| Current Use: 01 DOMESTIC | 2X: Description/History: |
| Integrity: Good/fair | This romantic revival house has a prominent front chimney left of center. To either side of it is a double hung window with diamond-paned upper sashes. The original segmental arched door is at the right under a cross gable marking the entrance. Rough-cut limestone is used to emphasize the shoulders of the chimney, slightly projecting entry bay, and at the base of the right side of the façade. |

<table>
<thead>
<tr>
<th>Description/History:</th>
<th>Yes</th>
</tr>
</thead>
</table>

This house is classified as a "gingerbread" type even though it lacks the characteristic gabled entrance bay. Its variegated brick facade bears other hallmarks of the type, including a prominent front chimney, round-arched original front door, and copious stone trim. The porch is faced with imitation stone. Metal rail at porch is original. The front chimney shows Art Moderne influence in its striking geometric lines. Original 2nd story windows.

Additions/Alterations:
Replacement window pair, left. Trim wrapped at eaves.

2V. Porch type: OB Other Bay

2X: Description/History:
This house is classified as a “gingerbread” type even though it lacks the characteristic gabled entrance bay. Its bright variegated brick façade bears other hallmarks of the type, including a prominent front chimney(right), round-arched front door, triple set of windows (with leaded glass upper sashes) at the left, and copious stone trim. The concrete porch base is poured to imitate stone, and metal rails appear original. Attic casements are original.

Additions/Alterations:
Trim wrapped at eaves.

Ownership information:
HACKWORTH, ALEX T & TINA FARME
6151 ADKINS AVE
ST LOUIS MO 63116

2Y. Environment/Outbuildings:
Vinyl-clad gable garage is noncontributing.

2X: Description/History:

This variegated brick house has an unusual roof form. The main roof is a front to back gable; at the façade a much lower side gable runs across the façade, with a front gabled projection at the left. The front door, flanked by fluted wood pilasters, is in an entry bay with a flared shed roof. Original copper guttering.

Additions/Alterations:

Replacement windows. Horizontal modern siding in front gable end (above lower side gabled roof).

Contributing to potential historic district?  ✔ Yes  ☐ No

Outbuilding contributing to potential historic district?  ✔ Yes  ☐ No

Condition:  Good

2Y. Environment/Outbuildings:

Frame garage with gable roof I clad with pressed board siding with metal corners.

2X: Description/History:  

This small Modern house has a shallow hipped roof. It is rectangular in plan, with the long side perpendicular to the street. The original front door is at the right, and a wide (replacement) fixed pane window is at the left. The base of the façade is imitation stone veneer, below red brick veneer. Both the window and door are sheltered with awnings. This house is not present on 1963 Sanborn map.

#### 2X: Description/History:

This red brick Modern house has a front door at the far left end of the façade, accessed by a small concrete stoop with four steps. The door is original. To the right is a wide window, a broad fixed pane with 4-pane windows to either side. The main roof is side gabled, with a set back section at the right. No permits were found for city block 4722; this house was constructed after 1950, according to Sanborn map of that year.

| This variegated brick “gingerbread” house has many features common to the style, including a front gabled roof, a secondary projecting peak defining the front door, a round-arched door and storm door, and a wide chimney that projects from the front elevation (just right of center). The red brick building uses limestone trim as shoulders and imposts, and decoratively laid brick as headers at the triple window set, left, and the small set of 3 windows in the gable end. The front porch is a simple concrete stoop with metal rails. The front door, storm door, leaded glass windows and railings are original. No permits were found for city block 4722. | |

| Additions/Alterations: | |
| Vinyl over wood trim. Dormers (south elevation) are added. | |

2V. Porch type:

STUDEBAKER, JUDITH ANNE
5702 ARENDES DRIVE
ST LOUIS  MO  63116

Ownership information:

2X. Description/History:

This variegated brick “gingerbread” house, simpler than its earlier counterparts, has many features common to the style, including a front gabled roof, a secondary projecting peak defining the front door (in this case the right bay has a secondary gable and the door itself, center, has its own third gable), and a wide chimney that projects from the front elevation (just left of center). The variegated brick façade uses sparse limestone trim, especially to form chunky lintels at the paired windows left and right, and basketweave brick and stacked headers. The front porch is a wide concrete stoop with metal rails. Front door, sash windows with leaded glass upper sashes, diamond-paned leaded attic window, and metal railing are original. No permits were found for city block 4722.

Additions/Alterations:

Vinyl over wood trim.

This front gabled two-family flat has a wide front porch, with a single front door at either end. The building is red brick. The front porch is limestone with battered piers at either end supporting a truncated gable roof on which a second story balcony is set. The porch roof's gable end is stuccoed with two pipes sticking out of the stucco surface. The balcony door and its side windows are above the triple set of 3/1 windows centered at the first story. The balcony has no railing. It is sheltered by a hipped hood on two wood brackets.

2X: Description/History:
This wide four-family building has a variegated red brick exterior and shallow front gable roof. The limestone porch has battered piers at either end. The wood posts that flank the centered steps appeared to be an added means of support. The four original front doors are spaced at the center of the first story; to either side is a single pair of narrow original 3/1 sash windows. At the second story, the middle half of the porch’s gable roof is cut away to create an inset balcony. Both doors are original. To the outer edge of the doors is a pair of 3/1 windows at either side; between the doors each unit has a small art glass window

Additions/Alterations:
Porch gable end covered with later modern horizontal siding.

#### Description/History:

This wide four-family building has a variegated red brick exterior and shallow front gable roof. The gabled brick front porch is centered over the four front doors, which are original. The porch's gable end has stucco and imitation half timber. To either side of the porch is a single pair of narrow double hung 2/1 windows. At the second story, to the outer edges of the façade are pairs of 3/1 windows; towards the center, each unit has a small art glass casement window.

**Additions/Alterations:**

Screen/storm doors and windows are only notable alteration.

BA Balcony  

2X: Description/History: 
This multi unit variegated brick building has three front entrances. The front porch runs the full width of the facade, with a single front door at either end and one at the center. Two pairs of 3/1 windows are between doors. The front porch is limestone with battered piers at either end supporting a partial gable roof into which a second story balcony is set. Two balcony doors are centered under a shed hood; to either side is a window with a fixed awning. The main roof is an open front gable. According to the assessor's database, this is a 3-family building.

Additions/Alterations: 
Some wood trim is wrapped. Replacement balcony railing.

Outbuilding contributing to potential historic district?  □ Yes  
□ No  

Date Surveyed:  9/3/2009  

Contributing to potential historic district?  □ Yes  
□ No  

2X: Description/History:  
This red brick walkup building reflects elements of the Modern as well as the Moderne. The lines are severe, with no applied ornament. The front door is centered at a concrete stoop in a field of imitation stone veneer which projects from the main plane of the faced. Above this is a set back riser of imitation stone veneer, above which a large glass block window is set into a vertical panel of imitation stone veneer which is almost flush with the front wall. A large fixed awning over the front door is supported on two openwork metal supports. The three-bay composition is not perfectly symmetrical, because the multipart metal windows at each story are not evenly spaced; the two at the first story are placed somewhat to the left of the two at the second story. The structure of the building appears to be load-bearing brick walls with steel joists, concrete floors and wood rafters (per sanborn maps).  

Additions/Alterations:  
Replacement contemporary front door.

2W. Porch Feature(s): 
2X: Description/History:
This four-family flat-roofed brick building has a wide center stacked porch and covered balcony, its most distinctive feature. The four original cottage-inspired front doors are paired at the brick porch. Brick piers support a balcony; the balcony’s brick piers are narrower and support a flat roof. The two multilight balcony doors are at the outer edges, with a small art glass casement window to the inside. At the outer bays are wide replacement 1/1 windows at each story; those at the first story are topped by soldier brick lintels; at the second story, they are enhanced by blind round arches in double courses of soldier brick with stone highlights. The front parapet wall is stepped over the windows and at the center, where a stone or terra cotta cartouche centers the center arch, which has a finial.

Photo date: 11/6/2008
2. Description/History:

This Modern-flavored version of St. Louis’ small brick gingerbread Tudor houses eschews the romantic rooflines in favor of a simple unadorned front gable. Rough limestone forms quoins at the front door, just left of center, and the windows- a small pair of 1/1 sashes, left, and a 2/2 (with horizontal rather than vertical panes), right. In the gable end is a small 3/1 window. The foundation and stoop base at the façade are faced with imitation stone veneer. The front door is original.

Additions/Alterations:

The windows are contemporary vinyl replacements.

2. Environment/Outbuildings:

There is a gabled frame garage clad in vinyl siding.

### 2X: Description/History:

This front volume of this variegated brick “gingerbread” house has a side gabled roof, crossed by a steep projecting peak defining the front door bay at the right side of the façade. The original door and its storm door are Tudor-arched; the limestone architrave is impressively wide. The front porch is a simple brick-walled stoop which is almost as wide as the façade. Sanborn map indicates Cinder Block construction. A triple set of original 3/1 windows at left side of façade. Pair of original diamond-paned leaded glass casements in gable end.

#### Additions/Alterations:

Some wood trim wrapped (vergeboard)

#### Description/History:

This simple dark red brick bungalow has a side gabled roof and a broad full width gabled front porch. The gable end and the gabled dormer above it are sided with a modern siding. The front door and its sidelights, center, are replacements. To either side are 1/1 windows.

#### Additions/Alterations:

The four gable windows are modern single-panes. Some wood trim wrapped.

---

Photo date: 11/6/2008
This small red brick house is a single story with a hipped roof. The front door is centered at a slab porch, its shed roof supported on four full-height columns. To either side of the door is a pair of narrow vinyl windows over a built-in planter box. A small eyebrow dormer window is centered over the porch.

#### 2X: Description/History:
This side-gabled "gingerbread" house has cross gables at the left bay and a smaller one at the right bay’s front door, an original round-arched door. The red brick building uses limestone trim as imposts and keystones. Brick is used for the sills of the triple set of double hung windows, left (with diamond paned leaded upper sashes) and the diamond paneled casement pair in the left gable end, as a soldier lintel at the lower windows, and as voussoirs at the front door. The concrete slab front porch runs the full width of the façade and has an open brick rail. Original address plaque, beadboard eaves. The Sanborn map indicates this house has a tile structure.

| 2X: Description/History: |
This house has a variegated red brick exterior. The façade is a three-bay front gable which projects from a side-gabled main house. The eaveless front gabled section has a round-arched front door, left, with a fabric awning. The architrave is subtly projecting brick supporting a wood arch, now filled with a fabric awning. The two windows at the first story are original 6/6s. A simple concrete stoop serves as front porch. The side gabled section of the house extends one more bay to the left (north), with a single window facing the street. A wide chimney breaks the roofline at the right (south) elevation. |

| 2Y. Environment/Outbuildings: |
There is a gabled frame garage clad in vinyl siding. |

2X: Description/History:  
The side gabled front volume of this house has a variegated red brick exterior. It reads as a simplified Modern version of the "gingerbread" houses that are common in the neighborhood. The right bay is slightly projecting front gabled section, with a front door at a concrete stoop, left, and an almost square window (vinyl) on a brick sill to the right. A small 6-pane window is at the gable end. To the left of this section a chimney with limestone shoulders is set back from the gable and forward from the plane of the side-gabled front wall. The right bay has another square replacement window. The building identifies as Modern because of the clean geometry, restrained ornament and lack of eaves. The Sanborn map indicates this house has a tile structure.

Additions/Alterations:  
Vinyl windows; replacement door.

2X: Description/History: 
This side gabled Colonial Revival house has a symmetrical three-bay façade. The exterior is smooth red brick, which also forms sills, lintels and a corbeled cornice. The original front door has a stern classical wood architrave. The front stoop, three steps above grade, is concrete. The window to either side of the front door is a vinyl replacement. Three gable dormers facing the street are vinyl-clad, each with a single vinyl window.

2X: Description/History:

This “gingerbread” house has front-facing cross gables at the left bay and a smaller one at the right bay's front door, an original round-arched door and original wood storm door. The variegated red brick building uses plenty of picturesquely irregular limestone trim as imposts, defining the door opening, at the chimney base and shoulders, and at the front porch. Brick is used for the sills of the triple set of windows, left, and the casement pair in the left gable end, to define blind arches above both window sets, and as a recessed stacked stretcher channel in the chimney. The chimney, left, and the front door bay, right, project slightly from the main plane of the façade. The front porch is a simple concrete slab covering the right 2/3 of the façade.

Additions/Alterations:

Façade windows are replacements.

2X: Description/History:
This house has a variegated light brown brick exterior. The main roof is hipped, with a slightly projecting wide cross gable at the right bay. At the first story of this bay is mullioned window set with three double-hung windows with pastel leaded glass upper sashes under a leaded glass transom. In the second story gable end is a smaller pair of windows with pastel leaded glass upper sashes. The gable end is eaveless. At the left side of the gabled section is a fanciful projecting chimney with two spiral chimney pots. The round-arched front door is at a concrete stoop, left. Flush limestone trim is used at the chimney shoulders, architrave, as quoins and sills and arches and lintel

Photo date:  11/6/2008
This Modern Colonial Revival house has a red brick exterior and a symmetrical side-gabled façade. The front door is centered in the three-bay composition, with an applied wood architrave featuring a scrolled broken pediment. At the second story above the door is a small octagonal window. At both stories of the outer bays are replacement vinyl windows with black shutters. Brick is used for sills and soldier lintels (a soldier course at the upper story just below the almost non-existent eaves).

2X: Description/History:

This picturesque variant of the gingerbread house reaps good effect from brick and limestone detailing. The main form is best described as intersecting gables. Most of the façade is a wide front gable, fight, with a steep parallel gable to the left housing the round-arched front door. The left gabled section is actually a projection from a taller gable which adds another bay pushed back at the left side of the façade. The front set of windows is on a limestone sill and features an unusual panel of basketweave brick above (suggesting the tympanum of a blind arch, but without a defined arch). In the gable end are two small narrow windows, one set five courses higher than the other. Flush limestone is used for the front door surround, and irregular round-faced limestone is used at the base, corners, and detailing the projecting chimney at the right (south) elevation. The round-arched original front door is intact. This house retains its polychrome French ceramic tile roof.

