21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story brick multiple dwelling has a flat roof with square pilaster corners, decorated with rosettes. There is a simple cornice. The three bay facade has six openings at both the first and second floor. Windows are single one-over-one with limestone sills and flat arches of a contrasting brick. The second and third bays are replacement doors, sheltered by a brick porch with a shed roof on wooden columns. The sixth bay on the first floor is another entrance, sheltered by a smaller version of the larger porch. The second floor has six, asymmetrically located gable windows, each with a stone sill. They share a continuous brick lintel.

This one-story brick house has a flat roof with a side stepped parapet with terra cotta coping. The front cornice is very simple brick corbelling and stepped bricks. The facade is symmetrical, with a central entrance. It is sheltered by a stone front porch with a hipped roof, supported by brick columns with corinthian capitals. On either side the porch is flanked by large one-over-one windows with stone sills and brick segmental arched lintels.

Other:
This two-story frame house has a side-gabled roof. The front facade is two bays wide. On the first floor, at the first bay, is a single two-over-two window, followed by an entry beneath a small wooden gable roof awning. At the second bay are two single two-over-two windows. There are four identical windows at the second floor. All windows have non-functioning shutters. There is a central interior brick chimney.

Date is from a street numbering certificate at this address dated 7/18/1884 by owner John Stader. There is also a permit for a two-story frame house on this street dated 8/11/1886 for $1000 by owner Elizabeth Gains. It is unclear if the building on Hopkins is this house or 6112 Minnesota (now demolished). 1918 permit to repair frame dwelling for $1000 by owner F. Dorsey and builders Ziegelmayer & Suter.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This one-story brick house has a flat roof with a front shaped parapet which features three square pinnacles and a triangular pediment on the right side at the entrance bay. There is a complicated cornice of patterned brick in a diamond pattern, accented by buff colored brick. Below this pattern is brick corbelling. The two bay facade has the entrance bay on the right. The front door with transom is recessed behind a curved archivolt with alternating buff colored bricks. The first bay of the house is two single one-over-one window, with segmental arched lintels, also with alternating buff colored bricks. They share a continuous sill which divides the front facade into two areas of contrasting colored bricks.

The facade is two bays wide under a front gabled roof. A full-length porch on rests on wood supports. A pair of windows comprises the only second story facade bay. A secondary entrance is located on the side under a gabled overhang. The diamond-patterned asphalt siding covering the house may be historic.

| Terra cotta coping caps the parapet. A terra cotta cornice with a brick frieze consisting of a dentil course and a molded brick pattern extends between the bases of the end blocks. The first story has a round-arched entrance bay with two recessed doors and a second bay with a broad arch holding a pair of windows. Three single windows in segmental arched openings are located in the second story. All the facade openings have contrasting colored brick lintels. |

The bay on the right side of the second story projects slightly and holds a segmental arched window. Over the top of this bay is a slightly shaped parapet decorated with contrasting colored brick trim. A segmental arched first story opening has two recessed doors. Single windows on each level have molded brick trim over the top.

The parapet is plain except for raised end blocks. The cornice may have been removed. An entrance bay with two transomed doors is located on the right under a flat roof that also serves as a balcony. A single segmental arched door opens to the balcony. A pair of windows in a segmental arched opening is located on both levels. A white glazed brick stringcourse is located under the windows on both levels.

The main section of this house is tall and narrow under a front gable roof. A pair of windows under a gabled overhang is positioned in the second story. The first story has a bay window. A one-story room on the side may have been a porch originally but is now mostly enclosed. A stone column supports the porch roof.

Three attached dwellings on high stone foundation - each household has its own stairs (the stairs appear to be concrete replacements). The roof is a low-pitched hip. The six bays on each level are segmental arched - the trasoms over the door are boarded. The cornice is wood and may be absent some of its original decoration.

The entrance bay projects slightly from the main wall of the facade and has a high-pitched mansard roof that intersects the mansard parapet. A bold, corbelled brick cornice extends across the facade. The entrance bay is round arched and has a recessed door with a transom. The other facade bay is a segmental arched opening with a pair of replacement windows.

This house appears to be missing its mirror image but the Sanborn map (1938) shows it in its current configuration. Two bays of segmental arched windows are in the second story. The first story openings (a door and window) have been altered and stand under a recent overhang on wrought iron supports.

At the base of the mansard-type parapet is a wood cornice and a frieze with a molded brick pattern. The facade has two bays on each level. The first story bays are shallow round arches - one with two transomed, recessed doors and one with a pair of windows. Second story windows are rectangular. The window bays hold replacement windows that are smaller than the original but the openings remain intact.

The flat-topped parapet is tile-capped. Three bays of round arched windows are in the second story. The first story has a round arched entrance bay with a recessed door and a segmental arched window bay. The window on the first story is smaller than the original. The facade has been covered in stucco but the brick round and segmental arches are left intact.

