft for each flue, with the shafts grouped in stacks each set diagonally to its neighbors. The school faces athletic fields that slope away from the school, giving it an unusual vista for an urban school.

Camera facing northeast
Built on a sloping grade, the red brick foundation of this school gives way to a mixture of brown and orange/yellow brick for an overall orange effect; this is laid in a diaper bond in the gable ends. Stone trim is used in the form of a water table, coping, quoining on the projecting center entrance bay, and the entrance surround and gable-window hood moulding. North wing has a one-story pentagonal bay window of stone. Ogee-arched entrance. Iron fence. Chimney flue shafts provided.

Original cost: $122,946

**42. FURTHER DESCRIPTION OF IMPORTANT FEATURES**
The grade slopes sharply downward to the east, exposing more of the basement level on the east side of the building. A projecting center entrance bay dominates, having a curvilinear, stone-coped gable with finial, flanking crenelated towers trimmed in stone, stone window surround, balcony with stone-railed brick balustrade and corbeled bracketing below for support, and featuring triple basket-arched stone arcading at the first floor. Smaller "towers" located in the junctures of the main building and wings feature decorative over.

**43. HISTORY AND SIGNIFICANCE**
Named for Land Grant Adjustor Edward Hempstead (1817-70). Original cost: $182,495.

   Three-story projecting entrance bay features round-arched arcading of stone carved in a linked-circle design, with small iron-railled balconies above, stone quoining, and a curvilinear gable with center fleur-de-lys motif. Wings feature scaled-down versions of the center gable and stone quoining. The primarily brown brick has some red scattered throughout; the second story has been recently tuckpointed with a lighter mortar than below. Stone water table. Chimneys laid in a pattern resembling grooving. Stone balustrade on roof above entrance. Iron fence. Stone lintel course at first floor. Stone downspout heads.

Brown brick is interspersed with darker cull brick and highlighted with light terra cotta and stone. Two stair towers dominate, each with bracketed overhangs, three open rectilinear windows per side, and decorative corbeled arches above round terra cotta-trimmed windows. Ground floor openings are segmentally- or soldier-arched; openings above have soldier arches. Extensive use of terra cotta in cornice, coping and paired brackets. Diaper bond in gable ends. Iron fence.

For Eugene Field (1850-95), St. Louis poet. Original cost: $122,268

42. FURTHER DESCRIPTION OF IMPORTANT FEATURES

Built above grade, this school is distinguished by the extensive use of stone, particularly the window surrounds. Brown brick is laid with dark headers in the Flemish double-stretcher bond. Center gable in the primary elevation and side-facing gables are bracketed and have decoratively-carved bargeboards. The remaining non-gable eaves have exposed rafter ends. First-floor windows in the center projection form a bay window. Iron fence.

The school was known as Harney Heights School only for a short time at its outset, after which it was named for the pen name of humorist Samuel Clemens (1835-1910). Original cost: $200,101.

Further Description of Important Features: Built on a grade that slopes away to the southwest, this school is dominated by twin stair towers topped with octagonal copper-domed cupolas. Entrances in the towers' bases feature stone columns supporting shallow balconies; stone quoining follows the windows all the way up. Between the towers, six round stone arches (the outer two blind) are interspersed with five round mosaic tile insets. Rectangular mosaic tile insets can be found on the side elevations of the wings. Shallow iron-railled balconies appear.

The four-story central section is flanked by two crenellated towers which feature stone battlements and quoining. Wings on either side are three stories, topped with balustraded parapets. Stone detailing is used throughout to highlight the reddish-brown brick laid in garden wall bond. Tudor arches at the entrance are repeated on the interior. The school is built above grade. The only major alterations are the non-contributing annexes to the east side.

* Original building (east) built 2 stories high with removable wooden roof for expected upward expansion; 1901. The center section was built in 1911-12 and the west portion was added in 1929-30. The red brick is mixed with random culls. Carthage limestone was used for sills, string course at top of the 2nd story and for other trim. Round-arched windows top entrance bays; entrance doors topped with round blind arches. Iron fence. Cupola & small dormers.

43. History and Significance
The contractor for the original building (east) was Lenz-Helm Building Wall Brothers contracted for the center section in 1911; no contractor was listed for the 1929 (west) portion. The building was named for William J. Simmons (1849-90), Baptist clergyman and author. Original cost: $42,184. Cost for 1911 section: $93,000. Cost for 1929 section: $50,000. Stowe Teachers' College (for Blacks) housed at Simmons School, 1929-40.

The two central bays project from the body of the building and are flanked by entrances, above each of which are paired windows topped with a round blind arch. Brown brick is highlighted at the attic story by the use of red brick in a diamond pattern. The roof has a substantial overhang, emphasized by exposed rafters. Shallow dormers in the roof face side elevations and a massive plain brick chimney dominates the rear. Stone sills & string course between 2nd & 3rd floors. Iron fence.

Original cost: $40,000.

**42. FURTHER DESCRIPTION OF IMPORTANT FEATURES**

Portable units currently located in front of each wing. Stone water table just above a course of dentils. Stone sills. Parapeted gables of wings feature brick laid in a basket weave pattern around small inset windows. Eaves have large overhangs and exposed rafter ends. Entrance has carved stone surround. Short landscape walls feature stone coping and finials. Iron fence. Soldier lintel course at 1st and 2nd floors.

**43. HISTORY AND SIGNIFICANCE**

Named after American Naval commander David G. Farragut (1801-70). Original cost: $173,045. School initially known as Elleardsville School, Elleardsville being the original name of the Ville neighborhood.

**Walnut Park School**

This school is built above grade, with limestone retaining walls where the grade slopes away; fronted by an iron fence. Stone water table and first-floor lintel course. Projecting center entrance bay features stone window and door surrounds; entrance has a square stone hood above an elliptical arch - a pattern repeated on a smaller scale in the secondary entrances in the wings. Overhanging eaves. Projecting bay windows in side elevations at ground and 1st floor levels.

Original cost: $161,188.

**Description of Environment and Outbuildings:**

Building is built well above grade and features a copious use of stone trim throughout, including window surrounds, coping, entrance surround, water table, lintel course at the 3rd floor, balustrade and finials in front of the building, and units of balustrading used to define bays in the roof's parapet. Windows are found in groups of 3 or 5. The entrance bay is elaborately embellished with stone carving above the round arch, as are the projecting 2-story bays in either wing's primary elevation. Brick has a redder cast than neighboring Wyman School.

**History and Significance:**

Originally developed to provide teachers for the St. Louis Public Schools, the Normal School became a separate entity in 1895. The name was changed to the Harris Teachers' College (after St. Louis educator William Torrey Harris (1835-1909) after the school was relocated in the building under discussion. Harris College later merged with Stowe Teachers' College to form Harris-Stowe State College, still a teachers' institution in St. Louis. The building currently houses a number of services connected with the St. Louis Public Schools, such as Audio-Visual Services, Photo Lab, etc. Original cost: $148,634.