Additions/Alterations:

Triple set of replacement windows at first story.

2S. Roof Material: 45 Slate

2T. Roof Feature(s):

2U. Foundation: 30 BRICK

2V. Porch type: CB Central Bay hood

2X: Description/History:
This house has a variegated brick facade, clearly separated in three symmetrical bays by the projection of the center bay. Original centered front door with leaded sidelights and flared metal hood. 8/12 windows at outer bays of first story; 8/8 windows above them at second story with wood frieze board instead of lintel. 6/6 window centered at second story below centered low-pitch cross gable. Small oculus window in gable end. Brick is the only visible material at the foundation.

Additions/Alterations:

2O. Structural system: LB Load-bearing Brick
2P. Wall material: 30 BRICK

2Q. Other Material(s):

2R. Roof Shape: HP Hipped
2S. Roof Material: 45 Slate

2T. Roof Feature(s):

2U. Foundation: 30 BRICK

2V. Porch type: CB Central Bay hood

2Y. Environment/Outbuildings:
There is a gabled frame garage clad in vinyl siding.

Date Surveyed:  3/6/2009  

2X: Description/History:  
According to Sanborn maps, the first story has a tile structure and the 2nd story, wood. This commercial building is two stories, with a brick exterior highlighted by buff terra cotta trim at string courses, cornice, and as ornament and coping at the parapet wall which hides the flat roof. The façade is divided into three storefront bays and two Tudor-arched doors opening to stairways to second story units. The door architraves at the first and fourth bays are terra cotta; the fourth bay’s is more elaborate, with two finials that project up to the wall plane. Above this, a 1/1 window is set between stories (indicating a stair hall). The other bays have windows at the second story – a single 1/1 at the first bay (above the stair entrance) and triple sets above the three storefront bays. All of the façade windows are replacements. The storefronts, while modern in construction and design, retain recessed openings and large windows. Visible foundation is brick.

---

**Description/History:**

This tan single story brick building has a symmetrical facade. Terra cotta is used at the façade’s foundation level and as piers and lintels defining the double door opening and the original 12/12 windows to either side, and as stylized coping. The piers to either side of the doors have a setback at eye level on which lanterns rest, and rise above the front parapet wall. Between them more ornate terra cotta rises to a ball finial above the parapet. Per Sanborn map, this bldg has a steel frame.

**Additions/Alterations:**

Doors and transom replaced.

2X: Description/History:  
This two-story building has a speckled tan brick exterior and a flat roof. The façade is three symmetrical bays, with a round-arched center entrance between two storefronts at the first story. At the second story are two sets of three 1/1 windows (replacements) on stone sills. A terra cotta cartouche is in the parapet wall’s center section, which is both stepped and peaked. The coping is terra cotta.  

Additions/Alterations:  
The storefronts are presently divided into three wood-paneled sections, with painted windows, bulkheads and transoms. Replacement windows at second story.

2X: Description/History: 

At the façade of this two-story red brick building, two storefronts flank a pair of doors leading to the second floor apartments. West storefront has a corner entrance. Parapet wall with terra cotta coping has peaks over both storefronts. The second story windows and one 11-pane front door are original. Sanborn map indicates 4" tile firewall between two sides. 

Additions/Alterations: 

The storefront openings are filled in with siding and new doors. 

Photo date: 6/14/2008
This two-story variegated brick 8-unit building is symmetrical with 6 bays and 2 entrances at the 2nd and 5th bays. Bracketed gabled hoods shelter the entrances. Mid-story over the two entrances are art glass windows. Triple sets of 3/1 windows (original) are at both stories at the remaining bays. Terra cotta cornice. Stepped and arched parapet. One of the two doors is original with art glass sidelights.

2X: Description/History:  
This red brick four family building is handsomely designed in the Arts & Crafts tradition. Four original front doors are at a flat-roofed porch at the center bay. The porch has stepped brick piers, and its roof serves as a balcony for the second story. The two upper units have original balcony doors at the center of the second story, with small art glass windows next to them. At the outer bays of the first and second stories are paired 6/1 windows on stone sills. The building has a flat roof but at the front is a side-gabled section lending extra stature to the building. A front-facing cross gable with bracketed eaves is at the center bay. The building’s front wall plane extends beyond the side walls in a stepped buttress-like fashion.

2X: Description/History:

This is a red brick four-family building. The limestone front porch runs the full width of the façade, roofed only at the outer bays. The porch roofs are flat and serve as balconies for the second story units; the iron-railed balconies have original doors and double hung small art glass side windows. At the center bays, two pairs of 6/1 windows are at each story. The building has a flat roof but at the front is a side-gabled section lending extra stature to the building. A Flemish gable parapet wall with terra cotta coping and ornament is at the center bays.

Additions/Alterations:

2X: Description/History:
The original permit for this address is from 1926, with a significant addition in 1928 and a garage addition in 1937. This brick commercial building is two stories with a flat roof. The façade is striking enameled white brick with green enameled brick trim. At the first story two doors (one original, one an incompatible replacement) are at the left and a storefront window at the right. At the second story are two sets of paired 1/1 windows under fiberglass awnings. The first story doors share an awning with the single story commercial building to the east. The building is in good condition but some of the bricks are spalling.

Additions/Alterations:
This building is connected to the single story to the east by a narrow brick addition that fills the original gangway. (added since 1963)

Outbuilding contributing to potential historic district? ☐ Yes ☑ No

Date Surveyed: 4/27/2009

Photo date: 11/7/2008

Additions/Alterations:

Almost no original material is visible; this house is believed to be the same one on the 1938 Sanborn map but it's hard to tell from the outside.

Contributing to potential historic district? ☑ No

2X: Description/History:

this single story house has a low-pitched front gabled roof. The front door is centered at a concrete stoop, and to either side is a set of horizontal slider windows with applied shutters. Modern horizontal siding. Original shaped vergeboard and wood slatted vent.

Contributing to potential historic district? ☐ Yes ☑ No

3838 BATES ST
ST LOUIS MO 63118

Date Surveyed: 4/27/2009

Photo date: 11/7/2008
This two-family red brick building is two stories. The front porch is full-width, with battered brick piers and stone foundation. The porch roof is gabled with a stucco gable end. The two original front doors are at opposite ends of the façade with a triple set of original 3/1 windows between them. At the second story, a triple set of 3/1s is centered. The flat roof is fronted by a parapet wall with decorative brickwork and terra cotta coping. Front doors are original.

Additions/Alterations:
This simple modern house is a single story. The front door is at the right side of the façade, and a set of windows is at the left. The base of the façade is concrete brick, and the upper half is variegated brick, separated by a limestone sill course. The building is likely noncontributing to a potential district at this time due to its date.

Additions/Alterations:

#### 2X: Description/History:

This is an unusual frame example of a common St. Louis brick property type. The front porch is at the right bay; its flat roof doubles as a balcony. Above the cornice, the front parapet wall has a center step and end blocks. Front doors and balcony door are original.

#### Additions/Alterations:

Window openings and vinyl replacements at left bay are shorter than historic windows, and their trim is obscured by the vinyl siding and inoperable applied shutters. Base of façade is covered with imitation stone veneer.

#### Photo date: 11/26/2008

<td>In 1963 this rear building was a large wood garage and carpentry shop. The current structure connects two buildings that were present on the 1938 Sanborn: in front, a 3-car garage and carpentry shop, and in back a small lumber storage building. A garage door and a person door face the alley. A small ext. brick chimney is near the front (north) of the bldg. Apparently the two were united under a single roof between 1950 and 1963.</td>

**Outbuilding contributing to potential historic district?** Yes

**Date Surveyed:** 8/1/2009

**Photo date:** 11/26/2008

---

**Additions/Alterations:**

Replacement window in gable end.

---

The front gabled variegated brick house has a steep secondary gable projecting at the left bay. The round-arched original door is intact. Triple set of 3/1 windows, right.
The three houses at 3952-60 Bates seem to have had in common a recessed corner porch at the left bay.

Additions/Alterations:
This simple hip-roofed frame house has replacement doors and windows, and no original material visible.

2X: Description/History:  
This tan brick house has a side-facing gambrel roof with a wide front shed dormer. The front door is centered, surrounded by leaded sidelights and transom. Its porch's gable roof has a vaulted intrados and two wood columns as support. To either side is a pair of 8/1 windows. At the dormer is a center pair of 6/1 windows with wider 8/1s to either side. All windows retain original wood storms.  

Additions/Alterations:  
Dormer and eaves sided with aluminum. Modern 1-story addition set back at left (east) elevation.

Date Surveyed: 8/1/2009

2X: Description/History:

This house is here in 1916; all of the lots between here and 4002 Bates were part of the property, which included a rear stable and a large hen house. The house was converted to a two-family building sometime between 1916 and 1938. The façade's base is dark brown brick; red brick is used above a first story limestone sill course. A small gable dormer faces forward from the hipped roof. The two Craftsman-era front doors are at a balcony-roofed porch at the right bay. Dentillated friezes are at both the porch and main eaves.

Additions/Alterations:

All façade windows are replacements, as is the balcony door.

This is probably (not confirmed) the tenement permitted in 1925 at 4028 Bates (probably a wrong or re-numbered address). This symmetrical brick façade is laid in Flemish bond. The center bay is slightly recessed, with the front door a step above grade. The door and its 4-light sidelights are original. The door is sheltered by a bracketed gabled hood. Between floors over the front door is an original 1/1 window. At the outer bays, original window sets at both stories involve a center 6/1 flanked by narrower 4/1s. Bracketed hoods are over the second story window sets. The front parapet wall has broad center steps at the outer bays and retains original terra cotta coping.

Contributing to potential historic district? Yes
Outbuilding contributing to potential historic district? No
Date Surveyed: 4/2/2009

2X: Description/History:
This house has a front facing gambrel roof. The façade is red brick above the first story limestone sill course, and speckled brown brick below. Door, sidelights, transom, 1/1 windows wood trim, and brackets are intact. At the second story a Palladian-inspired set of windows shares a common sill. This building's typology is related to the foursquare.

Additions/Alterations:
15'34 addition 1948.

<td>This front gabled house is sited mid-lot, making close inspection impossible. It appears that the house has been in place since before 1916 (based on Sanborn map evidence), which is consistent with a permit found for moving a house at this address in 1913 (probably moving to this address). The footprint of the frame house starts as a shotgun, which later had additions on its left (east) side. Without any idea of where the house was moved from, and without close inspection, any attempt to date it is strictly guesswork.</td>

**Contributing to potential historic district?** Yes No

**Ownership information:**
VINCENT, TIMOTHY & LINDA
4162 BATES
ST LOUIS MO 63116

---

**Description/History:**
This small house has a front gable end facing the street with a gabled porch which is almost full-width. The original 1/1 window, left, retains its wood trim. Notched vergeboard.

**Additions/Alterations:**
Gable end of porch covered; replacement front door; replacement metal trellis-style porch supports.

**Photo date:** 12/30/2008

### Additions/Alterations:

In addition to the exterior wall surface, the front door is not original. The transom is covered. Fiberglass awnings are added. Some original porch trim is present but the posts and rails are replaced.

### Photo Date:

12/30/2008
This front gabled house has a hipped porch, centered, which is almost as wide as the façade. The porch suggests the Craftsman era, but the only original material visible at the front of the house appears to be the porch ceiling.

Additions/Alterations:
Most surfaces armored with vinyl. Front door and windows replaced.

### 2X. Description/History:

This house has a variegated yellow and tan brick exterior with copious chunky rough-cut limestone trim at the porch, foundation, the lower walls and shoulders of the chimney, lintel, and around the front door. The main form of the house is side gabled. Two cross gables face the street: at the right, a very steep-pitched gable projects slightly from the front wall plane, its flared eaves only about 5 feet from the ground. The front door is at this bay, an original round-arched door with original storm door in a stone architrave, with a small leaded glass window in the gable end. At the center bay a tall wall dormer has a pair of leaded glass windows in the gable end; a triple set of 1/1 leaded glass windows is below. The left bay is a projecting chimney. The front porch is a concrete slab with five steps up at the right.

### Additions/Alterations:

- Wood trim is sheathed with vinyl.

### Description/History:

This red brick bungalow has a side gabled composition shingle roof. The full-width porch has a low-pitched gable roof with imitation half-timber and stucco in its gable end. The porch is limestone and has battered piers at either end. The original front door and a small art glass side window are at the left, and a set of three 6/1 windows is at the right. A wide gabled brick-faced dormer has a similar triple set of windows and a slate shingled gable end. Its side eaves, like those of the front porch, have exposed rafter tails.

### Environment/Outbuildings:

There is a gabled frame garage clad in wooden double-dropped lapped siding.

This red brick bungalow has a side gabled green ceramic tile roof. The full-width brick porch is sheltered under a much lower-pitched forward extension of the main roof. The porch has elephantine pink granite-clad piers at either end. The front door is centered, and two 3/1 windows are spaced on both sides. A wide gabled brick-faced dormer (with shingles on the side elevations) has a triple set of 3/1 windows with a soldier brick lintel. Its eaves and the house’s side eaves are supported on brackets. The visible foundation at the side elevation is brick.

The two-story house displays the brickwork we associate with the Arts & Crafts style in St. Louis. The right side of the façade reads as a two-story brick house with an open front gabled roof; the front door is at the left side of this volume, with two 3/1 windows rounding out the first story’s fenestration and three at the second story. To the left of the front door is a small side window, then the left side of the first story steps back and there is a single 3/1 window at this section. At the second story of this section the roof is side gabled, and it forms a projecting porch that unifies the two sections by overlapping over the front door. There is a slate-sided shed roofed dormer that abuts the front-gabled section of the house. Soldier bricks in a contrasting brown forms lintels and courses.

This two-story red and brown brick house has a front-gable right section which projects slightly from the plane of the side-gabled left bay. The front door is in the recessed section at the left; the porch base is a concrete slab just two steps above grade, with a shed roof supported on brackets and a single brick pier, and overlapping onto the projecting right section. Above the front door at the second story an 8/1 window is just under the eaves. At the first story of the right bay is a triple set of windows on a brick sill; above this there is a projecting vinyl-sided box bay which rises into the gable end and has a similar set of three windows. Façade windows are original, as is the front door. The front door is round-arched, and brick is used decoratively to form soldier courses and quoins.