This house is actually two houses joined together. Both sections are front gabled - the section on the left has a bay window that replaced its original openings. The right side has a door under a gabled porch on wrought iron supports and a window. Siding unifies the facade. The section that joins the two houses has a single window.

Sanborn maps (1938) show this building was likely identical as the one next door at 7018-20 Minnesota. On this one, the dentilled brick cornice is intact but the windows are replacements and may have originally been in segmental arched openings. A gabled porch roof on wrought iron supports shelters two centered front doors.

This building appears to be two separate buildings that were joined together soon after they were constructed. The section on the right has a single shallow round arched window bay in each level. The cornice is multiple layers of brick with corbelling at the base. The section on the left side has a mansard parapet with an intersecting gable over the round arched entrance bay. The narrow section in between is open on the lower story with a deeply recessed door and a round arched window in the second story.

The shed dormer centered in the side gable roof may be a historic alteration. The two facade bays are comprised of two segmental arched openings. The segmental arched lintel over the window is intact but the arch has been brick-filled. A metal awning hides the arch over the door. Corbelled brick cornice.

**Note:** The form includes various fields for detailed information about the property, including historical and architectural details, and indicates whether the property is eligible for listing on the National Register. The form is designed to be completed by professionals or preservationists for the purpose of documenting and preserving the historical significance of the property.
ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

| The permastone applied to the entire facade probably changed the window openings from segmental arched to rectangular but it left the dentilled cornice intact. The door has a metal overhang. The sides are brick with segmental arched windows. |

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This one-story brick house has a flat roof with a stepped parapet and terra cotta coping. The front facade has a simple stepped or square parapet, with a corbelled brick dentil cornice. The window and front door on the front facade are both beneath a simple arch of brick stretchers, outlined by a brick stringcourse. The visible rusticated stone foundation has been painted white.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

Building Permit # E-3157. 23 x 46. Daily record 3/24/1905.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

none

**ADDITIONAL INFORMATION:**

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This modest one-story brick house adheres to the Second Empire style with a modified mansard roof with decorative brackets. The entrance is on the side of the house beneath a simple porch with a wooden railing. Two windows on the front facade are both single three-over-ones, with decorative lug stone sills and segmental arched lintels of variegated brick. The rusticated stone foundation has been painted white.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

1921 alteration ($175) by owner H. Schumacher. 1922 addition ($1,100) by owner H. Schumacher.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

One non-contributing outbuilding with aluminum siding.

ARCHITECTURAL/HISTORIC INVENTORY FORM

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This one-story home has a front facing gable roof. The house is covered in stucco, although it is likely constructed of brick. No definitive permit was available to date the house, although a 1922 permit was taken out for substantial alterations. The large front porch has a low-pitched hipped roof with wooden columns sitting on tapered piers. There are two single windows on the front facade, both replacements that are small for their original openings.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

1922 alteration ($500) by owner G. Keim. 1960 permit to install concrete slab and porch steps, front and rear, ($400) by owner Eugene Klein.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This one-story brick house has a front-facing gable roof, and is nearly identical to 5619 Pennsylvania. The front door is on the left side of the front facade and is accessed by a small concrete porch, and covered with a metal awning. To the right of the door is a single one-over-one window with a stone sill and lintel. There is an internal brick chimney. No permits were found for 5617 and 5619 Pennsylvania, although street numbering certificates were taken out in 1888, at the same time as 5313 and 5615 Pennsylvania. It is possible the houses were built at this time, or were built earlier. They do not appear on the Hopkins map of 1883.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This one-story brick house has a front-facing gable roof, and is nearly identical to 5617 Pennsylvaina. The front door is on the left side of the front facade and is accessed by a small concrete porch, and covered with a metal awning. To the right of the door is a single one-over-one window with a stone sill and lintel. There is an internal brick chimney. Some of its carved decorated vergeboard is still in tact. No permits were found for 5617 and 5619 Pennsylvania, although street numbering certificates were taken out in 1888, at the same time as 5313 and 5615 Pennsylvania. It is possible the houses were built at this time, or were built earlier. They do not appear on the Hopkins map of 1883.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story brick house has a front facing high-pitched gable roof. The front porch extends the entire length of the front facade and has a shed roof supported by square brick columns. The simple wooden cornice has two wooden brackets. The brick work above the second story uses a contrasting colored brick to create a pattern similar to half-timbering. Windows are all single one-over-one with stone sills. The front entrance and door appears to be original and features a transom and side-light window.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

building permit # H-419

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

One contributing garage, frame, gable roof, concrete foundation. Built 1931.

ADDITONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This one-story brick house has a flat roof with a simply shaped parapet and a brick cornice. One the right side of the front facade is the front entrance, which is accessed by a small porch. The front door and transom are sheltered by a wooden awning. To the left of the front entrance is a paired window with a stone sill, beneath a metal awning. A basement window is above ground on the front facade. The brick has been painted.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

Building permit # D-7520 in 1902 is for 5701 Pennsylvania. A 1910 building permit (#G-5869) indicates that this brick dwelling was moved to 5711 Pennsylvania by owner Thos. Demphy. Houses on Bellerive Blvd. are in its original location.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

Other:
This two-story brick house has a steeply pitched front-facing gable roof. The original front porch is still intact, and features a front facing gable roof with terra cotta tiles, and square brick columns with Corinthian capitals. The front entrance has sidelights and a transom. To the left of the front porch is a double window with a continuous sill which divides the facade into two areas of contrasting brick. At the second floor are two three-over-one windows, which are probably original. These windows have stone sills.

Building permit # H-583. A permit for a one-story frame shed was taken out the same day. Daily record 11/18/1911, indicates the house was built with a slate roof.

Landmarks Association of St. Louis
21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This one-story brick house has a flat roof with terra cotta coping and brick corbelling at the cornice. It is a slight "L" shaped plan. The bay closest to the street has a paired window with a simple wooden mullion and a stone sill. Its appearance is obscured by a metal awning. Beneath this window are above-ground basement windows, also a pair divided by a wooden mullion. The front entrance is beneath a small porch on the south side of the house within the "L" shape of the plan. The front door has its original transom.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

There are two permits from 1896 for one-story brick houses on this block, although it is difficult to determine which is for 5806 and 5804 Pennsylvania. Both list the owner as Miss M. J. Stevens. The first permit has the date of 1/29/1896, is for $1000, and lists the builder as G. W. Lane. The second is from 2/3/1896, for $950, with no builder listed. Alter porch of frame dwelling, 7/13/1922 (permit #B-1206) for $50 by owner L. Tribur. A permit for a one-story brick garage was taken out on 4/25/1923 (permit #B-5826) by owner L. Tribur at the cost of $400.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story frame house has a front facing gable roof. The two-bay front facade is two bays wide. The front entrance is on the right, beneath a wooden awning, and approached by a concrete porch. Windows are all single one-over-one, and covered with metal awnings. The entire house appears to be covered in asbestos siding. There looks to be two additions to the back, and two-story sleeping porch, and a one-story brick addition.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

This house is difficult to date. It does not appear to be on the Hopkins map of 1883, but there is a permit from 9/13/1882 for a one and a half story frame house on this block, by owners O. G. and G. W. Sallee. On 3/11/1909 James W. Sallee moved a frame dwelling at this location, so it seems likely the 1882 permit is referring to this house. Permit for frame addition to dwelling, 6/8/1923 (permit # E-7965) by owner C. Schultze for $500. Permit from 6/6/1972 to move shed and construct new tool shed for $1,600 by owner Alphons Meurer and builder Erb. Const. Co.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

One non-contributing garage, with aluminum siding, and a gable roof.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story frame house appears to be on the Hopkins map of 1883. It has a front facing gable with returned eaves. There is a central brick chimney. It is one bay wide, and at the second floor there is one single window. The first floor openings are obscured by a large frame porch with a shed roof. The entire house has been covered in what looks to be a knotty pine siding.

**ADDITIONAL INFORMATION:**

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This one-story brick house has a low-pitched side gabled roof. The two bay facade has four openings. The first bay includes a rectangular window and a single window, both with brick sills and covered with metal awnings. The second bay includes the front door, and a large picture window, also with a brick sill. The front door and picture window share a metal awning. The bottom 1/4 of the front facade is covered in simulated masonry.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

There is one non-contributing garage, with vinyl siding and a gable roof.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This one-story brick house has a gable roof with an extended slope or catslide on the north side of the house. All windows have segmental arched lintels and brick sills. The front facade has a front porch with a shed roof, which is a later addition. It shelters a door and one window. At the half story level is a single small window with six panes. There are several single windows on the south side facade.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

Appears to be on 1883 Hopkins map. 1912 brick addition to dwelling ($540) by owner Mary Blumenthal and architect H. Breitenstein.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This one-story brick Queen Anne cottage has a cross gable roof and an L-shaped plan. The gable end facing the street is one bay wide and has fishscale shingles within the pediment. There is a paired window with a brick segmental arched opening. The rear portion of the house is covered with siding and may be frame. It has an interior brick chimney. The entrance to the house is along the south side, as are several single windows with segmental brick lintels and stone sills.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

Building permit #B-2364. Daily record 3/16/1892. No address on the building permit, but this is the only one-story brick house on this side of the street.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

There is one non-contributing garage, with vinyl siding and a gable roof.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story brick house has a side gabled roof. A historic two-story brick addition with a flat roof is at the rear. The basement is partially above ground at the front of the house. There are two small basement windows with stone lintels. The front entrance is on the right side. At the first floor level are two single six-over-six windows, with stone lintels and sills. Three similar windows are at the second floor level, although these replacement windows are one-over-one. With the addition the house is three bays long.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