2U. Foundation: 43 Limestone

2V. Porch type: OB Other Bay

2X: Description/History:
This two-story variegated red brick house has a front-gable right section which projects from the plane of the side-gabled left bay. The front door (original) is in the recessed section at the left; the porch base is a concrete slab just two steps above grade. The porch roof, supported by two brick piers with battered bases, is a hipped gable; the front gable roof of the right bay descends on its left side and joins the porch roof. Above the front door at the second story a pair of vinyl replacement windows just under the eaves.

Additions/Alterations:
Facade windows have been replaced with vinyl. Eaves and vergeboard covered with vinyl

<td>2X. Description/History:</td>
<td>This two-story red brick house has a front-gable right section which projects slightly from the plane of the side-gabled left bay. Massing and detailing are consistent with an Arts &amp; Crafts take on the English cottage. The front door is recessed behind a round-arched opening at the right; at this side the gable roof descends low to its right to about the level of the top of the opening. A 6/1 window is to the left of the door; above it in the gable end is a pair of 6/1 windows. A wide chimney projects from the front wall, truncating the left side of the gable. To the right of the chimney the roof is a low-pitched side gable. A wide shed dormer faces the side elevation (Dewey Street). Limestone is used decoratively at the chimney shoulder and around the second story windows; brick forms soldier lintels, rowlock voussoirs, and sills; and stucco forms a decorative vertical channel in the chimney.</td>

### 2X: Description/History:

This side gabled house has a symmetrical façade with a 6th bay, a gabled side porch with arched opening, to the right. The front porch is full-width but unroofed. The 24-light round-arched front door is sheltered by an arched hood with two overscaled brackets. To either side of the front door are two sets of French doors with arched art glass transoms. Stuccoed gable dormers has shaped wood vergeboards and exposed rafter tails.

### Additions/Alterations:

Replacement dormer windows.

Outbuilding contributing to potential historic district? No

Photo date: 12/30/2008
Although this variegated brick house is typed as a "Gingerbread," its form is not the typical front gable. A side gabled front volume has a wide cross gable, right, and a narrower gabled entry bay, left, with a front chimney between them. The arched front door and storm door are intact. In the triple set of windows, right, upper sashes have leaded glass (as do the pair in the gable end above them). Limestone is used at the door surround and chimney base.

Additions/Alterations:
Some wood trim is wrapped (subtle).

This tan-yellow brick house has a side gabled front volume with a wide cross gable at the right bay facing forward. The left bay projects slightly, defined by a chimney at the right side; the round-arched original door is in a deep-revealed limestone surround, and a small gabled wall dormer with an art glass window is above it.

Additions/Alterations:
Wide 1st floor right window is a replacement. Some wood trim is wrapped with aluminum.

2X: Description/History:
This red brick house has a full-width front porch. The left end of the porch has a brick structure with arched openings and a gabled roof. The gable end retains its stucco and stick finish. The front door, left, is original, as are the two squat 3/1 windows in the gable end. Brown brick is used as a soldier label course. Shaped vergeboard are supported on wood brackets at both of the gable ends. Brick is the only material visible at the foundation.

Additions/Alterations:
The front window set, right, would have originally had a Palladian feel, with a stucco blind arch over the center where the middle window would have been. A wider fixed pane now centers the opening.

#### Description/History:

This side gabled variegated brick bungalow has a wide front gabled wall dormer. The full-width brick porch has a front gabled roof which rests on two piers. Original front door is at the right, and triple sets of 3/1 windows are intact at the dormer and the left side of the façade. The roof is original French red tile.

#### Additions/Alterations:

Modern siding replaces stucco at porch and dormer gable ends and dormer panels.

#### 2X: Description/History:

Sanborn map indicates tile construction. This simplified later-day gingerbread house has a front gabled roof with a secondary front gable slightly projecting at the entrance bay, left. The original door is set in a stone surround. The large window opening at the right has two 2/2 windows (horizontal paneled) flanking a center picture window. A single squat 2/2 is in the front gable end. Tannish brick at the lintels and red brick sills contrast with the otherwise variegated brick exterior.

#### Additions/Alterations:

Shutters added and some wood trim wrapped.

#### Environment/Outbuildings:

Gabled garage is vinyl-clad and relatively modern

**Additions/Alterations:**

- Replacement windows; original wood trim wrapped with aluminum.

**Ownership Information:**

RHOADS, WILLIAM T & DIANN

3939 BOWEN

ST LOUIS MO 63116

**Photo date:** 12/30/2008
The unusual roof form of this bungaloid house appears as a side-gabled main roof with a 3/4 width gambrel wall dormer missing the lower slope of its left side. At this side the side gabled roof slopes down and flares into a hood over the front door. The original round-arched door is intact as well as three round-arched windows, right, and a casement pair at the second story gambrel end. The full-width brick porch has no roof. Brick is the only material visible at the foundation.

Additions/Alterations:
fiberglass awnings added at side and second story windows.
This side gabled variegated brick bungalow has a full width hipped brick porch. A hipped gable dormer faces the street. The original lantern is to the right of the front door.

Additions/Alterations:
Replacement door and windows.

2V. Porch type: FU Full

2X: Description/History:
This front gabled light brown brick house has a full-width brick porch with a front gabled roof. The porch's gable end retains its stucco and stick finish. Triple sets of original 3/1 windows are at the left side of the first story and the center of the second story. At the second story, the outer windows are small art glass casements. Contrasting red and brown brick is used in basketweave courses at the porch walls and above the second story windows.

Additions/Alterations:
Some wood trim wrapped with aluminum.

### Description/History:
From a distance the façade of this house appears to have a staggered header brick bond, but is instead the brick with a rough-textured center with outer fourths a smooth and lighter finish. The front gabled porch is almost full width. Its base is limestone; the brick upper piers are pierced with arches. The front door is original.

### Additions/Alterations:
Replacement windows with inoperable added shutters. Aluminum siding. Covers porch gable end.

**Photo date:** 12/30/2008

2X: Description/History:
The right side of the façade has a front gable above the second story. The left bay is side gabled with a low shed dormer that is attached to the cross gable at its right side. The round arched front door (original with wood screen) is at the left bay, recessed in a round-arched opening between two pilasters which rise through the roof and are capped with stone. A small arched casement is to the left of the front door. The three casements at the shed dormer also have leaded diamond-paned glass. At the right bay is a bay window with flared metal hip roof. The gable end features soldier and stacked courses, recalling the stickwork in stucco gable ends. All façade windows are original. Rear second story balcony filled in to become sunroom.

**Additions/Alterations:**

This variegated brick house has a full-width unroofed porch. The original arched front door is at the left bay, which is otherwise faced with imitation stone veneer (the amount of wall covered is a relatively small portion of the façade). The right bay is a front gabled wing. Two casement window pairs, right, have round-arched fanlights. A chimney projects slightly between the two windows and breaks the gable roof at the peak. The chimney retains its large S-turnbuckle.

Imitation stone veneer also covers the porch base and is used in the arched niche in the chimney wall. Front windows are replacements (except for fanlights).

### Outbuilding Information:

Outbuilding contributing to potential historic district?

### Description/History:

Sanborn map seems to indicate brick exterior walls and tile fire wall down the middle. This two story dark red brick building is no longer in commercial use; the corner storefront's windows at both elevations are filled in with board and smaller vinyl windows. The cutaway corner entrance (with new door) is not behind a column; the corner above it is cantilevered, and there is no obvious sign that there was a column holding it up. The angle over the entrance is slightly less than 90 degrees, causing the corner bricks to just out slightly beyond the corner. Sills are enameled white brick. At the south elevation, first floor windows are multi pane. Upstairs windows are 3/1s. The two doors at the south elevation are original; the one at the east elevation is a replacement. Terra cotta coping and embellishments (swags, shield with lion).

### Additions/Alterations:

Windows filled as above.

2X: Description/History:  
This front gabled variegated brick bungalow retains original 3/1 window pair at the façade.  

Additions/Alterations:  
The full-width porch has 4 limestone bases under trellis-style metal supports hold up a fiberglass awning. It appears that this replaced a hood over the door. The front door and one of the façade windows have been replaced.
This variegated brick building has a steep front gable, left, meeting a side gabled section, right. The front door is original, and at the right bay is an original pair of 3/1 windows. Planter box on three concrete brackets below window pair, left.

Imitation stone veneer covers the porch base, and the window pair at the left bay is a vinyl replacement.

2X: Description/History:
The main roof of this variegated brick house is front gabled, with a projecting gabled room at the left side. The two windows at the projecting room are topped with stuccoed blind arches outlined in brick; below them, three original concrete brackets support a window box. The original front door is in the right elevation of the projecting room. One of the two pairs of windows at the facade is original (3/1s), and one has been replaced.

Additions/Alterations:
vinyl covers some wood elements. Two replacement vinyl windows at facade. New imitation slate roof.

---

**Description/History:**

This tan brick house has a steep front gabled left bay crossing from a main side gabled roof. Below the right window pair, three original concrete brackets support a window box. The roof is the original fireproof asbestos imitation slate shingle.

**Additions/Alterations:**

Replacement door, window, attic vent. Fiberglass awning over door. Imitation stone veneer applied around window and porch base, and below left window to the left of the front door.
This front gabled variegated red brick house has a full-width gabled porch; the right two thirds of the porch is built out as a sunroom with four original 3/1 windows facing the street and French doors to the open section of porch. The roof is the original fireproof asbestos imitation slate shingle.

Additions/Alterations:
Front door is a replacement; vinyl covers some wood elements (eaves) and porch's gable end.

Photo date: 5/30/2008
The 1916 Sanborn Map shows that the front ell was added after 1916 - the original house had a small rectangular footprint along the rear of the lot, with a center porch. (The permit listed it as a two-room dwelling.”) Front leg of the ell added later in the historic period. This house is sited at the rear of the lot so the façade was not available for close-up inspection.

**Additions/Alterations:**
Front door and porch railings and posts appear to be replacements.

Contributing to potential historic district? □ Yes □ No

2X: Description/History:
The eastern side of this building appears to be the single story frame shop shown on the 1916 Sanborn, permitted as a butcher shop in 1911. Historic doors are still used at Burgen and to the parking lot, east.

Additions/Alterations:
A western shed addition and complete re-cladding with brick veneer and metal siding renders the original building unrecognizable.

Photo date: 11/17/2008

This front gabled house has a bracketed gabled hood over the front door, left. A metal awning is over the pair of 1/1 windows, right. In 1938 this house is shown as a shop on the Sanborn map. The foundation facing Concordia is concrete block while the side elevation is poured concrete, probably indicating that this was originally a garage opening to Concordia.

Additions/Alterations:

In 1912 there is a permit to "raise dwelling" here (owner and contractor use this address). There is also a 1919 addition to owner Frank Mathers. This house has a projecting right bay; the left bay is side gabled, with a shed roofed porch extension facing the street. (This plan is more or less a mirror image of similar houses on the other side of Concordia.) The front porch is filled in, with the door at the left elevation. The two front 1/1 windows appear original.

Additions/Alterations:
New window hoods and shutters.

Date Surveyed: 6/1/2009

**A. Historic Name:**

**C. Other Name:**

**2X: Description/History:**
This single story house has a projecting left gabled bay which intersects with the side-gabled volume behind. As with most of the houses built on this same plan on this block, the porch at the intersection of the wings has been filled in. This was probably an early alteration; the pair of casement windows appears to date from the historic period. The two 1/1 windows in the left bay are original.

**Additions/Alterations:**
12'24 addition was permitted in 1929. Window trim/wood detailing obscured by application of siding. Fiberglass awning at (new) porch.

**2X: Description/History:**

This house has a projecting right bay; the left bay is side gabled, with a shed roofed porch extension facing the street. (Similar to others on the block, this house has slightly different proportions.) A hipped porch is at the intersection of the two wings; its supporting pier is boxed and sided with vinyl. At the right bay is an original pair of 1/1 windows.

---

**Additions/Alterations:**

New door; wood siding is covered with siding and / or wrap.

---

**2O. Structural system:** WU Wood undetermined

**2P. Wall material:** 92 Vinyl

**2Q. Other Material(s):**

---

**2R. Roof Shape:** IG Intersecting Gable

**2S. Roof Material:** comp shingle

2X: Description/History:

This single story house has a projecting left gabled bay which intersects with the side-gabled volume behind. As with most of the houses built on this same plan on this block, the porch at the intersection of the wings has been filled in. This may have been a historic alteration; four small, narrow 1/1 wood sash windows are at the porch.

Additions/Alterations:

Replacement door; left bay window openings altered to picture-window size. Wood trim covered with siding.

Ownership information:
SMITH, DAVID & ROSE
4165 CONCORDIA AVE
ST LOUIS  MO  63116

Photo date:  6/16/2008
This front gabled house has a vinyl sided façade, but the base (below the window sills and above the front porch) is covered with wood lattice. The concrete porch is unroofed; it is veneered with brick, matching the foundation level of the façade. The side elevations use imitation stone veneer over the foundation. Multilight wood door appears original.

Additions/Alterations:

Vinyl windows.

This two-family building has a brown variegated striated brick exterior. The full-width brick porch has a gable roof, broken in the center for an inset balcony. The two front doors are at opposite ends of the façade. The front doors, and the art glass windows above them at the second story are original. The triple set of windows at the first floor, and windows flanking the second story balcony door, are original multilight windows with large center panes surrounded by 8 smaller ones (this pattern is repeated at the doors as well). The front parapet wall retains original terra cotta coping.

**Additions/Alterations:**

Vinyl siding at the porch gable end.

Outbuilding contributing to potential historic district? No 

2X: Description/History: 
This front gabled building has a variegated striated brick façade and red brick sides. The full-width porch has a gable roof, broken for an inset balcony at the center. Original French doors are intact at the balcony, and art glass windows are at the outer ends of the second story. Both porch and main roof retain green ceramic coping tile along the front edges. 