House appears to be on 1883 Hopkins map. 1917 permit to alter brick tenement ($300) by owner F. Willike and architect F. Gutting.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story frame house has a front facing gable roof and is one bay wide. At the first floor is a simple entrance and a single two-over-two window. It is sheltered by a hipped roof porch. At the second floor are two single two-over-two windows, each covered by a metal awning. There is a central interior brick chimney. The entire house is covered in what appears to be asbestos siding.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

House appears to be on 1883 Hopkins map. Permit from 4/25/1917 to "move and underpin frame dwelling" for $275 by owner G.W. Schwartz and architect E. F. David.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

    - not eligible

- **Other:**
This one-story brick store and dwelling has a flat roof with a stepped parapet with red terra cotta coping. There is a central square stepped pediment, with square pinnacles, on the front facade. The left bay of the house is the original dwelling space, with a single one-over-one window with a stone sill and brick segmental arched lintel, and a front door with a transom. A small wooden awning with a gable roof shelters the front door. The right bay is the original storefront. The cast iron window lintel is still in place, but the original windows have been removed and filled in with brick.

Building permit #D-2443. 1912 permit for brick addition to store and dwelling ($1000) by owner E. Hohenstein and architect J. P. Fendler. Storefront was apparently brick in in 1958 when a $400 permit was taken out by owner Albert J. McCarty to "alter store fr. Dwelling."

This two-story frame house has a complicated roof, with a hipped roof on the main body of the house, and an intersecting front-facing gable towards Pennsylvania Ave. The gable has a pediment, and tops a single bay which has paired windows at both the first and second floor. The second bay sits back a few feet, and includes the front door, which is sheltered by a shed roof porch with wrought iron supports. Above the porch, there is a single one-over-one window at the second floor. The house is covered in vinyl siding.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

No permit found.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

The simply shaped parapet has raised end blocks and a subtle dentilled cornice. The windows in each level have brick frames around the sides and a continuous stone sill course. The entrance bay has been altered - it appears to have originally held two recessed doors. Now it has one door surrounded by glass blocks.

This building looks like it could have been more than just a single dwelling originally but by 1938 when the Sanborn map was published for this area, it was just a dwelling. There is no record of this building in the permits. It has a corner tower with an arched entrance bay on each side under a hipped roof. New windows and wood fill the space between pilasters on the Pennsylvania side. A secondary door is also located on Pennsylvania.

The parapet has a rounded tower with a conical roof at the corner and a sloped roof with three gabled dormers across the facade. The bracketed cornice is wood. The corner entrance has paired doors and a transom and sidelights. The storefront is intact. Attached on the north side is a one-story section with two segmental arched bays and a garage bay.

The flat-topped house has, on the right-hand side, a pyramidal roof with a bracketed cornice. On the other side of the facade is a gable peak that sits on top of a plain wood cornice. Both stories have two window bays and a door bay. A porch/balcony on brick pier supports is located in front of the entrance bay.

The roof is flat but has a shed-type overhang and a gable peak. The entrance bay has been altered - it probably had a recessed door but it has been filled with a pair of doors. The left-hand bay has a group of three windows centered under the gable peak.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

A wood cornice that doubles as a parapet is this building's most outstanding feature. It has heavy brackets on its outside edges and a gable peak in the center. A molded brick stringcourse extends between the brackets. The facade openings are segmental arched - those on the right side have paired windows with transoms. The segmental arched entrance bay is intact but has been filled with a storm door. The porch/balcony has replacement supports. A transomed door accesses the balcony.

The shaped parapet has a raised center section with a recessed panel in the center. The end blocks are decorated with molded brick that matches the molded brick stringcourse at the base of the cornice. The shed porch on wrought iron supports is a replacement. The second main facade bay is a paired window bay. A secondary entrance bay is located on the side under a shed porch.

The right-hand bay projects slightly and has a taller parapet - this section contains the round arched entrance bay in the first story and a round arched window in the second. The second bay on each level is a broad round arched opening holding a pair of replacement windows. The cornice is comprised of several layers of brick stringcourses.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

A round-arched bay dominates the facade. It is topped by a horse-head ornament and flanked by single windows (boarded). The parapet is flat-topped and has bold corners that join it to the main wall. The Sanborn map (1938) shows an L-shaped building but the back of the L is faced with newer brick and has replacement windows. A wood shingle parapet over a two story porch fills the intersection of the two wings.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story brick corner commercial/residential building has a flat roof and terra-cotta coping. There is a projecting square bay at the corner of the building. Windows are single one-over-one, with stone sills and segmental arched lintels. At the second floor there are two windows on the front facade, and five along the north (side) facade. To the south is a one-story commercial addition, also brick with a flat roof. The building retains a great deal of integrity.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

A 1893 building permit taken out by owner Chas. Geitner for a two-story brick dwelling and store appears to be for this building. One 5/29/1895 he took out another permit for a one-story brick barber shop, which appears to be the southern addition. Other permits include: 1915 repairs ($75) by owner H. Schumacher and architect H. Dentman. 1945 repairs ($800 and $500) to two-story brick store and tenement.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

Other:
This 1.5 story brick house has a complicated hipped roof with a hip-on-gable dormer on the front facade. The exterior chimney is on the front facade, and has decorative stone quoins. To the right of the chimney is a grouping of three single windows with a stone sill and a rubble stone lintel. To the right of this window is the front entrance, with a round opening and stone quoins. On the south side of the house is a one-story brick addition dating from 1960.

There is a contributing small frame garage, possibly dating from 1935.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This large three-story apartment building sits on a hill overlooking the Mississippi River. It has a flat roof, although portions of its complicated facade, with hipped roof bays and sloping false fronts, extend higher than the flat roof. At the corner of S. Broadway and Bellerive the building has half-timbering at the second and third floors. There are two octagonal turrets on the front facade. Most windows are single three-over-one, which are probably original. All windows have stone sills and flat brick arches with keystones. There are several balconies accessed by doors with multi-panes.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

The contributing brick garage at 101-03 Dover was built in 1927 by Chas. Mueni. It has a flat stepped roof with terra cotta coping.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story brick flat has a flat roof with terracotta coping. It has an overhanging cornice with slate tiles on a mansard-like roof, above a wooden dentil. The symmetrical front facade has a two-story porch with metal supports. Three doors with transoms are accessed from this porch on the first floor, two doors with transoms open to this porch on the second floor. On the first floor large rectangular one-over-one windows flank the porch. They have a continuous stone sill, which divides the facade into two different colors of brick. On the second floor rectangular one-over-one windows also flank the porch. These windows each have a stone sill.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

Building permit # F-2439. Daily record 6/27/1907.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

This two-story brick two-family residence has a flat roof with a shaped parapet. The cornice has some brick corbelling, although it appears the original cornice has been removed and replaced with stucco. There is a wooden two-story porch, which is not original, although in the original location. It has wrought iron banisters and a concrete block foundation. On the first floor double doors open to the porch, on the second floor is a single door opening onto the porch. None of the doors are original, and transoms have been filled in. The first bay of the house, on the first and second floors, has a large single one-over-one windows with a stone sill.

building permit # H-1055. Daily record 1/30/1912.

Other:
This one-story garage building was built in two sections. In 1930 a 16 x 16 brick office was built. In 1934 an addition, apparently concrete block, was built. What appears to be the original building is a small structure with a flat roof, a central door, flanked on either side by single one-over-one windows. To the north is an addition, also with a flat roof, although a couple of feet taller than the office building. The addition is one bay wide, with a garage door on the front facade.

Endangered by: | |
21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story brick flat has an unusual roof that appears to be a side gable, but may actually be flat at the top and rear. The building was originally four apartments but has been converted into two apartments. The front facade is symmetrical, with two entrance bays at the center. Entrances are recessed behind the round arched opening. The original doors have been replaced with vinyl siding and metal doors. At the second floor are four single one-over-one windows, with stone sills and brick drip moldings. Between each window is decorative brick in diamond patterns. Flanking the central entrance bay, at the first and fourth bays, are large single windows at the first floor, with a continuous stone sill and brick drip moldings. There is brick corbelling at the cornice.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

ARCHITECTURAL/HISTORIC INVENTORY FORM

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This one-story brick bungalow has a medium-pitched front facing gable roof with a low-pitched gable roofed porch. The porch is brick and supported by square brick columns. There is a central wooden door which appears to be original to the house. It is flanked on either side by wooden three-over-one windows.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

Building permit # D5092. Daily record 4/22/1926.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

There is a contributing frame garage with a gable roof.

This one-story brick service station is built in the "cottage" or "house" style of construction that was popular for gas stations in the late 1920s and 1930s. It has a steeply pitched cross gabled roof, and an L-shaped plan. The gable end facing S. Broadway has half-timbering and one garage door. To the right is a large exterior brick chimney. To the right of the chimney is the front entrance, which is beneath a small gable end of the roof. To the right of the entrance is a large window which has been filled in.

### ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

| **This two-story brick two-family flat has a flat roof with a shaped parapet and red terra cotta coping. The front parapet creates a square pediment in the center of the front facade. The brick corbelled cornice has been removed. The two front doors with transoms are located on the right side of the front facade beneath a hipped roof front porch with a concrete foundation and wrought iron supports. To the left is a paired window with stone sill, obscured by a fiberglass awning. A similar window is located directly above at the second floor. To the right, above the porch, is a single window with a stone sill, also with a fiberglass awning.** |

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This building is a two bay industrial building, with two attached front facing gable roofs, with broad overhanging eaves. There are several garage door entrances. The second story is a large loft space.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

There is a permit dated 8/1/1939 for an “office” at 6127 S. Broadway for $400 by owner C. P. Rowe. It is possible it is for this building, or for a building to the south that is no longer standing. This building does not appear to be an office, but Clinton A. Rowe took out a $1200 permit on 1/19/1956 to “repair fire damage-service station” at 6115 S. Broadway.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

### ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

| This 1.5 story brick bungalow has a side gabled roof with a large shed roof dormer on the front facade. The side gable and dormer both have exposed rafters. The brick veranda extends the length of the front facade, and has tapered brick columns, and wooden banisters. The front entrance is on the left side of the front facade, with a band of triple windows on the right. |

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

| There is one non-contributing garage, with vinyl siding and a gable roof. |

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story frame house has a cross gable roof. The gable end facing S. Compton is one bay wide, with paired four-over-one windows. At the second floor is one large window, the same size opening as the first floor, which was probably originally two windows. The entire house is covered in vinyl siding.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story building was originally a store on the first floor, with a residence on the second floor. It has a low-pitched side gabled roof with exposed rafters. There is a large triangular eyebrow dormer facing S. Comton. The first floor has wide brick pilasters, capped by a decorative stringcourse/pilaster capital of terra cotta. The original storefront bays have been filled in with wood siding and metal awnings. The second floor has three bay windows, each with a center window of six-over-one, which is flanked by a rectangular four-over-one window on each side. Each of these bay windows have been covered by a metal awning. The second floor has either been painted or stuccoed.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

building permit # I-2663. One-story brick garage permit (A-3161) taken on 10/8/1920 by owner G. W. Bader for $300.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story brick flat has a flat roof with a galvanized cornice and brick corbelled dentils. The front facade is symmetrical, with a central bay extending from the front facade, topped by a pediment with returned eaves. This central bay includes four front doors sheltered by a front porch with square wooden columns supporting a second story open balcony. Two large doors, which may be Jefferson doors, open onto this balcony. They are both topped by brick dentils. Above the second floor doors, within the pediment, is a decorative brick medallion. The corners of the central bay have brick quoining. Flanking the porch and center bay are paired windows at both the first and second floors. All windows are topped by brick dentils. The second floor windows have stone sills, and the first floor windows have a continuous stone sill, which extends across the front facade.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

Building permit # D-4893. 1924 permit for alterations to tenement ($200)

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story frame house has a side gabled roof. The front facade is four bays wide, with a front door at the fourth bay. All other bay openings are single six-over-one windows. The house would have been a simple Federal style, but it underwent major facade alterations in 1974, creating a vaguely Tudor Revival style. The first story of the front facade is covered in simulated masonry, resembling large round stones. The rest of the house has been covered in white stucco. Second floor windows have been outlined with dark wood with half timbering between the windows.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

Building permit does not have an address, but is for a two-story frame house, which is likely 6132-34 Vermont, especially considering that the house appears to be on the 1883 Hopkins map. The form of the house suggests that it could be even older.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

There is one contributing frame garage, with a gable roof.

Simple brackets decorate an assymetrical sloped roof that has a shed dormer on its long side. A brick porch on the left side has an arched opening positioned in front of two doors. The porch roof is flat and supports a balcony with a wrought iron balustrade. The facade windows are casement and have stone sills.

A high-pitched, side gable roof is positioned in the front while a flat roof covers the rear of the building. The full-length brick porch has two ogee arches with keystones and a balcony above. The three-bay lower story is comprised of a three-part window in the center flanked by single doors. A semi-circular overhang and an arched doorway is centered in the second story.

ARCHITECTURAL/HISTORIC INVENTORY FORM
ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

The high-pitched side gable roof is positioned over the front of the building while a flat roof covers the rear. A full-length porch rests on brick piers and has a balcony with a wrought iron balustrade above. Single doors flank a center three-part window on the lower story; round arched windows under semicircular overhangs are positioned on either side of the center door on the second story.

A hipped porch is positioned across half the facade. Windows fill the space between the brick piers but this is likely a historic alteration. The main entrance opens into the side of the porch. Terra cotta coping covers the simply shaped parapet.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This one-story brick roof has a flat roof with a stepped parapet with terra cotta coping. There is a cornice with simple brackets. The front facade is two bays wide, with the entrance on the left side, beneath a curved arch. To the right are two one-over-one windows. Both bays are partially covered by metal awnings. A continuous limestone sill beneath the windows divides the front facades into two sections of contrasting brick. The basement is partially above ground, with two small basement windows on the front facade.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story brick two-family flat has a flat roof with a shaped parapet with white glazed terra cotta coping. It has a cornice with dentils and brackets, that is most likely galvanized iron. The corners of the building has brick quoining. The first floor has the front entrance set behind a curved arched entry. To the right of the entrance are two single one-over-one windows. They share a continuous limestone sill. On the second floor are three single one-over-one windows, each with stone sills. The basement is partially above ground, with two small rectangular windows on the front facade.