Additions/Alterations: 
The first story doors are modern replacements, as are the windows. The three brackets at the main roof are sheathed with siding.

2X: Description/History:

This Williamsburg style house is painted white brick. The main house is three bays wide. The original door is at the right bay, surrounded by a pedimented wood architrave. A projecting bay window is at the center bay, and a simple replacement window at the left bay. A compatible addition at the right side of the house imitates a breezeway and garage, connecting the house to the original garage at the back of the addition.

Additions/Alterations:

Photo date: 12/30/2008
This house was constructed in 1998, according to the City Assessor's database.

---

**Description/History:**

This variegated brick side gabled house is divided into three façade bays. At the right bay, a projecting gabled single story entry bay contains the original front door and a small side window, with a small pair of casements above. The center bay is a wide, many-shouldered exterior chimney. The left bay is the widest, the a projecting gable at the second story. Both the second story of the left bay and the gable end above the front door are surfaced with stucco and timber. All façade windows are diamond-paned leaded glass casements. Rough-cut limestone is used at the edges of the base and at chimney shoulders. The roof appears to be an asbestos-cement tile.

**Additions/Alterations:**

Much of the wood trim is wrapped with siding.

Date Surveyed: 6/17/2009

2X: Description/History:
There is some confusion with date of this building, as the permit to wreck the service station on site doesn't come until 1962, the year after the building permit is issued. 1963 Sanborn map shows this building as a concrete block structure. The 14-unit building has a red-black brick veneer exterior.

Additions/Alterations:
Replacement door; sidelight and transom filled in.

**2X: Description/History:**

This variegated brick façade has a full-width front porch which is only roofed at the right. Two brick piers support a tiled hipped roof. The two front doors are original. Windows are 3/1 (in triple sets at left bay). A small tiled hipped roof is hung at the front parapet wall, supported on four narrow brackets.

**Additions/Alterations:**

Fiberglass awnings at all façade windows.

### 2X: Description/History:

Variegated brick façade includes a full-width brick porch with battered piers at either end. Original transomed front doors are at either end of the porch, with a triple set of 3/1 windows (original) between them. Similar triple set centers the 2nd story, with small leaded windows to either side. 4 brackets support eaves.

### Additions/Alterations:

Metal awning at 2nd story windows.

### Photo date: 9/20/2008
This building has a full width gabled brick porch. Red brick forms details, including a label course, against the variegated dark brick facade. Original doors, 3/1 windows, and address plaques are intact.

Additions/Alterations:
Some siding over wood trim, including window frames, vergeboards, gable end of porch.

Photo date: 9/20/2008

Contributing to potential historic district?  ✔ Yes  □ No  

2X: Description/History:  
The two front doors, at opposite ends of the unroofed front porch, are original. Both are topped by a small bracketed gabled hood. 3/1 windows at both stories are original. Terra cotta coping at parapet wall; applied false gable is supported on 3 brackets and forms a center peak in the parapet wall.  

Additions/Alterations:  
Imitation stone veneer covers porch base.  

Photo date:  9/20/2008
This two family dwelling has a variegated brick façade. The front doors, both original, are paired at the center bay of the full-width shed-roofed porch. The brick porch's composition is unusual, with four brick piers and side parapet walls along the roofline. Three original 4/1 windows are at the second story and two pairs of 3/1 are at the first story. At the façade's parapet wall are three decorative terra cotta inserts beneath end blocks and the peaked center step, all topped with terra cotta coping. Original copper guttering and address plaques.

Additions/Alterations:

**2Z. Environment/Outbuildings:**

This two family dwelling has a variegated brick façade. The front doors, both original, are paired at the center bay of the full-width shed-roofed porch. The brick porch's composition is unusual, with four brick piers and side parapet walls along the roofline. An original 8/1 window is centered at the second story and two pairs of 6/1s are at both the first and second stories. A slight front roof is added instead of a front parapet wall. The porch roof retains red clay tile roofing.

#### Façade is variegated brick. Full-width porch is unroofed; the two doors at opposite ends of the façade. Original segmental arched doors and 9/1 windows. The main roof has a front side gabled section with a center cross gable (on two wood brackets); the gable end is surfaced with timber and stucco, and the front roof is covered with green ceramic tile. Behind this, the main roof is flat.

#### Additions/Alterations:

- awning at 2nd story center window set. It appears that there may have been hoods over the two front doors.

This unusually detailed house has a square tower, right, with three tile vigas at the roofline; this structure projects over the right side of the otherwise unroofed porch, with rectangular openings from the steps and to both sides. The front door (original) is located at this bay. The tan brick house features mosaic panels at the chimney and a stub wall off the right side of the façade. 9/1 windows and S-turnbuckle at chimney are original. Red brick forms sills and borders.

### Additions/Alterations: 
$2200 addition to owners berring 4/8/1952, must be at rear of house. Window frames have some protective siding on them.

Outbuilding contributing to potential historic district? ☐ Yes ☑ No

Date Surveyed: 5/15/2009

2X: Description/History:

This semi-bungalow has a brown brick façade. The round-arched front door is at the right bay at a projecting, asymmetric gabled bay. This gable end uses red brick in a radiating pattern that suggests half-timber. There is a center wall dormer with brick and stucco surface. The lower ends of the front wall extend beyond the plane of the side walls for a battered effect. Original door, lanterns, railings, stucco, gutters, downspouts.

Additions/Alterations:

Replacement windows, fiberglass awning, some wood trim obscured by protective vinyl siding.

The upper piers of the full-width brick porch are stuccoed. Both the porch roof and the applied hip fronting the parapet wall are clad in green ceramic tile. The center section of the hipped porch roof is cut away for an inset balcony for the second story unit. The building is very intact, with original round-arched doors, wood screen doors, French doors (at the balcony) 3/1 windows (first floor) and 4/1 windows (second floor), art glass windows, and wood brackets.

Date Surveyed:  5/15/2009  

2X: Description/History:  

This house has a center brick and stucco gabled hood with arched intrados over the original round-arched door. To the left and right are sets of three windows, a center 4/1 with 10-light casements to either side. In hipped gable bay, right, is a triple set of small windows, arranged Palladian- style (the center window is arched). The composition shingle roof is lined with green ceramic tile and the edges.

Additions/Alterations:  

Beyond the ridge of the front volume's side-gabled roof, a second story is added.

#### 2X: Description/History:
This two-family building has a red brick façade with stone highlights at the lintel courses. The full-width front porch is limestone with a gable roof. Original doors, 3/1 windows, art glass windows, guttering and downspouts.

#### Additions/Alterations:
Aluminum siding covers porch gable end, vergeboard, eaves.

**Photo date:** 11/19/2008
This front gabled building has a red brick façade. Original doors are at either end of the full-width gabled porch. The center of the gable is broken for an inset second story balcony; the balcony door is crowned by a gabled, bracketed hood. The porch has battered limestone piers, but its low walls are brick. Stucco is used at the porch and the hood.

**Additions/Alterations:**
Replacement windows; aluminum siding over porch vergeboard and main roof.

Outbuilding contributing to potential historic district? No

Date Surveyed: 5/15/2009

2X. Description/History:
   This side-gabled variegated brick bungalow has a gabled limestone front porch with battered piers. A wall dormer is gabled; its triple set of original 3/1 and 6/1 windows has a broad segmental arch shaping the upper sashes. Original triple set of 3/1 windows at left side of first floor.

Additions/Alterations:
   Replacement door. Vertical aluminum siding on porch's gable end.

Photo date: 11/19/2008
This front gabled building has a red brick façade. Original doors are at either end of the full-width gabled stone porch; above them at the second story, small original art glass windows are intact. The triple window sets centering both stories have center 3/1s flanked by narrower 2/1s. Soldier lintels are punctuated by square stone insets. The gabled limestone porch retains its original stucco and imitation timber gable end, and both gable ends retain original brackets.

Outbuilding contributing to potential historic district? ☐ Yes ☑ No
Date Surveyed: 9/3/2009

2X: Description/History:
This brick house has a full-width porch which is unroofed. The original multilight front door, left, is sheltered by a hipped hood on two brackets. To its left is a narrow diamond paned leaded casement window; at the right bay is a narrow pair of French doors. Two pair of original 6/1 windows are at the second story.

Additions/Alterations:
Base of porch is covered with imitation stone veneer.

#### Description/History:
The variegated browns & red façade of this house is front gabled from just above the first floor. The front porch is full width, but most of it is unroofed. Only at the far right section it there a projecting gable roof on a front wall with an arched opening the same size as the round-arched front door. Centered at the first floor, the two pairs of casements have colorful, apparently replaced art glass. Centered at the second floor is a Palladian window set.

#### Additions/Alterations:
Much trim wrapped.

Outbuilding contributing to potential historic district? □ Yes □ No

Date Surveyed: 9/3/2009

2X: Description/History:

This side gabled variegated brick bungalow house has a wide gabled wall dormer. There is a gabled entrance bay at the right. The unroofed porch is almost full width. Original round-arched door. Triple set of diamond-paned leaded glass window at the right.

Additions/Alterations:

Pair of replacement windows in dormer. Most wood trim wrapped.

Photo date: 12/8/2008
2X: Description/History:
This house has a variegated tan brick exterior; the side gabled front volume retains its original round arched front door at the right bay, marked by a small cross gable. Diamond paned leaded glass is used at the double hung windows at the left two bays and in small arched windows at the peaked shed dormer. The full-width porch is unroofed. Art glass arched transoms at the two first story windows.

Additions/Alterations:
Imitation stone veneer at porch. Siding wraps much wood trim.

Photo date: 11/19/2008
The right bay of this light brown brick house is a projecting gable; its left side flares over a small lancet-arched niche. The front door is also lancet arched. The front wall plane extends to the left past the side wall, creating a third lancet arch over the sidewalk along the left elevation. There is an exterior chimney at the intersection of the two wings. A jerkinhead dormer at the left contains an attic vent.

**Additions/Alterations:**
Replacement windows at left bay. Wood trim wrapped.

Contributing to potential historic district? Yes

2X: Description/History:
This red brick house has a full-width front porch; the sides of its hipped roof meet the façade just under the eaves of the front hipped gable. The porch has a center arched entrance under a bracketed cross gable with notched vergeboards. The front door is original (slightly off center to the right), as are pairs of 3/1 windows to either side.

#### Contributing to potential historic district?

- ☑ Yes  
- ☐ No

### Description/History:

The right bay of this brick house has a slightly projecting low-pitched gable; at the left bay, the brick porch is unroofed. The front door is round arched with a bracketed gabled hood. A pair of original 3/1 windows is at the right bay; a single 3/1 flanked by casements is at the left. A low gabled dormer above has an attic vent. Vergeboards at hood, right bay, and dormer are scalloped and shaped.

### Additions/Alterations:

Side dormers expand rear wing.

This brick house presents a cozy L-plan to the street, the projecting gabled wing at the right faces forward, while the left wing presents its end bay to Arendes. The single story porch, located under an extension of the main roof, is at the intersection of the two wings. The front door is original. Façade windows are diamond-paned leaded glass. Timber lintels made to look hand hewn; wavy-cut wood siding in gable ends. Steep gabled wall dormer at left bay.

2X: Description/History:  
This house's façade is on an L-shaped plan, with a projecting hipped left bay. At the elbow of the two wings is a gabled entrance bay. Its round-arched front door is recessed behind a round opening. In the second story gable end is a copper oriel window. This gabled bay has a stuccoed surface with brick highlights. The rest of the façade is variegated brick below the second story window sill level, and stucco and imitation timber above. Original 6/1 and 4/1 wood windows are intact. An ext. chimney with a wide surface of basketweave-patterned brick faces Arendes at the right (east) elevation.

Contributing to potential historic district?  ☑ Yes  ☐ No  

2X: Description/History:  
This variegated red brick house has a hipped roof with a slight gabled projection at the right bay and a smaller gable at the roofline of the left bay. A very shallow shed roof is over the first floor of the center bay, where stands the original round-arched front door. Both sides of the first story retain triple sets of leaded glass casements with transoms, quoined with rough-cut limestone under shaped timber lintels.  

Additions/Alterations:  
Some wood trim wrapper in aluminum; metal and glass arched awning on poles at front door.

2X: Description/History:  
This side gabled brick bungalow has a front gable dormer. The Full width porch has a limestone base with brick piers that have stucco panels. The porch’s gable roof retains its stucco and stick gable end. The dormer eaves also have three brackets. Dormer sides retain slate. Three 3/1 windows at dormer are in a single arched opening. The front door, right, is original and has leaded sidelights and an original lantern.  

Additions/Alterations:  
Picture window replaces original window set at first floor. Shutters added to façade windows.

☐ Yes  
☑ No

Date Surveyed: 7/3/2009

2X: Description/History:
This concrete block house has a red brick façade with (apparently false) header rows at every 7th course. The front door is centered with a concrete (cast stone) architrave with Moderne-inspired fluted pilasters and a simple frieze. Above the front door at the second story is an inset panel with a classical swag. At both stories of the left and right bays are pairs of original 6/6 wood windows. The keystones feature abstract cast foliated motifs. The side gabled-roof is low-pitched.

Additions/Alterations:
The wood porch (a very simple flat-roofed porch with two square posts at either side) is fully wrapped (and may not be original)

Photo date: 11/10/2008
This dark variegated brick house has a three-bay main volume with a side gabled red tile roof. Set back at the left is an additional single bay wing with a lower roof. The front door is at the left bay of the main volume, sheltered by a hipped hood. Wood is used at the door's classical architrave and to either side a bracket supporting the hood. The front porch runs across most of the façade, but it is not prominent because it is unwalled, unroofed and screened by hedge. At the right bays there are French doors at the first story (original).

Additions/Alterations:
Shutters added; unroofed porch faced with imitation stone veneer. Windows are hard to make out.

#### 2X: Description/History:

This side-gabled bungalow has a full-width porch and a wide jerkinhead dormer. The porch’s upper piers and the house are dark variegated brick. The porch base is limestone. The porch’s gable end retains three brackets, and the brick portion of the piers have inset stucco panels. The front door, right, and triple set of 6/1 windows, right, are original. An original set of 6/1 windows is in the dormer.

#### Additions/Alterations:

Both the dormer and porch gable ends are aluminum sided.

**2X: Description/History:**

This side-gabled red brick bungalow has a full-width limestone porch and a wide gabled dormer. The porch roof is a lower-pitched extension of the main roof. To either side of the front door, right, is a small art glass window. The right side of the first story has a triple set of 4/1 wood windows.

---

**Additions/Alterations:**

The front door is a replacement. The three dormer windows are replaced. Aluminum siding covers the dormer's gable end and wraps its 3 brackets.

### Description/History:

This tan brick house has a two-bay gable-fronted main volume with a lower hipped wing at the right. The wing has a first story garage at the sidewalk grade and a sunroom above. At the main volume there is a projecting walled gabled porch at the right bay; its stone or cast concrete-quoined arched entrance leads to the original arched door. Original façade windows. Set back at the left elevation is another porch and 10-light original door. Green ceramic tile roof.

### Additions/Alterations:

Vergeboards covers with wrap.

2X: Description/History:
This side gabled variegated brick has a side gabled roof. The façade is dominated by a wide dormer which is configured as a gabled wall dormer at its right half and a shed dormer at the left. The original front door is in a wide Tudor-arched opening defined by Limestone quoins. To the right, a triple set of windows has an awkwardly quoined stone surround. Above this at the gabled section of the wall dormer, three individual window share a common soldier lintel course. The front door is sheltered by a bracketed section of the eaves; at the dormer above is a pair of arched diamond-paned leaded glass casements.

Additions/Alterations:
Right bay windows at both stories are replacements. Some wood trim wrapped with siding.

2X. Description/History:

This picturesque house has a stone and brick façade. Stone is around the edges of the first story, fully covering the projecting center section that includes the round-arched front door, center chimney, and triple set of windows under a slate hipped roof. The right bay is a projecting gable which descends lower at its left side, swooping down to just above the front door. The second story and outer parts of the first story are variegated brick. The gabled right bay's second story is brick in houndstooth, basketweave and header patterns between timber verticals. A gabled wall dormer in the left bay has the same treatment above the triple set of diamond casements. The main roof is slate with a ridge parallel to the street and hipped gable ends.

Additions/Alterations:

Canvas awning over door; wood trim very carefully sheathed in aluminum.

### Description/History:

This variegated brick house has a side gabled slate roof. The right side of the façade reads as a single story; at the left side, a large wall dormer makes a picturesque silhouette against the slate roof. The left side of the dormer has a shed roof, while the right is gabled. Both feature hewn timber with brick "nogging" laid in basketweave, diagonal, and other bonds. The first floor under the dormers is primarily rough-cut limestone; the right side is brick. The front door is recessed into the right side of the stone section. The door and all façade windows are original. The windows all have diamond or rectangular paned leaded glass, some with art glass inserts.

**2X. Description/History:**

This variegated brick house has an intersection gable L-plan (as seen from the public right-of-way), but the two gable ends are hipped gables. The front-facing end, left, is asymmetrical; at the right side the roof slope ascends to the first story and covers the entry bay. The original round-arched front door is here. Both the door and the arched triple set of window, left, have rough-cut quoinned stone surrounds. Stone is also used to define the edges and base of the left bay. Windows are diamond-paned leaded glass; at the left bay the double-hung windows have single pane lower sashes. A shallow shed dormer is at the right. Imitation half timbering is used at the front-facing hipped gable end, left (with brick fill) and over the front door (with stucco fill).

**Additions/Alterations:**

Some wood trim is wrapped.

**Photo date:** 11/10/2008
This three-bay house has a symmetrical façade. The original front door is centered; to either side is a pair of French doors (also original). The French doors are set back a single wythe into a blind arch; the center door has a two-wythe reveal. At the second story's out bays, triple sets of windows have a center 6/1 flanked by two 4/1s. Between them is a smaller pair of art glass casements.

Date Surveyed: 8/27/2009

2X: Description/History:
This variegated tan brick house has a front gabled right bay; its right side is two stories at the outside wall, but the left side flares low over the front door near the center of the façade. At the left bay the roof is side-gabled. Its first story has a mullioned set of four casement windows with transoms (this is echoed at the right bay with only three windows). Above at the left is a projecting gabled bay with two 6/6 original windows and a timber and stucco gable end. The arched front door is set back behind a quoined stone surround.

2X: Description/History:
The front door of this light variegated brick near-foursquare is recessed behind an arched stone opening at the left. Its side window is original, as are the sash windows (paired at the second story, and a triple set at the lower right) which feature leaded glass upper sashes. Limestone is used at sills, architraves, the base, and in seemingly random patterns across the variegated brick façade. The roof is composition shingle with green ridge tiles.

Date Surveyed: 3/17/2009  

This house is similar to others further down the block, with a side-gabled roof and prominent front wall dormer, shed roofed with a center gable. Tudor-arched door is right; limestone architraves at the first story, a limestone label and sill at the center of the second story. Front door, storm door and windows all appear original. Front porch, unroofed, runs the full width of the house.

**2V. Porch type:** ST Stoop

**2X: Description/History:**

This front gabled house has an asymmetrical façade; its front gabled roof reaches wider and lower at the right side, covering a porte cochere. The façade is brown brick; the front door is under a fabric awning at a hipped gable stone entry. A prominent exterior chimney splits the façade at the gable peak. Leaded glass windows have Tudor arches and stone archivolts. Limestone is also used at the chimney and porte-cochere. Dromers are at both side elevations.

**Contributing to potential historic district?** Yes

**Condition:** Good

### Description/History:

The surface material of this house (and possibly the structure, according to Sanborn maps) is rough red granite stones from the eaves to the foundation. The front door (original door with leaded glass sidelights), right, is under a wide bracketed gable hood. Windows are original 4/1s and 2/1s. The slate roof has green ceramic ridge tiles and a small peaked vent dormer.

2X: Description/History:

The side gabled main roof intersects with a wide cross gable at the right side of the façade; the front door is almost centered in a secondary gabled projection. The massive chimney base is to the left of the entrance bay. This house has many romantic details, including a wavy wood siding in the entrance bay gable end, diamond-paned leaded glass casement windows, and limestone trim forming irregular quoins and other details. Entrance bay's gable end clad with irregularly patterned wood siding.

Contributing to potential historic district? Yes Yes No

This near-foursquare has a full-width porch. The front door is recessed behind an arched stone opening at the left. Its side window is original, as are the sash windows (paired at the second story, and a triple set at the lower right) which feature leaded glass upper sashes. Limestone is used at sills architraves, the base, and in seemingly random patterns across the variegated brick façade.

### Description/History:

This front-gabled house has an asymmetrical façade: the right side of the gable flares out over an arched car pass-through at the driveway. The front door is in a projecting single story gabled stone entrance (also asymmetrical). Front door and leaded glass windows are original.

**Date Surveyed:** 4/16/2009

---

**2X: Description/History:**

Sanborn map indicates this is concrete block structure. The house can be read as a side gabled building with an enormous front dormer, or as a two-story building with the outline of a side gable run along the side elevation. The exterior veneer is variegated brick. The front door is at the left side of the façade, with a round glass block window to its left. The two first story windows are 2/2s with horizontal rather than vertical lights. The second story windows are obscured by awnings.

According to Sanborn maps, this house is brick-faced tile construction. The front volume of the house is side-gabled, with two projecting front gables. The smaller at the left contains the front door, covered by an awning. The larger right bay has a triple set of original 3/1 windows (with horizontal rather than vertical lights), and a 2/2 in the gable end.

This variegated brick house uses limestone details around the front door and at the base of the entrance bay and the wide chimney to its left. A front facing gable at the right bay is a secondary gabled entrance bay at its left side (the chimney is to the left of this). The left side of the façade is side gabled. The front door and a small 4/4 attic window are original.

**2U. Foundation:**

**2V. Porch type:** hood

**2X: Description/History:**

this house, inspired by the popular medieval/Norman farmhouse revival trend, has a broad front gabled façade with two sets of paired metal 10-pane casements at the first story. The gable end is clad in wavy-cut siding; above a pair of 8-pane casements, the peak of the gable end is filled with stucco and imitation timber. The front door is at a much smaller, set back gabled bay at the left side of the façade. The door is original and is protected by a flared, hipped metal hood on brackets. The variegated slate roof features irregularly formed individual shingles for a more "romantic" effect.

### 2X: Description/History:

This house is classified as a "gingerbread" type even though it lacks the characteristic front gabled form. Its red brick façade bears other hallmarks of the type, including a prominent front chimney next to the steep-gabled entrance bay (left), original round-arched front door, triple set of windows, and copious stone trim. The right bay also presents a front-facing cross gable.

### Additions/Alterations:

Triple set of replacement windows at right bay. Some wood trim is wrapped with aluminum.

2X: Description/History:
The side gabled front volume of this variegated brick house is divided into two bays. The left bay is dominated by a cross gable; the right bay has a slightly projecting (1 wythe) entrance bay with its own steep gabled top. The round-arched door is original, its opening defined by rough-cut stone quoins. At the left bay the pair of windows retains diamond-paned leaded glass in the upper sashes. A small diamond-paned leaded casement window is in the gable end.

Additions/Alterations:
Some wood trim wrapped with siding; canvas awning over front door.

**Description/History:**

This near-Gingerbread variegated brick house has a side-gabled front volume. The right bay is a cross gable with a triple set of windows (lead glass in the upper sashes) under a stone lintel; in the gable end is a small original window pair. The left bay's front entrance is in a slightly projecting gable with a chimney built in at its right side. A corbel arcade separates the first story of this bay from the second, where a small window has art glass in the upper sash. The original round-arched front door has a stone surround. The front porch at the left side of the façade is unroofed and retains metal railings.

**Additions/Alterations:**

Some wood trim wrapped in siding

### Description/History:

This front gabled house displays some of the characteristics of the “Gingerbread” type, especially the prominent front chimney at the left side of the façade, but its other features are very minimalistic, reflecting the 1935 date. The roof is essentially eaveless. The original front door, right, is set within a severe architrave of concrete or limestone blocks suggesting quoins floating in the variegated brick façade. To the left is a set of metal casement windows in a round-arched opening.

### Additions/Alterations:

Replacement windows in gable end.

According to Sanborn maps, this house is brick-faced tile construction. The front gabled variegated brick house has a steep secondary gable projecting at the right bay. The front door is original. A triple set of 2/2 horizontal-paned windows is at the left bay; an exterior chimney rises from left side of entrance bay. Brick detailing includes slightly raised rows creating a gingerbread-Moderne hybrid.

Additions/Alterations:
   Fabric awnings at window set and front door.

2X: Description/History:
This variegated, striated brown brick house has a side-gabled front volume with a hipped gable facing forward at the left bay. The original round-arched front door is at a slightly projecting secondary gable at the right side of the left bay. Its gable end has stucco panels defined by brick. The set of 3 windows to the left all have diamond-paned upper sashes (as do the pair at the right side of the façade). The front porch has no roof.

Additions/Alterations:
Porch base covered with imitation stone veneer.

2X: Description/History:
According to Sanborn maps, this house is brick-faced tile construction. The variegated brick exterior is the only material visible at the foundation. This house has a most unconventional roof shape - the rear of the house is rear-gabled, and the front is essentially a side gable with a steep back slope and low-pitched front slope which allows a full two stories at the facade. At the right side of the facade is a steep front gable. The original round-arched front door is at a projecting bay, left, defined with limestone and crenellations at the top. Original metal windows are mostly casements - the large window at the right side of the first story has 20 panes, 6 of which are art glass.

Additions/Alterations:
Some wood trim is wrapped with aluminum.

2X: Description/History:  
According to Sanborn maps, this house is brick-faced tile construction. Its variegated brick façade is front gabled with no eaves. The front door is a replacement, surrounded by a stylized quoin-like series of concrete panels. The limestone front porch has a midcentury corrugated roof on two metal poles; the porch and railings may date from the same period. The base of the façade is limestone, which is also used in shoulders at the chimney (left side of the façade) and at the left edge of the façade. Diamond-paned leaded casement pair in gable end.

Additions/Alterations:  
Door and center arched window replaced.

2X: Description/History:

While the city assessor’s database indicates that this building is a two-family, it is notable for its three historic front doors centered at the first story. The porch is topped by a bracketed hipped hood. Four of the six façade windows are original 4/1’s, and there is an original art glass window centering the second story. Projecting below the parapet wall is a green ceramic tile hipped skirt.

Additions/Alterations:

Two façade windows are replacements; eaves and brackets are sheathed with siding.

#### Outbuilding Information:

- **Contributing to potential historic district?** Yes
- **Outbuilding contributing to potential historic district?** No
- **Date Surveyed:** 3/22/2009

### Description:

- **2X: Description/History:**
  - The façade of this front gabled building is variegated brick. The gabled porch retains its stucco and "timber" gabled end. Ceramic tile is retained along the front eaves, but the main roof is composition shingle. Original 6/1 windows are intact, as are the original doors and wood trim.

### Additions/Alterations:

- **Photo date:** 11/5/2008
This brown/red brick house retains its original front door and 3/1 windows. A wide front porch has no roof, but an arched hood shelters the door.

Additions/Alterations:
Eaves and brackets are in siding.

#### Description/History:

This dark variegated brick building has a front gable roof. The two front doors, right, are original. The front porch at the right bay is unroofed; a wide bracketed gabled hood protects the two front doors.

#### Additions/Alterations:

The two small windows above the front doors and the sets at both stories of the left bay are vinyl replacements.

OB Other Bay  

2Y. Environment/Outbuildings:  
$1500 brick garage at same time; there is a brick garage with a hipped gable roof.  

Outbuilding contributing to potential historic district?  Yes  

Date Surveyed: 8/31/2009  

2X: Description/History:  
This two-flat building has a much more horizontal profile than earlier examples of the type. Two glass block windows are above the two original doors art the left bay. The concrete porch has metal supports and a hipped roof.  

Additions/Alterations:  
Wide window openings at the right bay bear vinyl replacement windows.