eligible (district) not eligible
Other:
This one-story building was built as offices in 1908, but had a major commercial addition in 1912, which probably includes the front facade we see today. The building is one-story brick. The south side facade has a stepped parapet with terra cotta coping. The main facade is one bay wide and faces Virginia Avenue. It is a buff color brick and has a simple corbelled cornice. There is one large picture window, beneath a canvas awning. The entrance to the building is at the corner. It appears to originally had two openings, although one has been filled with siding.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story brick commercial/residential building has a flat roof with a front shaped parapet with white glazed terra cotta coping. The side facades have a stepped parapet. The terra cotta cornice has dentils. The front facade is symmetrical, and has a central entrance with a classical pediment supported by two columns. It is flanked on either side by storefront windows, with the northwest corner having a recessed entrance behind an iron support column. On the second floor are six single one-over-one windows, all with stone sills.

**ADDITIONAL INFORMATION:**

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

| This two-story brick house has a low-pitched hipped roof. There is a bracketed wooden cornice with decorative filigree. The front facade has three openings. The front door is at the first bay, recessed behind a brick segmental arch. To the right are two single one-over-one windows. Windows have a brick segmental arched lintel, a stone sill, and wooden shutters. Three identical, although slightly smaller, windows are at the second floor. |

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

| No permit found, but appears to be on the Hopkins map of 1883. |

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

**ADDITIONAL INFORMATION:**

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story brick house has a flat roof with terra cotta coping. It appears a brick corbelled cornice has been removed. Still attached, although in poor shape, is a galvanized cornice. The front facade has three openings at each floor, with the front door on the left side. To the right are two single one-over-one windows, with stone sills and brick segmental arched lintels. There are three identical windows at the second floor.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

No permit found, but street numbering certificate is dated 8/11/1897.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story brick school house has an H-shaped plan. The front facade is symmetrical with a central fanlight entrance beneath a pedimented portico supported by classical columns. The entrance is flanked on either side by three large double-hung paired windows, with multiple panes. Identical windows are located above at the second floor. Above the first floor windows is a string course. The two gable ends facing Virginia Ave. are two bays wide, with each bay opening being a single window with fifteen panes of glass. Above the second floor window is decorative polychromatic brickwork, in a lattice motif. Both gable ends have large square chimneys. There is another central interior chimney in the middle of the building.

This building's most distinguishing feature is its bold brick cornice. The openings are segmental arched and consist of doors near the outside edges and windows in between. The date on the house numbering certificate is 1885 - this building looks later than that but perhaps the second story was constructed later.

The main portion of the facade has a three-part round-arched window bay with stained glass transoms in the lower story and a segmental arched window bay with a pair of windows in the second story. The south side of the facade is slightly recessed and contains an entrance bay with side lights and a transom; a balcony is positioned in the second story under a shed porch roof. Some type of siding appears to have replaced the cornice.

Two gabled dormers, each with a segmental arched window, are situated in the second story. A two-tiered dentilled brick cornice divides the brick second story from the asphalt-clad mansard second story. The lower story window bay is segmental arched and holds a pair of recent windows. Glass blocks surround the door which is located under a metal awning.

Three round arched windows are positioned in the front gable and sit on a stone string course. The lower story is comprised of a recessed corner porch with stocky brick supports with stone capitals. A bow with three windows is located on the facade’s south half. A brick checker-board pattern decorates the apex of the main gable. Side windows are segmental arched.

An intact store front occupies most of the facade. It includes a center, recessed double-door entrance bay with flanking display windows. The door that accesses the second story is in a segmental arched opening with a transom. Second story windows are also segmental arched. Vinyl appears to replace the original cornice.

An permit issued for a two story brick dwelling in 1878 may represent a section of this row. The openings are segmental arched and each section has a corbelled brick cornice. 7147-49 has openings that extend all the way to the rear of the building. 7157 Virginia, located on the corner, has a nearly original storefront.

<p>| commercial building with simply shaped parapet roof. A terra cotta cornice extends across facade at the base of the parapet. Six bays of rectangular window bays with stone sills are positioned in the second story. Two separate storefronts flank the center pedimented entrance bay that accesses the second story. Both storefront entrances are recessed (the one in the corner has a column support). The storefront windows appear to be original with paneled wood bases. |</p>

A slate-clad mansard parapet sits over a bracketed wood cornice. The segmental arched entrance bay leads to two recessed doors (one door has been boarded but the transom remains intact). A round arched window bay sits in the second story over the entrance bay. The other two facade bays have paired windows in segmental arched openings.

A dormer is situated in the center of the high pitched hip roof. Brackets sit at the outside edges of the roofline. The two second story windows are wood-framed and share a sill. A row of raised brick frame the lower story windows and entrance bay. The entrance bay has been enclosed with a storm door.