Date Surveyed:  8/31/2009  

2X: Description/History:  
This variegated brick building has a full-width brick porch. The gabled porch roof and applied gable over the second story are red tile. The porch piers have stucco channels, and both gable ends are stuccoed. The front parapet wall has steps at either end, and the center is a peak formed by the applied gable.  

Additions/Alterations:  
Center window set at first story is vinyl. At the second story it appears that the arched windows at the outer bay are intact but the tympanum is covered by a wood insert to accommodate conventional storm windows.

2X: Description/History:  
This variegated brick building has a full width brick porch. The porch is unroofed with an openwork brick wall at the left; the right bay has a flat roof on two brick piers, and a balcony for the second story. The three façade doors are original. Façade windows are original (a triple sets of 3/1s at left bay and a small art glass window next to the balcony door). Beadboard eaves and address plaques are original.  

Additions/Alterations:  
Some original trim wrapped with siding.

**2X: Description/History:**

This variegated brick building has a side-gabled front volume punctuated by a front gable that begins above the first floor and rises above the front eaves (left side) and a small gabled wall dormer at the right bay. The full-width brick porch is unroofed at the left and has a walled superstructure at the right, where the opening from the front steps is defined with rough-cut stone and the roof doubles as a second story balcony. The two front doors and balcony door are original. At the left bay a slightly projecting bay with flared hip metal roof features three double hung windows with diamond-paned leaded glass upper sashes. The second story features a pair of 6/1 windows with original wood shutters. The gable end above them is sided with wavy-cut wood weatherboard, and the vergeboards have slightly flared ends.

2X: Description/History:  
This three-bay red brick building is dominated by the cast concrete (possibly stone) face of the center bay, which features triple sets of 3/3 windows (with horizontal panes). Between the window sets are spandrel panels; the center of which features a foliated Art Deco relief. This bay terminates with a parapet, a stylized scrolled broken pediment with center urn. The front doors are at opposite ends of the full-width, unroofed brick porch. Semicircular hoods project straight out from the façade.
This variegated brick front gabled building has a full-width limestone porch. The limestone piers at either end (pierced by arched openings) support a gable roof which retains its original stucco and stick finish. The two front doors at opposite end of the façade are original. The triple sets of windows that center both stories are original (center 6/1s flanked by 4/1s). Original small art glass windows at outer bays of second story. Shaped brackets at both gable ends.

Additions/Alterations:
Metal awning covers 2nd story windows.

**2X: Description/History:**

This two-family variegated brick building has a rectangular footprint; the front volume has a shallow side gabled roof. The right bay of the façade projects forward with a front gabled roof; one of the front doors is at the front of this bay, and one is at the left elevation. At the left bay are large metal-sash windows. The first story is a 40-pane arrangement in which the top row of 8 pastel panes is fixed over four 8-pane casements. The second story has 32 panes. Most of the left bay's wall surface is part of a slightly projecting gable; its peak rises above the front eaves and its left side descends past the side wall and is pierced by a round-arched opening over the concrete walk along the side of the house. Limestone is used for quoins, around the forward-facing door, and at the lintels.

**Additions/Alterations:**

Wood vergeboards are wrapped with siding.

2X: Description/History:
This two-family variegated brick building has a rectangular footprint; the front volume has a shallow side gabled roof. The left bay of the façade has a single story entry with a front gabled roof; one of the round-arched front doors is at the front of this bay. At the right bay are wide window openings. The first story's is round arched. Over the second story window is a diaper pattern in the gable end. Most of the right bay's wall surface is part of a slightly projecting gable; its peak rises above the front eaves. The second front door is at the right end of the façade with a rough-cut limestone quoined surround. A two-pot chimney projects from the front wall to the right of the left door.

Additions/Alterations:
Facade windows are replacements.

2X: Description/History: 
The variegated brick building has a front gabled roof with four small brackets at the front eaves. The two front doors are at opposite ends of the facade in steep-pitched gabled projections (these are asymmetrical; the inside slope is longer than those at the outer edges of the façade, accentuated by flared vergeboards). Both stories are centered by triple sets of windows in arched openings; their upper sashes are diamond-paned leaded pastel glass. At the second story outer bays are small art glass casements. Limestone is used to surround the arched doors and windows.

**Description/History:**

This front gabled four-family building has a variegated brick exterior. The four front doors are paired at a centered, roofless porch. At the outer bays are pairs of double hung windows with art glass upper sashes. Above the front doors are two small double hung windows. The four front doors are original. Stone base. No eaves.

**Additions/Alterations:**

Attic vents covered. Canvas awning over door.

Contributing to potential historic district?  No

2X: Description/History:
This front gabled variegated brick house has a wider profile than the typical St. Louis "gingerbread" house. A slightly projecting secondary gabled bay at the right side of the façade houses the original round-arched door. At the left side of the façade is a triple set of windows with diamond-paned leaded glass upper sashes. Bead board eaves are intact. Very slightly projecting chimney with two pots just left of front door. Rough-cut limestone trim is used at door surround, chimney, base.

Additions/Alterations:
Large shed dormer at right elevation; some wood trim wrapped with aluminum.

2Y. Environment/Outbuildings:
There is a frame gabled garage clad in vinyl siding.

Date Surveyed: 7/14/2009

**Description/History:**

This front gablet variegated brick building has four original doors in a slightly recessed wood-paneled entrance centered at the first floor. The recessed entry's flat surround has fluted pilasters, a chevron architrave and scalloped frieze. Both stories of the outer bays have triple sets of wood 3/1 windows (with horizontal panes). Above the front doors are two small art glass windows.

Brick colors vary in horizontal bands, with a pinker brick used at the window level and an oranger brick below the windows and between stories.

**Additions/Alterations:**

2X. Description/History: 
The three houses at 4150-4160 Fillmore are unusual - a 19th-century form, with an almost centered transomed door and paired windows under segmental arches, but with façade brick and porch detailing that is no earlier than the late teens. This front gabled brick house has a brick porch with battered brick piers and a gabled roof. Pairs of original 9/1 windows to the left and right of the front door share segmental arched openings and brick sills. The façade and porch are a striated red brick, while the sides are a common red brick. The foundation is oversized engineer brick. (Building permits for this block prior to 1925 are missing.)

Additions/Alterations: 
The front door's transom is covered. The porch looks like an addition (its interior gabled ceiling covers part of the window opening), but it is the same brick as the façade.

This large house has two gables facing forward: a gabled wing, left, and a cross gable from the side gabled wing, right. Between them is a crenellated parapet with limestone surface at the first story, above the roofline, and along the multi-shouldered right edge of this bay. The front door is roughly centered; it is original. At the left bay are French doors with diamond-paned leaded glass at the doors, sidelights, and transom lights. At the right bay is a triple set of windows with diamond-paned leaded upper sashes. The second story of the right bay projects slightly; it uses imitation timber patterns and imitation purlins supporting the embellished vergeboard. An oriel bay is at the center bay's second story. At the left bay's third story gable end is a Tudor-arched casement pair in stone architrave with modillioned ledge or planter box.

Additions/Alterations:
Second story windows are replacements.

☐ No  

Date Surveyed: 7/2/2009  

2X: Description/History:  
This variegated brick house has a side gabled main volume with a front-facing projecting cross gable at the 3rd of 4 bays; the fourth bay is a brick and stone porte cochere with a large balcony and set back room at the 2nd story under a lower side gabled roof. The front door is at the second bay next to the projecting bay; a limestone structure creates an arched entry with a balcony over it at the 2nd story. Original door; original 6/6 windows at both stories. Original French doors and transom at balcony over front door. Variegated slate roof has a peaked dormer with a semicircular window.  

Additions/Alterations:  
The only obvious alteration is the siding at the dormer.

This variegated brick house has a hipped main volume with a front-facing projecting cross gable at the right bay. The other two bays of the main volume of the house have parapet gables: the left bay has a projecting bay at the second story, and the center bay has a Flemish gable. The left bay is set back from the other two. The front door is at the center; the original wide arched wood door is set within a concrete (imitation stone) architrave. Concrete is also used as quoins at the windows, parapets and edges of façade. Set back to the left of the left bay is a porte cochere with a stucco-sided set back room at the 2nd story under a lower hipped roof. Windows are original. Variegated slate roof.

Condition: Good

This dark variegated brick house employs a complex roof structure which seems to have a hipped gable to the left of the centered chimney and a steep front gable to the right of it. Both gable ends have stucco and imitation half timbering separated from the lower brick walls by modillioned wood course. The front door is recessed within a projecting gabled entry with flared side walls. A single story sunroom wing with a balcony on top is at the left side of the composition. The front door is original (with a wood screen door); all façade windows are original 6/1s except for one original art glass window.

2X: Description/History:  
This red brick house consists of two gambrel wings in an L-shaped plan. The left wing's gambrel end extends toward the street; a screened sunroom is attached at the first story and the second story is dominated by the central chimney. The other wing extends to the right, and the front door is set at an angle at the intersection of the two. The original door is topped by a 5-pane fan light.  

Additions/Alterations:  
It appears that the right wing's picture window replaces smaller original windows.  

Photo date: 3/17/2009
This house has a variegated tan brick exterior. The main volume is side gabled, with a cross gable defining the left bay. The front door is at the right side of this bay, recessed behind a stone-quoined Tudor arched entry. The front door is original. A wide chimney is to the right of the front door. A projecting 3-sided bay is at the right side of the façade, capped by a small cross gable. All façade windows are diamond-paned leaded glass (all casements except at the projecting bay).

Additions/Alterations:

Aluminum siding at both front gable ends.
This two-story variegated brick house has a front-facing hipped gable wing at the left bay projecting from a hipped wing at the right bay. At the elbow of the two wings is a stepped back two-story volume with a parapet top and a ball finial. Limestone is used at this volume and the left bay to define openings, edges, bases. The original front door is recessed behind an arched opening centered in the left bay. Above it is a pair of leaded glass diamond-paned French doors. Two small casements are on stone sills in the hipped gable end. At the second story of the elbow volume is a small oriel window. At the right bay, the first story has two large round-arched screened openings, with French doors onto small railed balconies above them. The wall plane at the left side of the façade extends past the side wall to define an arch over the driveway.
### 3849 HOLLY HILLS AV

  - **State:** MO
  - **Zip Code:** 63116

#### Description/History:

This red brick Georgian Revival house is divided into three distinct bays. The L-shaped plan manifests in a forward wing at the right side of the façade and a side wing to the left, with a two-story flat-roofed entrance bay set back at the elbow. The front door (original, with transom) is sheltered by a porch consisting of a balcony supported by four wood columns. At the right bay a projecting oriel window is at the first floor, with a flared copper roof. Windows are original. The building employs brick quoins. A closed gable end at the right bay. Small gabled dormer at the left.

#### Additions/Alterations:

Some wood trim wrapped in siding.
This symmetrical Colonial Revival house has a 3-bay red brick façade. The edges are defined by brick quoins and there is a dentillated wood frieze. The front door, center, is set in an architrave with fluted pilasters and a scrolled broken pediment. Original front door. Original 6/1 windows at second story and 8/1 windows at first story. Single story sunroom added at right.

Additions/Alterations:
Part of architrave appears replaced.
This variegated brick house is a stylish combination of the Craftsman and Tudor Revival idioms, with quoin window openings with labels a la Tudor Revival, the massing and bracketed gabled of the Craftsman, and imitation half-timbering and other timber features that are used in both styles. The house has a hipped roof with a low cross gable defining the projecting entrance bay, just right of center. The original front door is in a quoin Tudor-arched opening, sheltered by a bracketed gable hood. At the wide left bay the first story windows are a triple set in a quoin surround. These and most other façade window are replacements (the only exception is the small leaded glass window next to the front door). Above the left bay a small peaked vent dormer is set back in the roof. The right bay is only a single room deep.

Additions/Alterations:
most façade windows are replacements; some wood trim wrapped in siding.

**2X: Description/History:**

One of the largest and most complex houses in the survey area, this Tudor Revival house appears to have an L-shaped plan with a projecting wing facing the street, right, and a side arm extending to the left. The intersecting roofs are hipped with variegated slate and a peaked dormer each. Limestone is used generously around the base, rough-cut except for the dressed set of four windows with trefoil Tudor arches, all under a stone label. The other windows are designed as small-paned leaded glass; French doors are at the first story of the left wing. The second story of the left wing is designed as two projecting stuccoed bays with imitation half-timbering and casement sets. Original features are almost completely intact.

**Photo date:** 3/17/2009
This variegated brick house appears from the street to have an L-shaped plan. The main volume is parallel to the street; it has a gable end facing the right (east) elevation, and the roof hips at the left side where the lower gabled bay projects forward. The front door is located at the center of the façade in a single story porch; the door is flush with the right wing, and the porch front is flush with the forward facing gabled bay. This single-story porch is topped by a balcony at the elbows of the two wings. Terra cotta is used for quoin attractive surrounds at all of the façade openings. The door and all façade windows are original. At the left bay are two sets of French doors. At the right bay is a triple set of wood casement pairs; second story windows are double hung 8/8s at the left bay, 6/6s at the right bay, and a diamond-paned leaded glass window at the center bay. A single story screened porch is at the right side of the composition.

Additions/Alterations:
This brown brick house employs a number of devices typical of the English Arts & Crafts movement, including a broad front gable, simple detailing, and half-timbered sections. Parallel to the street a wing has a gabled left (west) end; the front gabled section intersects near the right side of the house, and to the right of that the main roof terminates in a small hipped section. The front gabled wing is asymmetrical; the right side of the gable descends low over an arched passage and porch. The front door is not visible from the street. A set of French doors is at each bay of the first story. The right bay's gable end has a set of two casement pairs, and at the left bay is a double-peaked dormer with two 6/6 windows and a stucco and faux timber finish. A full-width unroofed porch runs along the front of the house. All windows are original.

### Description/History:

This tan brick house has a side gabled roof with a wide front gabled left bay. The front door is in a small projecting gabled entry bay at the center of the façade. The round-arched door and storm door are original. The left bay's windows are wood 6/1s (a triple set at the first story and a single window in the gable end); at the right bay are two pair of leaded glass casements. A shed-roofed dormer has art glass windows.

### Additions/Alterations:

Some wood trim covered with siding; canvas awnings at first floor windows; Screened porch added at right elevation.

$500 garage was permitted 7/15/1929 - hipped variegated brick

Outbuilding contributing to potential historic district? ☑ Yes ☐ No

Date Surveyed: 3/17/2009

Additions/Alterations:

Eclectic tapestry brick house with limestone quoins at the first story and a stone sill course at the second. Shaped wood rafters at the red clay tile roof. The round-arched front door is in a battered gabled projection. Unroofed full-width patio/porch.

Outbuilding contributing to potential historic district? ☑ Yes ☐ No

Photo date: 3/17/2009
This stately house has a main roof ridge running parallel to the street with front gabled pavilions at either end. The front door is at the left pavilion and a pair of French doors balances it at the right, with an unroofed full-width patio/porch running between them. The roof appears to be a concrete/cement tile.

Additions/Alterations:
Fabric awning over front door.

**Description/History:**

This house, one of the largest in south St. Louis, has dark variegated brick walls and a multi-gabled red composition shingle roof. The roof retains red ceramic tiles at ridges and edges. The brick porch, at the front gabled right bay, has a limestone base and brick piers. Most of the porch roof is a shed roof with a shallow cross gable over the front steps. Its gable end retains stucco and stick gable end. The front door is arched, with a casement window to its left. The gabled left bay retains its timber and stucco end.

**Additions/Alterations:**

Replacement façade windows; some wood trim wrapped.

Sanborn map indicates brick-faced tile construction. The side gabled house is faced with red brick. The original door is set back under a shed roof (extended from the main roof) on metal supports. Original windows include shallow round bay to the right of front door and corner windows at left edge of façade and left elevation. Three gable dormers each have 3-pane horizontal paned windows.

Additions/Alterations:

Some trim is wrapped; dormers sided.

Contributing to potential historic district? Yes

2X: Description/History:
Sanborn map indicates tile construction. Shallow side gable roof. Red brick exterior. Front door at right bay has a modern-era flared metal hipped hood on trellis-type supports. Sawtooth brick cornice.

Additions/Alterations:
Replacement windows. Shutters added.

Ownership information:
RHOADS, WILLIAM T SR & DIANN
3939 BOWEN ST
ST LOUIS MO 63116

Photo date: 2/25/2009
The roof form of this house resembles a Victorian cottage, with a projecting gable right, an overall hipped gable shape, and a shed dormer facing the side street. The envelope, however, is very Modern with thin stone or concrete sills, original metal windows, and stacked Roman-style brick door surround. The remainder of the exterior is striated red brick.

Additions/Alterations:

### 2X: Description/History:

This tan brick-veneered house has an unusual obtuse angle L-plan and an attached garage. Door and windows are original; wall plane extends to the right of the front door beyond the side wall, with four nearly-square piercings through it.

### Additions/Alterations:

Some wood trim wrapped in siding at eaves.

2X. Description/History:  
This side gabled house has a brownish brick exterior. Brick is the only material visible at the foundation. The roof of the main volume is side gabled, with a tall and wide front gabled wing projecting ant the right. At the left side of this bay a secondary gable houses the original front door. All of the facade windows feature diamond-paned glass. Copious use of limestone trim around openings and set randomly in brick wall. Clay tiles cap the ridges in the gabled roof. The front wall plane extends beyond the side wall at the left, and a round-arched opening through it frames a path.  

Additions/Alterations:  
Some wood trim sided.

2X: Description/History:

This side gabled house has a brownish brick exterior. Brick is the only material visible at the foundation. The round-arched front door at the left bay is original. Above it, supported on four wood brackets, a projecting gabled bay has stucco and stickwork finish. At the right bay, the first floor has a triple set of 6/1 windows with an art glass arched transom light. Rough cut limestone frames doorway and is set pseudo-randomly into façade.

Additions/Alterations:

Right bay windows at second story are replacements. Porch base covered with imitation stone veneer. Some wood trim covered with siding.

#### 2X: Description/History:

This variegated brick house has a side gabled roof. The first story of its left bay projects, and the gabled roof of this projecting bay is so steep-pitched that its peak is above the roofline. The gable end features imitation heavy timber work with brick "nogging." The right bay uses limestone beneath and around the triple set of windows; the second story's window pair breaks the roofline in a very shallow shed dormer. In the entrance bay, small leaded diamond paned casements are both next to and above the original front door. Original guttering and downspout. Brick is the only material visible at the foundation.

#### Additions/Alterations:

The right bay windows are replacements.

Condition: Good |

This house is three bays wide with a symmetrical façade of variegated brick. Plain red-brown brick forms quoins at the façade's edges and surrounds at the two arched 16-over-12 windows at the first story. The three second story windows are 8/1s. Roof has a center hip with secondary lower-pitched slope (French hip).

Additions/Alterations:
Hipped porch roof is on replacement metal columns. Some wood trim sided with vinyl. Vinyl shutters.

Photo date: 2/25/2009
2X: Description/History:
This side gabled house has a brownish brick exterior. The roof of the main volume is side gabled, with a full-height wide front gabled wing projecting at the left. At the right side of this bay a secondary gable houses the original round-arched front door. Copious use of limestone trim around openings and set randomly in brick wall. The front wall plane extends beyond the side wall at the right, where a round-arched opening through it frames a path. Diamond-paned leaded glass windows.

Additions/Alterations:
Large fixed pane window at left bay is modern.

2X: Description/History:

This house is a side-gabled variant of the "gingerbread" type. The main roof is side-gabled, with an unusually large shed wall dormer centered; the left side of the dormer merges with the high-pitched gable marking the entrance bay. The original round-arched door has a limestone surround; the triple set of windows at the right bay has diamond-paned leaded upper sashes. The full-width porch is unroofed.

Additions/Alterations:

Replacement windows is dormer. Some siding over wood trim.

   Outbuilding contributing to potential historic district? ☑ Yes
   Date Surveyed: 6/30/2009

Contributing to potential historic district? ☑ Yes

Condition: Good

Integrity: Good/fair

2X: Description/History:
Sanborn maps indicate concrete block structure; the veneer is blond brick. The roof is technically a gablet, but reads as a front gable with a ribbon of hipped roof crossing the facade just over the front door. The front door, metal porch railings are original. Imitation stone veneer at porch base and steps is appropriate.

Additions/Alterations:
Replacement windows.

2V. Porch type: OB Other Bay hood

2X: Description/History:
This front gabled house has a variegated brick veneer exterior. The (original) front door at the left is at a roofless concrete porch; in an unusual bit of detailing, the side roof wraps around like an eave return to act as a hood over the front door. Right bay's picture window appears original, as do the attic window and attic vent. Roman brick detail around door.

Additions/Alterations:
Dormer added in 1959, per permit.

### Description/History:

This side-gabled red brick bungalow has a full-width shed-roofed brick porch with battered piers and an overscaled shed dormer. The house is narrow for its type. Original façade windows include a pair of 3/1s at the left side of the façade, a triple set of 3/1s in the dormer, and the front door's transom.

### Additions/Alterations:

Replacement front door. Some wood trim wrapped.

### Photo date:

### 2X: Description/History:

Now a tavern, this former dwelling has a squarish single story concrete block addition at its north end. A gable hood shelters the modern replacement door facing Leona. The house is shown on the 1916 Sanborn map in a smaller form which is not quite at right angles to the current streets. Intensive research should be conducted on this site to determine history, since it likely predates surrounding houses.

### Additions/Alterations:

A $2000 addition permitted in 1955 is likely the concrete block room to the north. Bay window faces Leona. Replacement windows.

2X: Description/History:

This single story brick storefront building is something of a mystery; the original permit indicates it was a single story, as does the 1938 Sanborn map, but the permit indicated it was a "store and dwellings" (usually meaning there was a second story), and the separate entrance (a historic multilight door) at the right side of the façade is characteristic of a two-story building with access to upstairs units. In 1938 the front of the building was a "shop" and the rear was a bakehouse.

**2X: Description/History:**

This front gabled house has a front door just right of center. Its full-width porch is set under the main roof, which is supported at its front edges on two replacement metal trellis-style uprights.

**Additions/Alterations:**

Porch base is clad in imitation stone veneer; doors and windows are replacements.

**Photo date:** 11/13/2008
This appears to be a 1950s house with an added 1970s mansarded second story (not present in 1960s Sanborn maps). The three dormer-style windows at the second story are actually recessed into the mansard, and the first story porch is recessed at the right side of the façade.

2Y. Environment/Outbuildings:
no garage. House is at rear of lot on alley.

Outbuilding contributing to potential historic district? □ Yes □ No
Date Surveyed: 2/25/2009

Contributing to potential historic district? □ Yes □ No

2X: Description/History:
The steep pitched gambrel roof has a slight bellcast flare, with a tall chimney at the north (right) elevation. On the 1938 Sanborn map, this is listed as a garage with an address of 5927 1/3 Leona.

Additions/Alterations:
Door and windows are replaced.

2W. Environment/Outbuildings:
The narrow frame gabled garage reveals no historic material except for some wood trim at the eaves.

2X. Description/History:
This single story building has a tapestry brick façade and red brick side elevations. The right bay's roof is side gabled; at the left bay a steep pitched gable thrusts forward, covering the left section of the long (but not quite full-width) concrete porch. The front gabled porch wall is limestone, with aluminum or vinyl siding in the gable end. Wood trim and a 9-pane attic window are intact. The round-arched front door, left, may be original. A pair of original 6/1 windows are at the right bay.

2Y. Environment/Outbuildings:
The narrow frame gabled garage reveals no historic material except for some wood trim at the eaves.

<tbody>
<tr>
<td>This front gabled house has a striated red brick façade and smooth red brick side elevations. The concrete front porch, almost full width, has a metal railing and no roof. The house is similar to the widespread &quot;gingerbread&quot; type because the round-arched front door is in a slight projection which breaks the roofline; in this case the projecting bay is crenellated rather than gabled. The original round arched front door is set back within a 3-course stepped brick reveal. The window opening, left, has a stone sill and a quoined brick surround.</td>
<td>Narrow frame gabled garage is sided with asbestos shingle; new doors.</td>
</tr>
</tbody>

Contributing to potential historic district? ☑ Yes ☐ No

2X: Description/History:

This front-gabled building has a tapestry brick façade; the side elevations are a similar (but less colorful) striated brick. The full width gabled porch roof is supported on two limestone piers. The gable porch roof is broken by an inset balcony where the peak would otherwise be. The balcony door and two front doors are original, as are the 2 4/1 windows at each level. Original mail slots and lanterns are intact.

Additions/Alterations:

Metal awning at balcony.

2X: Description/History:
This charming house has a tan brick exterior with limestone trim at the base, door, windows, and random blocks across the façade. Ogee arched (original) door is at the left; the right bay has a projecting front gable with an arched window in the gable end and triple set at the first story. Windows have leaded glass upper sashes.

Additions/Alterations:
New windows at the dormer.

The structure of the Woerner School, according to Sanborn maps, is a concrete frame with tile floors, ceilings and partitions and brick curtain walls. Variegated tan brick is over a dark red brick base. The Georgian/Palladian aesthetic is revealed by gabled end pavilions; 2 entrance bays project slightly from the front walls under segmental arched wall dormers. Columned architraves support second story balconies.

**Integrity:** Good/fair

2X: Description/History:
This house is faced with tan brick; its side gable roof appears to be a French tile made of cement. A gabled wall dormer is at the left, and segmental arched projection right. Art Deco-inspired chevron panels (apparently a tinted concrete) are under the second story windows. Windows are original. Lanterns to either side of the front door are fantastic long dropped lanterns.

Additions/Alterations:
Fabric awning at front door.

Additions/Alterations:  
Replacement picture windows at first story.

Photo date: 12/30/2008

This side gabled house shows its modern date in (among other feature) its lack of eaves at the side elevations. The blondish-tan brick has orangish-tan brick quoins. Peaked vent dormer. Front door is centered in pedimented architrave.
This variegated house has a side-gabled front volume with a double-peaked intersecting gable facing the street. A round-arched door (with original storm door) is under an additional steep gable, right. Chimney left. Leaded windows at 2nd story of façade.

Additions/Alterations:
First story windows replaced.

### Description/History:

This variegated brick house has an asymmetrical front gabled roof. The left side of the roof is a lower pitch than the right. The front porch is at the left 2/3 side of the façade; at the far left it has a gabled roof that follow the main roof. Its front plane extend past the side wall of the house to form a gate over the side walkway. The two openings and the front door are Tudor arched. Original triple 3/1 windows are at the right side of the first story and a small pair of casements is at the gable end. Limestone trim is used at the projecting chimney, right, the porch, and as window trim.

This house has a luxuriously textured variegated brick exterior. The right bay projects slightly with a cross gable at the roof line. The front door is the original round-arched one, surrounded by limestone quoins. Art deco and traditional patterns in leaded glass windows. Unusually elaborate wrought iron lantern housing above front door. Very shallow hipped dormer at left bay.

**Additions/Alterations:**

Fabric awnings

2X: Description/History:
Front porch follow angle of sidewalk (which postdates the construction of the house after the widening of this part of Morgan Ford). Front gabled house with large shed dormer facing south.

Additions/Alterations:
porch and metal awning; imitation stone veneer at base of façade. New windows and door.

Photo date: 6/4/2008
This house is on the 1916 Sanborn map, sharing a large lot with 5648 Morgan Ford. The front door is at the left side of the Morgan Ford elevation at a small gabled porch. A small pair of modern windows faces Morgan Ford. Although this is one of the older frame houses in the survey area, there is little exterior evidence of this. There is no good evidence for a date of construction in the survey-level research.

Additions/Alterations:

2V. Porch type: 01 DOMESTIC

2X: Description/History:
This red brick house has a front gabled left bay and a side gabled main volume. The porch, right, steps forward to the sidewalk. Its front brick wall has a slight arch to its footprint; this brown brick section contrasts with the red brick of the rest of the house. Egg and dart molded brick is used below the porch wall cap. The shed roofed porch has a dentilled wood frieze. An art glass double hung window is to the right of the original front door; at the left are two original 1/1 windows in segmental arched openings. Hipped dormer at right bay.

Additions/Alterations:
Porch columns are modern replacements.