A tall pyramidal roof in the corner dominates the roofline of this house. The main roof is a high pitched hipped roof with an intersecting gable on facade and another on the side. A full-length hipped porch on turned posts wraps to the side. A door in the second story opens to a balcony under the corner pyramidal roof.

**ADDITIONAL INFORMATION:**

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This one-story brick house has a flat roof. It appears to have lost its shaped parapet. The galvanized cornice has dentils and simple brackets, with brick corbelling beneath. The front facade has three openings, with an entrance set behind a curved arch on the right side of the front facade. To the left are two single windows, which have been filled in with glass blocks. They share a continuous limestone sill, which divides the front facade into contrasting brick. The basement is partially above ground, with two windows on the front facade.

22. (cont.) Sources of information. Expand box as necessary, or add continuation pages.

40. (cont.) Description of environment and outbuildings. Expand box as necessary, or add continuation pages.

Building permit # F-5581. Daily record 5/4/1908. Alterations were likely done to the house in 1961, when a permit was taken out for a $7,500 addition to an "office building". The was by owner Kenneth E. Yachum. Daily record 6/8/1961.

41. (cont.) Further description of important architectural features. Expand box as necessary, or add continuation pages.

This two-story brick corner building has a flat roof with white terra cotta coping that is part of a decorative brick and terra cotta cornice with glazed brick diamond and rectangle patterns. The brickwork of the building is slightly variegated. The first floor storefront bays are rectangular openings with brick sills and decorative brick lintels, with brick headers turned vertical to create a flat but visually textured facade. The original door and window openings on the first floor have been filled in with wood and siding, although the opening sizes remain the same. The second floor south facade has a small square window on the left bay, with paired one-over-one windows at the second bay. The east facade of the building has six windows, the first two openings being small squares, with the following four openings being single one-over-one windows. All second floor windows have brick sills and brick lintels of on row of brick headers.

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story brick building originally had a store on the first floor with an apartment above. It has a flat roof with a shaped parapet, featuring a steep pediment on the center of the front facade. To each side of the pediment, symmetrically spaced, are two square brick pinnacles with pyramid tops. The cornice has brick corbelling and a dentil. The first floor storefront openings have been filled, although the iron supports remain, and the opening sizes have not changed. On the second floor are three one-over-one windows, with stone sills and brick segmental arched lintels with bullnosed bricks.

ADDITONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This two-story brick building has a flat roof with four brick pinnacles with stepped corbelling at the cornice. The central bay of the building has two separate curved arches outlined with bullnosed brick, with doors set behind each arch. There was originally a storefront at the first bay. Although the cast iron support is still in place, the windows have been filled in with wooden siding. The third bay, to the right of the entrance bay, includes two single one-over-one windows with limestone sills and segmental arched lintels. Two basement windows are below the first floor windows, each with a segmental arched opening. Each basement window has been filled in with glass blocks. On the second floor are six symmetrically placed windows, each one-over-one with limestone sills and segmental arched lintels. The entire building has been painted.

This two-story brick two-family flat has a flat roof. The side roof has a stepped parapet with terra cotta coping. The front facade has a shaped parapet, with a central flat pediment, which is above the rest of the roof about a foot. The cornice has brick corbelling. On the first floor the entrance is on the left bay, with two doors beneath a gable roof awning. The doors are approached on a stone porch with a metal railing. To the right of the entrance is a paired window with a stone continuous sill, and a brick segmental arched lintel with bullnosed bricks. The second floor has a single window on the left bay, and another paired window on the right bay. Second floor windows also share a stone continuous sill, and each have a brick segmental arched lintel with bullnosed bricks. The two continuous sills, beneath each floor windows, divides the front facade into three sections of different colored brick.

ADDITIONAL INFORMATION:

21. (cont.) History and significance. Expand box as necessary, or add continuation pages.

This one-story brick duplex has a symmetrical front facade. There is a shaped parapet with four pinnacles and a central triangular pediment. The cornice has elaborate brick corbelling. The two front doors are located beneath this pediment. Original doors have been replaced and the transoms filled in. They are accessed by a small wooden front porch. To each side of the central entrance bay are single one-over-one windows, with limestone lug sills, and brick segmental arched opening. The partially above ground basement has two windows on the front facade. The front facade has been painted.

This two-story brick apartment building has a flat roof. The front facade is asymmetrical, with two openings. The first opening is a rectangular window on both the first and second floor. To the right, on the first floor, is the entrance. Buff colored brick outlines the front door, and extends across the bottom of the front facade, up to the sill of the window. Above the entrance, on the second floor, is a small rectangular window. A rectangle of buff brick extends from the second floor window lintels, to the cornice, and stops at the outside corners of the windows. There are three bays, and five openings, on the south side facade. A door is centrally located, and the rest of the openings a small rectangular windows.