2O. Structural system: LB Load-bearing Brick

2P. Wall material: 30 BRICK

2Y. Environment/Outbuildings:
Gravel drive, left, leads to a frame clapboard garage with a gabled roof.

Outbuilding contributing to potential historic district? Yes

Date Surveyed: 8/24/2009

Photo date: 6/4/2008
This front-gabled bungaloid house has a lower projecting gabled bay, left, and a gabled brick porch, right. The surface is variegated tan and brown brick. Modern-era detailing has been added, perhaps as part of the 1956 alterations. The front door is at the right side of the left bay; it has glass block sidelights. The window set at the right bay is a set of four wood sash hinged windows with red Roman bricks or tiles to either side. The front windows at the left bay are a replacement pair with a similar Roman brick treatment to either side.

Additions/Alterations:
$1,200 addition to brick dwelling to owner Alles, 1956

**Description/History:**

This dark variegated brick two-family building has a front gabled roof. Side elevations are red brick. A full-width front porch is unroofed. Triple sets of 3/1 windows center both stories.

**Additions/Alterations:**

White paint around the doors and first story windows and at the front porch alters the appearance of the building. Replacement front doors. Three brackets at front eaves are soffitted.
2X: Description/History:

This two-family building has a striated red brick façade. An applied gable below the parapet wall has clearly been removed. The full-width brick porch is gabled. Terra cotta coping at parapet is intact.

Additions/Alterations:

Replacement doors and windows; porch gable end is covered with modern siding; applied gable removed at upper façade.

### Description/History:

There are two sets of building permits for this row of houses, so the date from the assessor's database is used. The variegated brick veneer is punctuated by concrete imitation Roman brick, which used below the sill level at the left side of the front door and around the door itself. A built-in garage is accessed by a driveway and garage door at the left side of the façade. Original windows; fiberglass awning

### Additions/Alterations:

Replacement door.

**2X. Description/History:**

This symmetrical 3-bay building has a dark red brick façade. Dark brown brick highlights sills, around the front door and in courses and panels. Side elevations are red brick. The façade's coping is concrete. At the two outer bays, each story has a pair of 4/1 windows with square panes in the upper sash. The center bay projects about an inch.

**Additions/Alterations:**

Replacement door. Metal awning over front door.

| **Contributing to potential historic district?** | ☑ Yes | ☐ No |
| **Additions/Alterations:** |  |

| **Photo date:** | 2/25/2009 |
This house has a typical bungalow front gabled section, left, and a gabled wing extending to the right on a high stone foundation. The exterior is variegated brick. The brick porch, left, runs the full width of the front gabled section. Two battered brick piers support a gabled roof with modern vertical siding in the gable end. 3/1 windows at this section are original.

Additions/Alterations:
Modern windows at right bay.

2X: Description/History:
This house has a fairly low-pitched side gabled roof. The front porch has a shed roof that attaches to the main roof above the eaves. The brick porch is at approximately the right 2/3 of the façade. The facade and porch are variegated brick; side elevations are rough-textured red brick. The front door is centered at the porch; to either side is an original 3/1 window, with a third at the left side of the façade beyond the porch.

Additions/Alterations:

Integrity: Good/fair 
Condition: Good 

Date Surveyed: 4/29/2009 

2X: Description/History: 
First, it should be noted that the contractor/architect name is the owner's name backwards, which seems fishy. This front gabled house has a red brick exterior. The front door is in a wood architrave, right; fluted pilasters are to either side of the door without a cornice. The door surround is at a minor gabled projection; entrance and the main roof have (sided) eave returns over brick quoins. 

Additions/Alterations: 
Siding at gable ends.

Variegated brown brick façade has limestone at base of building, laid at corners and base of center bay.; the outer edges of the parapet wall are also stone. The symmetrical façade has a center entrance. The first story has a Tudor arched entry with original wood entrance; it terminates in terra cotta urns on plinths to either side of a second story window with leaded stained glass. An applied gable over the stair window is supported by three brackets. The outer bays have two 8/1 windows each at the second story and a 3-window set (4/1s flanking 6/1s) at the first story. Stepped and crenellated parapet walls retains terra cotta coping.

**Additions/Alterations:**

$1000 addition 3/29/1940

### Description/History:

This symmetrical red brick four-family building has a flat-roofed brick porch at the center two bays; the porch roof is a balcony for the two second story units. All six façade doors are original, and the porch retains original eaves and soffits. Terra cotta coping on stepped parapet wall; three decorative terra cotta inserts at parapet wall.

### Additions/Alterations:

Replacement windows at outer bays, both stories.

Photo date:  11/7/2008
The courtyard of this U-shaped building faces the street. Each of its three interior walls has a centered entrance to four units. Tudor-arched doors in rough-cut limestone surrounds are original. Chunky stone labels are over windows, and brick sills below. Each entrance bay projects very slightly, and is capped by a shallow stepped peak at the parapet wall.

Additions/Alterations:
All façade windows are replacements.

Façade window replacement.

---

**Photo date:** 11/7/2008
This light brown brick building has a full-width porch on slightly battered brick piers. Its gable roof is broken at the center for an inset balcony. The two front doors at opposite ends of the façade are both original. A triple set of 6/1 windows between them is also original. At the second story, a hipped bracketed hood shelters the French doors and side windows, also original. Porch gable end retains stucco finish.

Additions/Alterations:
The small outer windows at the second story are filled in with glass block. Some wood trim wrapped.

2X: Description/History: 
Although no permit was found for this house, it is identical to those at 4138 and 4152 Federer, constructed by AJ Keim in 1929. This red brick house has a side-gabled front volume with a hipped gable facing forward at the left bay. The original round-arched front door is at a slightly projecting secondary gable at the right side of the left bay. Its gable end has stucco panels defined by header columns. The front porch has no roof. While the permit was not found, the house is very similar to a 1929 house by Keim on Federer.

Additions/Alterations: 
First story window replacement.

### Contributions to potential historic district?

- **Yes**
- **No**

#### 2X: Description/History:

This side gabled brick house has a full-width cross gable with eave returns defining the upper part of the façade. The original round-arched front door is at a simple stoop at the right side of the façade, sheltered by a bracketed round-arched hood. A set of three double-hung windows with diamond-paned leaded sashes is at the left side of the façade; an exterior chimney is between the two bays.

#### Additions/Alterations:

Aluminum wraps most wood trim. Metal awning over attic window.

2X: Description/History:
This variegated brick house has a wide cross gable with eave returns projecting forward for about the left 3/4 of the façade. The front door (round-arched) is at the set back right bay under a low hipped dormer. A set of three double-hung windows with diamond-paned leaded sashes is at the left bay. The attic and dormer windows are also diamond-paned.

Additions/Alterations:
Aluminum wraps most wood trim. fiberglass awning over door.

Contributing to potential historic district? Yes
Outbuilding contributing to potential historic district? No

Photo date: 11/7/2008
This front gabled red brick house has a full width brick porch with a gabled roof. The gable end retains its two eve brackets and stick and stucco finish.

Additions/Alterations:
Front porch has been screened in, making it difficult to assess original windows and doors. A metal awning is over the gable end window. Side dormers may be added.

2X: Description/History:
This dark variegated single story corner commercial building has a peaked parapet wall at the façade (with steps to either side of the center stepped peak) and a similar motif at the first bay of the left side elevation facing the side street. Terra cotta coping and cornice. The foundation material is brick to the ground on both visible elevations.

Additions/Alterations:
Replacement door and shop windows on front, sheltered by metal awning. The side storefront is filled in with red brick (likely the $1600 alteration permitted in 1946) and a stuccoed panel filling in where a window strip likely had been.

2X: Description/History:

This two-family building has a front gabled roof and a dark red brick façade. The full-width limestone porch has a gabled roof. A third gable tops a projecting bay at the left side of the second story.

Additions/Alterations:

Front doors (at the left bay) and all façade windows are replacements. Most wood trim covered with siding.

Photo date: 1/9/2009
This front gabled building has a red brick facade. Doors are at either end of the full-width gabled porch; above them at the second story, small original art glass windows are intact. The triple window sets centering both stories have center 3/1s flanked by narrower 2/1s. Soldier lintels are in contrasting red brick. The gabled porch has a limestone base and brick piers (with arched center voids); the porch gable end retains its original stucco and imitation timber, and both gable ends retain original brackets.

Additions/Alterations:
Some wood trim faced with siding.

Frame church on site permitted to Rev. Jos. Hoelting 4/9/1926, $1500; frame school permitted to Glennon 7/27/1927, also there is a 2 sty brick ten at 3909 Wilmington, E9599 on 7/26/1928, 2 sty dwelling 8/8/1929. School/teachers residence/auditorium 1931. This parish complex is unified by the use of tan brick. The side gabled parish house complex, left, has limestone highlights and leaded glass windows with a center gabled projecting entrance. The 1962 church has a broad front gable facing the street with stained glass window strips stretching from above the center doors into the gable end. The tall ribbed bell tower is to its right. The historic school building (1927) is in the Tudor style; a boxy gym was added in the modern era.

Outbuilding contributing to potential historic district?  Yes
Date Surveyed:  6/4/2009

Contributing to potential historic district?  Yes

Condition:  Good

2X: Description/History:
This eight-family building is divided into two separate four family units, each with its own entrance (one at Wilmington and one facing Coronado). Original Tudor arched door and sidelights, art glass windows. Terra cotta is used for label moldings, coping, inset tiles, and a large shield and helmet panel over the door.

Additions/Alterations:
replacement windows; canvas awning over doors.

Contributing to potential historic district? □ Yes □ No

Outbuilding contributing to potential historic district? □ Yes □ No

Date Surveyed: 6/4/2009

2X: Description/History:
This two-story building has a variegated brick façade. The limestone porch is full width. Its gabled roof is broken at the center for an inset balcony. Doors, 3/1 and art glass windows, brackets and railing at balcony are original. An applied front roof is supported on ten brackets; it is covered with composition shingle and has a center cross gable.

Additions/Alterations:
Siding covers the porch's gable end, vergeboards and eaves.

Contributing to potential historic district? Yes

Date Surveyed: 6/4/2009

2X: Description/History:
This two family building has a light variegate brick façade. The two original round-arched doors are at either side of the façade; both are sheltered by a shallow arched hood on brackets. Above the front doors are small arched art glass windows at the second story. At the center bay of both stories is a set of three windows in a single opening: a center 6/1 flanked by 4/1s. The limestone porch is full-width but unroofed.

Additions/Alterations:
Most of the wood trim is intact and uncovered (except around the windows)

Photo date: 11/19/2008
The Sanborn map specifies cinder block construction. The brick veneer is variegated tones of red and yellow. The façade is symmetrical, with a small round glass block window at the center. To either side of the center round window is a high-set pair of slider windows, and at the outer edges of the façade are two original front doors.

**Additions/Alterations:**

Windows are vinyl replacements.

2X: Description/History:
This front gabled house has a variegated smooth brick façade. Large shed dormers open up the second story space at both side elevations. The front door, left, is original. At the right bay is a pair of original 4/1 windows; in the gable end is a pair of 3/1 windows.

Additions/Alterations:
The front door's gabled hood is wrapped in siding, and the brick-faced dormers have modern horizontal siding on the sides facing the street.

Date Surveyed:  5/6/2009  

2X: Description/History:  

This twelve-unit apartment buildings constructed with a blond brick exterior with geometric orange-tan highlights. The north-facing façade is symmetrical. With two front entrances, the plan of the building is like two six-family walkups next to each other. Porthole art glass windows are to the outside of the stair halls, and above each entrance the wall is a vertical expanse of glass block lighting the stairs. Windows are the original 2/2 (horizontal pane) wood sashes, which wrap the corners. Round windows (without art glass) line the basement wall. Brick is the only visible material at the foundation. At the rear porch/stairs, copper gutters are intact.

Additions/Alterations:  

Aluminum coping. The two front doors appear to be later (midcentury) than the rest of the building.

2X: Description/History:
This front gabled building has a speckled tan brick façade. The four front doors (all original) are grouped at the center of the full-width limestone front porch. The center bays of the porch (over the doors) is roofed, with a flat roof that doubles as a balcony. Balcony doors and two art glass windows next to them are also original. Soldier brick forms labels and label courses. The windows at the outer bays are 3-part windows with a center double-hung set with a 10-light casement to either side. At the second story the center windows are original 6/1s.

Additions/Alterations:
6/1 windows replaced by new 1/1s at first floor; wrapped porch soffits and trim.

2O. Structural system: LB Load-bearing Brick 

2P. Wall material: 30 BRICK

Contributing to potential historic district?  □ Yes  □ No  

2X: Description/History:  
The façade and porch of this frame building are faced with variegated brick. The front porch is full width, set back under the main (side gabled) roof. Three brick piers at the porch are connected by arcaded walls. A low shed dormer faces the street. The side elevations and dormer are faced with asphalt shingles imitating brick.  

Additions/Alterations:  
The front door is a replacement, as are the façade windows. Not original wood trim visible.  

2O. Structural system:  WU Wood undetermined  
2P. Wall material:  30 BRICK  
     63 ASPHALT

**Contributing to potential historic district?**  
☐ Yes  
☑ No

**Additions/Alterations:**

This front gabled house has a replacement concrete porch at the right side of the façade. There is a 1925 permit for this house but the bldg. does not match others from same permit.

Replacement porch has metal awning on two metal trellis-style supports. The façade's two 1/1 windows are not original. The front door is a replacement.

### Description/History:

This front gabled house has an almost full width gabled porch. Its base is cast stone and it has two square wood columns. Its wood soffit is intact, as are the two pair of 3/1 windows.

### Additions/Alterations:

Most of the window trim is obscured by siding and the transom over the door is covered. A metal awning is over the second story windows.

Contributing to potential historic district? Yes No

2X: Description/History:
This side-gabled bungalow has a full-width front porch on a cast stone base under a lower-pitched extension of the main roof. There is a small gabled dormer. 1/1 windows are historic.

Additions/Alterations:
According to permit records, this house was moved from 5718 Morgan Ford in 1925. (Oral history in the neighborhood supports this.) Wood trim is obscured under siding.
